"That distorted coverage hurt us," David Cooley said in his office at the chamber of commerce, and some members of the school board expressed the same view. Ken Keele thought it was a fine piece of reporting.

Memphis 15-15-15

The CAB organization in Memphis, like anti-busing groups in other parts of the country, has gotten its strength from the large numbers of white parents who, for a variety of reasons, are passionately opposed to making the adjustments and sacrifices that are demanded by any effort to achieve school integration. Just how large that number is would be impossible to say. CAB claims to have 5,000 dues-paying members; in a city population that includes about 400,000 whites, that is not a large number. But without a doubt, far more than 5,000 Memphians have at one time or another given financial or physical or at least verbal support to the CAB movement, and from the available evidence it would seem a safe guess that a clear majority of the city's whites are sympathetic with the basic objectives, if not the tactics, of CAB.

The whites in Memphis who oppose busing are not a monolithic group; not even those who are actively involved with CAB are completely united. Some are unabashed white racists, people whose lives are very nearly structured around, even defined by, their fear and hatred of black people. Some are poor people who see what little they can lay claim to threatened by the prospect of black competition on an equal footing--their homes, their jobs, the schools their children have always attended. Some are resentful of government intervention in their lives, of being told and shown what they already know to be true: that unlike people with money and power, they cannot have freedom of choice. Some are people who have worked hard to gain the trappings of middle-class society, and do not want to open the rites of passage into that society to others who are "different." Some are middle- and upper-class people by birth, by inheritance--people who share little except skin color in common with working-class and lower-class whites--and the social incest that has restricted and impoverished their understanding of black Americans renders them almost incapable of perceiving what the urge for equality is all about. And all of them, in and out of CAB, can fundamentally and fairly

be said to lack the conviction that in a city where 400,000 whites and 265,000 blacks coexist, one group cannot have peace or freedom or ultimately even survival unless the others have it too.

Inside CAB, the mixed motives and perceptions of individual people have at times produced conflicts that barely show above the surface. There have been internal disputes over tactics, with some people advocating physical acts of resistance to the orders of the court and others counseling less overt behavior, some favoring recruitment of blacks who disapprove of busing and others opposing it vehemently, some advocating pressure on vulnerable whites to participate in the movement and others resisting that approach. The schools CAB has opened have been almost literally organized overnight, and in that frantic process there have been bitter disputes between what could be called the educational and the political wings of CAB. One disgruntled CAB supporter, speaking anonymously after a particularly stormy and vitriolic encounter, summed up the internal splits like this:

"I have a philosophical commitment to freedom from big government. I'm against forced busing because it's not what the people want, and this is supposed to be a government of the people, by the people, and for the people. Education in this country was based on religion, and I want to see Bible-reading and prayer restored. I want to see discipline restored too. CAB has stressed the importance of all these things, and that's why I joined. But what is happening is that some people are trying to make political hay out of it, and some are trying to make money out of the schools. They talk about their religious convictions in public, but they get in these meetings and cuss a lot--one woman called the children we're trying to serve 'little bastards'--and they bring drinks to the meetings. There's a lot more than race to it. The so-called leaders are a sorry bunch. Some of them are so idealistic they can't face the facts--they're against busing more than

they're for education. This school system has been thrown together. They've been hiring people over the phone, without interviews or credentials or anything. That's just not right. A lot of good people are involved, but the hard-core people are the problem. Let's face it: There are always going citizens against busing, lower case, even if there's no more CAB, and the farther the public schools are pushed on forced busing, the more resistance there will be. But it won't help to have white racists and black racists churning up the waters. The kids are just pawns--nobody really cares about them. I think Keele is in it for the principle; I have no personal complaints against him. But too many of the others are really harming the children."

Ken Keele is indeed "in it for the principle." He estimates that he has devoted 30 hours a week or more to CAB in the past six or eight months, and his small food-brokerage business is suffering: "If I stop, it stops--and I've had to neglect it a lot." Working out of an office in an apartment complex in south Memphis, he stays busy seven days a week trying to hold things together. In the office on a comparatively quiet Saturday afternoon, he talked about what drives him:

"I'm an ultra conservative, I come from a conservative family. I think the federal government has gotten too blasted big. I've seen the trends of socialism and communism coming through the schools, and I finally got sick of what I was seeing. Judicial tyranny led me to this fight, and I'll sacrifice whatever is necessary to win it. I've got three children--that's why I'm in it. Too many people are not willing to stand up and be counted. We're going to see the destruction of public education unless the federal judges stop this insanity.

"I started this movement in Memphis. Violence is the worst thing that could happen here. It's no answer. We tried boycotts, but they failed because they didn't give people any alternative. The law says children have to

go to school. But the law also says in Tennessee that anybody can start a private school on a temporary basis as long as they meet the requirements of the safety and fire codes. So that's what we're doing, and we'll work on through toward accreditation. We're in it to stay, as long as we can't have neighborhood schools.

"We started the private school movement two weeks before busing. Some people took a brief look and said it couldn't be done, but we were determined, and foolish enough to go ahead, and within two weeks we had 27 schools open, and over 5,000 children in class. Human resources and determination can do what needs to be done--and the quality of our schools is second to none. Our teachers are certified. I can show you an order for $40,000 worth of new textbooks--the same books they use in the public schools. We've got everything but a chemistry lab, and we're going to get that. Of course, we hope ultimately to get back into the public schools. We'll get a Constitutional amendment outlawing busing, and we'll be back in eventually.

"We pay our teachers $20 a day, and we charge $25 a month for one child, and slightly less for each additional child from the same family. If parents can't afford the cost, we have scholarships provided by donations from businesses and by various money-making projects."

Keele expressed some resentment against the efforts of some churches to open private schools that are too costly for working-class people: "That new Southern Baptist system is going to cost a lot--$1,000 just to join, and tuition above that. Harding Academy, which is operated by the Church of Christ--my church--is the most costly private school in Memphis. I personally resent my church making education too costly for its members."

How much does race have to do with his feelings and actions? "I have no hangups on black people," Keele said, "if they're Christian, and believe as I do in individual rights, in discipline, in keeping up their property and so forth.

And they should expect the same of me. As long as they believe in God and country, and abide by the Bible, that's fine with me. My children were in integrated schools, they were exposed to blacks. We have two black children in our schools, and four black teachers on the payroll. Many people fail to realize one fact: Choice is what only the wealthy have, while we're told we must do this, and we have no right of appeal. I'll defy until I'm six feet under, a federal judge telling me I must mix, I can't live where I want to. If the public schools would stop turning out illiterates and stop this Communist intrusion, a lot of people would go back. No, it's not a racial thing, not with me anyway."

As a Christian anti-Communist and a devotee of neighborhood schools, Keele can take both comfort and alarm from the government and religious leaders to whom he pledges allegiance. President Nixon is building bridges to the Communist world and promising to rebuild the bridges and dikes and cities of North Vietnam--and he is also promising the return of neighborhood schools, and government aid to private schools in the bargain. Many churches seem willing to get into the private school business--even as the Catholic Church appears to be trying to get out--but as often as not, they are pricing what Keele calls "just average people" out of the market, leaving the masses of whites to remain with most blacks and other minorities in the public schools. What the people in CAB are left with is their own limited resources--and the empty promises of political and religious leaders who may share their attitudes and beliefs, but not their powerlessness or their poverty. It is not so much the true believers in CAB who threaten public education in Memphis as it is the thousands of whites who want to retain, without sharing, the advantages American society has given them--and who have the money to do it. As Keele himself said, "Choice is what only the wealthy have."

Memphis 20-20-20

In the brief hiatus that followed the hectic weeks of December and January, the people of Memphis had an opportunity to reflect on what had happened. The school board faced an early March deadline for submitting to Judge McRae their proposals for completing the job of desegregation they had begun under Plan A. More busing would clearly be required, for 115 of the city's schools had been untouched by the first phase of change, and most of them remained segregated. The board's staff had been working on several alternative plans, and members of the board appeared deeply and perhaps irreconcilably divided. The black community in general was accepting desegregation and busing cooperatively and seemed ready for complete reassignment to take place. Whites, on the other hand, appeared to gravitate toward one of three alternatives: Many were fleeing to private schools; another group, much larger, seemed destined to remain in the public schools, if only because they lacked the money to move; and the rest were committed to public education and to integration, and expressed a determination to stay and make it work.

CAB continued without pause to develop alternatives to the public schools, and other private schools announced opening plans. East Park Baptist Church said it was leading in the formation of the Briarcliff Baptist School system, with 12 new elementary schools to open next fall and a high school to be added a year later. The elementary schools, a church spokesman said, will be located in Southern Baptist churches in the city, and an estimated 2,400 students will enroll in them. "This has been under study for two years," the spokesman said. "We're definitely not connected with the CAB schools--we're in no way trying to oppose desegregation. Our interest is in academic excellence, and we aim to be the best quality school in Memphis. The Catholics and the Church of Christ have quality schools, but the Baptists don't. Now we will."

Compelled by necessity to press on in preparation for September, the people involved in both the public schools and the private schools could not afford

to rest. In both camps, conflicting forces were at work--morality, the requirements of the law, racism, animosity, fear, idealism. Some still hoped for reconciliation; others were resigned to permanent division.

IMPACT, one step removed from the schools themselves, entered February in the unaccustomed atmosphere of a calm. "The problem we face now," said Bob Knott of IMPACT, "is holding together. For three months, we were in the midst of a continual crisis. Now that crisis has passed, and I wonder whether we can crank up again in preparation for September. We were together out of dedication and out of ignorance--we didn't know what would happen. Now we know more, we see the whole picture. Ignorance--the total absence of knowing how to proceed--was really an asset; we just went ahead. Now we'll be trying to follow the pattern we set, and I doubt if we can do it. You can't sell a similar car the same way twice--that's not selling, it's taking an order. The strategy will have to change. We did a job, and now that's over, and there's another job to do. This time it'll be a lot harder. But I'd do it again--and in every city, somebody better be doing it."

Mac Holladay, the chamber staff member who held the pieces of IMPACT together, faces the prospect of reorganizing for the second phase. Whether the chamber will devote as much time and energy to desegregation a second time will depend on who replaces David Cooley in the top job, and the people who knew Cooley best say he will be difficult to replace. Cooley, more than any other single person, is mentioned as the man who brought the Memphis business community together for the desegregation fight. "He's done three things here that he can be proud of," said Herald Latham, the chamber's public relations consultant. "The bridge between blacks and whites has been built over his back; he has made the active leadership of this community aware of the interrelatedness of problems; and he's made this community aware of itself. 'When are we gonna get off the nigger problem?' some businessmen used to ask, and Cooley's answer

was, 'What you call the nigger problem is the basis of all the other problems.' I think a lot of people learned that lesson, and Cooley's departure won't erase that. I'm optimistic."

Latham, Holladay, Knott and others who were closely involved with IMPACT share a natural pride in its contribution, and there can be little doubt that the organization was instrumental, perhaps essential, in the peaceful implementation of Plan A. The CAB forces, in the hostility they showed to the effort, are a measure of proof that it was effective. IMPACT is also criticized, though, for being "do-gooders for the moment, without any long-term commitment," and for "backing into involvement apologetically." Richard Fields, a staff member of the Legal Defense Fund, said of IMPACT, "I keep getting the feeling they aren't really talking about integration. It's like they're saying, 'We don't like busing either, but we want to obey the law.' They did a good job of publicity and public relations, and maybe they just felt they couldn't take the community with them if they hit any harder. They were really established because the chamber of commerce felt it couldn't do the job themselves. But the chamber should have just come out in the open. They got blamed anyway, so what difference did it make?"

The Rev. James Lawson, a United Methodist Church minister, has been in the midst of racial issues in Memphis for the past 10 years. "The black community has brought the white business community into a number of issues over the years," he said. "Even in the late 1950s they were confronted, and in the past decade the power structure has been faced time and time again. IMPACT may suggest that they are now taking some initiatives instead of simply reacting, but I'm somewhat skeptical. Had the chamber not played such a low-key, background role, had IMPACT been made up of visible community leaders instead of relatively unknown people, had they spoken directly to the need for justice and equity, I would feel differently. But I will say that Dave Cooley has been a good ally. He has

brought the chamber a long way in its understanding of the need for change. He never let up, he worked persistently with his board, and he was able to question some of their myths and fears."

Lawson expressed some optimism about changes he has seen in Memphis in the past five years--and tempered it with some criticism. "Since 1968 there has been a fairly sizeable explosion of concern among individuals and social service organizations of various kinds. A lot of people have gotten involved as volunteers, and the employment picture has improved. Still, it hasn't affected institutional change very much. We've got a foundation to build on, but one of the biggest drawbacks is political leadership. We are far better as a people than our politics or our politicians. The police situation is better, the press is better, Memphis State University has begun to make a contribution, but the University of Tennessee, which has more power, has been less help. The board of education is still unprepared to give leadership to the community. We've still got a long way to go."

Just how far Memphis had to go before its educational crisis would be over could be seen as the school board wrestled in the early days of March with its desegregation plans for the fall. In the offices of the Legal Defense Fund, attorney William Caldwell reviewed the latest efforts of the board to prepare a plan for September. "Nothing they've come up with yet is satisfactory by a long shot," he said. "The board's approach has been to pacify the whites in Memphis, to placate their fears. I don't think it's as bad as they make it seem. They can't adopt a plan that's less than the Constitution requires just to assuage whites. We could desegregate every school in the system without busing any child more than 50 minutes, and Tennessee law allows a maximum of one and a half hours. And, it could be done for no more than 3 per cent of the school budget. The state average for transportation costs is 4 per cent."

Caldwell is optimistic that Judge McRae will require a complete desegregation plan, and in any event, he feels the LDF "is on strong ground at the appeal level." He is sanguine, too, about the long-term prospects for school integration in Memphis: "Eventually, things will stabilize. By the end of next year, a lot of whites will be back. The alternatives won't survive for any except the wealthiest few, so it should shake down to about a 60 per cent black system, and it could even become majority-white again. We don't have the problems of the worst Northern cities. This isn't St. Louis or Chicago or Detroit--we don't have problems as serious as theirs yet. Even if our schools end up 75 per cent black, it can still be a good school system. Some things are happening here to offer some hope. The business community and the media seem to be on the right track, and the police under Hubbard are a very positive sign. He's what we've needed for a long time. But the politicians are still obstructionist, and that's our biggest liability."

At the Board of Education, the addition of three black board members and some staff changes at the top in the past two years have changed things--and so has the exhaustion of all legal options in the fight against desegregation. "The battle went all the way to the Supreme Court, and every possible avenue has been used," said Shelby Counce, the deputy superintendent. "Now some of us want to go ahead and do the job. I do, the superintendent does, some members of the board do, most of the staff does. Our top priorities have to be a unitary system and the elimination of all racism. We've got some principals who aren't worth a damn--blacks and whites both--and I worry sometimes that the entire education profession may not be capable of meeting this challenge, but we've got a lot of good people too, and we've got one of the best race relations staffs in the country, working hard to change attitudes and to prepare our faculty and administrative personnel for the job ahead. We're going to have stability eventually--not this year or next, but soon after. It could be a 70 per cent black system when it stabilizes,

but if we can get out of the legal hassles, out of this fishbowl, with all the unrest and confusion, things will settle down. If we can get a unitary system, then we can get on with the pursuit of quality education."

Memphis desegregated its teaching staffs two years ago, and every school has close to a 60 per cent white-40 per cent black faculty. Among the 11 people at the assistant superintendent level or above, there are three blacks.

The school board includes three blacks and four women. The three blacks--George H. Brown Jr., Carl Johnson and Mrs. Maxine Smith, executive secretary of the local NAACP chapter--have consistently advocated maximum desegregation. Three whites--Neal Small, William Ray Ingram and Mrs. Juanita Watkins--have just as consistently fought for relief from the courts and as little desegregation as possible. The other three whites--Mrs. Frances Coe, Mrs. Barbara Sonnenburg and the president, Hunter Lane Jr.--have tended to be swing voters, siding from time to time with one faction or the other.

While it was getting prepared to implement Plan A, the school board and its staff were also deeply immersed in the design of the second phase of desegregation--a plan for total elimination of the dual school system, which had to be presented to Judge McRae by March 5. A staff committee had been at work on alternative proposals since December, and the board had been meeting frequently to review and revise the committee's efforts.

Half an hour before a scheduled board meeting on March 1, Superintendent John P. Freeman was on the phone. "It's gonna be a lean, hard, mean year, son, so you better get your fighting britches on," he said, and then hung up. He lit up a long, thin cigar and leaned back, looking out the window.

A month earlier, Jerry Robbins and Barney DuBois of the Memphis Press-Scimitar had written a story about Freeman in which they quoted him as saying he hoped "the next desegregation plan we develop will be the last." In that

interview he talked of being able "to get back to the business of educating children," of establishing "a program that everyone . . . can depend on," of getting into "a period of tranquility, where all races understand we are doing the best we can." Earlier, Freeman had called busing "regressive," and said he favored the neighborhood school system. But when the legal action had come to a climax, he had said, "We have a court order. It is not important whether we as individuals agree or disagree with it. We have to get on with the business of complying."

In his office, Freeman seemed pensive and preoccupied. At 54, he has spent 30 years in the Memphis school system and less than two years as its superintendent, and the strains of the job showed in his face. What had convinced him, he was asked, that Memphis had to turn from obstruction to positive pursuit of a fully desegregated school system? "If I peeled it all away," he said after a pause, "it comes to this: If this country is going to survive, it's going to survive in the cities. We have to do it. Segregation won't work. The two cultures have got to live side by each, with a broader overlap than in the past. I don't know when I came to that realization. I can't answer that. My children are part of the answer--they've reshaped me, redirected me in some measure. If the cities fail to solve the complexities of crime and all the other problems, we won't make it. It's going to be resolved in the cities--and in my opinion, pretty quickly."

Freeman also talked about other institutions in the society besides schools. "The churches have failed," he said. "With notable exceptions, they are not a viable institution in this community. They will send missionaries to Africa, but people are starving here. I shouldn't be too harsh, but in the main it's true. The typical pattern is to preach Christ, and pay your $25 a month, and do nothing. (Freeman, like Keele, is a member of the Church of Christ.)

"Without positive, active, daily political leadership, our job is so

much harder. The politicians speak in platitudes. They make promises, they do what is expedient, and then they go back to Washington or wherever. And the colleges--I don't think they've come to grips with it yet. Our younger teachers on the whole may be more humanistic, more flexible, more qualified than our older ones--but if so, I suspect it's more a result of their generation than their college training. Our professional staff overall is outstanding in its preparation and experience--personally, individually, whether they're competent and prepared to deal effectively with different cultures and different levels of achievement is harder to say. It's hard to get prejudice and insecurity out of people, in spite of some excellent in-service training in human relations.

"The schools are being asked to undertake fundamental social change, and the rest of society seems unwilling to make as much of an effort. We're struggling to get stability in the schools, but if we're left with only poor whites and poor blacks, it'll be a disaster. We could be 70 per cent black next fall."

If all that makes Freeman want to throw in the towel, he doesn't show it. He looks tired, but he also looks tough--and determined. "Are we going to win?" he says, repeating a question. "Hell yes. We have to."

In the board room, sandwiches and coffee had been brought in. When the meeting began at 5 p.m., the black board members were absent. Two of them had angrily walked out of a board meeting the previous evening, after a delicately constructed majority coalition had come apart and a desegregation plan for the city's high schools had been rejected. The plan--called Plan I--would have desegregated all junior and senior high schools. After the blacks had gone, the others voted five to one, with Frances Coe dissenting, for Plan II, which would leave four junior highs and two high schools all-black. Barbara Sonnenburg and Hunter Lane had been part of the shaky coalition in favor of Plan I; when they switched to opposition, its defeat was assured, and at that point, George Brown and Maxine Smith walked

out. Carl Johnson was absent. Then the board came back for its second meeting, to consider further desegregation changes needed at the elementary level to complete the job that had begun in January.

"Are we being boycotted?" Neal Small asked, smiling faintly. Nobody seemed to know for sure. The meeting began with O. Z. Stephens, the director of research and planning and a member of the staff team, explaining in front of a large map one of their proposals for the elementary schools. The outline of the school system on the map resembled a horse's head in profile, with the Mississippi River as its mane. Stephens proceeded expertly through a bewildering succession of numbers, percentages, racial ratios, grade organizations, school capacities, bus routes. The plan would make all desegregated elementary schools at least 30 per cent white, but leave 18 all-black. (Overall, the Memphis elementary school enrollment is 65 per cent black.) The strategy, apparently, was to have as high a percentage of whites as possible in every desegregated school, even if it meant leaving some schools segregated.

Problems kept popping up around the room: The physical plant is out of date, and it was built for segregation. The worst schools are in the inner city. Whites won't go to those schools. Do you concentrate physically handicapped kids, or disperse them? (And how about slow learners, or discipline problems, or the gifted, or the educable mentally retarded, or pregnant girls?) What should be the maximum time permitted for a one-way bus ride? The City Council has to approve the budget--including the money to contract for bus services--and we'll never get it out of them. The CAB is seeking a referendum to allow voters to repeal the one-and-a-half-cent sales tax for schools (it produces over $10 million a year). Every school should be desegregated. No, a 50-50 split should be our objective, even though that will mean several schools will stay all-black.

The hours dragged on. Too many cigarettes, too much coffee. The room

had a stale, smoky odor. Eyes were red and baggy, tempers were short. It would be impossible to calculate the number of man-hours the board and staff have put in on the desegregation issue since Judge McRae's April ruling.

No vote was taken on the elementary school plan. Discussion turned to Plan II, the secondary school scheme approved with so much rancor the night before. Some modifications were proposed, and the seemingly endless process continued. At one point, Small said to Freeman, "Did you speak to these plans last night?"

"I didn't have an opportunity to," Freeman replied.

"Would you now?" Small asked him.

"Sure." Freeman was hunched over the table, cigar between his teeth, looking over his horn-rimmed half-glasses at Small. "Plan II, this plan, has disadvantages compared to Plan I," he said.

Mrs. Coe said the court would never buy Plan II because it left too much segregation. Small said, "Look at Atlanta--the plaintiffs down there are now saying, 'Let us have some black administrators, and we'll let you have some segregation.' Atlanta is a prime example of what happens when you try to flip-flop a system." Ingram said, "You can't have integration without both races. If you keep on doing things to drive whites out, you'll make integration impossible."

Charles Patterson, director of race relations and a member of the planning team, suggested that the guiding principle should be to show equity and consistency. "That will convince the court of our sincerity," he said--and the unspoken implication was that Plan II lacked either equity or consistency.

Finally, votes were taken on four alterations in Plan II, but the plan itself was not reconsidered, and it stood as the official choice of the board.

Yet another meeting was scheduled for Sunday afternoon, when the board would take a final vote on a total elementary and secondary plan for submission to the court the following day.

By then it was 10 o'clock, and the five-hour marathon mercifully came to a close. On the way out, Ingram was asked if he would vote for any plan calling for more desegregation, in light of his opposition throughout. "I haven't decided," he said. "I'm not worried about my constituents. Most of them are not affected anyway."

Frances Coe has been on the school board longer than any other member, and is the most liberal of the white members. The longer the Memphis case has dragged on, the more she has advocated two points of view: that the system must strive for maximum desegregation within reasonable bounds of practicality, and that it must get out of court and get on with its primary responsibilities. Plan I was sometimes called the Coe Plan because of her contributions to it. "I expect the three segregationists can carry Plan II if they vote," she said. "But I doubt if they'll support it. I think they'll abstain."

At her home in a quiet and attractive neighborhood two mornings later, Maxine Smith made no bones about the fact that she was "tired, worn out, angry, disgusted." She talked about the efforts that had been made to reach a compromise around the Coe Plan, about how at one point every board member except Ingram had agreed to support it. "Then Sonnenburg came in with Plan II, and the whole thing came apart. My disgust is not with the racists--it's with Sonnenburg and Lane. What got me was not the breakdown of the coalition, the defeat of Plan I--it was the trickery, the hypocrisy. I'm not an unyielding person, I'm willing to compromise--but I don't have the right to compromise on Constitutional principles."

Mrs. Smith is an upper-middle-class black woman who has been fighting civil rights battles in Memphis since 1957, and she is not given to timidity.

"I am an integrationist," she said, "because I believe it is the only way for black people to survive in this society." (The day before, another black leader had expressed the same view: "If they will be honest with you, blacks here generally will say that there's nothing magic in putting black and white children in the same classrooms. But they will also say that the white man puts his heart where his children are, and the goodies will be delivered where whites attend school in numbers, and the only way blacks will get their fair share of those goodies is to be in those schools.")

Her election to the board in a 60 per cent white district--over the opposition of three anti-busing candidates, two of them black--is an indication of Mrs. Smith's persuasiveness and strength as an outspoken advocate of integration. She is pro-black, but she is not anti-white; she speaks highly of John Freeman, David Cooley and some other white leaders in Memphis, and she is equally as forthright in her criticism of the city's political leadership. But the school controversy has left her bitter. "There is so much inconsistency, so much dishonesty," she said. "The whites are afraid of majority-black schools. They can stand a little bit of black, but only a little."

When the board met again on Sunday, the blacks showed up, but no agreement could be reached, and the next day their attorney asked Judge McRae for a one-week postponement. The judge agreed, setting March 12 as the final deadline for submission of the plan.

On March 9, the board came at last to its time of decision. Neal Small presented a resolution calling for the board to submit all the plans still under consideration--Plans I and II, and three different elementary school plans--to the court without any recommendation. "We were specifically instructed by the judge to come up with a plan," Mrs. Coe said. The resolution was defeated six to three--the three being Small, Ingram and Mrs. Watkins. Then Mrs. Coe moved for

adoption of Plan II. "I knew it didn't have majority support," she said later, and I voted against it myself. I just wanted to get it out of the way so we could adopt Plan I." The vote on Plan II showed Lane and Mrs. Sonnenburg for, Mrs. Coe and the three blacks against, and the other three abstaining.

Then Mrs. Coe moved for adoption of Plan I, confident that it would pass with six votes. But Mrs. Sonnenburg voted with Small, Ingram and Mrs. Watkins against it, and Lane, whose vote would have broken a four-four tie, abstained. "I felt like I had been hit over the head with a sledge hammer," Mrs. Coe recalled later, "and so did John Freeman. Hunter and Bobbie had promised us they would support Plan I if Plan II was voted down."

A recess was called, and when the board came back to try to break the tie, Small reintroduced his resolution calling for all plans to be submitted to the court, and he added an amendment: that the judge be told that Plan II and an elementary plan Mrs. Sonnenburg had devised were "the least disruptive and the least expensive." The motion passed by five to four, with Lane breaking the tie and the three black members and Mrs. Coe in the minority. The next day, the entire package of plans and the Small resolution were presented to the court. The Legal Defense Fund will be given time to answer the board's presentation, and hearings will be scheduled by Judge McRae, after which he will issue his ruling. And in September, some degree of further desegregation will proceed.

* * *

In all of the intricate and convoluted maneuverings that have gone on in public and behind the scenes in Memphis since last April, there has been enough emotion to elate and depress and exhaust everybody. That no overt physical violence has occurred in that stormy period can only be seen as a hopeful indication that this city, however divided it is, has had its fill of violence. At this point in its history, Memphis undoubtedly has more visible and influential citizens, black

and white, who are openly committed to community-wide equity than it has ever had before. In many measurable and specific ways, it has made encouraging progress out of its segregated past.

But the legacy of that past still lingers, and it too is measurable and specific. It can be seen in the actions, if not the words, of many thousands of whites who long for the past to reappear. It can be seen in the conditions that thousands of blacks still live under--the poverty of mind and body, the anger and anguish of rejection, the paucity of marketable skills. It can be seen in the failure of institutions--economic, political, educational, religious institutions--to eliminate from their bodies the cancer of white supremacy.

It is hard to be sanguine about the prospects for stability and equity in the public schools. The masses of black citizens apparently are still committed to those goals, in spite of years of frustration and disappointment. But the masses of whites are not, and those who could contribute so much to the realization of the goals--the middle and upper classes--are the very ones who have fled from responsibility first, leaving their fellow whites who have less economic independence to work out the complexities of desegregation as best they can.

Always, the tantalizing prospect of salvation, of escape, lies just beyond the grasp of the whites who are imprisoned by their fear of the black man. President Nixon will rescue us, they say, or Senator Brock, or Mayor Chandler. Our church will give us sanctuary. The suburbs will be safe. God will save us. But crime and drugs and ignorance are everywhere. No city anywhere can hope to segregate blacks from whites, the rich from the poor, the erudite from the ignorant, the young from the old, the skilled from the unskilled, the criminal from the law-abiding, the cruel from the compassionate. We will hang together, or we will hang separately.

Memphis 34-34-34

The Memphis public schools have no choice but to take the children who cannot or will not flee and do everything humanly possible to educate them. It will take a heroic effort by all concerned. If it fails, Memphis will then be forced to face a crisis of stupefying proportions. If it succeeds, the city will join a small circle of urban metropolises that has chosen integration as an antidote to catastrophe.

FUNDS TO ALL COLLEGES UNCHANGED

Black College Share of U.S. Aid Soars

WASHINGTON (U P I) — Federal aid to predominately black colleges and students has increased 58 per cent since 1969 while aid to all colleges virtually remained unchanged, a government report said Saturday.

The increasing black college share of the federal education dollar took place primarily in direct student aid and construction money. Scientific research funds increased slightly but remained a minor part of the budgets of black colleges.

The 115 black colleges surveyed last year enrolled 208,000 or 2.4 per cent of all college students and received $171 million or 4.4 per cent of all federal aid to colleges, the Federal Interagency Committee on Education (FICE) said in its third annual report on aid to black colleges.

Leading recipients of federal funds from 19 agencies last year were Meharry Medical College, Nashville, Tenn., $16.1 million; Howard University, District of Columbia, $15.1 million; Tuskegee Institute, Tuskegee, Ala., $5.4 million; Southern University, Baton Rouge, La., $4 million; Federal City College, District of Columbia, $3.8 million; Wilberforce University, Wilberforce, Ohio, $3.5 million; Prairie View A & M College, Prairie View, Tex., $3.4 million; North Carolina A&T State University, Greensboro, $2.9 million; Fisk University, Nashville, $2.9 million, and Florida A&M University, Tallahassee, $2.8 million.

The report said that financial aid to students attending black colleges increased from $56.5 million in 1970 to $73.3 million last year; construction funds from $11 million to $19.5 million, and research and development money from $5.1 million to $9 million.

In 1971, black colleges received 0.6 per cent of federal scientific research aid to colleges, compared to 0.3 per cent the previous year. Officials said that black colleges are primarily undergraduate schools and that few have the laboratories, specialized facilities and research workers to compete for federal science funds.

The bulk of 1971 aid to black colleges, 44 per cent, went for student aid. Another 24 per cent covered operating expenses and 15 per cent went for the training of professional workers. The rest was for building expenses and research.

On the other hand, research and development accounts for over 40 per cent of federal aid to all colleges.

U. S. Education Commissioner Sidney P. Marland Jr. said in a statement that the overall increase in federal aid to black colleges, from $108 million in 1969 to $170 million last year "is the result of a concerted effort on the part of this administration to demonstrate with money as well as rhetoric its concern for the future of some of our nation's most valuable resources."

APPEAL TO YOUTHS, MILLIKEN SAYS

Miami Beach, Fla. — Michigan Gov. William G. Milliken called on Republicans to "open our party to participation by young people, by blacks, by the poor, and by women. We will win in November, but winning alone is not enough," Milliken told the GOP National Convention's Platform Committee. "Mere survival through the election of 1972 will not be all that is needed to guarantee a strong and greater Republican party in the years ahead."

Agribusiness State's Largest

By SALLYE SALTER
Constitution Business Writer

Georgia shoppers may take for granted the availability of food, but its production, processing, distribution, and marketing requires the employment of at least 316,200 people — or 16 per cent of the state's workforce.

A recent study of the economic influence of Georgia's food industry also said that agribusiness, with an annual volume of $5 billion, is the state's largest industry.

The study was published in the current issue of the Atlanta Economic Review.

Although using data which "are minimums for the food industry and its impact on the Georgia economy," James E. Morrow and James R. Miller of the Bureau of Business and Economic Research at Georgia State University said the state is in "a position of leadership" in the food field.

Nationally, food is one of the nation's four largest industries, and its vast market is reflected by the writers in the U.S. Department of Labor 1970 figures which show an urban family of four on an intermediate budget spends 23 per cent of its income on food.

Georgia is the top state in the nation in the production of broilers and peanuts and second in commercial egg production.

"Georgia products and Georgia brands are distributed nationally," the report said. "Georgia-based food distributors cover wide regions of the South, East and Midwest. Many national food and related firms have major operations located in Georgia."

Of the state's $2 billion in cash farm receipts in 1970 livestock and livestock products accounted for 56.5 per cent or $710 million; crops for 36.9 per cent or $463 million; and governemnt payments for 6.6 per cent or $84 million.

Commercial broilers produced 15.4 per cent of the cash receipts and commercial eggs, 15.3 per cent.

Georgia farmers derive $500 million income from broilers, $170 million from peanuts, $117 million from beef, and $100 million from tobacco.

Citing Census Bureau figures showing 56 per cent of the state's farms accounted for 97 per cent of the total 1969 farm cash receipts, the writers estimated that in 1970, 42,000 Georgia farms accounted for $1.2 billion in cash receipts — an average of $29,052 per farm.

TWO BLACKS WERE KILLED as police tried to retake a college building.

It wasn't immediately known how the two died during the 10-minute battle for the administration building at Southern University, Baton Rouge. The students had been ordered to leave the building when, police said, a tear-gas grenade was fired from a crowd in front of the building. Other students started throwing missiles, and police responded with tear gas. "Nobody shot one round," Sheriff Al Amiss told Gov. Edwin Edwards. "We didn't use anything but tear gas." Later, Amiss told reporters deputies had heard pistol shots from the crowd and added: "It looked like" the two victims "were trampled. Their faces were all swollen."

Students at the mostly black school had boycotted classes for two weeks at its Baton Rouge and New Orleans campuses. They demanded ouster of the president, more student power, and better food and housing.

Muskie urged Jean Westwood to resign as Democratic national chairwoman. "We need a chairman who isn't identified with the divisions that have plagued us," the Maine Senator said. Mrs. Westwood again said she would fight to keep her job.

REVIEW *and* OUTLOOK

W-S-J 11/24/72

'Advocacy Scholarship'

Those who admire Ralph Nader might find it tempting to dismiss his critics (some of whom are quoted alongside today) as economic cranks or the agents of special interests. His public following seems to feel, with some justification, that, if he has made occasional errors of fact or interpretation, he also has brought to light a good deal of valuable information, and in any case, his victims were long overdue for a drubbing.

But a few of Mr. Nader's younger associates, having received this public indulgence, now seem to be attempting to claim it as a matter of principle. This tendency first appeared in the summer of 1971 when a critical review in The New Republic attacked the Nader Study Group report on antitrust enforcement.

"Scholarship it is not," wrote the reviewer, Professor Richard A. Posner, "if by scholarship one means an honest and rigorous search for truth rather than merely a parade of learning."

To which the author of the report, Mark J. Green, has since replied, in effect, that his aim is not scholarship but "advocacy scholarship." As spokesmen for a clearly defined point of view, righteously pursued in the public interest, Mr. Green and some of his fellow authors insist that they have no obligation to give full scholarly consideration to the counter-arguments of their critics. Their only obligation, they appear to contend, is for the accuracy and documentation of the side they choose to present.

Advocacy in its own right has an important place in American law and politics, and the Naderites have played an honorable role in this function. But a dangerous confusion results when the advocate presents his arguments as the product of unbiased scholarship, or the scholar subordinates his research to the demands of partisan advocacy. This confusion has affected some scholars of considerably greater age and distinction than the Naderites.

One expects a true scholar to adhere to a dispassionate standard of judgment, balancing arguments and evidence, avoiding ad hominem attacks or insinuations about a critic's motives. It is because of a presumed devotion to this code that academic figures receive a respectful hearing in the debate of public issues. Notions like "advocacy scholarship" threaten to hasten the already advanced erosion of this standard.

Professor Karl Brunner of the University of Rochester recently observed that the need for intellectual responsibility is especially great in the discussion of public policy, "because the cost of bad policy is very high." Since the Naderites are having some influence on public policy these days, we suggest they would do more for the public good if they abandoned the misleading slogan of "advocacy scholarship" and adhered instead to the traditional spirit of objective research.

Resumption of Classes SUNO Officials' Hope

But Students Promise to Continue Boycott

By CLARENCE DOUCET

Officials at Southern University in New Orleans will try again Tuesday to resume classes after a day of meetings Monday with students who vowed to continue the boycott.

In Baton Rouge, meanwhile, Gov. Edwin Edwards said police would be tried if it is determined they deliberately shot two black Southern University students who were killed in front of that school's administration building Nov. 16.

Edwards, appearing before an unofficial board of inquiry formed by blacks to look into the shooting, answered "absolutely" when asked if police would be prosecuted if an investigation reveals they deliberately shot the students.

"That's what it's all about," he said, "the FBI, the attorney general, perhaps this committee."

"But," he added, "I think you're going to find in the long run that this is just one of those things that happen when people flaunt authority."

Two hearings, one by the unofficial black group and the other by the group formed by Edwards, opened Monday in Baton Rouge where about 200 young blacks and whites marched from the predominantly white Louisiana State University to the steps of the State Capitol.

The governor told the group — and later, the black investigating committee — that student leaders must bear responsibility for the deaths because they defied the law.

"There's no justification, reason or excuse whatsoever for them to have stood there in front of the administration building defying the law," the governor told the black committee. "There was nothing in their grievances that was justification for them to ransack a building."

Earlier on the capitol steps, Edwards gave the student protestors this advice:

"Tell your brothers and sisters anything at all they're going to get they will get from me with logic and reason. I may not get another black vote when I'm through, but black people will be able to walk around with dignity."

Both Southern in Baton Rouge and SUNO have been closed since Nov. 16. Classes in New Orleans were to resume Monday.

Instead, a crowd of about 300 to 500 young blacks gathered outside a classroom to hear speeches and then broke up shortly before noon, apparently following the urging of speakers who called for them to boycott as long as necessary to get their demands.

One of the speakers, Earl Picard, president of the SUNO Student Government Association, said that, during similar student disturbances in 1969, the students "got the same promises from (former Gov. John J. McKeithen) we are now getting from Edwards."

Referring to regular classes, he said, "We can't consider going back to class until our problems are solved both in Baton Rouge and here."

Many students did return, though, for 1 p.m. departmental meetings, and meetings were still going on late in the afternoon between Dr. Asa Sims, dean of academic affairs, and students, in an effort to remove the proposed resumption of classes Tuesday.

Picard, who told students there is a concerted effort "to eliminate colleges like SUNO" and urged them to "quit worrying about graduating and worry about the university surviving," was one of three speakers to address the rally.

Another speaker, identified as Brother Sababu, said he was in Baton Rouge in the Nov. 16 incident and asserted that Edwards called in the police because "white folks had an image of him that he could not handle his niggers." He said the governor is naive in handling SUNO and SUBR separetely. "He doesn't realize we are one people."

There was a pushing-and-shoving incident during the rally involving newsphotographers trying to take pictures of the rally. The scuffle was between students and television crews plus Associated Press photographer Jack Thornell, whom the students apparently mistook for a policeman.

All the speakers echoed the theme that the SUNO boycott would continue until all student demands are met. They also called for unity.

The second panel to open its probe in Baton Rouge was the one headed by Atty. Gen. William Guste, appointed by Edwards to head the 12-man official board of inquiry, which includes six blacks, including students.

A witness at the private sessions was to include Dr. Hypolite Landry. East Baton Rouge Parish coroner. The panel was also to view films of the violence at the SUBR campus.

A witness before the black inquiry group, George W. Baker Jr., a SUBR professor who has been fired since the confrontation, said most of the students' grievances had been settled by the time the violence occurred.

Baker said the only point on which agreement could not be reached was whether Dr. G. Leon Netterville would resign as Southern's president.

Baker said Netterville told him he could not resign in good grace as the students wanted him to do.

"He also said his resigning would pull the rug from under certain people," Baker added. "He didn't identify them. We reached an impasse on it and that impasse was still present Nov. 16."

W-S-J * * *11/29/72

Southern University students had permission to occupy the Baton Rouge school's administration building shortly before police stormed it under cover of tear-gas, a student leader said. Nathaniel Howard told an all-black investigating committee that: "No doors were blocked. No one ever asked us to leave the building." Howard said the school's president, G. Leon Netterville, had given the students permission to stay in the building.

Black Panel Blames Officials For Shootings at Southern U.

Ed-Higher South

Wash Post 11.30.72

Associated Press

BATON ROUGE, La., Nov. 29—College administrators, police and state officials were entirely to blame for the Nov. 16 shooting deaths of two black students at Southern University, an unofficial panel of black investigators said in a preliminary report today.

D'army Bailey, a Berkeley, Calif., city councilman and chairman of panel, said committee members reached the conclusion that the students were killed by shotgun-wielding sheriff's deputies and unanimously agreed there was "more than adequate reason for criminal prosecution of those responsible for the deaths."

The committee's conslusions were read at a news conference by Bailey and did not cite specific testimony of witnesses interviewed. Bailey said a detailed report would be issued in two weeks.

The black panel's findings drem immediate criticism from Louisiana Gov. Edwin Edwards who termed it "as much blackwash as they accuse the state of a whitewash."

"It was my feeling that very few of the members of the panel had come to Louisiana with an open mind," said Edwards, who appeared before the black group Monday to answer their sometimes hostile questions.

An official investigating committee appointed by Edwards and headed by state Attorney General William Guste is looking into how and why students Denver A. Smith, 20, of New Roads, La., and Leonard Douglas Brown, 20, of Gilbert, La., died.

The unofficial committee was formed by blacks who said they didn't trust any official inquiry.

The state-appointed committee was in recess today, with hearings scheduled to resume Thursday.

The students died of buckshot wounds to the head during the police-student confrontation on the steps of the Southern University administration building. Law enforcement officials have said no live ammunition was fired by the officers, only tear gas cartridges. But Bailey said his committee was sure the deputies had fired buckshot.

Bailey said the committee also concluded:

- Students had not occupied the administration building, as university officials maintained, on the day of the confrontation.
- Prior to the violence, student protesters had made sincere efforts to negotiate their complaints, while university administrators "acted in bad faith."
- Police officers called to the campus by the all-black administration behaved in an undisciplined manner, used more force than necessary and precipitated the violence by firing the first tear gas.
- Edwards was "irresponsible in his public statements" about alleged acts of violence by students.

Guste's committee staff has interviewed more than 100 witnesses, and plans to question many more before drawing any conclusions, the attorney general said. The black committee met for two days and interviewed a dozen persons.

Edwards criticized the black committee for "attempting to portray this incident as something it was not, namely a black-white conflict." The governor has maintained the problem at Southern involved black students against black administrators, and that white politicians and law officers acted only as peacemakers and arbitrators.

Little Said Revealed In Official Investigation Of Library Explosive

Investigations begun after the discovery Wednesday night of a small explosive in the LSU Library have not determined the identity or purpose of the person who readied the device to explode, officials said Monday.

An LSU student spotted the device in a study cubicle of the second floor science section of the library and police bomb experts disarmed the explosive.

The explosive is described as a grenade simulator available only in the military. It was set to explode if a student pulled back a chair in the study cubicle.

There have been no other bombs or substnatial bomb threats reported on the campus since campus police evacuated the Chemistry building Friday afternoon after an unidentified person telephoned campus police that a bomb would explode in the building at 3 p.m.

Campus Police Chief Charles Anderson said of the original explosive incident, "No, unfortunately we haven't learned anything."

Chief Anderson said federal officials now have the explosive device and are examining it. Possession of the explosive and the placing of it in the library violates state and federal laws, Anderson said.

City Police Chief E. O. Bauer said Monday he will stand by his statement last week that the explosive was in some way connected with student disturbances at Southern University.

LSU is predominantly white and Southern is predominantly black. Classes were suspended at Southern last week after protesting students marched on the administration building demanding the removal of Southern President Dr. G. Leon Netterville.

Bauer refused to reveal any information to support his statement. Chief Bauer said intelligence agents of his department had information militants sympathetic to the Southern student protest probably planted the bomb to explode in the library.

But, Bauer said Monday his department is not investigating further, because the case is not theirs to investigate.

SECTION ONE—PAGE FOUR

'It Won't Work,' Senior Says of SUNO Warning

'Boycott More Important Than Graduation'

By BILL SHEARMAN

In response to a statement by the chairman of the State Board of Education that students fail to resume classes at Southern University in New Orleans on Jan. 3, the school may be converted to another use, a SUNO student spokesman said Sunday "quite simply, it won't work."

Keith Medley, a SUNO senior, said that the statement, Saturday by Enoch Nix of Bossier City was an effort to put "pressure on the students to break the boycott," and that the "harassment, threats and intimidation have not deterred students but solidified their resolve."

In his statement, made on the Dillard University campus, Nix said that "unless students return to class (on Jan. 3), we shall recommend to the governor and the legislature that a study begin immediately to determine a more effective utilization of the physical properties of the (SUNO) campus."

He added that "this action, of course, would be taken only in the last resort. If students refuse to avail themselves of the use of this university, it has no hope of maintaining its accreditation."

Nix also said that for seniors, graduation would be impossible at the end of this semester and that for underclassmen, because of the time involved, there would be no credit given for this fall's work.

Medley, himself a would-be graduating senior, said in response to Nix's comments, "this (boycott) is more important than graduation."

"The school has threatened to flunk students," said Medley in regard to the boycott, but he added, "The (SUNO) professors back the student demands for sure and will not resort to such tactics."

Continuing, Medley said, "The governor and the state board have attempted to deceive the people as to the real issues surrounding the boycott of SUNO."

"The boycott is not the issue—the issue is that the state board of education has never dealt with serving the needs of the Southern University system."

Medley said "the students are not asking for control of executive council made up of the school's student leaders, faculty members and advisors to discuss policy and changes affecting the school.

"The president (Leon Netterville) would have the right to veto or ratify anything the council suggests," said Medley, who added that the current student demands "have been endorsed by the entire SUNO family of students and faculty."

He said the SUNO Student Government Association "is powerless" to affect change on the campus and that "disruption of the educational process is the only way to get our demands noticed."

"We stand united, solid as granite," said Medley who added that the boycott "is on until the demands are implemented."

A meeting has been set for 7 p.m. Monday at St. Augustine High School, 2600 London Ave., for interested SUNO students, their parents and interested persons to discuss the current problems.

Medley added that Netterville and the entire administrative staff of SUNO has been invited.

Ballistics Data Sought in Two Deaths

Ed - Higher South

BATON ROUGE, La. (AP) — A special investigating committee, hopeful of finding the gun that killed two Southern University students in a campus clash here Nov. 16, hears a report Wednesday from its ballistics subcommittee.

The panel, headed by Atty. Gen. William Guste, already has determined the students, Denver A. Smith and Leonard Douglas Brown, died of wounds inflicted by "pellets from a shotgun."

Ouachita Parish Sheriff Bailey Grant and Sidney Cates, former assistant police commissioner in New Orleans, have been working with ballistics experts for several days in an effort to determine who fired the fatal shot or shots.

The 20-year-old black youths feel beside one another as sheriff's deputies and state police chased students from in front of Southern's administration building. The violence climaxed three weeks of campus turmoil.

BEGAN NOV. 27

The Guste Commission, which has been staging a closed-door, grand jury-style inquiry, was in recess Monday and Tuesday to allow the attorney general's staff to catch up on paperwork. The panel began its inquiry Nov. 27.

A spokesman for the attorney general said the commission would resume its investigation by viewing more films taken at the scene of the tragedy, hearing the report from Grant and Cates, who are members of the panel, and by listening to testimony from state police officials.

Col. Donald Thibodeaux, the superintendent of state police, is among the witnesses lined up for Wednesday's meeting.

Several unidentified students are scheduled to appear at the official inquiry Thursday, and East Baton Rouge Parish Sheriff Al Amiss will testify Friday, the spokesman said.

The commission reported Friday it had decided law enforcement officers tossed the tear gas canister that set off the wild melee.

As the committee prepared to resume its investigation, there were these other developments:

—The head of the NAACP in Louisiana, Emmett Douglas of Baton Rouge, said his group supports the demands of protesting Southern University students.

THE REAL ENEMY

Douglas earlier took issue with the demand that the university's president, Dr. G. Leon Netterville, be ousted.

He told newsmen Tuesday, "We support the students. The big problem was with the demand that Netterville step down. The NAACP's real concern is that we fight the real enemy—the all white state Board of Education."

—A spokesman for a Baton Rouge group known as Taxpayers Education Association said pickets would protest Wednesday the Guste Commission's "civilian review board" type inquiry.

—Netterville, in a prepared statement, pleaded for a "return to reason" when the university is reopened Jan. 3. The Baton Rouge campus has been closed since the turmoil.

"The future of the Southern University system is clouded at this time, in fact, its very existence as we know it today could be altered by the actions and reactions stemming from events of the past four weeks," he said.

He promised to attempt to meet student grievances and added: "Southern University will always honor its commitment of enhancing the future and upward mobility of poor and black people," but he said the university's commitment depends on a return to normalcy.

RE: Southern University, Baton Rouge, La.

DATE: 12-6-72

CC. E. Via, C. Esser

I received a call, 12-6-72, from Dr. Laura Hicks, a member of the counseling staff at Southern and professor of counseling education.

Dr. Hicks heard about some of the work of SDP and called to request our help. She feels there is a need to develop a program at Southern to train student leaders in communications skills (such as communications workshops held at both institutes and of the type Dr. Rachel DuBois does). She also feels this type program must be instituted at Southern immediately (with a small group of students, preferably, before school resumes). She asked for any help we could provide. I urged her to quickly develop the idea on paper and send it to me immediately. Her thoughts are that these type activities are needed in order that students not only at Southern, but other predominately Black colleges threatened by merger can be better equipped to state their case and not necessarily run the risk of another or more Southern, Baton Rouge type explosions.

I surmise that she is hoping to sharpen and provide skills in organizing and communications. She estimates a cost of near... (hold on) $10,000. Upon receipt of her letter, I will make specific recommendations.

SUNO BOYCOTT IS NEAR-TOTAL

Ed. Higher South

No Indication That It Will End Soon

12 8 72 T.P.

The near-total boycott of classes at Southern University in New Orleans entered its ninth day Thursday with no indication that it will end soon.

Students have vowed not to return to class until their demands are met, and Gov. Edwin W. Edwards, a central figure in the disagreement, has refused to meet with them while the boycott is on.

Among student demands is establishment of departmental and executive councils at the school.

The proposed councils would include students, faculty and administration members, but the students would be in the majority.

Earl Wright, SUNO director of public information, said Thursday morning that only 3 to 4 per cent of the school's 2,700 students were attending class.

Gov. Edwards, whom some blame for the deaths of two students on Southern's Baton Rouge campus Nov. 16, was invited to meet with a group of militants Wednesday.

The governor, in a telegram to Earl Picard, president of SUNO's Student Government Association, said he will not negotiate with students during a boycott.

"I do not believe the proper atmosphere exists for negotiation and, furthermore, could not enlist the kind of public support needed to implement changes," the message said.

It added: "The boycott has succeeded in dramatizing students' complaints and campus conditions which you seek to remedy. Other than that, it has brought interruption of educational benefits, hardening of positions, loss of public support and uncertainty of graduation dates for seniors."

The students are also at odds with the state Board of Education, which they describe as "insensitive" and interested only in "total control of the Southern system."

Picard said Wednesday an all-Negro board of governors for the Southern system should be established.

He said students had agreed to meet with the board last week, but that the group canceled the meeting at the last minute.

Wright said he knew of no meetings between students and SUNO administrators Thursday.

Eleven students were expelled from SUNO Tuesday for unauthorized use of the Science Lecture Hall. Wright said there have been no other expulsions.

BOARD'S SUPPORT TO NETTERVILLE

12-9-72 T.P.

But More Student Voice Asked at Southern

By TOM JORY

BATON ROUGE, La. (AP) —The Louisiana Board of Education gave Southern University President G. Leon Netterville another vote of confidence Friday, but suggested that the 65-year-old administrator give students more of a voice in the running of the school.

The board, in a telephone poll, approved a report prepared by a special seven-man committee set up Oct. 27 to examine the student grievances that led to three weeks of campus turmoil.

The committee began its work before the clash between students and police here Nov. 16 which left two young blacks dead and led to the closing, through the first of the year, of the school's Baton Rouge campus. The report did not touch on the violence.

The newly adopted policy statement shaped up as a possible breakthrough in the now months-long student-administration dispute at Southern.

STUDENTS MARCH

Students marched on the state Capitol in late October to demand Netterville's ouster and to seek more of a voice in the administration of the university.

One of the vehicles for increased participation in administrative affairs was the creation of departmental councils—suggested by students but up to now rejected by most officials as throwing the school to the dissidents.

The board's committee proposed among other things, that colleges and universities in the state establish departmental councils, composed of faculty members and elected student representatives, with advisory authority in educational matters.

As the committee was releasing its report, Atty. Gen. William guste's commission of inquiry, set up to investigate the violence, was winding up the second week of its examination.

A spokesman said no witnesses appeared Friday, and that the panel would return to work Tuesday or Wedneaday to hear student testimony.

TROUBLE TOLD

The attorney general report-

Cont. in Sec. 1, Page 5, Col. 5

NETTERVILLE BACKED BY BOARD

Continued from Page 1

edly has had trouble rounding up student witnesses.

In its six-page report, the committee headed by board member Jesse Bankston of Baton Rouge recommended:

—Netterville be retained as president of the nation's largest black university, at least through the "present unsettled conditions..."

—The Southern administration "expand its channels of communications to the point of including students at the departmental level."

—Special attention be given to Southern students with disadvantaged backgrounds, perhaps through "special developmental training which requires a high ratio of faculty to students."

—Some procedures be set up to provide for the periodic evaluation of teachers, with some weight given to student judgment.

—The board set up a policy for the future selection of presidents for all colleges in the state.

MORE OF A VOICE

—Faculty and staff members at Southern be given more of a voice 'in the development of the institution's programs, planning and budgeting cycle."

Some state officials and student leaders have suggested for weeks that all the student complaints, except one — that one against Netterville—were settled in advance of the confrontation.

The Baton Rouge campus was closed through the first of the year after Denver A. Smith and Leonard Douglas Brown were killed in the wild melee. Administrators have attempted, with little success, to keep Southern's smaller New Orleans branch open.

The committee's report said that while Netterville should be retained at the present time and be given full support in his efforts, something should be done about the future selection of college presidents.

It suggested the creation of a qualifications committee composed of faculty, staff, students and alumni, which would prepare recommendations for the board of education.

'SEARCH' PANEL

A "search" committee, representative of all segments of the university community, including the public, would then submit a list of candidates to the board.

The board has been criticized in the past for the way it chooses college presidents.

As a second major step in upgrading the university, the committee pointed to "a need for more intensive individual counseling and guidance" for the disadvantaged, and suggested that this might be accomplished by providing more money for the purpose.

The panel applauded Southern administrators for their efforts in establishing good communications with students and faculty, but said more must be done.

It called for the creation of the departmental councils, but added: "full and final responsibility for administering the institutions of higher learning shall rest with the president . . ."

The committee said student grievances regarding particular faculty members must be handled at the administrative level first.

MORE REPORTS

"Additional reports will be made as we continue to delineate the existing problems and to assure the maintenance and preservation of the academic excellence of Southern University."

The decision came three

All-Black Board Asked for Colleges

NEW ORLEANS (UPI) — A student leader at Southern University-New Orleans has called for the establishment of an all-black board of governors to administer the school's three-campus system.

Earl Picard said such a board should have powers similar to the Louisiana State University Board of Supervisors — administering the affairs of the southern campuses at Baton Rouge, New Orleans and Shreveport.

Louisiana Riot View Disputed

Atl. Const 12/11/72

By PAUL DELANEY

BATON ROUGE, La. (NYT) — Members of a biracial commission investigating the deaths of two Southern University students said Sunday they disputed the official version of the incident that occurred last month on the school's campus.

The commission, appointed by state Atty. Gen. William Guste, will hear the last few witnesses, mostly students, this week and make its report shortly thereafter. The report is then to be presented to a grand jury.

Commission members — six blacks and six whites, including two black students — met with Gov. Edwin W. Edwards Thursday night and informed him of their preliminary findings. Members said privately Sunday that their findings were critical of the roles of the state police and the East Baton Rouge Parish (County) sheriff's deputies. Some members also criticized certain of the governor's public statements since the incident occurred on Nov. 16.

According to sources close to the investigation, the commission has made the following findings:

—The authorities have just about pinpointed the spot from where the fatal shots were fired. Some members of the commission believe that it is now possible to identify the person or persons who fired the shots.

1. The two students, Leonard Douglas Brown and Denver A. Smith, both 20-year-old juniors, were killed by the same shotgun blast by the police. The authorities recovered 23 of the 29 buckshot pellets that killed the two. The police at first maintained that the shots were not from their weapons.

2. Some deputy sheriffs carried their own weapons, in addition to regulation firearms.

3. There was a mixup in orders and general confusion, especially among deputy sheriff's officers.

4. The sheriff's department has displayed a lack of professionalis. To date the department has not initiated an investigation of the incident.

At their meeting Thursday, the commission members told Gov. Edwards that he had been misled by the state police on what set off the shooting. Based on what the state troopers told him, the governor concluded, and was widely quoted as saying that the "precipitating incident" occurred when students threw a tear-gas canister at the police.

The students have denied that they had any weapons. The commission's findings were said to support their contention that the police first fired tear gas at them.

"The television films show and testimony has confirmed that a state police lieutenant tossed a defective teargas canister at the students," one commission source said Sunday.

"The canister had a delayed fuse on it and gave the students a chance to pick it up and toss it back at police," the source said.

"There was a mixup in orders and the lieutenant should not have thrown the canister. Films show that there was much confusion. The deputies didn't have on their tear-gas masks. The film showed that many of them didn't even know how to put them on.

"Another deputy is clearly shown resting the stock of his shotgun on the ground with the muzzle pointed in his stomach while he tried to put on his mask."

The incident occurred on the main campus here after students had conducted three straight weeks of demonstrations and boycotts of classes.

Better Schools A Must—Nix

Ath. Const. 12/12/72

ATHENS (AP) — State School Supt. Jack Nix said Monday that education is in financial trouble all over the country, and in order not to commit "educational suicide" schools must give the voter better results for his tax dollar.

Nix said the reasons for the financial dilemma of education vary. "But basically they can be summed up in the fact that public education — as it is perceived by the people who vote in bond elections — is no longer in the same category with mother, the flag and apple pie."

Nix spoke at the Center for Continuing Education at the University of Georgia.

"As the bill for public schools has gone up and up the voters have become more careful of their pocketbooks and more demanding of results for the money they spend," said Nix.

Citizens are becoming more inquisitive and skeptical of public schools and other institutions, he said.

"We can commit educational suicide by persisting in our old patterns of keeping education and the functions of government in the control of a select few, or we can respond to the citizens' right to know about and have some input into the functions of his government, including public education," he said.

Nix said "accountability" would go a long way toward restoring some of the confidence public education has lost.

"Very simply, accountability would involve the setting of educational goals and objectives by a school system, the measurement of student performance in relation to achievement of the goals and objectives, and the public reporting of the results of the measurement."

"A fourth and very important—even overriding—aspect of a toal system is the subsequent improvement of the educational program and individual student performance by the application of education dollars in those ways determined by evaluation to be most effective," Nix added.

He said this approach to improving education is a complete departure from the way schools have operated in the past.

"Until now our efforts to increase the quality of education have been expressed in the number of teachers, textbooks, classrooms, school busses and so on we have provided to the systems with tax funds."

He said emphasis has been on "measurable quantities of tangibles rather than on the nebulous attribute of quality."

Black Studies

JAN 29, 1973
Ed - Higher

BLACK STUDIES RUN INTO TROUBLE ON U.S. COLLEGE CAMPUSES

Born in turmoil, courses on Negro history and culture continue to generate controversy —and, on some campuses, demands for overhaul.

A searching re-examination of "black studies" is under way at colleges and universities throughout the country.

These courses came out of racial conflict erupting on campuses in the late 1960's. Today they are being offered at perhaps 600 institutions, large and small.

At an estimated 200 campuses, studies ranging from African tribalism to U. S. urban problems have been organized into full-fledged programs—some in departments of their own and a few offering degrees in black studies.

Now, however, this controversial innovation is running into trouble.

Enrollment in black studies is leveling off nationwide—and declining in some places. Qualified teachers for many of the courses are hard to find.

Furthermore, many black students who once greeted these programs as educational emancipation for Negroes, are beginning to wonder what black studies will do for them on the job market.

The result is that black educators are looking at what needs to be done to preserve the foothold these studies have won on America's campuses.

Already, tens of thousands of students —whites as well as blacks—have been getting unprecedented exposure to study of racial problems in general, and Negro history and culture in particular.

Some study Swahili; more are taking courses in "Afro-American History," "Dimensions of Racism," "History of Black Music," "Philosophy of Black Liberation" or "The African Woman."

Wide publicity given to such studies is prompting other "oppressed" groups to seek similar programs of their own.

On one campus after another, programs are being devised for Asians, American Indians, Spanish-speaking students, white ethnics—and women. (See page 32.)

Black studies originated with the demands of militants for fully autonomous courses where they would have control over subject matter, teaching approach and grading standards.

"Black liberationists," especially those on white campuses, conceived of black studies as offering young Negroes a new grasp of the racial struggle—and a new sense of racial "identity."

Aims questioned. Couched in those terms, black studies generated bitter opposition from academic traditionalists. While extreme demands of militants were never met, scholarly suspicion of black studies still is high.

As academic critics see them, black studies constitute an attack on established lines of scholarly disciplines and departmental authority. Black-oriented courses are held by some academicians to be geared more to social and political aims than to rigorous scholarship.

Heard, too, is the charge that these studies add up to "racism in reverse."

Dr. Kenneth B. Clark, psychologist and Distinguished Professor at City University of New York, said recently:

"Black studies are as revolting as the form of segregation we fought against, even more so because they are insidious. They are allegedly buying peace (on campus) but at the expense of the education of black students." Here and there, the early radicalism of the black-studies movement still flavors it.

Problems raised. On the Berkeley campus of the University of California, militants are boycotting black studies in protest against the firing of the co-ordinator by the university administration last spring in the wake of an inquiry into alleged financial irregularities.

At the University of Michigan, a popular lecturer in black studies is Robert Williams, who had fled the country a few years ago to avoid arrest on a kidnaping charge, and later lived in Red

(continued on next page)

New York University, like many other institutions, finds that black studies have lost their glamour. Now NYU is attracting serious scholars, at graduate level, to black studies that are linked to students' career aims.

—USN&WR Photo

BLACK STUDIES

[continued from preceding page]

China and Africa. The charge, in North Carolina, is still on the books but extradition moves have failed so far.

At Duke University, the black-studies program includes a course, "Study of Marxism and Its Perspective for the Liberation of Black America."

This course was designed and is being taught by Henry Olela, a Kenyan, who said his position on Marxism "does not matter" but added that "I admire, sort of, the Marxist analysis."

Dr. Olela is only one of numerous persons who have come into black-studies programs outside usual channels.

Back of this situation are two major shortages—in money and in supply of trained scholars in this field.

At most institutions, financing for black studies is severely limited—blamed by some blacks on a general squeeze on academic finances, by others on hostility from scholarly traditionalists.

Even well-known schools such as Harvard are colliding with a more intractable shortage when it comes to teachers.

Institutions with money are scouring the universities of Europe, Asia and Latin America for experts on Negro history and culture, as well as race problems. African diplomats, civil rights leaders and militants such as Stokely Carmichael are invited to lecture.

Decline in students. At institutions with less money, courses go untaught.

—Wide World Photo

Scholar Kenneth B. Clark attacks black studies as a new and "more revolting" form of segregation—and costly, too.

One instance is Wayne State University in Detroit where the winter catalogue listed more than 300 "courses of minority interest." More than half of those 300 classes lack instructors.

Today, officials are getting evidence of troubles ahead for black studies.

Fordham University's Rose Hill campus last autumn reported enrollment in black studies down to 262 students from 305 a year earlier. At the Lincoln Center campus, the decline was from 226 students to 157.

The University of California at Berkeley is only one of several State-run campuses where black-oriented studies are drawing fewer students. Because of the boycott, the Berkeley decline is precipitous—from 566 last spring to less than 100 at present.

—USN&WR Photo

Howard University's Russell Adams sees continued support for black studies that are "academically rigorous, vocationally relevant and socially useful."

All kinds of reasons are being advanced for the slowing of interest in black studies.

Dr. Jacob U. Gordon, the director of African Studies at the University of Kansas, commented:

"Many of the blacks who originally were clamoring for black studies had a romantic notion about the glamour of these courses, and didn't really want to do serious academic work. Now the programs are attracting dedicated students and teachers of both the white and black races."

Similarly, Dr. Grace Sims Holt, black-studies director at the Chicago campus of the University of Illinois, had this to say:

"Students are more sophisticated now than when the programs were set up. Instructors can't just throw something together, call it black studies and expect students to buy it."

Reassessment seen needed. Available evidence suggests that probably most students with experience in black studies would endorse the real or potential worth of such programs. Still, young skeptics are heard to use such terms as "Chitterlings 101" or "Ego Massage" to describe courses held to be lacking in substance or usefulness. From a black coed at the University of Houston came this comment:

"Some courses are good and some are bad, depending on the teacher. I'm not any more impressed with black-studies courses than I am any other course on campus. Mostly, black studies is the rehashing of an experience you've already dealt with."

At Fordham, experienced students are heard to complain that they are "not learning anything new." A University of Kansas student concluded tolerantly that some courses would be better taught in high schools—pointing up the general absence of such studies in public-school systems.

Student reserve toward black studies is measured in a poll of Negro students at Indiana University last spring.

It found that more than half the juniors and seniors responding to the poll had taken at least one course in black studies. But fewer than one third felt Afro-American courses should be required of all black students.

As many black scholars see it, racially oriented studies are doomed to become campus backwaters in many places without a sharp reassessment of their academic role and relationship to the nation's racial concerns.

Harvard last year underwent a complete review of its black-studies program by a blue-ribbon committee, with some recommendations for strengthening it. Being proposed now is a drive for capital funds that, among other aims, would add four full members to the faculty.

At Berkeley, the new co-ordinator of black studies, Dr. William Banks, described past courses as often being "junk." He has reduced course offerings by one third, and is upgrading faculty.

Dr. Banks explained:

"People used to think of Afro-Ameri-

Ed- Higher

can studies as a big pork barrel. A rip-off mentality was established."

Next autumn, he said, more courses may be offered. But he added:

"We want in-depth courses, not just a lot of offerings. We'll use other departments because there's no point duplicating what they have to offer. We want serious intellectual study."

Similarly, while his first appointment to the faculty was a black woman as assistant professor, he said he preferred an "outstanding multiracial department to a mediocre all-ethnic staff," composed to a large extent of "political types."

In Washington, D. C., the Institute for Services to Education has named a "national evaluation team" of college teachers to assess black studies in about 25 universities.

A member of this team, Dr. Tobe Johnson of Morehouse College in Atlanta, said of black-studies programs so far:

"Most are concerned about stabilizing themselves through the basic survival factor—money—and getting integrated into the university budget.

"As far as I know, none has failed. But I'm not really pleased with the quality of many programs. Many were hurriedly built.

"One of the big problems is lack of personnel. It gets down to the question of using white teachers. That's a sticky question.

"Black would certainly be my preference—if you're teaching Chinese, you go for a Chinese.

"That is the real problem and it's going to have to be worked out if the programs expand. They're going to have to use capable white teachers."

—SMU Photo

At Southern Methodist University—and other predominantly white schools in the South—white students often outnumber Negroes in the black-studies classes.

—Dick Corten Photo

Dr. William Banks, taking over black studies at Berkeley, is overhauling the curriculum and upgrading the faculty.

At a number of universities, especially in the South, where white teachers and often white students outnumber blacks in these programs, the racial issue is very much alive.

At predominantly white institutions—especially those below the Mason-Dixon line, such as Southern Methodist University—black students are often outnumbered in black-studies classrooms.

This is a live issue in some places.

At the University of Houston, where the 16-man faculty is evenly divided between the races, the director of Afro-American studies at this school, John Indakwa, said:

"Some black student leaders feel that all teaching jobs in the black-studies program should be held by blacks. I disagree. Qualifications, not the color of a person's skin, should be the deciding factor. And there are simply not enough qualified black teachers to staff all the black-studies programs in this country."

Getting a job. Equally troublesome, perhaps more so, is the problem of selling these studies to students who have their sights on well-paying careers.

A spokesman for the California Coordinating Council for Higher Education commented tersely on the decline of Negro enrollment in black studies at several State campuses:

"Ethnic studies don't get you a job."

Looking ahead, many educators foresee less emphasis in black studies on "racial pride" and "cultural identity"—and more on practical goals such as developing scholarly research in this long-neglected field, and producing trained teachers capable of infusing education at all levels with a better understanding of racial problems in depth.

Also foreseen is growing participation of black studies in urban affairs.

At Wayne State University, the new director of its Center for Black Studies, Dr. John E. Simpkins, sees Detroit's slums as a "laboratory" where students apply classroom knowledge of the community to real-life problems.

Dr. Simpkins's argument to career-conscious students: Demand for their services is likely to grow as more cities acquire black majorities.

Special fields. Accordingly, he said, black studies leading to degrees will be linked to student specialization in fields that sell on the job market—economics, education, sociology and others.

The University of Kansas requires students seeking the black-studies degree to earn six credit hours in community service, then submit a summary in thesis form. Counselors stress the usefulness of black studies in community or governmental work. Said Dr. Gordon:

"We aren't teaching students here how to make soul food."

Bolder participation in the community is stressed at Kent State University's Institute for African American Affairs.

Until recently its faculty chairman was an ex-convict and former Black Muslim now studying for his doctorate on the West Coast.

One course, "Sociology 374," brings into the classroom politicians, policemen, welfare recipients, clergymen, prosti-

(continued on next page)

BLACK STUDIES

[continued from preceding page]

tutes and businessmen for discussions with students.

"Practicality" turns up, too, at New York University's Institute for Afro-American Affairs which is promoting its own master's degree in education as invaluable to young people planning to teach in integrated schools.

Within a year, this program's enrollment has gone up 50 per cent—at a time when undergraduate enrollment in black studies has shown only a modest gain.

Predominantly black Howard University in Washington, D. C., is stressing the need for at least some knowledge of black history, culture and community problems to young people whose careers —in law or teaching, for instance—may bring them into close touch with black community problems.

This university, traditionally, has drawn much of its enrollment from upper-income levels of "Black America." Today, heads of Howard's professional schools are urging some black studies for a more systematic and precise knowledge of "the black experience."

The director of Howard's department of Afro-American studies, Dr. Russell Adams says: "I think that if black studies are to survive they must be academically rigorous, vocationally relevant and socially useful.

"The stronger institutions, black and white, will support black studies, for these studies have pointed up fundamental academic and social oversights in the American system."

WOMEN'S COURSES GAINING GROUND

Now it is women who are moving into the foreground of pressure groups seeking academic programs tailored to their own interests.

Since 1970, scores of colleges and universities have set up women's studies as definite programs. Others are in the process of doing so.

Mostly, such programs are small. Michigan State University, with more than 40,000 students, offers six courses in women's studies such as "Sex Roles in a Changing Society," a sociology course, and "Women in America," a literature offering.

On the other hand, California State University at San Francisco offers 26 courses for undergraduates, graduates and housewives or career women.

Some courses at this campus are hard to get into. A few are for women only, while the philosophy course, "Current Consciousness," is taught in three sections—one each for women, men and both sexes.

A "no nonsense" program in women's studies is being offered at the University of New Mexico in Albuquerque.

The 12 courses include "Women and the Law in the United States" and graduate seminars in "The Educational Status of Women."

There, all instructors are women. In most courses, men are barred. The women studies' center, which is also a base for the women's liberation movement on campus, is located in a former fraternity house—vacated last year by order of the university administration.

Another stronghold is developing at George Washington University in Washington, D. C., featuring a master of arts degree built around four core courses in women's studies.

This interdisciplinary program, with seven women enrolled as degree candidates, is taught by six professors from different departments.

G.W.U. officials are planning expansion of women's studies next autumn, both at the graduate and undergraduate levels.

In New York City, Barnard College claims to have pioneered women's studies with "The History of Women in America" in 1965.

Last year it listed 11 courses in women's studies. There is a waiting list of applicants for the "History of Women" course, now taught in seminars limited to 18 students or fewer.

Duke University's course on "Contemporary Woman" is drawing a capacity enrollment of 150 students for the third year. Four other courses, added this year, also are packed—with men making up one third to half of the classes.

In some places, women's studies draw mild or intermittent interest as at the University of Southern California, where a course may be offered for a semester, then dropped and later reinstated.

Similarly, growth is erratic in the women's studies program at Georgia State University in Atlanta, aimed primarily at older women.

A year ago, the university canceled a course on women's liberation when only two middle-aged men showed up.

In the spring, with a new title "The American Women in the 1970s," eight women enrolled. At present, under the heading "Being a Woman in Today's World," the same course has only two women enrolled.

—Robert Brown Photo

Michigan State coeds learn about "Women in America."

Perhaps the most unusual venture into women's studies is the one course being offered at Oklahoma University—a physics course for women only. Dr. Betty Pollak, the instructor, personally recruited 42 women for the course—in contrast with the "one or two" women taking first-year physics courses previously.

"We don't teach them anything different than they would get in any other physics course—except perhaps we treat women more like people, not with hostility or condescension," said Dr. Pollak. "It's an effort to get more women interested in working in nontraditional fields."

Few Crises Seen as Dual Schools Dwindle in State

By BEAU CUTTS

More black and white Georgia children will attend schools together than ever before in the history of the state when the 1972-73 school year begins in a few days.

Federal and state school officials, who in past years have sometimes been bitter opponents, agree that integration of schools in Georgia is virtually completed.

Although tension still exists in some areas, especially where busing orders are in effect, federal and state officials predict that the 1972-73 school year will not be a crisis period in the long effort to eliminate racially dual schools, outlawed 18½ years ago.

Of the 1.1 million students in Georgia public schools, less than 1 per cent will change schools or otherwise be affected this term by new desegregation, according to Dr. Joseph N. Edwards, assistant state school superintendent.

The politically passionate issue of busing is a minor element in the desegregation of Georgia schools, say state and federal officials. No exact compilation exists of the number of Georgia children bused for integration purposes, but it is almost certainly less than 5 per cent of those enrolled.

PAUL WILLS, director of the state Education Department's division that includes pupil transportation, declared: "I would say busing is less than 1 per cent of those transported."

This estimate would place the number far below 1 per cent of all students enrolled, since only 55 per cent of Georgia public school students ride school buses for any purpose.

William H. Thomas, regional civil rights director of the U.S. Department of Health, Education and Welfare (HEW), said he agrees with the estimate that 3 per cent or less of the nation's school children are bused for desegregation.

He said the figure might be slightly higher for Georgia and other Southern states. Even so, Thomas added, "Busing (in Georgia) under desegregation is not as much if the dual system still existed."

'State and local school officials are ready to do—there are no more legal loopholes. But, in a change from a few years ago, it's the national administration that's now standing in the schoolhouse door.'—Leon Hall, prospect director, Southern Regional Council.

Duplicated bus routes under segregation actually increased distances traveled, he said.

The whole effort of desegregating Georgia public schools seems to be tapering to a conclusion in at least two ways.

FOREMOST, there is more mixture of the races in schools. According to HEW, 76.4 per cent of Georgia black students in elementary and secondary grades attended all-black schools in 1968. By the fall of 1970, the figure had dramatically dropped to 16.8 per cent. And it will be somewhat less this fall.

In 1968, 14 per cent of black students in Georgia attended majority-white schools. By 1970, it was up to 35.9 per cent. But, according to HEW, 64.1 per cent of Georgia black students attended majority-black schools in 1970.

Thomas, HEW regional civil rights director, said no estimates are available for the degrees of desegregation that will exist this school term in Georgia.

A second tapering effect in desegregation efforts is due to changes in the political climate, centered around antibusing sentiment. "With the Nixon administration, there has been more turning back of the clock," charged Leon Hall, school desegregation project director of the Southern Regional Council, long active in civil rights efforts.

"MANY OF THE whites are still racist and they are still running the schools," Hall said. "But those trying to desegregate are being cut out from under by the Nixon administration.

"State and local school officials are ready to do it—there are no more legal loopholes. But, in a change from a few years ago, it's the national administration that's now standing in the schoolhouse door."

In contrast, HEW Secretary Elliot L. Richardson said earlier this year, commenting on data showing increased desegregation, "The only measure of desegregation enforcement is results. It cannot be measured by a level of rhetoric or the amount of money cut off from financially distressed school systems

"It can be measured only by the persistent fulfillment o[illegible]al and educational mandate—the elimination of dual schools based on race. And on that score," the Nixon-appointee said, "this administration has a documented record of solid performance."

With the passing of the dual school system, HEW's Southern regional civil rights office is undergoing "a change of direction," said director Thomas.

"Technically, we've fairly well eliminated the dual system. But there are still problems — problems of discrimination inside the schools in terms of discipline meted out to students, and assignment and harassment of teachers and students," Thomas said.

RACIAL isolation — classrooms of one race within desegregated schools — is a difficulty in a number of Georgia school districts, Thomas said. He refused to estimate how many districts have such a practice.

This racial isolation sometimes is done through assignment of students by IQ scores or other test results — so-called ability assignments that mean all-black classrooms and all-white classrooms, he said. "This happens in some schools even though some blacks score higher than some whites."

The Laurens and Cook county school systems have been investigated for alleged racial discrimination in student punishment. Hearings have been held, but no decision rendered, Thomas said.

Early County schools lost to HEW in a hearing on racial isolation and a decision has not been announced from another hearing on Irwin County schools, also charged with isolating blacks by classrooms, he added.

Complaints of harassment and discriminatory job assignments for teachers sometimes are difficult to investigate and, over-all, the various forms of "internal" school racial discrimination are tougher to prove than in former years of blatant segregation, Thomas said.

Meanwhile, local school administrators feel a major irritation from new court orders apparently shifting exact requirements to desegregate staff, faculty and students, said Assistant State School Supt. Edwards.

'It (desegregation) can be measured only by the persistent fulfillment of our legal and education mandate—the elimination of dual schools based on race. And on that score, this administration has a documented record of solid performance.'—HEW Secretary Elliot Richardson.

"LOCAL SUPERINTENDENTS have gone to the nth degree to comply, and what's so maddening is to have new orders," Edwards said, referring specifically to a U.S. 5th Circuit Court of Appeals ruling last week ordering more staff integration in 79 Georgia school districts.

Attorneys in the case decided by the appeals court are uncertain how many districts are already in compliance. The order from the appeals court also called for more student integration in Elbert County, Newton County and Decatur city schools. Also, Taylor County schools' sex segregation is to be examined by a federal district court for possible discrimination.

Edwards said Georgia school systems affected this year by new desegregation requirements, although minor changes, include Chatham County, Muscogee County and Bibb County.

And perhaps the most change will occur in Richmond County where the largest phase of a three-part court order will significantly desegregate 18 elementary schools in addition to the high schools. Widespread busing will be needed.

IT WAS in Richmond last February that a group of white parents organized two one-day school boycotts to protest the busing. The group's attorney, O. Torbitt Ivey Jr., has filed a motion to reverse desegregation plans of 29 elementary schools before classes begin Aug. 28.

In addition to the opening of desegregated schools throughout the state in a few days, scores of all-white private "academies" will begin another year.

The state Education Department estimates that last year 30,000 students attended such private schools, established in recent years to be alternatives to desegregated public schools.

"If there is an increase in these schools this year, we think it will be very minor. We're getting a lot of kids back in public schools and a good many teachers, too," said J. A. Mize, director of the department's division of administrative leadership services.

I. INTRODUCTION

A. Background of the Evaluation

The Southern Teaching Program was created early in 1964 by a group of law and graduate students at Yale University to provide instructors for summer sessions in predominantly Negro colleges, primarily in the South. In the summer of 1964, fifty-three graduate and professional students (called in this report "Student Instructors" or "SI's") taught at thirteen predominantly Negro colleges (twelve in the South and one in Ohio). The 1964 program was evaluated by the Southern Regional Council in a report dated January 29, 1965. That evaluation was prepared under the direction of Leslie W. Dunbar, Executive Director of the Southern Regional Council, with the collaboration of six consultants who visited the campuses where the SI's taught.

Since the summer of 1964 the Southern Teaching Program has been incorporated and a full-time executive director, Mr. Fred Schulze, has been appointed. Foundation aid was secured for enlarged operations for the 1965 summer. Mr. Schulze broadened considerably the area of recruitment of instructors, and the requests for them from the colleges increased markedly. In the outcome, 144 SI's taught at 26 colleges (24 in the South) and in two community programs, both in the South.[1]

---

[1] In mid-August Mr. Schulze learned that two instructors, engaged at the eleventh hour, taught at Bluefield State College in West Virginia. No information has been received from either the institution or from the instructors. The statistics and generalizations in this report consequently

This evaluation of the 1965 program was requested by one of the supporting foundations, as well as by the STP. Dr. Dunbar engaged me to make the evaluation. My conclusions are based largely on four sources: (1) visits to eight of the colleges;[2] (2) interviews at a week-end conference in Atlanta attended by thirty-nine SI's from thirteen campuses; (3) questionnaires completed for me by the presidents or other administrative officers of the receiving colleges; and (4) questionnaires completed by the SI's for the STP which Mr. Schulze made available to me.[3] The special circumstances at Bishop College, discussed in Section IV, required extensive investigation through letters and telephone calls.

B. General Criteria of the Evaluation

The chief purpose of the authors of the 1964 report was to discover "how well STP is adaptable to the basic needs of the predominantly Negro colleges." They wished,

---

omit this institution. Were it included, the number of institutions receiving STP instructors would be 29, and the number of SI's, 146. A complete list of institutions and the number of instructors who taught at each is reproduced in the appendix.

[2]The eight institutions visited, with the total number of SI's at each indicated in parentheses, were: Benedict College (7); Dillard University (6); LeMoyne College (6); Miles College (10); Philander Smith College (9); Tennessee A & I State University (15); Texas Southern University (11); and Virginia Union University (3).

[3]Replies were received from 25 of the 28 institutions; one of the non-reporting institutions, Dillard University, was visited. The other two were Central State College and Friendship Junior College. Responses came from SI's who taught at all institutions except one, Wiley College. Eighty-three SI's submitted evaluations.

moreover, to evaluate the STP in the light of two contemporary concerns: (1) the need to provide direct assistance to Negro colleges; and (2) the feasibility of using graduate students to alleviate the shortage of trained college teachers.

This evaluation is written with these questions uppermost in mind. Granted the discouraging, sometimes appalling, conditions that obtain in many Negro colleges, we need to know in what ways the STP can help to generate constructive reform. We need to look carefully at ways in which the STP has affected the students who were taught; the regular faculty members who stay on after the SI's leave; the curricula, standards, and administration of the receiving colleges; and the SI's themselves. Beginning with a description of the way in which the STP functioned in 1965, this report discusses each of these questions, highlights some of the principal difficulties that were encountered, and concludes with a summary of recommendations for the future.

II. SCOPE AND ORGANIZATION OF THE STP

A. Recruitment and Orientation

Recruitment of SI's was carried on, with varying degrees of enthusiasm and care, at more than twenty-five university campuses. In some cases both recruitment and interviewing were extremely casual, requiring the Executive Director of the STP to rely almost exclusively on the written applications of the candidates for placement purposes. In other cases interviewing was taken seriously and the recommendations of the local committees proved useful. There is no doubt that a serious interview, going beyond the question of academic ability, should be an integral part of the selection process, and the STP should persuade responsible administrators of the supplying universities to appoint a faculty committee for the purpose of screening applicants. The announcement of such a policy would, in addition to improving the chances of appointing qualified persons, alleviate some of the concerns of the receiving colleges over the non-academic qualifications of the SI's.

The staff of teachers recruited for 1965 was, both on paper and in practice, well qualified academically. About two-thirds had had previous teaching experience. All but three had had at least one year of graduate work. Ninety-three held master's degrees and five had earned doctorates. The table below shows the academic qualifications of the SI's, breaking them down into three groups: (1) those who came directly from graduate studies; (2) those who came from established teaching positions; and (3) a miscellaneous group

of persons who were neither in graduate school nor presently teaching (several of these were wives of men in the first two categories).

ACADEMIC QUALIFICATIONS OF SI'S

	Total	B.A./B.S.	M.A./M.S.	Ph.D.
From Graduate Schools	118	40	77	1
From Teaching Positions	13	2	7	4
Miscellaneous	13	4	9	0
Totals	144	46	93	5

Of the 118 who came directly from graduate schools, 68 (about 58%) came from three universities: California (26), Yale (25), and Harvard (17). Known last year as the "Yale" Southern Teaching Program, this year's enterprise was frequently called the Yale-Berkeley program (Harvard does not appear to have stamped its image on the STP). Other universities supplying more than one SI were Columbia (8); Virginia (7); N.Y.U. and Wesleyan (4 each); Brandeis, M.I.T., and Michigan (3 each); and Cornell, Howard, and North Carolina (2 each). Twelve universities supplied one SI each. In all, twenty-five universities supplied SI's from their graduate schools.

The broader recruiting program which these figures reflect was a distinct improvement over the previous year, when nearly all of the SI's came from only one institution. To bring instructors from a variety of universities is to introduce more teaching ideas and practices, considerably increase the number of instructors who may be supplied, and involve more persons and institutions in the cause of the

Negro college. Despite the broader appeal, however, relatively few Negroes and white Southerners were recruited. The experience of the few who did participate, and the reactions to them of both students and administrations, suggests the need to recruit more vigorously in these two categories. Potential Negro SI's will come from the universities already in the program, plus ones similar to them. They need to be sought out. White Southerners can most easily be recruited in the southern universities, such as Duke, Emory, North Carolina, Texas, Vanderbilt, and Virginia. Only Virginia had a satisfactory recruitment program for 1965.

Once recruited the 1965 SI's faced a variety of orientation problems, few of which were satisfactorily met. Knowing little about Negro colleges in general, and even less about the specific institutions to which they would go, the SI typically arrived at his college with only the vaguest notion of what he was expected to do. The orientation programs at New Haven and Berkeley were judged by the SI's to range in value from extremely helpful to useless. One can safely say that these meetings did help to bridge the gap from innocence to involvement by acquainting the SI's with some of the general problems and conditions which they might encounter. The principal complaint -- a rather general one -- was that the meetings did not orient the SI toward his specific situation. Although general orientation meetings cannot remove this deficiency, there are some ways of improving the situation. For one thing, the STP might prepare brief sketches of the salient characteristics of each of the

receiving institutions, based largely upon reports filed by the 1965 SI's. It could also make available a list of the persons who taught in 1965 so that the 1966 SI's could contact the veteran whose experience should prove most helpful. Finally, the orientation meetings would be more helpful if they included special sessions for each discipline to be taught. Such meetings could be directed by a person who taught successfully in 1965.

A large measure of responsibility for the lack of advance knowledge rests upon the receiving institutions themselves. Most of them failed to supply their new instructors with adequate information on courses to be taught, books to be used, number of students in the classes, living accommodations, and other relevant matters. To remedy this situation the STP should urgently request each receiving institution to state as early and as explicitly as possible exactly what it expects from the SI's. Such requests were made in 1965, but they should be pressed vigorously in the future.

B. The Colleges and the Programs

The twenty-six colleges that employed SI's represent a cross section of the Negro college in America. They included two from the non-South, and southern institutions both large and small; state supported and church related; urban and rural; aggressive and lethargic. They had in common, whatever their relative academic positions, an awareness of acute problems which cannot easily be resolved. They looked upon the STP as an inexpensive means of bolstering

existing programs, adding new programs, infusing new ideas into the institutions, and garnering prestige for themselves.

At only eight of the colleges did the SI's function exclusively in the role of teachers of regular summer school courses. At seven places they taught both regular and pre-freshman courses, and at eleven institutions they were engaged exclusively in pre-freshman work. Almost two-thirds of the SI's taught pre-freshman courses. Typically these were in the fields of mathematics, reading, and English. Most of these programs were aimed at the sub-standard student, not normally admissable without remedial work. Some were designed for the more talented, and some indiscriminately mixed their students with little reference to ability.

At most of the colleges where pre-freshman programs were offered the SI's constituted a substantial portion of the teaching staff; at some places they did virtually all of the teaching. Without the STP the receiving colleges either would not have had pre-freshman programs, or would have had ones significantly inferior to those which were offered. Every institution reported that the STP was crucial to its program. One dean, for example, reported that the "STP made it possible to fully staff a pre-college program for over 200 high school graduates who will enter college in the fall." Another declared: "We were able to offer an experimental program for high ability freshmen by having STP instructors." The evidence is overwhelming that, considered in terms of new programs offered and/or old programs strengthened, the STP made a considerable contribution.

As teachers of regular courses, the SI's came generally well prepared by their graduate studies. Those who taught elementary and remedial courses in the pre-freshman programs, however, typically had had no special training and little, if any, relevant experience. Extraordinary enthusiasm and an admirable dedication to teaching, however, generally overcame these deficiencies. Bright people with large capacities for work, the SI's taught effectively in difficult and, to them, novel situations. This is not to imply that specialized training is not to be prized. Time after time, SI's commented that they could have made more progress more rapidly if they had not had to work out techniques for themselves. Precisely how the STP may address itself directly to this problem is not clear, but one possibility would be to engage several experts in remedial instruction, particularly in reading skills, to counsel with the SI's before the summer sessions begin. It might be well, also, to engage an appropriate number of "experts" to travel from college to college, early in the summer, to work for brief periods with the SI's.

C. Two Community Programs

The STP also furnished instructors for two non-collegiate programs, the Charleston County Tutoring Center, in Charleston, South Carolina, and Wider Horizons of Orange County, Daytona Beach, Florida. Both of these community programs were created prior to the 1965 summer in response to demands for remedial and/or enrichment programs for Negroes which the total school boards were unwilling to undertake.

The Charleston program was begun in October, 1964, as an after school tutoring project to work with "academically able" students of the 10th, 11th, and 12th grades. The summer program, under the sponsorship of a local Baptist Church in cooperation with six church and community groups, enrolled students from the 7th through 12th grades and included as well two college freshmen. A total of forty-five students participated. Five SI's were in the summer teaching staff. Instruction was offered in reading, written communications, mathematics, and the humanities. Both the director and the SI's reported striking achievements in all areas. In reading, for example, standard tests showed that each student gained at least two grade levels in comprehension and increased reading speed by as much as one hundred words per minute. According to the director, the SI's were "highly capable and interested in working with the students."

The Wider Horizons project was a direct outgrowth of the decision of Orange County, Florida, to begin integration of the elementary school grades. It was created in the summer of 1964 to help students make an easy transition from segregated to integrated situations. During the 1965 summer, some 250 students of elementary grade age were taught by a staff of twenty teachers, ten local, including three Negroes, and ten SI's. Emphasis was on communication skills, spelling, and mathematics. Equally important, according both to the director and the SI's, were a variety of cultural activities, field trips, and informal projects. The program lasted but four weeks, too short, according to

the SI's, to make substantial academic progress.

Both the reporting SI's and the director, however, indicated the achievement of significant academic gains, although not as striking as in the Charleston case. With the younger children, many from rural backgrounds, non-academic adjustments often seemed more important than, or at least prerequisite to, academic progress. One SI wrote that "Although the children . . . had great educational needs, their psychological needs were in some cases more basic." The same instructor felt "strongly that graduate students are badly needed to teach elementary school in the South -- even students with no experience teaching. These children need so much more than just teachers -- they need someone to emulate, someone who can increase their scope of interests, someone who cares about them." Echoing this sentiment, the director, noting that the program would have been impossible without the STP, praised the SI's as being "warm, sympathetic, creative, and responsive to the needs of the students." They were "completely absorbed by the problems of the children and devoted their time unceasingly to improving the conditions confronting them."

Both community programs appear to have been highly successful. Both improved the academic skills of the students and paved the way for an easier transition from segregated to integrated school situations. The question facing the STP must be: shall projects of this sort, which are in great need across the South, be assisted on a wider scale? Some of the dangers are obvious. If the STP is to address

itself to all educational problems facing southern Negroes, and attempt to lend a hand wherever asked, it invites the danger of dissipating its energies and lessening its effectiveness. To restrict itself to the colleges, however, is to overlook the obvious truth that many problems of the college student are created in the lower grades. A happy compromise, which would maintain the essentially experimental spirit of the STP, would be to retain primary emphasis on the college, meeting first the demands that arise there, and then accommodate other programs on the basis of individual needs and merits and the availability of suitable teachers. What is recommended, in short, is a cautious expansion in 1966 of the non-collegiate programs undertaken in 1965.

III. THE IMPACT OF THE STP

To assess authoritatively the impact of the STP at this early stage in its history is all but impossible. Much depends upon the perspective from which one views its operation. To expect it to make long-lasting and profound changes in Negro higher education in a short period of time will inevitably lead to a sense of frustration and a negative evaluation. Realism rules out viewing the STP with such anticipations. The most sensible way of evaluating it is to ask what contributions it has made and how these contributions may be continued and augmented. If the impact, however limited, is constructive, and if the cost is not out of proportion to the results, one may safely declare irrelevant to the evaluation the larger question of how Negro colleges may be brought up to desired standards.

A. On the Students

All sources of information underscore, with varying degrees of enthusiasm, the most obvious generalization about the student reaction to the program: appreciation was profound and the quality of the enlightenment was beyond expectations. One student put it this way: "Any of us would give his right arm to go to Yale. We can't go to Yale, but they sent Yale to us." Students are not adequate judges of the competence of their teachers or the success of their programs, but the insights they furnish are often unique and can be ignored only to the detriment of an effective evaluation.

While it is no doubt true that the evidence accumulated

ignores some students who were oppressed by the academic demands placed upon them and resentful of low grades, it remains clear that those who did speak out -- and they were in large numbers -- responded affirmatively to their experience. They commonly remarked on the friendliness of the SI's, their patience and dedication to teaching; and, almost without exception, they noted both surprise and pleasure at the extraordinary amount of time, outside the classroom, which the SI's were willing to devote to them. In some institutions, where little or no extracurricular activities were planned for them, the students found that the SI's -- despite their heavy teaching loads -- organized social, cultural, and athletic activities which enriched the summer.

At many institutions, the novelty of the SI -- his eagerness to raise fundamental questions in the minds of the students, and his frequently unorthodox means of jolting them -- caused the students to question for themselves the institutions in which they were enrolled and the quality of the education they were receiving. Two very different kinds of results were observed. At one institution, for example, several of the brighter and more advanced students tended to resent the implied criticism of their college which they felt in the remarks of the SI's. As one young man put it, "We know we're not Yale; we know, in fact, that we're not a very good college. But we're not worthless!" Proud of their institutions, students like this one testified to the excellence of the SI's teaching but wished for more tact

in their assault on the deficiencies which now appeared more clearly than ever before.

At the other extreme were a group of students in another college who found spiritual allies in the SI's. Resentful both of the regulations of the administration and the lack of concern of their regular faculty, this group spent many hours in exciting conversation, exploring ways of bringing about reforms. In between these two examples were the majority of the students interviewed. They questioned both themselves and their institutions without having their pride in either seriously damaged or without being moved to undertake protests and reforms.

The most common -- and in one sense the most revealing -- student observation described the quality of the education offered by the SI's. Almost everywhere one encountered the stock phrase: "They have taught us new ways of looking at our subjects; they have brought new techniques of teaching." Those who spoke in this fashion felt the excitement of intellectual achievement and reaped the rewards of hard work, intelligently directed. What they meant by "new" ways of looking at subjects and "new" techniques of teaching almost sums up the educational problem which the STP is facing. A "new" way of studying history meant asking "why" a particular event occurred; a "new" way of studying poetry meant examining "how" a poem was structured; a "new" technique of teaching physics was conducting an experiment to discover "why" one physical phenomenon occurred instead of another. The novelty with which these "techniques" appeared to the

students, and the inability of good graduate students to teach in any other way, says a great deal both about the deficiencies which are to be met and the qualifications of graduate students to meet them.

The immediate impact of the STP on the students, then, was a positive one. How lasting it will be cannot, of course, be determined. One of the chief regrets of the students, and one of the serious inadequacies of the STP, is that provision is made for summer instruction only. Returning to conventional instructors, most of whom are quite different from the SI's, the students will come better equipped for progress in the future. They may, however, develop frustrations which will sooner or later dissipate the achievements of the summer. Much depends upon the impact which the STP has on the institutions themselves.

B. On the Institutions

Discussion of the impact of the STP on the twenty-six colleges may begin with the observation that the administrations of these institutions were, on the whole, more than satisfied with the SI's and eager to continue the program. Twenty-three of the colleges completed questionnaires prepared for this evaluation. Twelve declared the teaching job done by the SI's to be excellent; eleven rated it good. None found it fair or poor. Asked to describe their general attitude toward the STP as it operated on their campuses as very favorable, favorable, satisfied, unfavorable, or very unfavorable, thirteen responded very favorable; seven, favorable; one, satisfied; and one, Bishop College, very

unfavorable; one cannot be classified.[4] All but Bishop College and Claflin College responded affirmatively to the question, "Do you expect to request STP instructors for next summer?"

Asked what they considered to be the chief contributions of the SI's, most colleges rated first their enthusiasm, willingness to work long hours, and ability to inspire the students. Typical were the following statements:

> New ideas together with zest for teaching has made a healthy impact on our regular teaching program.
>
> . . . their youthfulness, zest and desire to make a contribution in this particular kind of setting were very effective in motivating our students.
>
> . . . these instructors helped to widen the horizons for many of their students. They also demonstrated in a very practical way a number of worthwhile traits which could help to influence the students favorably.
>
> They have been able to identify with the students and express concern for the total life of the students.
>
> STP instructors brought new vigor and enthusiasm into the classrooms. They demanded and obtained relatively high academic performance from our students. They inspired students to read and study and exhibited a genuine interest in student development. They brought new ideas to the campus.

---

[4] At Claflin College two SI's were originally assigned. One was dismissed by the president early in the term. The dismissal apparently stemmed from a personality conflict between the president and the SI. The dean of the college, in preparing his evaluation, stated that the college's attitude toward the SI who remained was "favorable" while it was "unfavorable" toward the dismissed SI. No reason was given for the decision not to request SI's for next summer.

Half of the institutions also indicated that they had been able to undertake new programs or significantly expand existing ones because of the STP.

An attempt was made to determine the extent to which, if any, the availability of SI's made it possible for regular faculty members to pursue further study of their own. Eleven institutions reported that the STP had made this possible. The phrasing of the question, however, probably led to misleading replies, for it is highly doubtful that the STP did more than make it possible for faculty members to be relieved of teaching duties. Unfortunately, no reliable information was obtained to indicate the way in which further study was financed. It is probable that the instructors involved had to make their own arrangements. There is no indication that their salaries were met by the colleges.

Rumors, not easy to confirm, suggested that some faculty members who desired to teach were replaced by low-cost SI's. One definite example of this was uncovered; there may have been more, for certainly the temptation was there. To some undetermined extent, this aspect of the STP has an unsettling influence, not necessarily constructive, on the colleges. It certainly does not help faculty morale. Both faculty members and administrative officers expressed the wish that the STP, in addition to supplying instructors, would also make available matching funds to underwrite the cost of summer study for some members of the regular faculty. Such a program would increase appreciably the

usefulness of the STP and significantly augment its long-range contribution to improved educational standards. Supporting foundations should consider financing a well-conceived program along these lines, perhaps one which would require some contribution from the receiving college, although not one substantial enough to discourage the addition of new programs and the expansion of existing ones.

The impact of the STP on curricula, standards, and other aspects of the institutional complex was probably very slight, for several obvious reasons. Apart from the fact that institutions do not change easily, it must be remembered that SI's were relatively few in number, seldom integrated into policy-making echelons of the colleges, and often isolated from other members of the faculty. Their brief tenure and the non-typical nature of the summer session itself are further impediments. At some of the colleges the administrations requested, and received, critical evaluations of the curriculum which may serve as stimulants and guides to constructive reform in the future. Probably the most direct, tangible benefit which can be ascribed to the STP is the upgrading of students in the pre-freshman programs. Despite the limitations of these programs, noted earlier, they will supply a better student for the regular session.

The impact on regular faculty members is difficult to assess. Two science teachers at one college described the ideal result: a happy interchange of ideas and teaching techniques conducted in an atmosphere of mutual respect. SI reports and a few interviews with regular faculty members,

however, suggested that there was little contact between the two groups at most places and some apprehension at a few.

An essential development, if the institutions are to be improved substantially and fairly rapidly, is a continuation through the regular academic year of the kind of contributions made by the SI's. This raises the question of the degree to which the STP should restrict itself to summer employment. The advantages of recruitment for summers only are obvious. Relatively few graduate students can be persuaded to sacrifice an entire year of work toward graduate degrees, while many are anxious to accept summer positions. Perhaps the most that the STP can do at the present is to apprise SI's of available opportunities and hope that a significant number will choose to become regular faculty members in one of the Negro colleges. How likely this approach is to bear fruit can better be understood by examining the reactions of the SI's themselves to their experiences.

C. <u>On the SI's</u>

The written evaluations supplied by the SI's run to almost three hundred pages and constitute a rich source of information. They make an interesting contrast to the shorter evaluations submitted by the institutions themselves. In general, the SI's were less optimistic about the future and more critical of their own achievements than were their employers. There is a two-fold explanation for this. First, the SI's were largely unacquainted with academic

backwardness when they encountered it, while the institutions were all too familiar with it. These dissimilar perspectives inevitably produced differing evaluations. Second, many of the SI's -- although certainly not all -- exhibited a common expectation of young people in believing it possible to make great changes in a short period of time. They were inevitably frustrated when the record of progress, though often remarkable, was woefully incomplete. The institutions, on the other hand, accustomed to a long history of student mediocrity, noted with sensitivity the slightest signs of breaking out of old patterns.

Most of the frustrations, criticisms, and bitternesses expressed by the SI's will be noted below, in Section IV. Numerous and varied though these disappointments were, virtually none of the SI's came away from the summer with a sense of despair. Even the most critical felt that some progress had been made; frustration arose from realizations of how little it was and how difficult it would be to achieve more. At several places -- notably Miles, LeMoyne, Lane, and Texas Southern -- the sense of achievement was especially high.

Whatever their evaluations of the programs, most of the SI's felt personally rewarded by their experience. One wrote:

> My summer . . . was very enriching for me personally and professionally. Lasting friendship grew between me and the members of the student body, the faculty, the administration (!), and the colored community . . . not immediately related to the university.

Typical of many was the reaction of another SI who wrote that the summer teaching "was one of the most fascinating experiences I have ever had." Others described their reactions with such adjectives as "unusual," "fresh," "vigorous," and "challenging." One SI, probably reached more deeply by her experiences than most, wrote:

> Teaching psychology at Miles College this summer was one of the most worthwhile, exciting, and difficult things I have ever done. I feel very lucky to have been sent to Miles . . . I am grateful for being given this first opportunity to teach, and to discover that I love it. I am very glad to have been able to be in the South, where I gained, if not a better understanding of the white point of view toward segregation or of the issues involved . . . at least a great love for my students and for the staff and administration of Miles College, a sad realization of the difficulties of educating the southern Negro, and an appreciation of the great satisfaction to to be gained from contributing something to this great need.

Another Miles SI described her work there as "one of the most rewarding experiences of my life and one of the most enjoyable, too." She has accepted a position on the regular faculty as a direct result of her experience.

An SI from Tennessee A & I, after reviewing both the disappointments and pleasures of his work, concluded:

> In sum, this has been a summer of mixed reactions. I've enjoyed teaching and found pleasure in many of my students. The people I've worked with are going to be fondly remembered. Most important of all, I'm sure that after a couple of nights' deep sleep in a less hot and humid climate, I will realize that the assumption which compelled me to seek this job, namely, that only through education will the Negro be able to maintain the equal rights he has won, has been vindicated.

No systematic attempt has been made to determine exactly how many SI's moved directly into Negro colleges, either their

own or another, as a result of the summer, or how many now feel inclined to return later to a Negro college. Several have in fact taken permanent jobs this year. Of the sixty or so who were interviewed during the summer visitations, ten indicated a rather strong desire to return later to a southern Negro college. Among these were several who appear to have bright professional careers before them.

To conclude this discussion of the impact of the STP, one may assert confidently that the graduate students recruited by the STP performed with extraordinary effectiveness as teachers and that the experience they had is likely to encourage a significant number of them to enter into full-time positions in Negro colleges.

IV. SOURCES OF CONFLICT

The generally favorable evaluation of the STP, summarized above, was reached despite evidence of a plethora of irritations and conflicts which diminished the effectiveness of the SI's in some places, caused serious crises in others, and a nationally publicized debacle in one. A brief survey of some of the principal sources of difficulty may be helpful in preparing for future summers.

A. Institutional Irritants

Anyone familiar with the *modus operandi* in most (not all) Negro colleges could have predicted a series of frustrations for the SI's and might reasonably have anticipated feuds of varying intensity. Coming from universities that are both wealthy and academically alert, the SI's were not prepared for the situations they would face. Many of the problems sprang directly from poverty. Libraries were generally poorly stocked and inadequately administered. Book stores commonly offered poor fare and their staffs, either inadequately trained or undermanned (or both), were often slow and inefficient in placing orders. Frustrations arising from these deficiencies caused bitter complaints in a few colleges. Where complaints were tactlessly aired, resentment on the part of the administrations frequently followed. Most of the SI's, however, accepted these and similar irritations with maturity and some worked intelligently and effectively to point the way toward constructive reform.

More serious were the irritations that sprang from the heritage of segregated education itself. In most Negro colleges, for example, the tradition of immense presidential authority -- autocracy, according to some critics -- resulted in what often seemed to the SI's arbitrary rulings which adversely affected the welfare of the students. Stern social regulations, rigid academic requirements, and an authoritarian faculty-student relationship -- all part of an ancient tradition of academic paternalism -- frequently seemed to the SI's to stifle self-expression and hinder intellectual development. There were conspicuous exceptions to this generalization, of course, but variations on the pattern occurred with uncommon regularity. In their zeal to break their students loose from these "oppressive" patterns, many SI's aroused suspicion and a measure of hostility from their Negro colleagues and superiors. Not unnaturally, many of the Negro faculty members felt defensive and insecure while the administrations, though maintaining a facade of confidence, reacted uneasily to the challenge to their authority. How prevalent this pattern was is not easy to determine. The safest generalization is that signs of it appeared at all but three or four institutions, but that at all but perhaps seven or eight the SI's muted their criticisms and relationships were generally constructive.

Finally, there were several miscellaneous irritants, present at enough institutions to warrant noting here.

Inadequate registration procedures and poor planning meant that some SI's were asked to teach courses other than those for which they had been hired, or that they had significantly more or fewer students than they had been told to expect, or that they had a heavier teaching load than they had agreed to. Directions from department heads or program directors were sometimes inadequate causing the SI's to prepare their courses without knowledge of what was normally expected. Salary payments caused difficulties in some places. The SI's had been led to expect $50 a week, but this did not, in fact, always result in weekly payments. Some were paid monthly, others at the end of their service. These arrangements worked a few serious hardships.

The STP is no doubt already aware of most, probably all, of the institutional irritants and, in fact, Mr. Schulze worked diligently to remedy many of them in advance. Not all of them, however, can be directly approached by the STP, and future SI's should be instructed carefully in the kinds of problems they may encounter.

B. <u>The Instructor as Agitator</u>

Given the institutional irritants, sketched above, the prospects for harmonious and constructive teaching situations depend to a very considerable extent upon the attitudes of the SI's themselves. To oversimplify complex reactions, one might delineate two polar positions which characterized SI attitudes. One position, which was occupied or approached by a significant majority of the SI's, held that the instructor's job was to

teach well and to work within existing frameworks in order most effectively to reach the students, gain the confidence of the faculty and administration and thereby make a positive contribution. Accompanying this attitude was the notion that, after all, the SI was a temporary employee with little experience in a complex institution with a long and involved history. One SI, displeased by the behavior of his colleagues, put it this way:

> Some of the teachers seemed to channel their frustrations into cutting satire about the school and trying to get students to rise in dissatisfaction.... I always thought we were there to reform students through good teaching, not to change the administration through satire and bitter, petty gripes.

The second position, cuttingly suggested by this criticism, was occupied by a minority of SI's. No less committed to "reform" than the others, they grew impatient with their superiors and became convinced that frontal assaults of one kind or another were the most likely approaches to yield dividends. Almost without exception, their first loyalty was to the student and they struck out at impediments to his progress. That so few administrations, in the questionnaires or in the interviews, expressed concern over this behavior suggests that the administrations were often more tolerant than the more militant SI's believed. It also suggests that the militants were a distinct minority and that, even when they did nettle their superiors, the desire for STP assistance in the future greatly outweighed the impact of the criticism.

In a few of the institutions which were visited, and

probably at about a third of those which were not, some SI's appeared as agitators in social as well as academic roles. Here their mode of dress and casual forms of behavior were distinctly out of keeping with the traditions of their host institutions. This pattern of behavior was evaluated in the 1964 report as follows:

> It is tempting to say that SI's should conform to local styles of dress and behavior, but we would not stress it. Repeating our earlier point that the SI's should regard themselves always as faculty, we would add here that he who isn't conforming should know that he isn't. SI's should, at least, find out what is customarily expected of faculty, and non-conformity should be deliberate.

The observations of the 1965 program lead to a slightly revised version of this recommendation. Certainly the SI should find out what is customarily expected of him so that his non-conformity is not accidental. He should also have the right of a faculty member anywhere to be a non-conformist. However, evidence collected this summer would indicate that, in many instances, non-conformity, especially in matters of dress and hygiene, has its price in undermining the confidence of the student in his instructor. The SI who dresses conventionally seldom runs the risk of creating obstacles to his teaching techniques and "new" ideas. The unconventional dresser frequently does create such obstacles.

In conclusion, one must be wary of stressing too heavily the importance of the summer's irritations and conflicts. With the primary emphasis on teaching programs and teaching obligations,

the net gains in the future -- as in 1965 -- are likely to be considerable. Only in one institution this summer did the conflicts result in a real debacle, but even there the evaluation of the academic progress was favorable.

C. The Bishop College Debacle

Two days before the pre-freshman program at Bishop College was scheduled to end, most of the program faculty, including all eleven SI's, was dismissed. "We separated the entire group," the President explained, "for rank insubordination." As the President saw them, the SI's were "rebellious, uncooperative, and set on the idea that the members had no obligations to the institution." He found their personal hygiene wanting, their dress deplorable, and their "extraordinary efforts to incite the students against the college" unpardonable. For their part, the SI's regarded the President as the "adversary," and described their battle with him and Bishop College in language quite as vigorous as his.

The bizarre events of the summer, as interpreted by several participants, make for serious strains on one's credulity. From various SI's came hair-raising tales of administration-inspired raids on faculty parties, puritanical administration suppression of normal boy-girl relationships, hoodlumism of various sorts, robberies, intimidation, interference with the mails, and an allegation of SI plotting to bring shame on the college by implicating a Negro student in a rape charge against a white teacher. These "extracurricular" activities provided the

backdrop for a series of intense academic quarrels that ultimately produced an SI-led demonstration, involving over one hundred students, and the subsequent dismissal of the SI's.

It would require a separate report, quite as long as this one, to deal adequately with the Bishop affair. The following summary merely attempts to highlight some of the principal aspects of the story which are relevant to the future of the STP.[5]

Bishop College is in a stage of transition. The appointment of a distinguished scholar, Professor C. P. Cuttino of Emory University, as Academic Consultant, led to the drafting of a long-range academic plan and the inauguration of a pre-freshman program in 1964. SI's joined Emory graduate students to launch the program that summer. The same combination, with the addition of a few Dallas school teachers, staffed the operation this year. Mr. James W. Anthony of the Denver Country Day School was engaged as Program Director.

---

[5]My evaluation is based on the following sources: (1) the President's questionnaire and covering letter; (2) Mr. Schulze's statements on the nature of the negotiations and arrangements with the college; (3) a lengthy evaluation prepared by the Program Director, supplemented by a personal letter from him; (4) extensive accounts prepared by four of the SI's as well as a jointly-prepared document on the "real and alleged reasons for student discontent at Bishop College"; (5) the transcript of a round table discussion of the crisis held in mid-July; and (6) other documents and remarks furnished by Professor G. P. Cuttino, the Academic Consultant to Bishop College.

The college is extremely backward academically and is plagued by a variety of outmoded customs and regulations which any of the 1965 SI's would have found oppressive. In this atmosphere, numerous issues arose which divided the SI's from the administration; by mid-summer discontent was extreme and battle lines were drawn. Of the several divisive issues, the bookstore drama became the focal point and symbol of the contest. Hours were capricious, book orders were handled with aggravating disregard of the instructors' needs and wishes, and -- most serious of all -- students were overcharged on their purchases. Here, as in other conflicts, the SI's rallied to the side of the students. Protracted, inconclusive negotiations with the administration over the excessive charges led to the demonstration -- a dramatic challenge to the President's authority.

The SI's who led the protest movement would fall in the category of "agitator," as defined earlier in this report. One can easily imagine another group of 1965 SI's who would have labored within the existing framework, lodging their criticisms tactfully to avoid a violent confrontation. The Bishop SI's, on the other hand, apparently wanted to see reform instituted in their sight and at their insistence, as one of their sympathetic observers put it. It was this insistence which produced the "explosion."

To attribute to the SI's primary responsibility for the debacle, however, is an insufficient comment on the significance of the Bishop affair. One could argue that tactful acquiescence

would have left the institution as unreformed after the summer as before. There are those who maintain that a full exposure treatment was the only way to institute reform; that the existing structure was too inflexible to yield to normal ameliorative tactics. It may well be that the "explosion" will, in fact, lead to long-needed reforms. One will observe the future with interest in this respect.

Even should this prove to be true, however, the STP can scarcely point to the Bishop summer with pride or commend the tactics used there to future SI's. Three reasons underlie this conclusion. First, it is easy to imagine other institutions at which such tactics would have crippling effects. Second, the awesome responsibility of deciding when revolutionary tactics are necessary and pardonable is one which, one would feel, graduate students from our finer universities would need more than a short summer to ponder. Finally, the mission of the STP is to teach; and its program of reform lies in providing outstanding examples of the dedication, values, and achievements of American higher education at its best.

V. SUMMARY OF RECOMMENDATIONS

The conclusions of this evaluation of the Southern Teaching Program, 1965, may be stated briefly. The STP has made a positive impact on the students who were taught, all but a few of the receiving colleges, and the SI's themselves. It has proved itself to be an organization of considerable, though limited, usefulness in the cause of improving education in Negro

colleges. Likewise, it has shown that graduate students may be used with great effectiveness in alleviating the shortage of trained teachers. Their very youth, in fact, permits them to make in some respects a more substantial contribution than older scholars. Assuming that the STP will continue to be administered as effectively as it was in 1965, it is the recommendation of this report that it be both continued and expanded.

The specific recommendations presented for the consideration of the STP and supporting foundations have been discussed in the body of this report. The major ones are listed below.

1. Creation of a faculty committee at each recruiting university to interest students in the program and interview candidates for it.

2. More vigorous recruitment of Negroes and southern whites.

3. Revision of orientation meetings to (a) acquaint SI's with their specific college; and (b) provide discussion of teaching problems in specific disciplines.

4. Exhortation of receiving colleges to provide SI's, as early as possible, with detailed information concerning courses to be taught, materials to be used, and accommodations to be provided.

5. Employment of experts in remedial instruction, especially reading, to counsel at the orientation meetings and call on receiving colleges during the summer.

6. Cautious expansion into the area of community programs for pre-college students.

7. Addition of a well-structured program of grants to underwrite summer study for selected regular faculty members of the receiving colleges.

8. Addition of a more systematic program of informing SI's of the availability of full time employment opportunities in Negro colleges.

9. More specific provisions for salary payments.

10. Thorough discussion with the SI's of the issues involved in "non-conformity."

"We have entered an age in which education is not just a luxury permitting some men an advantage over others. It has become a necessity without which a person is defenseless in this complex, industrialized society . . . We have truly entered the century of the Educated Man."

PRESIDENT LYNDON B. JOHNSON
April 1964

PAUL JENNINGS
President

PHILIP MURRAY BUILDING

INTERNATIONAL UNION OF ELECTRICAL, RADIO AND MACHINE WORKERS

AFFILIATED WITH THE AMERICAN FEDERATION OF LABOR and CONGRESS OF INDUSTRIAL ORGANIZATIONS AND THE CANADIAN LABOUR CONGRESS

PHONE: 296-1200 (Area Code 202)
1126 SIXTEENTH STREET N.W., WASHINGTON, D.C. 20036

Dear IUE Member:

Parents investigating the cost of education beyond high school -- particularly college -- are stunned at the expense. Four to six years at college (or technical school) can cost from $10,000 to $14,000 and must be paid while the student is in attendance. This sum is comparable to the cost of a home for IUE members in the United States or Canada. But the cost of a home is almost always stretched over a 25 or 30 year period. The parent who sends his child to school must pay now.

IUE members' concern for the belabored parent resulted in COPE and legislative activities creating the political climate that made possible the passage of the Higher Education Act of 1965. Now a college education is within reach of most qualified children of working families, who until recently could not dare dream of this. The "luxury" of education is rapidly being converted into a right.

IUE members' concern also has spurred the publication of this pamphlet which we hope will provide guidance and information on the ways education beyond high school can be financed and where scholarships can be obtained.

More consistently than any other group, the labor movement has been the prime advocate of education. Labor's agitation for a free public school system in America dates back to 1826. We have come a long way in 140 years, but much remains to be done in this fight. Your One Dollar annual contribution to COPE, your vote for liberal candidates, and your continuing interest will hasten that day.

Fraternally and sincerely,

Paul Jennings

Part I

NEW WAYS TO FINANCE HIGHER EDUCATION

In 1966, 16 children of IUE members successfully competed in National Merit Scholarship Qualifying Test, became finalists and have won scholarships. But as parents of these students would probably testify, and what thousands of frustrated IUE member parents are beginning to find out, a scholarship is but a small part of the expense of going to college. At some universities, the cost could amount to as much as $4,000 a year.

Most scholarships, however welcome, cover only tuition. Very few also cover room and board, books, travel and other expenses.

Today, in the United States, the cost of education beyond high school may be covered by a combination of methods. Scholarships, plus federal or institutional or private grants, loans from colleges, plus low-cost Federally insured state loans or low cost Federal loans, or perhaps also, a work study program or part-time or summer employment, are the ways students are now financing their education.

In Canada, students may meet expenses in similar ways, usually through one or more types of available financial aid. Some of the means may be through scholarships based on academic excellence; bursaries (the Canadian term for grants-in-aid) which are non-repayable sums given to needy students with satisfactory scholastic achievement; loan programs from governmental or university sources or through chartered banks with their own educational loan provisions.

Most of the financial assistance is administered either by the colleges themselves or by the provincial Departments of Education. The types and amounts of financial aid offered by the provincial department of education varies from one province to another.

A student should check with the college business office when applying for admission about the possibility of a package financial arrangement. An education is a major and life-time investment which should be carefully planned. Many American and Canadian colleges regard this as so important that financial aid offices have Student Aid Officers assigned to assist students.

One of the sources of information on colleges which provide these services is **Baron's Profile of American Colleges.** It lists the number and value of college loans; whether the college participates in the National Defense Student Loans or Federally insured state loans; the number of jobs available at colleges and rates of pay; it also indicates what Federal or other work-study programs, freshman grants and scholarships are available at each college. The high school guidance counselor or the public library may have it.

An excellent source of information for undergraduate financial aid for Canadian students is the **National Student Aid Information Service's** two comprehensive volumes in loose leaf form, revised annually. These may be found in most public and university or college libraries.

Catholic students may secure a listing of Catholic universities and colleges, courses offered, staff, enrollment, degrees conferred, student services, library facilities, financial aid, including scholarships, etc., in the 1965 **Official Guide to Catholic Colleges, Institutions and Religious Communities in the United States;** published by the Catholic Institutional Directory Company, and sponsored by the Department of Education, National Catholic Welfare Council. The guide also lists Catholic institutions for students other than college candidates.

This guide may be found in public libraries or through the high school guidance counselor. It may be purchased at $3.95; to order write:

N.C.W.C.
The Official Guide to Catholic Institutions
100 North Village Avenue
Rockville Center
Long Island, New York 11570

(See **Reference Sources for Students and Parents** for more information).

Work-Study or Cooperative Education Programs

Work-study or cooperative education programs are important and satisfying ways for students to finance their education. (This is not to be confused with the U. S. Federal Work-Study Grant program to students from low income families discussed later in this pamphlet.) More than 86 American colleges and universities make use of the National Commission for Cooperative Education work-study program.

The program permits students to work full-time for a number of months and to return to full-time studies for the rest of the year. The number of work months versus study months varies in each college or university using the National Commission for Cooperative Education program. For example, Antioch College's work-study program permits the student to spend six months each in study and work. In other colleges, a student may work throughout fall and winter and enroll full-time in spring or summer semesters, or both.

It takes work-study students somewhat longer to complete their education. However, work-study programs have the advantage of broadening understanding of the relationship between theory and practice. The student's motivation is increased and his concerns about financing his education are substantially minimized.

In addition to Antioch College at Yellow Springs, Ohio, there are work-study programs also in such leading colleges and universities as Northeastern, Boston, Massachusetts; University of Michigan, Ann Arbor, Michigan; Cornell, Ithaca, New York; University of California at Los Angeles and Berkeley; Virginia Polytechnic Institute, Blacksburg, Virginia; Bennington College, Bennington, Vermont; University of Cincinnati, Cincinnati, Ohio; Northwestern University, Evanston, Illinois; Marquette University, Milwaukee, Wisconsin; Massachusetts Institute of Technology, Cambridge, Massachusetts, and others.

For a complete list of colleges with work-study programs write:

National Commission for Cooperative Education
8 West 40th Street
New York, N. Y. 10036

* * *

There are employment possibilities on a temporary or intermittent basis in Federal agencies such as Departments of Agriculture, Commerce, Treasury, Health, Education and Welfare and General Services Administration. Students appointed must be pursuing studies related to the field in which they will be employed, primarily as professional, technical and scientific aids. Applications and detailed information should be secured from these agencies. Students enrolled in universities or colleges with cooperative education programs may find employment opportunities in professional and technical fields with the National Aeronautics and Space Administration. Application and information may be secured from this agency. Air Force and U. S. Army work-study programs are described below.

Air Force Civilian Cooperative Education Programs—Alternating periods of study and practical work experience in an organized program is available to students interested in science or engineering. High school graduates who pass the appropriate Civil Service examinations are eligible in most cases. This is a five year program toward a B.S. degree in which the student enrolls in an accredited college or university with a cooperative education curriculum. Work periods are at one of a number of Air Force bases or installations.

Salary starts at approximately $4,005, with progression to approximately $6,050 per year at the time of graduation. For more information write directly to any or all of the following:

Air Force Logistics Command (MCACT)
Wright-Patterson Air Force Base, Ohio

Air Force Systems Command (SCPCD)
Andrews Air Force Base
Washington 25, D. C.

Office of Aerospace Research (RRPC)
Building Tempo-D
Washington 25, D. C.

Army Civil Service Cooperative Training Plan—A work study program is available to high school students interested in the sciences or engineering. To qualify, the high school graduate must pass the appropriate Civil Service examination. The student can work toward a B.S. degree within 5 years through combining study and work at one of 30 installations in the United States. Starting rate is $3,600 per year with regular promotions to a top of $4,700 per year. Neither the Air Force nor Army Civil Service work-study programs require, nor constitute the fulfillment of military obligations. For more information write:

Deputy Chief of Staff for Personnel
Attn: Office of Civilian Personnel
Department of the Army
Washington, D. C. 20310

* * *

Church related colleges frequently offer work assistance to students through jobs on the campus and in

the community. Often, paid service opportunities are available during the summer. For more information write:

Service Opportunities Information Center
National Council of Churches
475 Riverside Drive
New York, N. Y.

* * *

A student's educational costs can be considerably reduced by enrolling in a city university, a junior college or community college if one is located near his home town. If he takes the regular college course at a junior college, he can change to a four-year college to obtain a bachelor's degree. Or he can attend his state college which is considerably less expensive than prestige colleges.

Part II

HOW AND WHERE TO OBTAIN AVAILABLE SCHOLARSHIPS

Substantial numbers of scholarships are available from a wide variety of sources. There are two categories of scholarships. One is based on merit or achievement; the other is on need.

Merit scholarship recipients are selected through competition. Some awards may be obtained for unusual ability in music, art or science. To qualify for most scholarships based on achievement, in general, the student must be in the upper 25 percent of the high school graduating class. If the student is seeking a sizable scholarship award, then in most cases, he or she must be in the upper 10 percent.

For the second type of scholarship, frequently called grants (bursaries in Canada), financial need is the primary criterion. To qualify the student must first be accepted by the college or must be currently enrolled. Generally, in awarding grants, the needy student whose scholastic achievement is high gets first consideration. However, some colleges offer grants to average students who demonstrate need. Applicants are required to submit family income data.

In Canada, academic achievement is the most important factor, although there are a number of scholarships based on both need and achievement.

Contrary to general belief, scholarships are not easy to obtain, for competition is exceedingly keen. The extent of this competition can readily be appreciated by this example: Out of 850,000 students each year in the United States who compete in the National Merit Scholarship Corporation's scholarship program, only a little over 2,000 receive awards from this source. In addition, a large number of private donors, organizations and corporations require students to be National Merit Scholarship test finalists.

Nevertheless it has been said, and it is probably true, that thousands of scholarships go begging each year, due in part to lack of knowledge of their existence. However, the most important reason that so many scholarships are unclaimed is that a great number of these awards have special requirements—for example, religious affiliation, nationality, or a stipulation that the student must enroll at a religious college. Many corporations offer scholarships to employees or their children. Some awards are conditional: to receive them the student may need to reject all others or limit the amount of other scholarships.

A good many scholarships must be applied toward a highly specialized field; in others the student must be a son or daughter of a member of the organization granting the scholarship. Several organizations offer scholarships to special groups such as Negroes, Puerto Ricans, Mexicans, Indians, Chinese or Japanese.

The high school guidance counselor should be consulted for information on scholarship sources as early as possible. This is because the deadline for most scholarship applications is January 1. Those based on U. S. National Merit Scholarship require preliminary tests during the student's junior year in high school.

It is impossible to list all sources of scholarships since so many colleges, universities, organizations and groups offer them. However, listed here are a few important scholarship opportunities.

Colleges and Universities

The best place to secure a scholarship or to find out about scholarship aid is at the college or university which a student wishes to attend. Scholarships from this source may be based on need, or scholastic achievement, or both. Awards available are normally listed in university or college catalogues ("callendar" is the Canadian term).

Some colleges grant full tuition. Others make up the difference between the costs for the school year and amount which parents or students can afford. Those who make the decision on scholarship aid tend to be more sympathetic to a student seeking scholarships based on need, if the student or the family has made some effort to provide even a small amount of funds.

When judging need, in the United States, many

colleges require parents to fill out "A Parent's Confidential Statement Questionnaire" from which the family's income and assets are evaluated and estimated.

Most colleges recognize that what each family can afford without hardships depends upon a number of factors. The table below serves as a broad rule of thumb for them:

Annual Contribution of Parents

Net Annual Income	Number of Dependent Children (1)	(2)	(3)
$ 4,000	$ 370.00	$ 200.00	$140.00
6,000	780.00	450.00	320.00
8,000	1,260.00	800.00	600.00
10,000	1,830.00	1,240.00	980.00

Allowances are made for special circumstances. In that case the figure would be smaller.

Students seeking scholarship information should write to the Director of Admissions or the Registrar of the college or university of his choice. Applications should be made at the earliest opportunity. Quite often, first applicants stand a better chance. Adequate time should be allowed to meet requirements since it takes time for clerks to process official transcripts of high school records.

Canadian students wishing scholarship and other financial aid information in a given field of study or specialty—for example, philosophy or chemical engineering—can short-cut their search for a $1.00 fee by writing:

National Student Aid Information Service
2149a Yonge Street
Toronto 7, Ontario

State or Provincial Scholarships

A growing number of state governments in the United States and many Canadian provinces now provide scholarships. Some rely on competitive tests; others on good grades plus financial need. In other states or provinces, awards may be offered as an inducement to enter a specialized area in which there is a shortage of trained personnel.

Some state or provincial programs may require the student to attend the college in that state or province.

Scholarships and financial aid programs provided by provincial governments are administered either by the province or through participating universities. The Canadian student, therefore, should write for information to the Deputy Minister of Education in the capital city of the province, or to the university he plans to attend.

Listed below are 14 U. S. state scholarship programs (as of January 1, 1966) and addresses of the administering agencies. If the student's state does not appear on this list, he should write to the State Department of Education in the capital city.

STATE	PROGRAM TITLE	ADMINISTERING AGENCY AND ADDRESS
California	Competitive Scholarships	State Scholarship Commission 520 Capitol Mall Sacramento, California 95814
Connecticut	State Scholarship Program	State Scholarship Commission State Department of Education P.O. Box 2219 Hartford, Connecticut 06115
Delaware	"Right to Education" Grants	Dean of Students University of Delaware Newark, Delaware
Illinois	Competitive Scholarship Program	Illinois State Scholarship Comm. 730 Waukegan Road Deerfield, Illinois 60015
Iowa	Grants-in-Aid $200 to $800	Higher Education Facilities Comm. 826 Des Moines Building Des Moines, Iowa 50309
Kansas	State Scholarship Program	State Department of Public Inst. Topeka, Kansas 66601
Maryland	General State Tuition Scholarships	Maryland State Scholarship Board 310 West Preston Street Baltimore, Maryland 21201

STATE	PROGRAM TITLE	ADMINISTERING AGENCY AND ADDRESS
Massachusetts	Scholarships for Needy and Worthy Students	Board of Educational Assistance 200 Newbury Street Boston, Massachusetts 02116
Michigan	Competitive Scholarship Program	Michigan Higher Education Assistance Authority 702 Prudden Building Lansing, Michigan 48933
New Jersey	Competitive Scholarships	New Jersey State Scholarship Commission P.O. Box 2019 Trenton, New Jersey 08625
New York	Regents General College Scholarships	State Education Department Division of Examinations and Scholarships Albany, New York 12201
Oregon	Cash Award Scholarships	State Scholarship Commission P.O. Box 5175 Eugene, Oregon
Rhode Island	State Scholarship Program	State Scholarship Program, State Department of Education Providence, Rhode Island 02908
Virginia	Undergraduate Scholarships and Loans	State Department of Education Richmond, Virginia 23216

Many of the state and provincial programs require filing of applications by Spring of each year, so American and Canadian students are advised to write for a program description and application form early in the year.

Federal Scholarship Programs

Medical Scholarships—By Fall of 1966, a limited number of scholarships worth $2,500 per year each will be available to students who plan to study medicine. This is made possible by an amendment to the Health Professions Act of 1964 which created a Federal scholarship program for medical students.

Real financial need is the criterion. If the student is currently in medical college or plans to enter by next Fall, he should check with the student aid officer at his college to find out whether the school will participate in the program and how and when to apply for consideration.

Nursing Traineeships: A nurse who plans to prepare for administrative or supervisory positions, or to become a nurse specialist, or a teacher in a hospital or in public health, may obtain a traineeship from the Federal government. Traineeships, made possible through the Nurse Training Act of 1964, may be for full-time academic study or short-term specialized training.

For a list of participating institutions such as hospitals, clinics, schools of nursing, etc., or information on where a nurse may make application for a traineeship, write:

Division of Nursing
U. S. Public Health Service
Dept. of Health, Education and Welfare
U. S. Government, Washington, D. C.

For information on Federal programs for nurses throughout the government, write for Volume 3, No. 4, American Council on Education, 1785 Massachusetts Avenue N.W., Washington, D. C.

Labor Union Scholarships

The American Federation of Labor-Congress of Industrial Organizations: The AFL-CIO scholarship program offers two scholarships a year in each of three geographical areas. One scholarship in each area is reserved for a son or daughter of a current member of a union affiliated with American Federation of Labor-Congress of Industrial Organizations. The other scholarships are unrestricted.

The scholarship program is conducted in cooperation with the National Merit Scholarship Corporation. All applicants must participate in the National Merit Testing Program. From the finalists in each state the AFL-CIO selects six students to receive AFL-CIO

Merit scholarships. The amount of the award is adjusted to individual need set in accordance with the formula of the National Merit Scholarship Corporation. The maximum award is $1,500 per year or $6,000 for four years. See AFL-CIO pamphlet in this kit, **How to Apply—AFL-CIO College Merit Scholarships.** For the AFL-CIO Scholarship Kit, write to:

Lawrence Rogin, Director
Department of Education
AFL-CIO
815 16th Street N.W.,
Washington, D. C.

Other Labor Organizations—The AFL-CIO and all its affiliated International Unions, city central bodies and state federations will spend over $1,250,000 in scholarship awards in 1966. Most scholarship programs offered by International Unions, their districts or regions, local unions or joint boards are generally for members or children of members only. A few, however, offer scholarships to young people in the community as a public service. The student may find it fruitful to contact unions in his community to find out about scholarship programs at the local or international level. The classified section of the telephone directory lists labor unions.

In most localities in the United States, there are AFL-CIO city or county central bodies and state AFL-CIO federations with which most local unions are affiliated. Most Canadian local unions likewise are affiliated with CLC (Canadian Labour Congress), Labour Councils and provincial CLC Federations.

Each year more of these bodies establish scholarship programs. Some are for young people in the community, others are limited to children of members of affiliated unions. To find out if these organizations offer awards, a parent who is an IUE member should check with his local union officers or with the city central body or state AFL-CIO federation. A Canadian IUE member can contact the Labour Council or provincial CLC Federation for information. Most IUE local unions are affiliates of these bodies.

American Federation of Musicians Annual Musical Talent Grants. Approximately 100 music scholarships are granted annually to young men and women, ages 16 to 23, in the United States and Canada. They need not be sons or daughters or members of the Musicians Union. Scholarships are worth a total of $600 each. Awards are made by the local unions of the American Federation of Musicians in the amount of $300 and matched by the parent organization, the American Federation of Musicians in the amount of $300.

Entrants must be trained to play violin, viola, cello or string bass. Candidates must attend auditions in their area and scholarships are awarded individually after Musicians Union judges make their decisions.

American and Canadian winners will attend the International Congress of Strings held on the campus of Michigan State University at Lansing, Michigan, from June 27-August 21. This is a splendid opportunity for talented young people because the Congress of Strings provides coaching, instruction and inspiration by the distinguished conductors under whom the young people perform.

Many of the Musicians scholarship finalists secure contracts with large symphony orchestras, in a number of leading cities. Some of the finalists who have not been offered positions by symphony orchestras get additional scholarship aid to prepare them for a career in music.

High school and music students should contact the local American Federation of Musicians if they wish to be entered as candidates. The address may be obtained in the telephone directory in the student's city or nearest city. For general information write:

Mr. Stanley Ballard, Secretary
American Federation of Musicians
220 Mount Pleasant Avenue
Newark 4, New Jersey

Veterans' Organization Scholarships

American Legion Scholarships—Notable among scholarship programs are those offered by the American Legion or some of its state and local posts. Individual posts and auxiliaries in the hundreds offer awards to students in their communities. State Departments of the American Legion and Auxiliary are also good scholarship sources.

A national high school oratorical contest is held annually by the American Legion. Four finalists receive scholarships of from $500 to $4,000. Participants may win, in addition, one of the several hundred scholarships awarded by district and state posts.

The Legion's Auxiliary also awards scholarships of $1,000 each, annually. Candidates must be daughters of deceased veterans in their senior high school year or graduates of an accredited high school who have not yet attended college. The award is based on need.

The American Legion, through its "Eight and Forty Tuberculosis Nursing Scholarship Fund," offers awards of $1,000 each. The fund was set up to assist nurses who seek advanced training for administrative, supervisory or teaching positions. The deadline for applications is June 1 of each year and awards are an-

nounced July 15. For more details on how to qualify and to apply, write:

Eight and Forty Scholarship Chairman
American Legion, Box 1055
Indianapolis, Indiana

Contact local Legion posts to find out if they sponsor scholarships and how to qualify.

AMVETS—Scholarships up to $2,000 are awarded to high school seniors who are children of totally disabled veterans of World War II or the Korean War. For additional information, write:

AMVETS National Headquarters
Post Office Box 6038
Mid-City Station
Washington, D. C.

Church-Sponsored Scholarships

Archdiocesan Scholarships—Catholic University of America is the National Pontifical University under the direction of the Bishops of the United States. Twenty-seven scholarships (one in each archdiocesan province) are offered annually to all Catholics who are members of the graduating class of any high school. Each scholarship is for four years and has an annual value of $1,200.

Scholarships for music have an annual value of $1,300. (If in a five-year program, students receive tution for the additional year.)

The student must be able to meet other expenses such as board and room, books, etc. Criteria are high scholastic achievement, based on SAT College Entrance Examination Board and three achievement tests including English composition.

Candidates must apply to the College Entrance Examination Board office in their area to take the Scholastic Aptitude Test in December or January. Application for the test—with fee—must be made to the College Entrance Examination Board, and not to Catholic University.

For scholarship application write:

The Registrar and Director of Admissions
The Catholic University of America
Washington, D. C. 20017

Lutheran Church in America Merit Scholarships. Limited to children of Lutheran church members who become finalists in the National Merit Scholarship Competition. They are eligible only if they enter one of the four-year Lutheran church colleges. Awards $250 to $1,500, determined by need. For more information, write:

Lutheran Church in America Education Fund
231 Madison Avenue
New York, N. Y.

The Aid Association for Lutherans All-College Scholarship Program. Scholarships ranging from $200 to $1,500, renewable, are offered. Apply by December 31 to:

Educational Testing Service
Princeton, New Jersey

For information on how to qualify write:

Aid Association for Lutherans
Appleton, Wisconsin

National Methodist Scholarship Program. Limited to Methodist students who wish to enter an accredited Methodist college or university. Awards cover tuition and fees up to $500, on a one year basis, renewable once. Write to:

The Methodist Church
Box 871
Nashville, Tennessee

American Baptist National Scholarship Program. The student must have been an active member of an American Baptist Church for at least one year. Criterion is applicant's need and he must be nominated by the student's church by November 1 of his senior high school year and take the college board tests by December of the same year. Write:

National Scholarship Program
American Baptist Board of Education and Publication
Valley Forge, Pennsylvania

Reformed Church in America Scholarship. Must be members of Reformed Church, but need not be committed to church-related vocations. Funds are distributed to these colleges: Hope College, Holland, Michigan; Central College, Pella, Iowa and Northwestern College, Orange City, Iowa. The colleges then make awards from $300 to $500 on the basis of outstanding ability and need. For more information write:

Reformed Church in America
475 Riverside Drive
New York, N. Y.

Scholarship Competition for Presbyterian Colleges. Must be a member of the church in top one-fourth of high school, junior high school class or recent

graduate not yet in college. Awards up to $500, renewable. Write:

Competition for Presbyterian Colleges
Presbyterian Church, U. S.
Box 1176
Richmond, Virginia

Samuel Robinson Scholarships. Any undergraduate student regardless of religion is eligible if he attends one of 52 colleges related to the United Presbyterian Church. For information on how to qualify and location of these colleges, write:

Office of Educational Loans and Scholarships
425 Witherspoon Building
Philadelphia, Pa.

National Scholarships

National Merit Scholarship Program. Sponsored by the National Merit Scholarship Corporation, scholarships are from a minimum of $100 to a maximum of $1500 per year or $6,000 for four years. In addition, an important service is rendered—winners of National Merit Scholarships are eligible for special scholarships offered by private organizations and colleges. Need plays a large part in the amounts awarded.

To qualify, the student must participate in the National Merit Testing Program. This is usually held in the Spring of the year in most high schools in the second semester of the junior year or first semester of the senior year.

Students who score highest in the qualifying tests in each state become the semi-finalists. Semi-finalists take a second examination. Time, date, place and additional information is provided by the National Merit Scholarship Corporation.

It may be advisable to take the National Merit Scholarship Qualifying test even though the student may be doubtful about becoming a finalist. The names and scores of the semi-finalists and a list of 35,000 Commended Students are sent to colleges each year.

Should a student apply for a scholarship based on need, the fact that he or she took the test and rated well would have an important bearing. Colleges prefer to award scholarships to needy students whose scholastic achievement is high.

The student should consult the high school guidance counselor on how to apply and to find out when the tests will be held. If the high school is not a member of the National Merit Scholarship Program he may participate as an individual. For more information write to:

National Merit Scholarship Corporation
990 Grove Street
Evanston, Illinois

Write, also for pamphlet, **Student Information Bulletin,** at the same address. It describes the program, procedure, test rules, etc., and lists several pages of private organizations and corporations which sponsor National Merit Scholarship programs.

Negro students taking the National Merit Scholarship Test may obtain college advisory services from:

National Scholarship Service and Fund for
Negro Students
6 East 82nd Street
New York 28, N. Y.

NSSFNS enables Negro students to compete for supplementary financial aid in addition to qualifying for Merit Scholarships.

National Honor Society Scholarship. Awards are from $500 to $6,000. Applicants must be high school seniors and members of the National Honor Society. Consult high school counselor or principal on how to apply.

General Motors College Scholarship Plan. Any high school senior is eligible, but must be U. S. citizen. As many as 400 undergraduate scholarships in 200 colleges are offered in amounts up to $2,000. Need is criterion. Competition is so keen that early application date is advised. High school guidance counselor should be consulted, or write to:

General Motors Scholarship Plan
General Motors Corporation
General Motors Building
Detroit, Michigan 48202

Westinghouse Electric Corporation—This corporation sponsors the following scholarships:

1. **Westinghouse War Memorial Scholarships** provide $1200 per year to children of employees or to eligible junior employees who are interested in engineering, mathematics and the physical sciences.

2. **The George Westinghouse Scholarships** provide 10 annual awards of full tuition to study engineering, industrial management, chemistry, physics, or mathematics at Carnegie Institute of Technology. Not restricted to children of employees or employees.

3. **In cooperation with the Science Clubs of America** through the "Science Talent Search," scholarship winners receive awards up to $7,500.

For more information, write:

Westinghouse Electric Corporation
East Pittsburgh, Pa.

Western Electric Company, Inc.—195 Broadway, New York, N. Y. Funds are provided by the

company for more than 150 scholarships worth $400 to $1,000 in value, applicable at over 125 participating institutions of higher education.

General Electric Company—Education Committee, Schenectady, N. Y. Loans and scholarships valued from $400 to $500 a year to children of employees.

The General Henry H. Arnold Education Fund—Sponsored by the Air Force Aid Society, scholarships offered are up to $1,000 per year. Need is criterion. Must be unmarried, dependent sons or daughters of deceased U. S. Air Force and Army Air Force personnel. Deadline for applications, January 31, 1966. Write to:

Director, Air Force Aid Society
National Headquarters
Washington, D. C.

Young men and women in their senior year in high school are eligible to apply. Must be U. S. citizens. Applications for scholarships must be requested from the list of colleges and universities included here. Request Lockheed Leadership Fund Scholarship applications from the following:

California Institute of Technology, Pasadena, Calif.
Carnegie Institute of Technology, Pittsburgh, Pa.
Cornell University, Ithaca, N. Y.
Georgia Institute of Technology, Atlanta, Ga.
Massachusetts Institute of Technology, Cambridge, Mass.
University of Michigan, Ann Arbor, Mich.
Purdue University, Lafayette, Ind.
North Carolina State College of the University of North Carolina, Raleigh, N. C.
Rensselaer Polytechnic Institute, Troy, N. Y.
Stanford University, Palo Alto, Calif.

The Cooper Union for the Advancement of Science and Art—More than 350 free tuition scholarships are offered to undergraduate and graduate students in engineering and science and for degree and certificate courses in art and architecture. Competitive tests are difficult; however, once a student is admitted his full-time tuition continues throughout the curriculum as long as high academic standards are continued.

The day sessions scholarship is equivalent to $2,000 for each of the four-year engineering, science, and art curricula or for the 5-year architecture program. Evening scholarships amount to $1,000 a year spread over four or more years.

Criteria are based on aptitude and talent alone without regard to sex, race, creed or economic status. Must reside in the United States. The student must make own arrangements for housing facilities. For more information write:

Admissions Office
Cooper Union
Cooper Square
New York, N. Y. 10003

Colgate University Alumni War Memorial Scholarships—Financed by gifts of Colgate University Alumni, 26 national and regional four-year scholarships are awarded each year on a competitive basis to entering freshmen. Awards are from $100 to $2,750 per year, depending upon need. Criteria are character, performance inside and outside of classroom and promise of successful achievements in college. Assistance continues as long as justified by need and academic standing. SAT (College Board Scholastic Aptitude

Tests) must be taken by December or January. The candidate must apply for admission and with the application must be included the parent's confidential statement. For more information contact:

Director of Admissions
Colgate University
Hamilton, N. Y.

Martin Marietta Foundation—Seven scholarships of $1,100 per year, renewable, are offered at any accredited college and university offering curricula in aerospace. Must be recommended by a counselor. Apply by March 1 to nearest Martin facility in Baltimore, Orlando, Denver or Canaveral.

Martin Marietta Foundation
Scholarship Committee #502
Martin Company
Baltimore, Maryland 21203

Julliard School of Music Scholarships—Grants up to $1,250 in partial or full tuition, some renewable annually, are available. Must be a graduate of accredited high school or equivalent with record of high achievement, particularly in proposed major in music or dance.

Scholarships for Canadians

St. John Ambulance Margaret MacLaren Memorial Fund. One or more scholarships of $1,000 are awarded each year to registered nurses who have proved their ability and are capable of preparing themselves for greater responsibility and knowledge in the field of nursing. For information and application write:

Chairman of Bursary Funds
321 Chapel Street
Ottawa 2, Ontario

B. C. Dentist's Wives' Association Bursaries—Bursaries of $400 each for one year of study at any approved faculty or school of dentistry are offered to pre-dental students. Criteria are academic standing and financial need. Winners are asked to assume the moral obligation of reimbursing this fund when and if circumstances permit. Application should be made to the approved university or school of dentistry by August 1.

Beta Sigma Phi-Canadian Chapter Scholarships—Three scholarships of $1,000 each for one year duration are awarded to students of Honours Course in English. The award is made at the end of the 3rd year on the basis of academic achievement and a confidential appraisal of teachers in English courses. May be applied in any Canadian university which is a member of the National Conference of Canadian Universities and Colleges. Must apply by June 1. To apply write:

Secretary,
Canadian Universities Foundation
75 Albert Street
Ottawa 4, Ontario

Heinz Scholarship Award—One scholarship of $300 for each of the four years of study for a student of Household Economics or Institutional Management. Criterion is scholarship standing or any other qualifying information required by the scholarship selection committee. May be used at any college or university offering a four-year degree course. For information the student should consult the high school principal or guidance counselor by February 1.

Margery Brooker Bursaries—Bursaries totaling $2,500 divided among students (number variable) are granted each year to those taking courses in art at any institution of higher learning. Criteria are high academic achievement and need. The awarding agency is the Winnepeg Foundation of the Margery Brooker Estate. The student should consult the high school principal, counselor, or the financial aid officer if already enrolled in any institution of higher learning.

Canadian Association of Real Estate Boards Scholarships—Two scholarships of $300 to $500 for one year are granted to commerce and business administration students enrolled at any Canadian university or affiliated colleges. Criterion are high scholastic ability and need. Must be citizens of Canada. To apply write:

Executive Secretary
Canadian Institute of Realtors
109 Merton Street
Toronto 7, Ontario

The scholarship programs listed here are administered by the Association of Universities and Colleges in Canada. For further information write:

Dorothy R. Patterson
Director of Awards
Association of Universities and Colleges
75 Albert
Ottawa 4, Canada

Bank of Nova Scotia Bilingual Exchange Scholarships — Six scholarships, three to French-speaking candidates and three to English-speaking candidates, either undergraduates or graduates, are offered for $2,500 each for one academic year. English-speaking winners may attend any Canadian-French language university or college and French-language winners may

attend any Canadian English-language university or college. Colleges or universities selected must be affiliated to, federated with or a member of the Association of Universities and Colleges of Canada.

Nuffelt Foundation Traveling Fellowships for Canadian Trade Unionists. Canadian male or female trades unionists who have shown exceptional ability and whose application is supported by the chief executive official of his union is eligible for a traveling fellowship in the United Kingdom. Two fellowships are granted annually. The candidate may choose any field of study for a period of six months which would improve his usefulness to his own organization.

Grants include first class travel by air and other incidental expenses. If spouse accompanies candidate the expenses will be covered on the same basis for a minimum of three months. In addition, the Foundation will pay a stipend at the rate of £120 per month if single, or £180 if married and accompanied by spouse.

Upon return to Canada, the trade unionist will be expected to submit a report to the Foundation and to his union on his work during the Fellowship. The closing date is January 1 of any year.

American Federation of Musicians Talent Grants—Canadian students are eligible. See section in this manual on Labor Union Scholarships for amounts and to qualify.

Canadian Library Association Scholarships—Two scholarships of $500 and $600 each for one year are granted to students of Library Science. The scholarship is tenable at any accredited Canadian Library School. Deadline for applications is May 10. For applications and information, write:

Canadian Library Association, Room 606
63 Sparks Street
Ottawa 4, Ontario

The Sir James Dunn Scholarships—The Algoma Steel Corporation offers six scholarships per year to students of engineering, science, commerce and business administration. Awards cover full registration and tuition fees up to a maximum of $1,000, plus a grant of $450 payable in installments of $150 each on October 1, December 1 and March 1. An additional grant of $500 is made to the university involved for each scholarship. The duration of the scholarship is one year, renewable for the succeeding three years, depending upon the student's scholastic record. Criteria are scholastic achievement primarily, although need is also considered. Preference is given to employees or their sons. Efforts will be made to provide summer jobs with the company for the winners to earn additional funds. The candidate should consult the school guidance counselor or write for information to:

Scholarship Committee
The Algoma Steel Corporation Ltd.
Sault Ste. Marie, Ontario

Fraternal Organizations

The Knights of Columbus "Pro Deo and Pro Patria" Scholarship Trust for Undergraduate Students. Ten scholarships of $1,000 each are available to members of the Knights of Columbus, and to sons and daughters and brothers and sisters of living or deceased members. In addition, two scholarships of $1,000 each are available to Columbian Squires. (Catholic high school boys sponsored by Knights of Columbus councils) Scholarships will be renewed annually subject to satisfactory academic record.

Criterion is academic excellence. Financial need is not a consideration. Selection will be made on the basis of school record, class rank, recommendation of principal or headmaster and the results of the College Entrance Board (Scholastic Aptitude Test) examinations which will be used as a basis for the scholarship awards. Candidates should apply to the College Entrance Examination Board Office in their area to take the test.

All scholarship candidates must be applicants for admission to the freshman class at Catholic University, Washington, D. C., or must have been accepted there as freshmen.

Admission and scholarship application forms may be requested from:

The Registrar and Director of Admissions
The Catholic University of America
Washington, D. C. 20017

Knights of Columbus Educational Trust Fund—Scholarships are available to children of members who were killed or wholly or permanently disabled in the Korean War. Eligible students must enroll in Catholic universities or colleges. State or local Knights of Columbus often offer scholarships. For more information write:

Knights of Columbus Educational Trust Fund
Drawer 1670
New Haven, Conn.

B'nai B'rith Youth Organization Scholarships—**The Anita Perlman** Scholarship offers two awards at $200 for one year to members of the B'nai B'rith Girls. To qualify, the student must have shown outstanding leadership in the organization and have financial need. The scholarship may be used in any field of study at any college. Application deadline is May 15.

BBYO Academic Scholarship Award. A scholarship of $200 will be awarded each year to a deserving member of AZA. (Aleph Zadek Aleph) The student must have need and a good scholastic record and must have participated in the activities of the B'nai B'rith Youth Organization. Along with the application the student must also include a financial statement and official transcripts of undergraduate records and three personal references, one of whom must be his Regional or District Director. Deadline for application is April 15. For application form and further information contact:

National B'nai B'rith Youth Organization
1640 Rhode Island Avenue N.W.,
Washington, D. C. 20036

Jewish students already in college should contact the Hillel Foundation Director on their campus for scholarship information.

Elks National Foundation Scholarship—Awards from $700 to $1,500 are granted each year in the "Most Valuable Student" contest. Any student in the high school graduating class or any undergraduate (except senior) of a recognized college is eligible. The criteria are scholarship, citizenship, personality, patriotism, leadership, perseverance, general worthiness and financial need.

The scholarships are in the form of certificate of award conditioned upon enrollment in an undergraduate course in a recognized college or university. The student must not accept any other scholarship assistance in excess of $1500. However, loans are not considered in this calculation. April 1 is the deadline for applications. Requests for information and blanks should be addressed to:

John F. Malley, Chairman
40 Court Street
Boston, Mass. 02108

De Molay Foundation—Children of members or former members of the Order of De Molay are eligible for grants up to $600 a year or loans at 3 percent interest up to $1200 per school year. For information write:

De Molay Foundation
201 East Armour Boulevard
Kansas City, Mo.

Special Groups

National Jewish Welfare Board—A number of scholarships, fellowships, work-study, plans, loans, field work stipends and fellowships are available through various local Jewish Community Centers and foundations. Areas are limited to social workers whose career will be to work within Jewish Community Centers and Young Men and Young Women's Hebrew Association fields.

Practically all of the financial aid plans are available for first or second year university social work students and most recipients are permitted to apply and receive additional scholarship aid from other sources. Grants are usually for one year, usually renewable for a second year.

Many of the local and regional plans require the recipient to accept employment for two years at the center or in one of a group of agencies making the grant following graduation or completion of studies. National Jewish Welfare Board's Personnel Service has compiled a directory called "Scholarships-Fellowships-Work-Study."

Plans for Graduate Social Work Education—For more information or to order the pamphlet, write:

Henry B. Stern, Personnel Consultant and Recruiting
National Jewish Welfare Board
Personnel Services
145 East 32nd Street
New York 16, N. Y.

Another publication, **"Social Work, Fellowships and Scholarships in the United States and Canada"**, price $1.50—lists other programs of financial aid. Order from:

National Commission for Social Work Careers
345 East 46th Street
New York 16, N. Y.

John Hay Whitney Foundation—Fifty Opportunity Fellowships are available for graduate study in the creative arts, apprenticeship in agriculture, industry or labor, primarily, but not exclusively, for study in the U. S. Awards are from $1,000 to $3,000 for one year. Must be citizens of the United States of outstanding academic achievement with racial or cultural backgrounds among the following: Negro, Spanish-American, American Indian, residents of Guam, Puerto Rico, Samoa, the Virgin Islands, the Appalachian and Ozark Mountain areas and the Trust Territories. Applications must be made by December 15. For information write:

John Hay Whitney Foundation
111 West 50th Street
New York, N. Y. 10020

Scholarship Service for Students of Spanish-American Background—Grants, varying in size, according to need and availability of other sources are available to students of Spanish ancestry who are citizens of the United States. Applicants must be in attend-

ance at regionally accredited college or university, of good character, have promise of successful academic achievements and must demonstrate financial need. For application forms and further information, write:

Field Director, United Scholarship Service,
Room 20
1452 Pennsylvania Avenue
Denver 3, Colorado

National Achievement Scholarship for Negro Students Program—Administered by the National Merit Scholarship program, more than 200 four-year college scholarships are awarded annually to outstanding Negro students. Awards are from $250 per year to $1,500 per year, and within limits are intended to provide funds for the winners to attend college for four years. The award may be used at any United States accredited college or university. For information on how to qualify write:

National Merit Scholarship Corporation
990 Grove Street
Evanston, Illinois 60201

Japanese-American Citizens Annual Scholarships—The American Citizens League provides seven annual scholarships to high school graduates of Japanese ancestry. One grant is at $300, two at $250 and four supplemental scholarships of $200. Nominees are sponsored by local Chapters of the League. For information, contact:

Masao W. Satow, National Director
Japanese American Citizens League
1634 Post Street
San Francisco 15, California

Danish Brotherhood in America Scholarships—Four scholarships a year are awarded to members in good standing in amounts of $250 per year. Scholarships are renewable each year up to a total of four years on the basis of satisfactory work. Criteria are academic achievement, need, school activities and willingness to work way through school. For further information and application forms write:

Scholarship Committee
Danish Brotherhood in America
8536 25th Avenue N.W.,
Seattle, Washington 98107
or
Scholarship Committee
Danish Brotherhood in America
908 W. O. W. Building
Omaha, Nebraska 68102

Sons of Italy in America Scholarships—Awards of $300 for one year are offered by this organization to members or direct descendants of members in good standing for any field of study at any accredited college or university. Criteria are scholastic achievement, need, community and school activities and recommendation of principal or advisor. Application deadline is March 15 of any academic year. Contact local chapters of Sons of Italy in America.

Association of the Sons of Poland—One annual scholarship of $500 is awarded to a male and female member who have been members of the association for at least two years. For information write:

Alexander Sudnik, Secretary-Treasurer
Association of the Sons of Poland
665 Newark Avenue
Jersey City, N. J.

Amerpol Club awards one scholarship annually to a male student of Polish descent entering college who is a resident of Hudson County, N. J. Contact Alexander Sudnik, Trustee at the address above.

Part III

SCHOLARSHIP, OTHER ASSISTANCE NOT REQUIRING COLLEGE DIPLOMA

A large number of high school graduates do not plan to go to college and many who do can only count on two years at most. Yet additional years of post-high school education are required to prepare for a professional, semi-professional or technical career or vocation. In many fields of specialized training students are charged as much in tuition fees per year at private institutions as they would pay for a year in college. Most of these students come from families that are hard-put to raise funds to finance post-high school education.

Scholarships and other financial aid are available through trade or professional associations, the vocational or technical institutions themselves or through the Federal government. These are not as numerous as college scholarships, however.

Most of the professional, technical or vocational scholarships require study at a specific institution; others, including Federal loan and grant programs, require study at accredited schools. In any case, if at all possible, the student would be well advised to study only at accredited professional, technical or vocational institutions. If in doubt about a school's accreditation, write to the U. S. Office of Education, Dept. of Health, Education and Welfare, Washington, D. C. Students have spent large sums of money for inferior training at unaccredited schools only to experience difficulty later in qualifying for employment in their field.

Contrary to general belief, junior colleges provide excellent, and in some cases, superior technical training at little expense or at considerably less expense than at most specialized private technical schools. Frequently, financial aid can be more readily arranged at a junior college. Students seeking financial assistance should check with the registrar or financial aid officer at the technical school or junior college.

One of the Federal programs may be used in addition to scholarship aid to finance a professional, technical or vocational education. Some of these are the National Student Defense Loan Program, Federal Work-Study Grants, the National Vocational Student Loan Program, the Nursing Student Loan Program and the Cold War GI Bill.

Talented students of music or art will find a somewhat larger reservoir of scholarship opportunities made possible by national foundations and associations, art galleries and schools of art and music. Not all of these scholarships require study at the college level.

Frequently local schools of art or music offer scholarships to talented young people within that area. Museums or institutes with art schools may have Ford Foundation or other grants and access to special funds for scholarships. For example, in Washington, D. C., the Corcoran Gallery of Art, through a Ford Foundation grant, offers scholarships to talented Washington area high school graduates. Scholarship information may be secured through the schools of music or art in the student's home area or city nearest him.

Youths seeking apprenticeship training should apply to the appropriate labor union or an accredited vocational training school. Only high school graduates or those who have passed a high school equivalency test are eligible for apprenticeship training. While on the job as an apprentice, the young worker earns about half the journeyman's rate, between $1.40 and $1.50 an hour, with increases every six months. Students requiring information about apprenticeable and skilled occupations should consult the high school guidance counselor or the nearest State Employment Service.

Scholastic Magazine—Awards involving tuition for a year to one of 60 art schools and colleges are made under the auspices of the magazine. Awards are also made to winners of creative writing and photography competitions. For more information, consult the high school guidance counselor or write:

Scholastic Magazine
50 West 44th Street
New York, N. Y.

The 15th Annual Student Award—Sponsored by Broadcast Music, Inc.—Awards are for compositions, vocal or instrumental, submitted by students. Applicants may be enrolled in accredited public, private or parochial high schools, in colleges, music conservatories, or engaged in private study of music. Entry deadline is usually by February of any year. Entrants must be under 26 years as of December 31. Write to:

Oliver Daniel, Director
SCA Project
Broadcast Music, Inc.
589 Fifth Avenue
New York, N. Y.

General Federation of Women's Clubs—1734 N Street N.W., Washington, D. C.—In cooperation with Hallmark Cards, Inc., the federation sponsors an art talent contest. Three scholarships ranging in value from $600 to $1,000 are available to be applied at an approved school of arts or college.

The John F. and Anna Lee Stacey Scholarship Fund—One year scholarship in art up to $3,000 will be awarded to one to three applicants. The award is available to American men and women who are citizens, age 18 to 35, without regard to sex, marital status, race, creed or color.

The purpose of the scholarship is to foster a high standard in the study of painting, form, color, drawing, design and technique. Applicants must show an affinity for the classical tradition in painting and design. The last date for entries, including photographs of work, letters of reference and a written plan of the candidate's aims are required by November 1. Announcement of the awards is made December 1. For more information write:

The John F. and Anna Lee Stacey Scholarship Committee
P.O. Box 411, La Quinta, Calif.

Mayer School of Fashion Design—Four scholarships of $860 each are granted to the highest ranking applicants. There are eight scholarships of $430 applied toward half of the tuition. Eligibility: Must rank in the upper one-third of the high school graduating class and be recommended by a guidance counselor, sewing teacher or art teacher. Applicants are required to take competitive examination, given by appointment only at the Mayer School of Fashion Design. For more information and application write:

Mayer School of Fashion Design
64 West 36th Street
New York, N. Y. 10018

The Juliette A. Southard Scholarship Award—sponsored by the American Dental Assistants Association. High school graduates who are citizens of the United States or Canada who enroll in an approved dental assistant education program are eligible for scholarships in this field. Application may be by letter to the Scholarship Committee stating their interest in a career as a dental assistant and reasons for applying for a scholarship.

Applicants will be judged on academic achievement, need, character and citizenship. Awards to the winning applicants will be made on a semi-annual basis directly to the applicant's school. The application must be accompanied by official transcriptions from the school and should be in the hands of the Scholarship Committee by August 1. For application and information, write to:

Merle Andrews, Chairman
J.A.S. Scholarship Committee
1167 Illinois Avenue, S.W.,
Huron, South Dakota

American Institute of Baking—For young men who wish to pursue a career in baking, this institute offers ten scholarships annually. Awards of $750 each, plus $300 living expenses, provide tuition in a 20 week course in Baking Science and Technology. Criteria are educational achievement and financial need. Applicant does not need to be in the industry, but if in industry, must be available for employment wherever the best employment opportunity exists. For information, write:

The Registrar
American Institute of Baking
400 East Ontario Street
Chicago, Ill.

William Walmsley Scholarships—Scholarships offer tuition and living expenses for the 20 week course to those interested in a career in baking. Criterion is need. The student must be a high school graduate, preferably from a trade or vocational high school with experience in the baking division of a vocational school. Those interested in applying, write:

The Alumni Association
American Institute of Baking
400 E. Ontario Street
Chicago, Ill.

Business School Scholarships—Scholarships are available through a number of business schools. The United Business Schools Association authorizes its member schools to issue funded, work and general scholarships. Upon request, this organization will send a list of the business schools offering scholarships so that

students may write directly to the school. For such a list, write to:

Mr. Richard A. Fulton, Executive Director
and General Counsel
United Business Schools
1518 K Street N.W.,
Washington, D. C.

Aspen Music Festival and Music Scholarship Assistance—Sponsored by the Music Associates of Aspen, Inc., the scholarship provides non-competitive opportunities for high school music students. Average awards to eighty students amount to $225 per nine weeks term, but there are some scholarships amounting to the value of $815 for the nine weeks.

The students must be 15 years of age or older, have obvious talent, but must demonstrate need of aid and be recommended by two or more reputable music teachers. Application deadline is April 15 of each year. A confidential financial statement must accompany a written application. For further information write:

Executive Director
Music Associates of Aspen, Inc.
111 West 57th Street
New York, N. Y. 10019
After May 25, address requests for information to:
Box AA, Aspen, Colo.

Educational Opportunities in the Armed Forces

If a high school graduate, or even a high school drop out decides to enlist in the armed forces, it need not be the end of ambitions for higher education. In fact, it can be the beginning of rich educational opportunities. Branches of the Armed Forces offer educational assistance from elementary and technical education to a complete college education.

While drawing full pay, a member of the Armed Forces may arrange to study at a college, university or technical institution. In return for extended military service, 75 percent of the cost of such education is financed by the Armed Forces. Extended military service may be from two to four years, depending upon the duration of studies. Some selected educational assistance programs are:

U. S. Armed Forces Institute (USAFI)—All active duty service personnel are eligible for educational assistance while in any branch of the armed forces. Some of the subjects, such as vocational or technical training or make-up courses to qualify for high school equivalency tests, may be held on the base and at no cost, or at reduced fee for group, extension and correspondence courses. The field of study may be any course from elementary school subjects through the second year of college. For further information contact any recruiting office, or if already in the armed forces, the education officer should be consulted.

U. S. Navy Enlisted Scientific Education—Navy or Marine Corps enlisted men and women who are high school graduates may obtain a Bachelor of Science degree in science or engineering at government expense. To be eligible, he or she must be 21 if in the Navy, 17 if in the Marine Corps, and must pass qualifying examinations. While studying, qualified enlisted men and women get full pay, allowances, plus tuition and other fees. They must complete Officers Candidate School and serve four years after receipt of commission. For further information write:

Navy or Marine Corps
Recruiting Office
Washington, D. C.

U. S. Navy Occupational Therapist Student Program—Single young women, age 21 to 31½, already enrolled in an approved clinical occupational therapy program, are eligible for awards and pay up to $338.58 per month for study toward a certificate or degree in occupational therapy. To qualify, students must commit themselves to two years of active military duty after termination of training.

U. S. Navy Physical Therapist Student Program. Within 12 months of completion of approved course in physical therapy, single women ages 21 to 31½ are eligible for awards and pay allowances of $338.58 per month. This program prepares young women for a B.A. degree in physical therapy. However they must commit themselves for two years active military duty in this area. For further information write to:

Bureau of Medicine and Surgery
Navy Department
Washington, D. C.

U. S. Navy Nurse Corps Candidate Program—Awards include tuition, books, room and board plus $99.37 a month until six months before completion of degree requirements, at which time pay increases to $222.30 a month when candidates are commissioned. Single women, age 20 to 29 are eligible, and must have a high school education and be in the sophomore or junior year of nursing school. Studies must be toward a degree at an accredited school of nursing. Candidates are obligated to serve two years of active military duty if awards are for twelve months or less; three years if

awards are for more than 12 months. For more information, contact:

Bureau of Naval Personnel
Navy Department
Washington, D. C.
Attention: Pers-B623

U. S. Armed Forces Educational Programs for Nurses—Men or single women entering a nursing career are eligible for educational assistance in nursing.

Army Student Nurses: Men or women who complete the second year in a professional nursing school may enlist in the Army to qualify for continuation of studies in their respective school, for up to 24 months. Awards are from $99.37 to $338 per month during their junior and senior years. If enrolled in a four year college nursing program, the Department of the Army pays tuition, books and incidental fees, when qualified students are appointed 2nd Lieutenants, Army Nurse Corps (ANC) and serve two or three years, depending upon education aid received.

Walter Reed Army Institute of Nursing—High school students of high scholastic achievement are eligible to apply during the last semester of their senior year for a four year program leading to a Bachelor of Science Degree. Must be single, U. S. citizens, and between 17½ and 23½ years of age. For further information, write:

Bureau of Medicine and Surgery
U. S. Navy Department
Washington 25, D. C.

Navy Nursing Education Program—Navy enlisted women who are high school graduates with one year of active duty may qualify for educational assistance in this program. Awards include pay of $99.37 per month plus tuition, books, room and board and uniforms while attending any accredited collegiate nursing school for up to four years. They are committed to serve a year on active duty for each year of school. Write:

Bureau of Naval Personnel
Navy Department
Washington 25, D. C.

Part IV

GRANTS, RELATED AID AND VARIOUS OTHER AVAILABLE LOANS

The term "grant" is frequently used interchangeably with scholarship based on need, or sometimes called "scholarship aid to needy students". Listed are federal grants, related aid and funds available to students from private organizations and religious groups.

Educational Opportunity Grant. Title IV-A of the Higher Education Act of 1965 provides grants ranging from $200 to $800 per academic year, but is limited to four academic years. An additional $200 may be granted if the student is in the upper half of his class during the preceding college year.

The grants cannot exceed one-half of the sum provided the student from other sources such as other grants, loans, scholarships, etc.

There are four eligibility requirements.

1. The student must be accepted or currently enrolled as a full-time student, in good standing and full-time attendance.
2. He must show evidence of creative or academic promise and can maintain good standing.
3. He must be of exceptional financial need.
4. The student would not have been able to pursue his education at an institution of higher learning without the grant.

Need is determined by the source of the student's income and assets or income and assets of those who support him.

When the student applies for admission to one or more colleges, he should ask the student aid officer if the college will be participating in the program. Effective date of the program is September, 1966.

Federal College Work-Study Grants—A $500 per year grant is awarded to students from low income families who are in need of earnings in order to pursue their studies. This is made possible through the Economic Opportunity Act, and amendments to the Higher Education Act of 1965.

Federal grants are made to participating accredited higher education institutions to assist in the operation of work-study programs. Students are required to enroll for full-time study and the Act limits the hours students may work to 15 hours a week. The college is obligated to make efforts to provide jobs in line with the students' major studies.

Participating higher educational institutions may be accredited four-year or two-year colleges or schools of nursing or technical institutions which provide not less than a one-year program. The latter is important since it helps needy students who do not plan to go to college, but must prepare for gainful employment. The student should write to the Student Aid officer, at the school to which he is applying, for information and eligibility under this program.

Social Security Act Amendment to Title II, Section 202—A monthly stipend up to $110 is available to students who are in, or entering an accredited college, if the wage earning parent is deceased, totally disabled, or over 62 and unemployed. The monthly stipend continues up to the 23rd birthday. Until 1965, the age limit was 18. The nearest Social Security officer should be contacted for information. **Many students are entitled to retroactive payment and should telephone the Social Security office to find out if they qualify.**

Veterans Administration (War Orphans)—Students who are entering, or are currently in college, are entitled to monthly payments until 21 years of age if they are children of deceased veterans or children of veterans with 50 percent disability. The surviving parent or guardian must notify the Veterans Administration that the student plans to continue his education. **This is important.** Otherwise benefits automatically terminate at age 18.

Federal Low-Interest Insured Loans to Students—Title IV, Student Assistance of the Higher Education Act of 1965 sets up a program whereby state and private non-profit institutions and organizations

are encouraged to offer low-cost student loan programs. The Federal Government pays the interest to the participating organization, or institution while the student is in school and when repayment begins, pays interest up to 3 percent. Maximum overall interest is set at 6 percent simple. The student begins repayment one year after completion of studies, at 3 percent on the unpaid balance.

Student borrowers must come from families whose adjusted incomes are under $15,000. In determining "adjusted income", a number of factors are considered such as family size, current indebtedness, personal assets, or members of the family presently in college or planning to attend. A student may borrow form $1,000 to $1,500 per academic year for as long as six years of study at an accredited institution of higher learning, with a maximum of $5,000 or a maximum of $7,500 for graduate or professional studies.

Credit unions may also participate under Title IV, Part B, but only to the extent of 10 percent of their assets. IUE members should consult their credit unions to find out if they plan to participate, and perhaps to urge participation. Meeting the cost of post-high school education is now one of the major economic problems of workers' families, a problem the credit unions can help to resolve.

Canada Student Loan Program—Passed July, 1964. The Federal government guarantees the loans to students through chartered banks, but the provinces administer the program. Quebec residents are not eligible since that province does not participate in Canada Student Loan Program. Quebec has its own loan program.

Although eligibility for the loan is dependent upon need, the definition of need or adjusted income is currently being worked out. The loan is repayable at 5¾ percent, six months after graduation from college or after leaving college, up to a 10 year period. There is a repayment sliding scale. For example:

Amount Repayable	Within
$1,000	5 years
$1,800	6 years
$2,600	7 years
$5,000	10 years

National Defense Student Loan Program—Enacted in 1958, makes possible low-cost loans to needy students. To qualify, students must attend or enroll in a participating college. For every $9.00 provided by the Federal government, the participating colleges match it with $1.00. Students may borrow up to $1,000 per year to an aggregate of $5,000. Graduate students may borrow up to $2,500 per year for an aggregate of $10,000. If already enrolled, students should consult the Student Aid Officer, or the college to which they are applying, to find out if it participates.

Amendments to the Act enable part-time students carrying half the regular academic loan to borrow not only at accredited colleges, but also at junior colleges, and post-high school business, vocational and technical schools.

Private, non-profit institutions may participate if they match Federal funds. Students who teach later may have 10 percent per year for five years written off their loan. If they teach later in an area with a high concentration of low-income families, they may apply for cancellation of the unpaid balance at 15 percent per year. No interest accrues during education. When repayment begins after completion of education, interest is 3 percent on the unpaid balance with 10 years to repay.

The Nursing Student Loan Program is similar to the provisions of the National Defense Student Loan Program, except that the interest rate is higher. It ranges from 3 to 4½ percent per year. Maximum loan is $1,000 a year.

If the student works as a nurse, or teaches nurses for the first five years after receiving the R.N., 50 percent of the total loan can be cancelled. The nursing school must be accredited. Students wishing to apply for the low-cost loan under this act should check with the school of nursing to find out if it is participating in the program.

The National Vocational Student Loan Insurance Program known also as the Dent Act, becomes effective in the Fall of 1966. Low-cost loans will be available for vocational training in business, trades, technical and other vocations to students from families with an adjusted income of under $15,000. The student may borrow up to $1,000 per year.

The Federal government will advance funds to increase reserves of private insurance programs so that students may have access to low-cost insured loans. Where private insurance low-cost loans are unavailable, the government can insure loans made by commercial banks.

During the student's training, the government pays the interest. After completion of training the student repays at 3 percent on the unpaid balance. After September 1966, the student should consult the technical, vocational or business school at which he is enrolled or plans to enroll, concerning how to go about applying for a loan under this act.

The Health Professions Student Loan Program is geared toward doctors of medicine, dentistry, osteopathy, and optometry, or equivalent degree. Cri-

terion is financial need. The student must be accepted by an accredited medical school, and be a U. S. citizen. If already in medical school, the students must be in good standing. Maximum loan is $2,000 per year.

Interest is 3 to 4½ percent, but repayment begins 3 years after completion of education at medical school over a 10 year period. If the student becomes a doctor in the armed forces or with the Peace Corps, an additional period of grace is extended to 6 years before repayment. Students should check with the college financial aid officer to find out if it participates in this program.

State Student Loan Programs—As of January 21, 1966, 23 states had student loan programs. Loan programs vary greatly from state to state. Some states are in the process of preparing to participate in the Federal Low-Interest Insured Loans to Students, under Title IV-B of the Higher Education Act of 1965; others are already participating. A number of states do not contemplate any change for the time being. For this reason it is advisable to write to the address in your state shown on the list which follows.

If the student's state does not appear on this list, he should consult his high school counselor (if in college, his Financial Aid officer) or he may write to the state department of education in the capital city of his state.

Should the student find that his state has no program at all, he should contact the United Student Aid Funds, Inc. The program is described below. Unless the state loan program participates in the Federal Low-Interest Insured Loans to Students, the interest rate may be as high as 6 percent simple interest, accruable. The student would be better off obtaining a loan guaranteed by the United Student Aid Funds, Inc. and insured by the Federal government at 3 percent interest repayable within 1 year after completion of his college education.

United Student Aid Funds, Inc.—This organization guarantees loans made by the student's home town bank, but does not lend to the student directly. The USAF is the largest privately supported non-profit institution of its kind in the U. S. It maintains a reserve fund contributed by private philanthropists and deposited by colleges.

The United Student Aid Funds, Inc. now has an interim agreement with the Federal government authorizing it to participate in the 1965 Federal Low-Interest Insured Loans to Students, operating in 50 states and in the District of Columbia. Endorsed by the United Student Aid Funds, and with interest guaranteed by the Federal government, this enables students to obtain loans from their hometown banks at 3 percent interest. As in the National Defense Student Loan and the Federal Low-Interest Loans to Students program, the stu-

dent does not begin repayment until one year after completion of his education. The loan is to the student rather than the parent, but student borrowers must come from families with an adjusted income of under $15,000.

Repayment begins one year after the student's graduation. Students under 21 do not need the endorsement of their parents, but do require their signature. For more information, write:

United Student Aid Funds, Inc.
845 Third Avenue
New York, N. Y. 11022

Cold War GI Bill—Passed in early February of 1966. Effective date, June 1, 1966. The bill extends educational and other benefits to veterans who served after January 31, 1955. Veterans are entitled to a maximum of 36 months of training or educational benefits, or a combination of benefits from World War II or Korean GI Readjustment Bill, the war orphan readjustment program, or vocational rehabilitation program for disabled veterans, totaling not more than 36 months.

Benefits are $100 a month for a full-time course; $125 if the veteran has one dependent and $150 for two or more. For a three-quarter-time course, a single veteran is entitled to $75 per month; one dependent $95; two or more, $115. For a half-time course, a single veteran can get $50; one dependent $65; two or more $75.

The veteran must be admitted to an accredited institution (high school, business, vocational or technical). Proof of admission must be sent to the Veterans Administration after which the payments are authorized.

The veteran must complete his education or training within 8 years following his last discharge from active duty after January 31, 1955, or within 8 years after the education section of the Bill went into effect (June 1, 1966).

Educational Aid Fund of the Lutheran Church in America—To be eligible, the student must be an active member of the congregation. Criterion is the student's need. Awards cover tuition and are renewable once. Students should apply to the pastor of their local congregation. For more information write:

Lutheran Church in America Education Fund
231 Madison Avenue
New York, N. Y.

Methodist Student Loan Fund—Student must be a member of the congregation for one year or more. Minimum age is 17. Student must maintain good grade level. Loans start at 1 percent while in college and 3 percent thereafter. Write:

Methodist Student Loan Fund
Department of Student Loans and Scholarships
The Methodist Church
Box 871
Nashville, Tennessee

American Baptist Loan Funds—Student must be a member of the congregation for a year. Must attend an institution of higher education of Baptist denomination or attend one of 125 colleges where there is a Baptist ministry to students. Loans up to $500 a year, and a total of $2,000. Write to:

Student Loan Fund
American Baptist Board of Education
Valley Forge, Pa.

Lemberg Scholarship Loan Fund—Interest free loans are offered to Jewish young men and women who are students at colleges or at institutions offering professional courses in college or theological courses at Jewish Theological seminaries. Criterion is need. An applicant must be sponsored by the director of B'nai B'rith Foundation, or by a regional or metropolitan director of the B'nai B'rith Youth Organization. The application must be accompanied by academic transcripts and letters of recommendation. For more information and application write:

Myron E. Schoen, Secretary
Lemberg Scholarship Fund
838 Fifth Avenue
New York, N. Y. 10021

Part V

INEXPENSIVE REFERENCE SOURCES FOR STUDENTS AND PARENTS

Need a Lift?—Published by the American Legion Education and Scholarship Program Division. Price 25¢. Revised every year, it is one of the best pamphlets in existence. It lists private and Federal sources of scholarships and financial aid available to children of veterans and non-veterans. The pamphlet includes tables of State education benefits such as scholarships, grants, loans, and sets forth eligibility.

For children of veterans there is a listing of national scholarships sponsored by the American Legion and auxiliaries. Included are extensive, easy-to-read tables of educational assistance offered to children of veterans by departments of the American Legion and auxiliaries in each state. The tables define types of educational aid (scholarships or loans), eligibility and where to apply to get further information. Write:

Education and Scholarship Program
American Legion
Indianapolis, Ind.

Student Assistance Handbook—A Guide to Financial Assistance Beyond High School—U. S. Senate Document No. 26. Number 48-105—Revised March, 1965. Published by the subcommittee on education of the Committee on Labor and Public Welfare, and prepared by the Library of Congress. Price, 60¢. This is a most remarkable document, sure to be useful to students and parents. It should also be ordered by every IUE Local Union to have on hand to answer questions about scholarship sources and financial assistance on higher education.

The pamphlet's tables provide valuable sources of scholarships and amounts, loans and grants offered by the state governments and lists those available through private organizations and the Federal government. There is a listing of higher educational institutions which participate in the National Defense Student Loans Program and a grouping of universities and colleges offering work-study programs. A recommended list of selected references is included. When ordering, write:

Superintendent of Documents
U. S. Government Printing Office
Washington, D. C. 20402

Financial Assistance for College Students, by Richard McKee—Price 50¢. This pamphlet lists amounts and numbers of scholarships, loans, employment opportunities and other financial assistance at more than 2,000 colleges and universities. Order from Superintendent of Documents at address above.

The Cost of Four Years of College—Published by the New York Life Insurance Company. Free. A summary of costs of tuition, fees, room and board at most colleges in the United States and Canada is included in this pamphlet. To order, write:

New York Life Insurance Company
Career Information Service
P.O. Box 51
Madison Square Station
New York, N. Y. 10010

A Letter to Parents—Sidney Margolius. No charge. The pamphlet explains the viewpoint taken by most college financial aid officers about ways of financing a college education. Write:

College Entrance Examination Board
Princeton, N. J.

Planning for College, by Sidney Margolius—Price 75¢, 304 pages. This paperback deals with basic information students should know to prepare for college; how to select the college which most fits the student's need, and what tests are required. To order write:

Avon Books
959 Eighth Avenue
New York, N. Y.

Education, an Advantage for a Lifetime—Free. This pamphlet makes estimates of lifetime earnings for those who invest in a college education and gives statistical probabilities on the return for the investment. Write to:

Occupational Outlook Survey
U. S. Department of Labor
Washington, D. C. 20212

What You Must Know About Getting Into College—An Essential Guide for Students and Parents—Dr. William Rubinfeld—Price 60¢, paperback. Long in the field of educational counseling, the author speaks from vast experience. The book deals with the importance of preparation for college as early as the eighth grade and throughout the senior high school year, and in another section for these years there is a time-table of study, special tests and follow-up required in studying college catalogues, and in making applications to colleges.

Stressed strongly is the advisability of utilizing the services of high school guidance counselors early and frequently for a wide variety of advice and information. Described are tests given during the junior and senior high school years which measure aptitudes for study at the college level and the entrance examinations and other tests administered by colleges themselves to determine the student's eligibility for admission. Parents and students will find much useful information in this comprehensive pamphlet. To order, write:

Award Books
Universal Publishing and Distributing Corporation
800 Second Avenue
New York, N. Y. 10017

Colleges With Room For Students—Price 75¢. Survey of openings in four-year accredited colleges, prepared annually by the Editors of Changing Times.

also

No, You Don't Have to Go to College—Price 25¢. This pamphlet describes numerous non-college satisfying and well-paying careers. For either or both pamphlets write to:

Kiplinger Magazine
1729 H Street N.W.,
Washington, D. C. 20006

Post-Baccalaureate Grants and Awards in Music—Published by the Music Educators Conference, a department of the National Education Association. Price $1.00. Well worth the price to a talented student of music who is seeking scholarship and foundation funds. The pamphlet's three sections include 1) an index of grants and awards from sources other than schools; 2) a description of grants, awards and amounts from sources other than schools; 3) institutional aid for advanced studies at the post-graduate level.

Section II has relevance for high school graduates seeking financial assistance for an education in music. Although the title would indicate that the scholarships and grants listed in the pamphlet are mainly for the graduate student, a surprising number are offered to undergraduate music students and high school students.

Section III deals with the types of financial assistance and awards offered at universities and schools of music for advanced study. Some are scholarships in return for duties performed for the institutions; others are offers of teaching assistantships. A few are full tuition grants offered to qualified college graduates.

The Market for Music Teachers—A Placement Consultant's Appraisal. Price 50¢. Reprinted from Music Educators Journal, Music Educators National Conference. The pamphlet evaluates employment opportunities and advancement possibilities for music teachers in the public school system, with some advice to those who plan to teach music at the college level.

A Career in Music Education—Price 50¢. Published by the Music Educators National Conference. Prepared especially for high school students, the pamphlet discusses opportunities for teaching careers in music and what is required to prepare for such a career. All or any of the above pamphlets may be ordered from:

Music Educators National Conference
1201 Sixteenth Street N.W.,
Washington, D. C. 20036

Directory of International Scholarships in the Arts—Price unquoted. 120 pages. This pamphlet lists awards available in the United States and abroad in painting, sculpture, design, architecture, music, dance, creative writing and the theatre arts. For more information write:

Institute of International Education
800 Second Avenue
New York 17, N. Y.

Let's Be Practical About a Nursing Career—Free. Published annually, this pamphlet lists state approved schools of practical nursing.

Schools of Professional Nursing—Published annually with lists of schools of professional nursing in the United States. Free.

Scholarships and Loans for Professional and Practical Nursing. Scholarships, Fellowships, Edu-

cational Grants and Loans for Registered Nurses.

Both pamphlets are 5¢ each. For any of the above pamphlets write:

Committee on Careers
National League for Nursing
10 Columbus Circle
New York, N. Y. 10019

Directory of Technical Institute Courses—No charge. Lists approved schools and courses. Write:

National Council of Technical Schools
1507 M Street N.W.,
Washington, D. C. 20005

Directory of Business Schools in the United States—Free. Write to:

United Business Schools Association
1518 K Street N.W.,
Washington, D. C. 20005

Guide to Correspondence Study in Colleges and Universities—Price 25¢. This guide provides information about courses by mail and how to enroll. Write to:

National University Extension Association
122 Social Science Building
University of Minnesota
Minneapolis, Minnesota 55415

Directory of Accredited Home Study Schools—No charge. This directory lists accredited schools and courses. Write to:

National Home Study Council
1601 18th Street N.W.,
Washington, D. C. 20009

Summer Vacation Jobs in Federal Agencies—Pamphlet #68. Price 15¢. This pamphlet provides information about summer job opportunities in a number of Federal agencies both in Washington, D. C. and in other areas and how and when to apply. To order the pamphlet, write:

U. S. Civil Service Commission
Washington, D. C. 20415

Planned Training—Your Future Security—Apprenticeship Training For Me? and

National Apprenticeship Program—Both pamphlets write:

Bureau of Apprenticeship and Training
U. S. Department of Labor
Washington, D. C. 20210

Careers in Technical Occupations—U. S. Department of Health, Education and Welfare, Office of Education. Publication number OE-80032, price 5¢. Primarily geared toward the junior or senior high school student seeking occupational guidance, the pamphlet describes a wide variety of opportunities available for trained technicians and the kinds of skills utilized. It also advises the student on how to go about obtaining counseling to determine aptitudes required for technical careers. Order from:

Superintendent of Documents
U. S. Government Printing Office
Washington, D. C. 20402

Baron's Profile of American Colleges—Paperback, $3.95. Listed are the number and value of scholarships, grants, college, state and Federal loans, the universities which participate in the National Defense Student Loans, Federal or other work-study programs and the number of jobs available at each college. This book may be obtained in most public libraries or through the high school guidance counselor. To purchase, write:

Baron's Educational Series
343 Great Neck Road
Great Neck, N. Y.

The National Defense Student Loan Program—The College Work-Study Program—and the Participating Institutions—A long name for a pamphlet, but it provides valuable information. Both programs are described and included is a list of colleges, universities and other institutions of higher learning which participate in these programs. Free.

Get Ready for College and Go—A short brochure which provides thumb-nail descriptions of College-Work Study, National Defense Student Loans, Educational Opportunity Grants and Guaranteed Loans. Also includes a small table on the average cost of college, such as tuition, room, meals on campus, books and supplies, transportation, etc., at high-cost, low-cost, private and public colleges. Free. Both pamphlets may be secured by writing to:

U. S. Office of Education
U. S. Department of Health, Education and Welfare,
Washington, D. C. 20201

Nursing Student Loan Program—Information for Students—This short brochure describes the Federal Nursing Student Loan Program, how to qualify, how much a student may borrow, the interest rate and how to go about applying for the loan. Free.

The Health Professions Student Loan Program—In question and answer form, this pamphlet describes low-interest Federal loan programs, for students who plan to study medicine, dentistry, osteopathy

and optometry. It also explains how to go about applying for the loan, how to qualify and how much a student may borrow. Free. For either or both pamphlets write:

Public Health Service
Division of Community Health Services
U. S. Department of Health, Education and Welfare
Washington, D. C. 20201

Job Horizons for College Women in the 1960's —Bulletin 288—Price 30¢. Published by the Women's Bureau, U. S. Department of Labor. This pamphlet describes career prospects for women who have a college education. Some of the careers described also list salary ranges. To order, write:

Superintendent of Documents
U. S. Government Printing Office
Washington, D. C. 20402

Your Opportunity for a Professional Career in Jewish Communal Service—Price 35¢. The pamphlet, published by B'nai B'rith, describes employment opportunities for social workers, educators, religious leaders, etc., in Jewish community organizations and lists also the salary ranges in these fields. To order, write:

B'nai B'rith Vocational Service
1640 Rhode Island Avenue N.W.,
Washington, D. C.

Your Career Opportunities as a Social Worker in the Jewish Community Centers and Young Men and Young Women's Hebrew Association—Free. This pamphlet describes career opportunities in occupations such as physical educators, nursery school teachers, adult education and cultural arts specialists in Jewish Community organizations. Salary ranges are also included. To order pamphlet, or to obtain more information, write:

Henry B. Stern, ACSW
Personnel Services
National Jewish Welfare Board
145 East 32nd Street
New York, N. Y. 10016

The 1965 N.C.W. Official Guide to Catholic Education Institutions—is published by the National Catholic Welfare Center. Price $3.95, soft cover. The book includes a short section on preparation for a college education, financial aid, admissions procedure, etc. It is valuable, however, for descriptions of Catholic colleges and universities, enrollment, programs, staff, degrees conferred, scholarships and other financial aid (number and amounts), etc. May be obtained at a public library or from a Catholic high school guidance counselor. To order write:

National Catholic Welfare Council
The Official Guide to
Catholic Educational Institutions
100 North Village Avenue
Rockville Center, L. I., N. Y. 11570

Student Aid Annual—Price $5.00. Describes scholarship and financial aid programs at various colleges and universities, percentage of students receiving aid; range of aid received, requirements and application deadlines. It also includes availability of on-campus and off-campus employment and average earnings.

Chronicle College Chart—Price $5.00. In quick easy-to-read chart form, along with universities and colleges are included units required, enrollment period required; distribution of male and female students; fees and tuition, application information; student faculty-ratio etc. Look for either or both at the public library, or high school guidance counselor. It can be ordered by writing to:

Chronicle Guidance Publications, Inc.
Moravia, N. Y.

National Student Aid Information Service (Canada)—This is a large loose-leaf service, revised annually, which may be studied at public libraries, or college libraries. The service catalogues colleges, universities, course descriptions, numbers and amounts of scholarships and other financial aid. An extensive list of scholarships offered by private donors is included.

High school guidance counselors, individuals and organizations may subscribe to this service by writing to:

National Student Aid Information Service
Canadian Scholarship Trust Foundation
2149a Yonge Street
Toronto 7, Ontario

IN CONCLUSION

Recently passed legislation on higher, secondary and elementary education represents giant steps forward. While IUE members can rightfully be proud that through their COPE dollars and activity they had a significant hand in helping to improve educational opportunities for all young people, a critical problem still exists at all levels of education.

The IUE is concerned not only about expanding opportunities in higher education, but realizes that the quality of primary school education must also be vastly improved . The ability of young people to gain admission to college and other institutions of higher learning depends upon this.

Our society is becoming more highly technical in each passing year, where knowledge and information are more valuable and necessary to our nation than manual skills. A high school education is fast becoming pitifully inadequate in preparing our young men and women for the careers, vocations and skills of tomorrow. But unfortunately, most college doors will be closed to the average student upon whom society will depend to fill these needed occupations. It will be the average student who will need special educational assistance and consideration, to enable them to reach their potential usefulness in our technological society.

Colleges today are besieged with admission applications because the high school graduating classes are getting larger each year, with a greater percentage going on to college. By 1980 college and university facilities will have to be doubled to accommodate these young people.

At the present time, prestige universities accept only the upper 5 percent or 10 percent of the graduating class, and other colleges and universities accept only the upper quarter. Even the state universities are being forced to raise admission standards despite efforts to keep the door open even a little.

Increasing costs and rigid admission standards will exclude average and even good students from low-income families while those with higher incomes will have little trouble getting into college. IUE regards the equality of education as vital to a democratic society.

To expand educational opportunities for the average as well as for the exceptional student at financial levels possible for workers' families, and to improve primary and secondary education, will be two of the goals of the labor movement. The COPE dollars, the voter registration campaigns of IUE locals, and the support of liberal candidates, will be needed to assist in obtaining additional legislation to make the American dream of equality of educational opportunity a reality.

crowned Miss Albany of 1972-73 at the annual pageant sponsored by the Albany Jaycees. The winner, who will compete in the Miss Georgia Pageant next summer, is the daughter of Mr. and Mrs. Bruce Gunnels of Albany.

Funds Lack Shuts Heritage

Atl. Journal 3/30/73

AMERICUS, Ga. — Heritage Academy, a local private school, was unable to open this week as scheduled "because we just didn't have enough students registered."

A spokesman for Heritage Academy attributed the institution's apparent death to finances. "Everybody tried it and found out that it was above their means," the official said.

Heritage was launched two years ago with an enrollment of about 280 students, then dropped to some 140 for the last year, it was revealed. Thirty students registered for the 1972-73 term, but it was just not enough to hold classes.

The spokesman, who asked not be identified, said that recently an effort was made to drop from the 12 grades offered the two years of its existence to the first eight grades this fall, but "this didn't work either."

OPERATIONAL costs for last term amounted to $65,000, mostly in salaries. "We had $35,000 to raise above tuition last year, and fortunately we made it. But we just didn't want to chance it again this year," the spokesman said. Last June Heritage Academy graduated eight students.

The academy did not have a headmaster employed for the new term. Tom Mann of Americus, who served in that capacity last year, announced after the close of school that he would not be returning another year.

Families of students who made deposit for this school year will receive refund checks shortly, it was announced Monday. Members of the 12-man board of trustees scheduled an early meeting to close out arrangements concerning the school.

Mercer Slates Yearbook Meet

MACON, Ga. — More than 500 students and their advisers from high schools in Georgia will attend a yearbook seminar at Mercer University Sept. 13.

Robert Hastings of Dallas, Tex., will direct the one-day seminar which will be attended by representatives of more than 100 schools.

2 Suspects At Center of Slaying Probe

BELVEDERE, S.C. (AP) — Sheriff Paul Grant of Aiken County, S.C., says his investigation into the shooting death of a 15-year-old girl and the critical wounding of another youth last week has "narrowed to two suspects."

The sheriff, however, declined any further comment on the slaying of Julia Allace Widgeon of North Augusta, S.C., and the shooting of Gary Jerrell, also 15, of North Augusta.

The body of Miss Widgeon and young Jerrell, both shot in the head, were found on the bank of Little Horse Creek by the boy's father last Thursday.

The girl was found face down in a marshy area of the creek, in Aiken County, and the youth was found lying partially in the creek. Each had been shot behind the left ear.

Jerrell is in critical condition in a hospital and unable to supply any information to officers, the sheriff said.

The two had gone fishing last Wednesday and had been seen by several persons, Grant said. The boy's father went looking for them when they failed to return home, he added.

no Republican opposition in the November general election — was seen as a defeat for supporters of Gov. Jimmy Carter.

Gillis opposed many of Carter's legislative programs during the last Geneal Assembly session while Passmore worked in Carter's successful 1970 gubernatorial campaign.

CARTER FORCES took some consolation, however, in Sen. Bob Smalley's re-election victory in District 28.

The veteran Griffin senator is prop-Carter and was a strong supporter of Carter's controversial governmental reorganization plan that passed during the last legislative session.

Smalley's unofficial total was 7,264 to 6,473 votes for Jonesboro businessman Claude H. Whaley with all ballots counted except for a few absentees.

Gillis carried every county in the 6½-county district except one.

Passmore took his home county of Laurens by about 1,600 votes — 5,900 to 4,300. Gillis won his home county of Treutlen by a similar margin — 1,500 to Passmore's 600.

Gillis had the backing of several black leaders in Georgia, including Sen. Leroy Johnson of Atlanta. He defeated Passmore 1,003 to 568 in predominantly black Washington County where a few precincts were cut off and put in the 20th District during reapportionment last year.

PASSMORE CALLED the black vote the deciding factor in the race.

"I advise Mr. Gillis to be on his toes because I'm starting tomorrow to run again," Passmore said. "We feel like we've laid the groundwork in the six and one-half counties in the district for another campaign."

Gillis could not be reached early Wednesday for comment although a campaign worker said he was elated at the outcome.

The Soperton Democrat came to the Georgia Senate 12 years ago in an uncontested election, and remained unopposed in subsequent re-election bids.

Prior to going to the Senate, Gillis served several terms in the state House of Representatives.

"I believe from the depths of my heart that my record

tempt to upset Hugh Gillis in 1970 as president pro tem of the Senate. The job makes Gillis the second ranking officer (to Maddox) in the upper chamber. As such, he was in a position to influence legislation in a 56-member body that was, and still is, closely divided between Carter and Maddox partisans.

Smalley's victory over Whaley was fashioned with a

'Bug' Raid Trio in M

COLUMBUS, Ga. (AP) — Local law enforcement officers arrested seven persons and seized an undisclosed amount of lottery and gambling paraphernalia in raids Monday night in Muscogee County, Ga., and Russell and Lee counties in Alabama.

The raids, coordinated by the FBI, were aimed at "crippling the 'bug' or numbers rackets which prey on low income bettors," said Robert R. Franck, in charge of the Mobile FBI office.

Walter R. Smith Jr., and Billy G. Arrington, both of Phenix City, Ala., were arrested by Lee County sheriff's officers at a trailer court and charged with possession of lottery paraphernalia. They were released on $1,000 bond each.

Smith also was arrested Aug. 9 by Columbus police on a lottery charge and in March crackdown on lottery he was charged with commercial gambling, possessing no tax paid cigarettes and whisky.

Mamie Bell, Manda Frierson and Glassy Rolf were arrested at their homes in Columbus and charged with commercial gambling, according to Capt. F. R. Guthrey of the Muscogee County sheriff's department.

Guthrey said Mamie B and Glassy Rolf were released under $250 bond each. three are scheduled to appear in Municipal Court Wednesday for hearings.

Phenix City police arrested Lillie B. Griggs and W Reed, both of Phenix City. charged them with possession lottery paraphernalia. E was released on $500 bond lice said.

Franck said no fede

Education

Prep Schools

To Let Some Air Into the 'Hothouse'

The days of the old school tie: The Groton School baseball team around the turn of the century, with Franklin D. Roosevelt, back row center with straw hat, as manager.. Boarding schools long were considered "the Rolls Royce of American secondary education—expensive, exclusive, prestigious"—but many now have fallen on hard times.

The boarding schools — "prep" schools, as they are popularly known—have long been considered the Rolls Royce of American secondary education: expensive, exclusive, prestigious. Largely for children of the upper class, boys' schools like Andover, Exeter, Groton, St. Paul's, Hotchkiss and Lawrenceville have served as jumping-off places for Harvard, Yale, Princeton and other top universities. Boarding schools for girls have played a similar role.

In numbers, the boarding schools constitute only a small segment of what has become a huge national education system. The National Association of Independent Schools lists 215 boarding schools—89 for boys, 38 for girls, 88 coeducational —with a total enrollment of 47,742.

But in academic quality, the boarding schools generally rate high in the over-all secondary-school picture. The teacher-student ratio is low, the intellectual standards are high, and the total program is disciplined and geared toward "prepping" the students for college.

In recent years, many of the boarding schools have fallen on hard times. Enrollments have sagged — meaning a loss of tuition revenue—at a time of rising costs. The result has been the now-familiar increasing financial pressures. At least 14 schools have been forced out of business since 1970, and all but the top few among the others have had to resort to recruiting students—a rare practice in former years. Annual charges, including room and board, range between $3,000 and $4,000.

Last week, Theodore R. Sizer, the new headmaster at Phillips Academy, a school of 900 students in Andover, Mass., issued a call for what amounts to a "new deal" for the boarding schools. In his inaugural address at Andover, one of the nation's oldest and best prep schools, he proposed that the boarding schools become a "complement" to the public high schools by admitting large numbers of students from the public sector—at least for a few months. Mr. Sizer, until recently, was dean of the Graduate School of Education at Harvard.

Mr. Sizer stressed that Andover's constitution established "a public free school or academy" which "shall be ever equally open to youth, of requisite qualification, from every quarter." But he also acknowledged the present plight of the boarding schools. "The general public has little interest in what it calls 'prep schools,' perceiving them as being smug outdated bastions of WASP society," he said.

Historically, the academies were not, in fact, created as the snob-appeal institutions some have subsequently become. Antedating the development of the high schools, they were closer in their original philosophy—as documented in the recent book, "American Nonpublic Schools", by Otto F. Kraushaar—to the democratic views of Benjamin Franklin than to the British public school tradition.

There are two main reasons for today's problems:

First, the income-producing endowment of most of these schools is simply not large enough to handle the rising costs comfortably. Only 14 schools, at the most recent count, have endowments of more than $10-million—and this amount does not produce adequate interest income. Only Exeter and Andover have endowments in excess of $50-million, followed closely by St. Paul's.

Second, there is the rapidly changing lifestyle. Prestige colleges, including the Ivy League, now draw the majority of their students from the public schools, thus reducing the academies' "prepping" advantage. Many adolescents no longer acquiesce in their parents' decisions about their schooling, making it difficult for Dad to ship his son to his "old school." Moreover, youngsters today often feel that "the action" is in the communities—rather than in the scholastic "enclaves" of the academies.

Mr. Kraushaar's nationwide survey of attitudes showed that many students considered the prep schools "too limited and narrow, too dominantly scholastic." They conceived boarding school as "life lived in a total educational hothouse."

"While the private schools have been spared the turmoil that has wracked many urban public schools, the evidence of boredom, grievances, and student impatience with the rigidities of the traditional school is unmistakable," Mr. Kraushaar concluded.

Mr. Sizer addressed himself to many of these problems:

- He announced that Andover would end the "distortion" of having only boys by virtually merging with the neighboring Abbot Academy for girls. (At least six other boys' academies have recently gone coed.)
- He called for a better mix of students, not only by adding the disadvantaged minorities — as has already been done — but by also seeking "sons of small shopkeepers, of policemen, of factory workers."
- He called for close collaboration with the public schools "so that as many students as would benefit from a residential experience—whether for but months or for years—would have the opportunity and financial backing to do so." This type of program, if it were accepted by many academies, presumably would be underwritten in part by public funds and thus would help those prep schools with underutilized facilities.

Mr. Sizer, in looking to the 1970's as "years of retrenchment and retreat for public education," urged the private school leadership to join forces with their public colleagues to defeat the "doom-mongers and budget cutters."

—FRED M. HECHINGER

Paternity Leave

Must He Also Get Morning Sickness?

School boards generally have not considered pregnancy a medical problem. Not only has it been the custom of school boards to compel a pregnant teacher to surrender her job as soon as possible, but the teacher usually has been denied a paid leave during the period immediately following childbirth. And often she has had no guarantee that there would be a job to which to return.

City University of New York is one of a growing number of employers of teachers to take cognizance of this situation. In proposing to do something about it, the university last week was considering a novel approach.

Current policy at the university requires a teacher to inform her department chairman as soon as she knows she is pregnant, to leave without pay at the end of the semester and to stay out of work for an entire semester. The university has the right not to rehire her.

"The way it works now, it's almost as if as soon as you get pregnant you have to get up out of bed and telephone your department chairman," says Dr. Marilyn Gittell of the university's Queens College, the chairwoman of the institution's Advisory Commitee on the Status of Women.

Recognizing a need for change, Chancellor Robert J. Kibbee, at the suggestion of the Advisory Committee on the Status of Women, has asked that the work contract now being negotiated with the university's 16,000 teachers offer not only maternity leaves, but also paternity leaves. Technically, they would be "child-care" leaves. It is not an either-or proposition—that is, it is not necessary that both husband and wife be teachers at the university.

Labor and educational officials say that a contract allowing a husband to stay home to take care of a newly born child, instead of or along with his wife, would probably be a first-of-its-kind.

C.U.N.Y. is proposing that either a male or female teacher be permitted up 20 days of paid leave and up to 18 months of unpaid leave in connection with the arrival of a new child. Also, the expectant mother, if she chooses, would be allowed to work until the day the child arrives.

"The proposal represents the change in attitude that is taking place toward equality of the sexes and toward maternity leaves," commented Rudy Oswald, a staff economist in Washington who keeps watch on new contracts for the American Federation of Labor and Congress of Industrial Organizations.

C.U.N.Y.'s proposed new policy would be a harbinger for teachers everywhere if the 1.2 million-member National Education Association has its way. Robert Chanin, the N.E.A.'s general counsel, says that the organization wants to see a provision for "parenthood leaves of absence" in every teacher's contract. "This is a right that should be applicable to a parent," he says, "and it is irrelevant which parent."

Where We Stand

A Weekly Column of Comment on Public Education

by Albert Shanker

President, United Federation of Teachers

What the Public Thinks of the Public Schools

Public opinion polls are much in the news these days. Their accuracy is a continuing subject of debate, as is the question of the effect of polls on the outcome of elections. But, whatever the problem with polls, we are better off for having them. Their value is clearly evident in the field of public education, where the media are too often inclined to view as gospel, and to publicize as generally accepted, criticisms leveled at the public schools by a handful of latter day educational experts, frequently with the blessing and support of some tax-exempt foundation or other.

Phi Delta Kappan, a monthly educational magazine of the highest standing, has published in its September 1972 issue the findings of the fourth annual Gallup poll of "Public Attitudes Toward Education." The Gallup surveys are, in the words of the magazine's editors, "now established as a major source of information concerning the status and trends of opinion about significant school questions." This year's findings make it quite obvious that, whatever the merits of the new criticism, it is scarcely representative of the views of the citizenry as a whole.

Where the new critics would list, as the major problems confronting the schools, such considerations as bureaucracy, inadequate recognition of students' rights, irrelevancy of curriculum and repressive atmosphere, the general public, according to the Gallup poll, lists "discipline" as the major public school problem. Following "discipline," in order of importance, are "lack of proper financial support," integration-segregation problems," "difficulty of getting 'good' teachers," "large school, too large classes," "parents' lack of interest," "lack of proper facilities," "poor curriculum" and "use of dope, drugs." So far as students' rights are concerned, 41 per cent believe students have too many rights and privileges, as against 11 per cent "not enough" and 33 per cent "just right." Even on the question, "Should students who are 18 years of age, and now have the right to vote, have more rights and privileges than other students?" 73 per cent answered "no."

On questions of school finance: 56 per cent oppose raising taxes, with 36 per cent voting for increases; 55 per cent favor shifting the school tax burden from local property to the state governments or the federal government or both, while 34 per cent oppose the shift. The value-added tax, the national sales tax which was at one time favored by the Nixon Administration as a method of financing the schools, is opposed by 51 per cent, with only 34 per cent in favor.

High Rating for Teachers—and for Teaching as a Career

Tenure, defined as "a lifetime contract," is disapproved by 61 per cent and supported by only 28 per cent. But, in spite of this, the public's opinion of teachers, as it comes through, is high. In the listing of ways in which public schools are particularly good, curriculum comes in first and teachers second on a ten point list. Responding to the statement, "When some children do poorly in school, some people place the blame on the children, some on the children's home life, some on the school, and some on the teachers," 14 per cent place the blame on the children, 57 per cent on the children's home life, 6 per cent on the school and 12 per cent on the teachers. (Says *Phi Delta Kappan:* "With such wide agreement that home factors are responsible for educational failure, one wonders why so little attention is being given to the solution of this problem. Neither the schools nor the teachers can be expected to re-order the home life of children, yet many surveys have shown that parents are eager for help and suggestions. This is true of the highly educated as well as the poorly educated. Certainly, if a child's success in school is largely dependent upon his home life, more time and effort should be devoted to finding out ways to deal with these home factors.")

The public's reaction to educational innovations is mixed. There is approval (53 per cent) of the year-round school, with considerable opposition (41 per cent). There is overwhelming opposition (65 per cent to 32 per cent) to compulsory school starting at 4 years of age and overwhelming approval (71 per cent to 22 per cent) of non-graded schools, in which a student could be enrolled, for example, in fifth grade English while studying seventh grade math.

Asked whether they would like to have a child of their own take up teaching as a career, 67 per cent answered "yes" and 22 per cent "no". The "yes" percentage is high but lower than that of previous years, the respondents indicating an awareness of the current shortage of jobs but also frequently saying that "teaching has become 'dangerous,' with children permitted to run 'wild' in many schools."

The poll shows that, by and large, there is still widespread support for the public schools, and that the views held by parents on most educational issues are similar to those held by professional educators. The "alienation" of the public from the schools and of the layman from the professional seems to be largely the product of the imagination of our handful of new critics.

Copies of the Gallup survey are available, free of charge, from UFT.

ETF — Desegr. Legal Developments

From the Law Office of:

NATHANIEL S. COLLEY
1810 S Street
Sacramento, California
Phone (916) 446-7584

November 29, 1972

FOR IMMEDIATE RELEASE

The NAACP today began its legal challenge to Proposition 21 the anti-school integration measure, with the filing of a court petition in Sacramento calling for the courts to declare the controversial measure in direct conflict with state and federal law and with the U. S. Constitution's Equal Protection Clause.

Nathaniel S. Colley, Western Regional Counsel for the NAACP, filed the petition in Sacramento Superior Court against the Sacramento City Unified School District. Named as plaintiffs with the NAACP are Erman J. Mason, a Sacramento manpower director for the county poverty program, and his two daughters, Lorlashone, 6, and Ermajean, 12. Both are students at Camelia Elementary School, which the petition states has an enrollment 90 per cent Black.

The petition states that passage of Proposition 21, called the Wakefield Amendment, forbids the school district from taking affirmative action to end school segregation in Sacramento. It contends further that the measure may result in the federal government's cutting off federal funds to the school district, because Proposition 21 violates the U. S. Constitution, and makes it impossible for the district to comply with its non-discrimination agreement with the Department of Health, Education and Welfare.

"There is no doubt the Wakefield initiative is void," Colley said. "It's really tragic that these emotional issues mean more to some people than the Constitution of the United States."

More.....

The civil rights attorney cited statutes in North Carolina and Alabama which used language almost identical to the Wakefield measure, and which U. S. Courts have already thrown out as unconstitutional.

In addition, Colley said the initiative purports to nullify 1971 legislation authored by Assemblyman William Bagley and the school guidelines set forth by the State Board of Education.

The petition also asks the court to order the Sacramento school district to come up with a plan by January 31, 1973 "for the elimination or alleviation of racial segregation and racial imbalance" in Camelia School (located on Elder Creek Road).

Proposition 21, approved by voters on November 7, is commonly called the anti-busing initiative, but in effect, its wording makes it illegal for state or local school officials to take any action to integrate any school in California.

The initiative, which is now a part of the State Constitution, thus violates the 14th Amendment to the U. S. Constitution and the announced policies and laws passed by the State Legislature, he said.

The petition also seeks $25,000 from the defendants, the Sacramento school district, to cover court costs and attorney fees.

Colley claimed every school district in California would be violating federal contracts signed with HEW if they were forced to comply with Proposition 21, jeopardizing over $76 million of federal educational funds.

****

(them) from the risk of undue dependence on the wealthy."

W.S.J. * 12/13/72

IF A SCHOOL admits racial minorities, it can't keep it secret, the IRS says.

In a directive aimed at private schools, the Service says merely admitting minority students isn't sufficient to qualify a school for tax-exempt status. The school must show that its admission policy "has been made known to all racial segments of the community served by the school."

The school can do this by running a notice in one or more newspapers that families served by the school likely will read. The notice must be "prominent" and its message clear. If a school chooses to use the broadcast media, it must run an "adequate number" of announcements in high listening hours on stations likely to be heard by people in the school's area.

The school also may publicize its policy through its own brochures if it shows they are distributed to all segments of the community. And it may spread the word simply by telling minority group leaders, if these people will sign statements that they have adequately informed their people of the school's nondiscriminatory policy.

4,000 Students Drop Out Over Memphis Busing?

Atl. Const
1/23/73

MEMPHIS, Tenn. (UPI) — The president of Memphis Citizens against Busing (CAB) estimated Monday that more than 4,000 students have withdrawn from the public school system due to the scheduled racial busing of 13,000 pupils on Wednesday.

"It could be close to 5,000 but don't hold me to that figure exactly yet," said Ken Keele. "They have registered for the schools which CAB is setting up in the city."

The Memphis School Board closed schools Monday and Tuesday to get the nation's 10th largest system ready for busing, clustering and pairing of schools on Wednesday.

Some 138,000 students are currently enrolled in Memphis public schools .Education officials would not comment on the number of dropouts.

Most of the students who registered to attend the temporary CAB schools were said to be white.

Memphis Busing Goes Smoothly

MEMPHIS, Tenn. (AP) — The nation's 10th largest school system coasted through its first day of desegregation busing Wednesday, although possibly one-third of the pupils failed to appear and white absenteeism was expected to continue today.

Pupils who went to school were unruffled by integration. One labeled it "a fun day."

"Attendance was relatively poor, perhaps less than we had anticipated," said Quinnie McCormick, assistant school superintendent.

Memphis, which has never seen public school buses on its streets before, is required to transport about 10 per cent of its approximately 135,000 pupils under a federal court desegregation order.

Some of the 66-passenger buses arrived at schools Wednesday with 10 or fewer pupils aboard. Of 550 whites assigned to Cypress Junior High School, 50 showed up.

School officials said no systemwide breakdown on the level of absenteeism would be available until today, but guessed it at up to 35 per cent of enrollment.

"We know we are going to lose a lot of students over these first few days," said Supt. John Freeman. "Most of them will come back as soon as they see how things work out."

"Smoothly," was the way principal Ernest B. Abron assessed it at Corry Junior High, which until Wednesday had only six whites among its 1,050 pupils. "Over all, I think we've had a good day."

Busing was to give the school 300 more whites Wednesday, but only 114 arrived.

Some of them seem impressed by the Corry building, which they said was newer and better equipped than schools they had been attending.

"It feels okay. The school is all right," said Richard Hillhouse, 15, toward the end of the day.

The busing climaxed a 13-year court battle by the National Association for the Advancement of Colored People. City officials had fought in the courts up until Tuesday in an attempt to thwart the busing.

The 6th U.S. Circuit Court of Appeals in Cincinnati earlier upheld a local federal court decision on the busing and has instructed that further desegregation be planned for the fall.

ATTENDANCE CLIMBS IN MEMPHIS SCHOOLS

1/26/73

MEMPHIS (AP) — Absences declined about a third Thursday as the second day of court-ordered desegregation busing in Memphis schools passed without serious incident, school officials reported.

About 25,000 pupils stayed away from classes Thursday, representing about 18 per cent of an anticipated total enrollment of 137,795, a school spokesman estimated.

About 38,613 students, roughly 28 per cent of total enrollment, were absent Wednesday, when the pairing, clustering, boundary changes and busing went into effect.

A school official said normal absenteeism is about 6 per cent, or 8,000 pupils.

City Schools Supt. John Freeman said Wednesday that about 7,000 pupils of the almost 13,000 scheduled to be bused actually rode the buses.

Figures compiled Thursday indicated that perhaps as many as 1,500 to 2,000 white pupils rode buses, adding to already heavy black ridership.

TO SCHOOLS

Atl. Const

Memphis Buses Move Quietly

1/26/73

MEMPHIS, Tenn. (AP) — "We're mighty proud. We think it's going very smoothly," beamed transportation supervisor Charles Hurtado Thursday as the nation's 10th largest school system rolled into its second day of forced busing.

Court-ordered transportation, involving about 13,000 of the school system's 135,000 pupils, got off to a relatively easy start Wednesday—a day marked mainly by calm, and low attendance.

Hurtado said some of the system's teething problems were being straighted out and most buses were making all their stops and were on time. Wednesday, at least one bus driver got lost and several ran considerably late.

School officials had refused to disclose Wednesday's attendance and various figures were speculated. The most reliable sources indicated an absentee rate of about 35 per cent in the school system, with most of those absent being white.

Accurate figures were not available for Thursday's attendance either, but it appeared to be on the increase.

"Our early reports today show that we have a lot more people riding the buses. Also, things seem to be going much smoother administratively," said school Supt. John Freeman.

"It wasn't bad at all and I don't mind going back," said Pam White, 11, who was transf e r r e d from mainly-white Treadwell school to predominantly black Lester.

Wednesday, Pam was the only white child to board the bus in her neighborhood, where signs dotting yards proclaim that "happiness is walking to your neighborhood school."

"I don't know why some of the others didn't go to school today," said Pam, "I think the mothers and daddys kept some of them home that wanted to go. If I learn to get along with black people it will help me when I get big and start work-[illegible]"

The initial drop in attendance was attributed to parents waiting to see if the plan would work, and to a boycott of the schools proclaimed by Citizens Against Busing.

Rolls Reported Up At Private Schools

Atl. J. + Const

2/4/73

Metro Atlanta private schools have increased their enrollment by about 5,000 pupils in their last two years, but have room for no more than 1,500-2,000 new pupils next academic year, according to Research Atlanta.

Private schools, now flooded with applications for admission because of a desegregation lawsuit expected to result in busing of pupils in the Atlanta public school system, were the subject of a third desegregation report issued this weekend by Research Atlanta.

The private-schools report and two others released during the past week will be included in a study of school desegregation in the metro area, to be released this week.

A total of 20,146 pupils — 6 per cent of all elementary and high school pupils in the metro area — are enrolled in private schools this academic year, according to the report.

THE SHARP INCREASE in private-school enrollment since the 1970-71 school year contrasts with a decrease of about 750 in metro Altanta public school enrollment since last year.

Total enrollment in the nine metro area public school systems is now 324,187, the report said.

About 13 per cent of the private school enrollment is black, as compared to 29 per cent of the public school rolls.

Research Atlanta based its computations on figures supplied by the state Education Department, as well as a telephone survey in which it was able to contact 53 of the 66 private schools in the five-county metro area. Its report reflects "the best information available," Research Atlanta said.

Most of the schools contacted expected little increase in enrollment next year because they lack "the necessary resources," the report said.

Most interested in expansion were the smaller schools currently under-enrolled, the report said, but many of these schools face difficulty raising money for expansion.

"The larger and older 'prestige' schools are generally filled to capacity," the report said. "Of the schools contacted, only Pace Academy has an expansion program. Some of the others plan to discuss expansion in the near future, but extensive expansion is not expected."

ROMAN CATHOLIC schools were said to be filled to capacity, with little increase in enrollment possible next year.

In Atlanta, whose public schools have about 96,000 pupils of whom at least 77 per cent are black, 9,289 students attend private schools. That figure includes 1,802 black students, 24 per cent of the total.

The survey covered Fulton, DeKalb, Cobb, Clayton and Gwinnett counties. It included both accredited and non-accredited regular primary and secondary schools, but excluded special schools, adult education and nurseries.

Some Atlanta parents, including a group at S. M. Inman Elementary School, are making plans to organize new private schools if the courts require busing in Atlanta public schools.

Research Atlanta is a nonprofit, independent organization which studies housing, taxation and education problems in metro Atlanta. It is funded by donations and other private sources.

LWV Atlanta Fulton County. Education Committee. March, 1969

During the month of February, unit meetings focused on a study of the impact of the urban crisis in education and local schools. 15 of 17 units reported to the committee on suggested improvements.

The overall topic was a broad one and unit leaders determined specific interests in the fields of desegregation plans, equality of opportunity, quality improvements, and public participation in policy making decisions. The proposed State Budget was discussed and members were especially interested in seeing that school lunch funds are to be provided.

After the Education Committee received the suggestions from units they discussed the proposals and submit the following suggestions for Board action. We recommend sending these suggestions to the members of the Atlanta Board of Education and requesting time for discussion. If no answer comes before the April 14th meeting, we recommend asking for inclusion on the Board Agenda to highlight points in the five minutes allowed.

RACIAL BALANCE

The League feels better racial balance in city schools is still a viable goal; difficult, but not impossible to improve. Ways to accomplish this include modifications in the present mainly freedom of choice plan, more interpretive information on schools, improvement in transportation routes, and professional advice from outside consultants.

Faculty

Increased faculty integration would be desirable, particularly in the lower grades where better results might be expected for students and teachers. Consider possible incentives for teachers, voluntary rotation of teachers, use of teacher aides and diversified staff. Continue to recruit teachers of all races and both sexes for each school. Petitition the State Board, the State Department of Education and the State Legislature for necessary changes to make flexible use of personnel.

Transportation needs

The League feels Atlanta as an independent system is discriminated against at the State level. Funds should be made available to complement regular student fares. The Board of Education in Atlanta should petition the Legislature and ~~also petition~~ the Atlanta Transit Company for changes. The League recommends North South routes for the convenience of students who wish to exercise freedom of choice provisions. (for example, a bus on Northside Drive S.W. to N.W. would perform such a service.) If fares do not provide the necessary financial support, state aid should supplement the regular student fares. The Atlanta Board of Education should provide transportation services for students who attend special schools for Exceptional Children. State funds should be available to Atlanta for this purpose.

Neighborhood schools and alternatives

The League generally approves schools with easy access, especially for small children and approves flexible use of state funds to provide them. At the same time, provisions should be made to make children aware of the larger community: possibly by the use of special auxiliary facilities on a regularly scheduled basis.

The League favors the concept of comprehensive high schools, but

BEST COPY AVAILABLE

feels more consideration should be given to student andfaculty needs for "sense of belonging", communication problems, supportive services, and community support. Dividing students into groups or smaller units was suggested. Flexible arrangements should be made at the Area Office level and community wishes considered.

New buildings should be planned with a socio-economic mix and provisions for racial diversity. Stress should be placed on the advantages of cultural diversity. The size of schools should be openly discussed and advantages and disadvantages of larger units, educational complexes, etc. explained and considered.

The League feels the "Schools without Walls" is a valid concept for urban schools and the Atlanta Board should pursue this idea, seek State support for flexible use of State Funds. An attractive feature to support this idea is the cooperative use of facilities of local business and industry, and on the job training possibilities. Consideration should be given to requesting changes to allow 15 year olds to participate more actively inthis training to lower drop-out rates. Concentrate on this age group, especially boys. (Reports from Social Work Activities indicate problem)

The League feels special facilities should be used to develop special talents and to help desegregation in city schools. Particular promise in the fields of art, music, drama. Expand idea of classroom in Cultural Arts Center so many children can use facilities at the same time. Expand science possibilities using community facillilites already in existance, such as Zoo, Georgia Tech, etc.

POLICY MAKING DECISIONS

The Atlanta School Board should lead, inform, and accept major responsibility for policy making decisions. The administrative staff should carry out decisions, without bearing the full brunt of criticism. The Board should revise procedures to allow and encourage community participation. The Board should seek contact with classroom teachers to improve communications.

Some of the suggestions from League units included: a seat on the Board for a representative of teacher groups, area meetings, changes in Board meeting format, and interpretive publications. The League feels significant changes in teaching techniques, use of new materials, flexible groupings, etc. will come only with the involvement and cooperation of the best possible classroom teachers who are relieved of some clerical and disciplinary problems, given freedom and time to teach.

Parents must be encouraged to act cooperatively with school officials and personnel. Parents need to know their own schools, neighboring schools, and area staff and resources better. The Board is urged to reinstate Area Advisory Councils or similar groups, involve the community in solving common problems. Reexamine present area organization to explore possibilities of further decentralization. Decide which functions need central administrative procedures and reorganize accordingly.

BEST COPY AVAILABLE

PROGRAMS AND SERVICES TO IMPROVE QUALITY OF INSTRUCTION

The League feels many programs begun as pilot projects should be expanded. The community ~~xxxxxx~~ should be made aware of the limited numbers of children who benefit from such programs at the present time and the intent of Federally funded projects. Emphasis should be placed on Program for the coming decade much as emphasis has been on Buildings in the past decade. The League particularly recommends the expansion of the following programs:

1. Prekindergarten for significant numbers of children, starting at 4 years of age and younger.

2. Improved kindergarten programs for all children in the city.
   - Smaller classes.
   - Better trained personnel. (Petition State Department of Education for Certification Changes and use of Stae Funds. Petition for change in Compulsory Attendance Law change to lower age)
   - Add content to course. (Follow lead of private kindergarten development in Atlanta area)
   - Use diversified personnel. (Allow use of part-time teachers, home economics majors trained in child care, teachers trained in other states, but not yet certified in Georgia)

3. Strengthen elementary grades.
   - Smaller classes for grades 1-3.
   - Continue to improve and stress reading programs. (Petittion for use of state funds for books not on state list if more suited for urban schools. Investigate ~~special~~ series designed for special area, more multiethnic materials.)
   - Continue innovations, expanding use as quickly as possible to schools not receiving federal funds.
   - Expand Communications Skills Laboratories to lower grades.

4. High schools
   - Expand present limited programs of pre-vocational training, independent study, honors programs, etc.
   - Make study of underachiever and plan program to help.
   - Expand counseling and social worker staff, changing role as necessary.
   - Make strang attack on social problems including absenteeism, truancy, drop-out, delinquency.

Teacher training

The League approves adequate inservice training for teachers, but feels quality is more important than quantity of offerings. Subject should be relevant, content worth the time to attend classes.

The Board of Education should ~~xxxxxxxxxx~~ petition the State Board for provisions of a differntiated staff. This might not require more money from the State, but more flexible use of State funds. Why not point out to State Department the need for specialists, the number of newcomers who have special abilities, but are not state certified, the number of former teachers who cannot teach full time, the possibility of using clerical aides to perform school duties?

BEST COPY AVAILABLE

INFORMATION SERVICES

The League information furnished to the Board and to the Public should be interpretive in nature and point out needs, problems and programs in local schools. They should be designed to build public support for new programs needed and to aid parents, both residents and newcomers, to make intelligent choice in schools for their children to attend. For example:

1. Use monthly Board meetings to communicate and respond to the public as well as transact business. Decisions which clearly require professional competency may be more lightly treated in public meeting and increasing time spent on problems of interest to community at large. Consider relaxing rule about answering delegations.

2. Use more realistic terminology in discussing desegration. Even the terms may be legally correct, they are not always satisfying. If an individual school has all black students, calling it desegregated is not very meaningful and freedom of choice form seems irrelevant.

3. Publish material about individual schools so parents can make intelligent choice in home buying, renting etc. Suggested information might include: languages taught, special classes personnel and services offered, extent of vocational and pre-vocational offerings, indication of achievement level, size of school and approximate crowding (last year, for example), ~~xxxxxxxxxxxxxxxxxxxx~~ racial composition. At the present time realtors in the metropolitan area make their own judgements, often using innacurate information, and influence housing patterns.

AREAS OF GREAT CONCERN (NON-ACADEMIC)

Admittedly, the Board of Education cannot solve all of Atlanta's problems, but records of school children contain some of the best clues as to where the problems are and what they are. A total community effort will be necessary to solve them. The Board of Education should seek to inform other agencies, business and industry leaders and community groups of the extent of the impact of the urban crisis on schools and seek help to solve problems which include:

1. Serious unmet health needs
2. The hunger problem and school lunch programs
3. Absenteeism in city schools, truancy, delinquency,
4. The needs of children who come to Atlanta to go to school but do not have a parentoof legal guardian to sign for admittance to city schools. If they are State residents, they should be able to go to school and the the system should receive state funds.
4. Children who have never been enrolled in school anywhere and are lost statistically.

BEST COPY AVAILABLE

Summary of SUGGESTIONS:

1. Call in expert on urban school problems.

2. Examine needs for financing programs, not buildings. Inforam the community, seek flexible use of existing funds.

3. Contact State Board of Education, State Department of Education and members of General Assembly for needed changes.

4. Outline suggestions for interested community groups.
   Need of general fund to meet needs not filled by state, federal or local funds. (PTA's expand idea of Ira Jarrel Milk Fund, Central Library Fund for example, or Central Music Fund)

   Explore possibility of naming sister schools for groups to work cooperatively together to pool resources, train volunteer staff, utilize talents.

   Explore what services and programs can be assigned to agencies other than schools to relieve some of the non-academic chores.

EDA to Continue but Other Economic Development Programs in Jeopardy

The Federal funding outlook for community-oriented economic development programs is beginning to shift as the Administration intentions, revealed in the proposed Fiscal Year 1974 budget are subjected to the Congressional authorization and appropriations process.

The first big switch of the new fiscal year came as the President compromised with the Congress on renewing the life of the **Economic Development Administration.**

EDA's activities, largely designed to provide grant funds for public works projects in rural areas, have proven popular on Capitol Hill.

Last year, Congress passed a renewal of the basic legislation authorizing the agency's programs, only to have the measure vetoed by the President.

In the FY 74 Budget, the Administration revealed plans to close the agency down entirely on June 30, 1973, asserting that other agencies and new programs authorized by the **Rural Development Act of 1972** could carry the ball on rural development.

Congressional support for EDA again became evident as a one-year extension of EDA programs was passed in early June. In a shift of position, the President signed the bill and EDA received a new lease on life.

The basis for the compromise between the President and Congress was spelled out in the President's statement on signing the renewal bill. Mr. Nixon agreed to a FY 74 funding level of approximately $200 million, as contrasted to the $430 million authorized in the legislation and to the $270 to $280 million which the agency has customarily received in past years.

The Administration will submit a new proposal to re-structure the Federal economic development programs to the Congress before January 1st.

The necessary appropriations bill for EDA is still working its way through the Congress. If the final appropriations level follows the President's suggestion, the outlook is for a reduction in the size of the public works program and a drastic reduction in the business loan program.

The technical assistance program, the agency program most useful to community groups in the past, would be increased. However, this increase is targeted for technical assistance efforts in communities affected by closings and cutbacks in military installations.

EDA support for economic development on Indian reservations is projected at approximately its current level, with the non-Federal share of Indian technical assistance grants eliminated by a special provision of the law renewing the agency.

In other developments, the Administration has submitted its legislative proposal for the transfer of the **OEO Community Economic Development Program** to the **Office of Minority Business Enterprise** in the **Department of Commerce.**

The fate of the program is of considerable importance to community groups, since it is presently the largest single source of Federal dollars for community-based economic development efforts.

The proposed legislation, dubbed the **"Minority Business Assistance Act of 1973"** would remove the current legal prohibition against transferring the Community Economic Development Program outside OEO.

The bill would do this by specifically transferring the responsibility of Part A of Title VII of the Economic Opportunity Act from the director of OEO to the Secretary of Commerce.

However, the bill makes no mention of Part B of the same title, which authorizes community-based rural development programs, nor does it mention Part C, which authorizes support training and technical assistance programs. Part C also authorizes the crea-

Status of **OEO** programs in doubt; four key projects are analyzed . . .

Census Bureau shows decrease in overall poverty but increase among Blacks . . .

CDC's get a chance to influence next year's revenue sharing outlays . . .

CDCs Urged to Seek Revenue Share for FY 74

Community development organizations will have an opportunity, although perhaps a brief one, to affect how their local governments spend Federal revenue sharing dollars in the fiscal year which began July 1.

The **Office of Revenue Sharing** of the **Treasury Department** last month mailed to local units, among other things, copies of the Planned Use Report, in which every local government must set forth how it intends to spend revenue shares in the coming year.

This report must be filed with Treasury no later than September 20. The governmental unit must specify by that time what expenditures it intends to make for the eight priority areas called for in the general revenue sharing law as well as capital outlays planned.

These eight priorities are public safety, environmental protection, public transportation, health, recreation, libraries, social services for the aged and poor and financial administration.

The planned use data must indicate also how much of next year's funds will be allocated for the continuation of presently-provided public services and what percentage will be spent for new or expanded services in each of the eight areas.

In addition, the Planned Use Report must show how much the unit intends to use for capital expenditures including education, transportation, housing and the like. There is virtually no ceiling on such outlays.

Finally, the chief executive officer of the local government unit must "advise a local newspaper and the news media of the contents of this report." Furthermore, he must swear, "I have records documenting the contents of this report and they are open for public and news media scrutiny."

All of this means community groups will be able to a) examine carefully what it is the local unit plans to do with its revenue share for the full fiscal year which ends next June, and b) determine whether all segments of the community, particularly the poor and disadvantaged, will share equitably in the distribution of services and other expenditures.

One way to make certain CDCs will have support for their positions on future spending is to examine what local governments have done with money already received.

For the Revenue Sharing Office in Treasury also demands in another report an accounting on what's happened to revenue sharing dollars for the past year and a half, the time general revenue sharing legislation has been in effect.

This Actual Use Report (covering the period of January 1, 1972 through June 30, 1973), will show what local units have done by way of spreading their revenue shares throughout the community.

The Actual Use Report must be filed with Treasury by September 1 and will indicate the expenditure of all revenue sharing dollars received through June 30 of this year.

Local CDCs should be able to acquire a copy of the Actual Use Report in the near future, because the report must be prepared for presentation to Washington by the first of September. This report should be helpful to local groups in developing plans for the future expenditure of funds.

For example, if the Actual Use Report shows only small amounts spent for social services or other programs helping low income residents or that the major portion of the funds went for the construction of buildings or other capital improvements, these facts can be used as arguments to support a community group's suggestions for more desirable use of Federal funds in the future.

It is most important that local CDC s report to MONITOR on experiences undergone with governmental units on either the past use of Federal revenue sharing dollars or the disposition of CDC suggestions on planned use of these monies.

End of Housing Freeze Viewed as Unlikely

The Department of Housing and Urban Development's freeze on spending for housing continues into its seventh month with no sign it will be removed. HUD still promises new legislative recommendations by September 7, but action by Congress this year seems unlikely.

The nature of the Administration's recommendation also is unknown and unpredictable.

Federal District Judge Richey in Washington recently ordered HUD to lift the moratorium and resume processing applications. The Administration will appeal, so this does not seem to be a source of relief in the near future.

Poverty Rose for Blacks, Ebbed for Whites in '72

Recently the **Census Bureau** reported that 24.5 million persons were living in poverty during 1972. The poverty definition used was an annual income of $4,275 for a four-person, non-farm family. For a family of four persons living on the farm the figure was $3,643. (These figures are adjusted according to family size and place of residence. For example, for a two person non-farm family the figure is $2,724; for a five person non-farm family the figure is $5,044. Also, the poverty line or "poverty threshold," as it is sometimes called, is adjusted each year to take into account changes in price levels.)

Of the 24.5 million persons, about 20 million were living in 5.1 million families, while 4.8 million were so-called unrelated individuals. About 94 per cent or 4.8 million, of the 5.1 million families lived in non-farm communities.

The overall figure represents a decline of 1.1 million persons between 1971 and 1972, but that total hides sharply different movements among Whites and Blacks and other races. For while the number of poor Whites declined by 1.6 million, the number of poor among Blacks and other races showed an increase of 500,000, netting out to the slightly more than one million person decline.

Overall, the progress made by our nation in reducing poverty in recent years has been disappointing.

In 1969, the number of poor totalled 24.2 million, rose by 1.2 million in 1970 (the first increase in the number of poor since 1959 when such data were first tabulated), increased by another 140,000 in 1971 and and then showed the 1.1 million decline referred to earlier.

The comparable figures for Blacks and other races separately show a worsening in 1970, a slight improvement in 1971 and once again a worsening in 1972.

The number of non-White poor in 1972 was actually 800,000 greater than in 1969 and 260,000 greater than in 1968. One must go back to 1967 for a year when the poor among Blacks and other races were more numerous than in the latest census count.

Year	Total Persons In Poverty	Whites	Non-Whites
	(figures in millions)		
1969	24.2	16.7	7.5
1970	25.4	17.5	7.9
1971	25.6	17.8	7.8
1972	24.5	16.2	8.3

Among Blacks alone, what improvement was made took place among the families headed by a male. Such poor Black families declined by some 200,000 during the year, but that was more than offset by the over 500,000 increase in the number of poor Black families headed by a female. Overall some 32 per cent of all Black and other minorities were in poverty, a rate more than three times as high as poverty among Whites.

The census information on the poor shatters one of widely-held myths about poverty and work. Substantial numbers of the poor worked but, because of irregularity of work, low wages and other factors, still found themselves and their families mired in poverty. Even among those who worked on a full-time basis each week and worked year-round, there were one million such persons during 1972 whose earnings kept them and their families below the poverty threshold. (Of these 250,000 were Black, 750,000 were White.)

Besides these working poor, there were an additional 1.5 million who worked part-year. These poor were employed between one and 49 weeks during the year. In one out of three cases, unemployment was responsible for the part-time factor.

The 24.5 million persons officially counted as poor by the census represent about 12 per cent of our total population. But considering the extremely low standards used in that definition, many more who lived in severe deprivation are not reflected in the official poverty count.

The census reports do contain another measure which should be noted. That measure is one which uses a figure of 125 per cent for the poverty threshold. In other words, it uses a poverty line of $5,344 for a four person non-farm family, rather than the $4,275 figure mentioned earlier.

Using this measure, the census statisticians found there were 34.7 million persons who had incomes less than 125 per cent of the poverty level. While these 9.3 million persons are not officially included in the poverty definition, they, too, are living at the brink of poverty.

Break Ground on New TWO Housing Project

Construction began in late May on Jackson Park Terrace, The Woodlawn Organization's most recent housing project. The terrace will offer 322 apartments and town houses on a nine-acre site next to Jackson Park and the Lake Michigan waterfront.

It will be offered to a wide range of income groups and will house single persons and elderly couples as well as large families. Air-conditioning, security equipment and neighborhood shopping are among the many features to be offered.

The terrace is financed by the **Illinois Housing Development Authority,** the state housing finance agency. All tenants will benefit from the reasonable mortgage terms available from IHDA, and many families will receive Section 236 interest subsidies as well.

In addition, IHDA has made an unprecedented grant to TWO which will enable the group to put $800,000 aside as a reserve to be used for unanticipated management, maintenance or other costs after construction is completed. This assures the financial flexibility which the wave of FHA foreclosures has proven necessary.

The project received its feasibility letters before the **Department of Housing and Urban Development** imposed its housing moratorium. It therefore was not affected by the freeze.

EDA Set but Other Programs in Danger

(Continued from page one)

tion of two development loan funds: one for Special Impact Projects under Part A and one for rural projects under Part B.

Other provisions of the bill would build a legislative base for the programs now run by OMBE and oriented toward the development of individually-owned as distinct from community minority business.

The fate of the bill is uncertain as this issue of MONITOR goes to press.

Despite the public attention given to it, the new Rural Development Act has yet to be implemented. The law, passed through Congressional initiative last fall, calls for a number of new grant and loan programs aimed at generating more business and job opportunities for rural and small town residents.

In the FY 74 Budget, the Administration proposed to implement the loan authorities but asked for minimal funding of the grant programs.

The Department of Agriculture has published proposed regulations covering the loan programs and says it will begin to release money as soon as funds are available from the pending FY 74 appropriations act for the department.

The department's implementation strategy has been keyed around close involvement of the governors. The proposed regulations would give the governors the opportunity to say which projects they favor and in what priority order for funding. The governors would also be asked to designate a limited number of multi-county planning districts where RDA programs would be tested.

Agriculture's strategy has run into strong public and Congressional opposition. There is considerable sentiment for starting up with a nation-wide, rather than a selected district program. There is also a chance that the governors' control over RDA projects may be downgraded before the final regulations are published.

The usefulness of RDA loan programs for community-based business ventures appears limited. The proposed regulations call for a 25 per cent equity requirement, a condition which capital-starved rural groups will find hard to meet.

The proposed regulations also defer to current **Small Business Administration** programs and the lending activities of local banks, setting out the role of RDA financing as that of a guarantor of bank loans for ventures too large for SBA to handle.

Fate of OEO Awaits Nixon-Congress Accord

Pending final action by Congress and the President, the future of major programs of the **Office of Economic Opportunity** remains in doubt.

As reported in the April, 1973 issue of MONITOR, the Administration proposed to terminate the **Community Action Programs,** create an independent **Legal Services Corporation** to continue legal services programs and to transfer other OEO programs, including the migrant and special impact programs, to the **Departments of Labor and Commerce.**

Until September of this year, OEO will remain in operation under a continuing resolution that maintains both the CAP and legal service programs at last year's level of funding.

What happens after September is a matter of guesswork. The signs, however, are not hopeful. Here is the current status:

• **Legal Services:** As predicted in the June issue of MONITOR, the Legal Services Corporation bill passed the House but with far more restrictions on the program than contemplated. Amendments restricting law reform, lobbying on behalf of the poor and the use of backup centers were added to the bill. Whether an effective program will emerge from the Senate and conference action is an open question.

• **Community Action Programs:** If the Administration has its way, there will be no funds for the support of the 1,000 community action agencies which employ 150,000 persons and provide a multitude of services for the poor. Reports from the field indicate that few communities are being pressured to set aside other monies to continue the CAA's. However, these examples are instructive. In Los Angeles, community groups have convinced the local administration to use general revenue sharing funds to maintain the CAP program. In Erie, Pa. and Nassau County, New York, both general revenue sharing and general local revenues are being set aside to pick up the programs. Overall, the Administration prediction that this would be done in many places has turned out to be "disappointing" in the words of the new acting director, Al Arnett.

• **Migrant Services:** Acting according to its own plan, the Administration continues to move toward transferring $39 million for migrant programs to the Department of Labor.

Under OEO administration, migrant monies were used for a variety of services, including education, self-help housing and family-oriented services.

Indications now are that the Labor Department will restrict the use of money to helping farm workers find other means of employment. This would end services to two-thirds of the migrant population, destroy flexibility and spell the end of support for non-profit community groups controlled by farm workers and providing services to migrant constituencies.

Testifying before the Senate, the new acting director conceded that specific plans have not been drawn up beyond the plan to transfer the money. Regulations to insure a flexible use of the money do not exist.

• **Special Impact:** Under Administration plans, OEO economic development funds will be administered by the **Office of Minority Business Enterprise** at the Department of Commerce. What's happening in this area is treated in detail elsewhere in this issue of MONITOR.

CHAPTER II

CITIZEN ATTITUDES TOWARD PUBLIC EDUCATION

For quite some time, public education has been in the vortex of the "urban crisis." Whether the issue in question has concerned taxes, proper socialization of the young, drugs, collective bargaining, desegregation, community control or a host of other explosive issues, at one time or another the schools have been involved in virtually every major controversy of the day.[1] While some school systems may have suffered severely from their involvement in social controversy, the fact nevertheless remains that most Americans hold quite favorable attitudes toward public schools. Indeed, Campbell and Schuman's important study of racial attitudes in fifteen American cities reported public education to be the most highly esteemed of all local government services among both blacks and whites.[2] Also, a recent study of citizen attitudes toward state services and tax policies in Georgia found Georgians to rank education more favorably than any other program; the 584 respondents in this statewide survey were also more willing to increase taxes for educational purposes than for any other program.[3]

Thus, on the basis of these findings, there is good reason to expect Atlantans to give highly favorable evaluations of their public schools. To test this expectation, this chapter will examine citizen attitudes toward the following: 1) quality of education provided by neighborhood schools; 2) perceived quality of neighborhood education compared to educational quality in other areas of the city; 3) whether parents and

PAGINATION INCORRECT

citizens have had the right amount of say in neighborhood educational decision making; 4) school integration and busing; and 5) willingness to spend more money on public education.

Citizen Evaluations of Educational Quality

Two questions attempted to measure citizen perceptions of the quality of education provided to Atlanta youth. The first question was designed to test perceived quality of neighborhood schools by asking respondents to rate the quality of education children receive as very good, good enough, not so good, or not good at all. Our second question attempted to measure perceived neighborhood inequalities in the public schools by asking respondents whether they thought their neighborhood schools were better, the same, or not as good as schools in the rest of the city. Tables 2.1 and 2.2 report our findings, and these data may be summarized as follows.

First, quality of public education is accorded rather favorable ratings with over three-fourths of those responding, rating the educational quality of neighborhood schools as very good or good enough. Conversely, approximately one-fourth evaluate the schools less favorably. It is also important to note that there are no statistically significant differences by race, educational level, or age. Only homeownership is related to evaluations of public school quality with homeowners being more positive than renters in their views on the quality of education in neighborhood schools.

Second, a somewhat different pattern emerges when attention is focused on perceived inequality of education across neighborhoods in Table 2.2. Although 58.8 percent respond that their neighborhood schools

rank about equal in quality with schools in the city at-large, perceived inequality varies by race, education, and age. Because the most pronounced differences are racial (with blacks being less satisfied than whites), the differences are best delineated by controlling for race. Table 2.3 contains the relevant data which show that whites, regardless of age and education, have the most favorable perceptions of neighborhood educational quality. Satisfaction with neighborhood schools is particularly evident among all white groups except the low educated where 14.9 percent see their schools as better than those in other parts of the city. Among blacks, the tendency to evaluate neighborhood schools as "not as good" as elsewhere in Atlanta is slightly more pronounced among young persons. In the final analysis, however, perhaps the most important attribute of the data in Table 2.3 is that persons of lower social rank--including both lower status whites and blacks--tend to hold the most critical views toward the city's public education system.

Community Relations

One of the most important concerns of school officials in metropolitan areas is the school's relationship with its constituency of parents and other citizens. School-community relations are especially important because of American notions that schools are to serve the public and because schools must often depend upon public approval via referenda of additional funds to cover rising educational costs. In recent years, another phenomenon, demands for community control of schools, has been nurtured by the civil rights movement, the "maximum feasible participation" ethos of the 1964 Economic Opportunity Act,

TABLE 2.3

Citizen Perceptions of Neighborhood Educational Quality
With Controls (in rounded percentages)

	Schools are Better Quality	Quality is Same	Not as Good
White, Young	35.4	47.5	17.2

Black, Low Education	15.2	62.8	22.1
Black, High Education	21.6	54.1	24.3

seemingly impervious school bureaucracies, as well as class and cultural conflicts between school leaders and the community.[4] Needless to say, the demand for community control has received widespread attention, and its advocates often leave the impression that parents and citizens are universally disenchanted with urban school systems.[5]

Is there evidence that Atlantans conform to this disenchanted citizen model? Our survey data in Table 2.4 suggest quite the contrary; 67.6 percent of respondents assert that parents and citizens have the right amount of say in neighborhood educational decisions. In contrast, only 32.4 percent state that parents and citizens do not have the right amount of say. Moreover, levels of disenchantment do not vary to any significant degree by race, age or homeownership. The low visibility of community control and community relations problems is enunciated further by responses to an open-ended question asking citizens how schools could be improved. Of the 339 persons responding to this item, only 6.2 percent identify community relations as a means of improving schools; and even among this small proportion of respondents, answers are usually stated in a positive rather than a negative manner. Hence, on the basis of these data it is quite apparent that school-community relations are perceived quite favorably by most citizens.

School Desegregration and Busing

Since the U.S. Supreme Court's decision in Brown vs. Board of Education (1954), the struggle to achieve school desegregation has been catalogued in numerous studies.[6] These studies thoroughly document the seriousness of school desegregation as a major problem and describe the

various means devised for circumventing or evading desegregation. Thus, there is little reason for summarizing these general aspects of the school desegregation controversy since our principal concern is with perceived desegregation problems in Atlanta.

Following Brown vs. Board of Education, Atlanta's school board was successful in averting desegregation through appeals processes until 1961 when Atlanta became the first city in the hard-core, segregationist states of Alabama, Mississippi, Georgia, and South Carolina to successfully desegregate its school system. Crain et al. show that the desegregation controversy was marked by open civil rights activity, and, in contrast to other Deep South cities, relatively peaceful resolution of racial conflict. Atlanta's fairly commendable record in dealing with desegregation has been attributed to the "modernizing" ideology of local elites and civic leaders who have been determined to see that the city's progressive image will not be tarnished by extremism.[7] A politically moderate electoral coalition of higher status whites and blacks, arrayed against lower status whites and state political leaders, aided in the peaceful transition toward desegregation.[8] By 1970, most city schools had achieved some degree of desegregation. However, the fact that blacks constitute 70 percent of the student population, the 1968 presidential election campaign, attempts to close some neighborhood schools, faculty desegregation, and other issues continued to give salience to the desegregation question. Our objective here is to describe citizen perceptions of the problems surrounding desegregation.

First, to what extent is school desegregation perceived as a serious problem by our respondents? Table 2.5 indicates that 37.5 percent view

TABLE 2.5

the question as a serious problem, 40.6 percent assign a moderate (i.e., some problem) ranking, whereas 21.6 percent state that integration of schools is little or no problem at all. Whites and persons of high educational status tend to view desegregation as being more serious than blacks or low educated persons. Statistical controls for race and education do not significantly alter the relationships in Table 2.5, although race controls show young blacks to view desegregation as a serious problem by a 37 to 23 percent margin over older black respondents. On the other hand, among whites, perceptions vary only marginally by age and educational level.

Of course, the agency which has primary responsibility for effecting desegregation is the local school board and other school officials, a fact which directs attention to citizen evaluations of how well these officials have handled the integration problem. The data in Table 2.6 demonstrate quite conclusively that Atlantans are satisfied with the way in which officials have handled school desegregation. Almost three-fourths of those responding to the question of how well school officials have handled integration respond favorably (i.e., very well or well enough). Conversely, only 7.2 percent report a highly unfavorable (i.e., not well at all) response. On this question no statistically significant differences appear by race or education. Renters are less favorable in their evaluations than homeowners, but the most important differences are generational--younger respondents, by far, hold the most negative evaluations of school authorities' handling of school integration. Indeed, 36.6 percent of younger persons report negative evaluations, compared to only 15.3 percent among older respondents. Further manipulation of the

*Not significant

data reveal that these generational cleavages do not disappear when race is controlled. In other words, young Atlantans, regardless of race, are more critical of school officials than older Atlantans.

These generational differences may be attributed to two factors. First, younger persons are more likely to have children in school and the problem impinges more directly upon them. Second, the general thrust of our survey data suggests that older persons have more favorable images of virtually all aspects of city government, while young persons tend to be less accepting of system directives and behavior.[9] To a large extent, therefore, the age differences may be a reflection of genuine commitments to different values; older residents are more traditionalistic and acquiescent; younger persons appear to show signs of breaking with social and political traditions.[10] Two characteristics of this more modernistic value system among younger persons is a greater willingness to react critically to system performance and to expect more from the system than older citizens. Evidently, this higher level of expectation extends to authorities' handling of school desegregation.

One of the most controversial aspects of desegregation is that of busing students to achieve the goal of an integrated society. Advantages and disadvantages of busing have been articulated elsewhere and need not be stipulated here since our emphasis is upon citizen reactions to the plan, not upon the plan's substantive merits. But in view of the Supreme Court's recent decision in Swann, et al. vs. Charlotte-Mecklenberg Board of Education, the busing issue assumes paramount importance.[11] Two questions attempted to measure citizen perceptions of busing. Respondents were first asked whether assigning children to schools outside their neighborhoods

to achieve a more even spread of blacks and whites would be "a good idea or not." Second, persons with children in school were asked whether they would be willing to have their children sent to schools outside their neighborhoods to achieve integration. Responses to these two items are reported in Tables 2.7 and 2.8.

Focusing first on citizen evaluations of busing's relative merits (Table 2.7), our data show that over two-thirds of respondents (67.8 percent) do not consider busing to be a good idea. On this question, however, blacks and whites hold widely divergent perspectives. Whites are almost uniformly opposed to the idea, with 89.3 percent reporting that busing would not be a good idea, whereas almost 6 out of 10 blacks (59.7 percent) consider busing to be a good idea. There are also some noticeable differences by age, education, and homeownership, but these differences turn out to be mere artifacts of socioeconomic differences between blacks and whites: Statistically significant differences by age, education and homeownership disappear when controls are introduced for race. (It is worthy of mention that younger whites and whites who rent are more favorably inclined toward busing than older persons and homeowners. On the other hand, among blacks, younger persons are less favorably inclined toward busing than their elders while owners and renters divide in the same manner as whites. But despite these fluctuations, the racial cleavages shown in Table 2.7 remain intact.)

Are parents willing to send children to schools outside their neighborhoods to achieve integration? Our data in Table 2.8 provide an emphatic "no" in response to this question: 61.6 percent of the respondents report an "unwilling" reply compared to only 38.4 percent

who state a willingness to have their children bused. Again, the differences are primarily racial with almost 6 out of 10 blacks willing to bus compared to only 15.4 percent of the whites. These racial differences remain constant under statistical controls, whereas the differences associated with age, education, and homeownership vanish.

In fact, among high educated whites, only 11.8 percent report a willingness to have their children bused compared to 17.1 percent among lower status whites. Although the differences are not statistically significant, this finding is important for two reasons: 1) a higher educational achievement does not appear to have much ameliorating influence among white Atlantans;[12] 2) the finding further enunciates mass racial polarization on the notion of busing to achieve racial integration of schools.

Citizen Willingness to Spend More Money for Education

Despite findings that citizens generally accord a high level of support for schools, this support is sometimes difficult to translate into citizen willingness to increase expenditures for education. One section of our survey sought to tap citizen willingness to spend more, the same, or less money in sixteen program areas, including education. Responses in Table 2.9 show a strong willingness to spend more for public education with 63.7 percent of respondents taking this position. In contrast, only 2.7 percent report a preference for spending less on education. Of course, variations occur by race, education, and homeownership, but the principal source of divisiveness is age. Young persons, by a wide margin (75 percent to 50 percent) express a desire to spend more on education. The pervasiveness of this difference between

TABLE 2.9

younger and older respondents is well illustrated under statistical controls for both education and race. In no instance does the level of support for spending more drop below 73.5 percent among youth; conversely, in no instance does the support level for higher expenditures rise above 57.5 percent among older respondents. Thus, age turns out to be the principal line of cleavage between forces wishing to increase public school expenditures and forces wishing to maintain or decrease present expenditure levels.[13]

Summary

Our major findings regarding citizen attitudes toward Atlanta's public school system may be summarized as follows:

(1) There is a relatively high level of public satisfaction with the quality of Atlanta's public school system. However, there is a tendency for blacks and lower class whites to perceive greater inequities in their neighborhood schools than is the case among higher status whites. This perceived inequity does not result in a dramatic withdrawal of support from the public schools, but officials might devote attention to possible inequities among schools in different types of neighborhoods.

(2) Community-school relations are perceived quite satisfactorily and there is little evidence to suggest that authorities will be presented with any demands for community control that will have widespread public support.

(3) School desegregation is perceived by a solid majority of citizens as a continuing problem. This is especially true among whites, persons of higher formal educational achievement, and younger blacks. In spite of this finding, almost three-fourths of our respondents give favorable evaluations of the way in which public authorities have handled school desegregation. Authorities receive their most critical evaluations from younger persons and the more critical posture of youth persists when controls are introduced for race.

(4) Busing of children to achieve a more even spread of blacks and whites is not a popular subject for whites. On the other hand, blacks

are more favorably disposed toward busing, obviously perceiving it as a means of eliminating racial barriers and of reducing racial inequality in the public schools. Nevertheless, any concerted effort to implement mass busing will probably meet with strong resistance from whites and a few younger blacks who have apparently begun to question the wisdom of this approach to school integration.

(5) Atlantans express a strong willingness to spend more for public education. Policy makers should not interpret this liberal attitude as a mandate for increased taxation, but the fact nevertheless remains that a good education for their children is a major concern of Atlanta adults. Under favorable circumstances, it is conceivable that this sentiment could be converted into public approval of higher taxes. A major obstacle to such an effort, however, is that of providing some means of alleviating the opposition of older persons to increased expenditures.

R has no children

All R's children 18 or older

R's children all under 5

R has children 5 - 18

B2. (Are your children going to/Will your children go to) public schools here in Atlanta, private schools or parochial schools?

B3. As you know, many children go to Catholic or other church-supported parochial schools instead of to public schools. Some people have said that local tax money should be used to help support such schools. Do you think this is a good idea or not?

B4. Now thinking of the public schools, how good would you say is the education children get in the schools in this neighborhood, very good, good enough, not so good, or not good at all?

B5. What, if anything, could be done to make the schools in this neighborhood better?

B6. Compared with schools in the rest of Atlanta, do you think the schools in this neighborhood are better, the same, or not as good as those in other parts of the city?

B7. Are there any courses or subjects that are not taught in public schools now that you think ought to be taught? (What?)

B8. Do you think that parents and citizens in this neighborhood have had the right amount of say in important decisions about education in the neighborhood schools, or not?

B9. What things should be done so they would have more say in the schools?

B10. Interviewer: (Check one)

Albuquerque

Other City

PAGINATION INCORRECT

B11. How much of a problem has racial integration of schools been here in Atlanta in the past three or four years - a serious problem, some problem, a little problem, or no problem at all?

B12. And how do you think school officials here have handled school integration - very well, well enough, not too well, or not well at all?

B13. As you probably know, in some places they assign children to schools in other neighborhoods to get a more even spread of black and white children in schools. Do you think this is a good idea, or not?

B14. Why do you say that?

B15. (Interviewer: Check one)

R has children in public school

R does not have children in public school

B16. Suppose people in your neighborhood were asked to send their children to a school a little farther away from home than the one they go to now to help integrate the schools in Atlanta. Would you be willing to do this or not?

SERVICES

J1. Here is a list of services and problems. Some we have talked about already, others we have not. For each, I want you to tell me whether you think the local agencies should spend more money, less money, or about as much money as is now spent on these services, or problems. Remember, that to spend more on something, the local government has to spend less on something else or it has to raise taxes.

a. Public schools

b. Police patrolling the streets at night

c. Giving tickets and towing cars parked in illegal places

d. Street lighting

e. Cleaning and repairing streets

f. Providing medical care to people who cannot afford to pay for it themselves

g. Cleaning up parks and playgrounds for small children

h. Places for teen-age boys to go when they want to play a game, have some recreation or a good time

i. Trash and garbage collection

j. Inspecting and making owners clean up houses that are run down or have rats or other safety hazards

k. Helping kids and others who are on drugs

l. Building low-cost housing

m. Controlling air pollution

n. Improve public transportation

o. Building freeways

p. Welfare and aid for dependent children (AFDC)

PAGINATION INCORRECT

J2. I know there are a lot of things on this list. But could you pick out the three where you think increased efforts are most needed.

J3. And if some things had to be cut back on, which three would you choose?

J4. As you know, costs keep going up. If a choice has to be made, do you think taxes should be raised or services like those on the list should be cut down?

J5. Here are five ways that local governments can raise money. If more tax money is needed, which do you think is the best way to raise it?

Tax on property

Tax on income or earnings

Tax on utilities - like electricity, gas, or water

Sales tax

Tax on automobile owners

J6. Which is the next best way?

J7. From what you know, do you think taxes are too high here in Atlanta, about right, or are they too low to pay for needed services?

J8. Do you think that trash and garbage collection should be paid for by taxes, or should people hire and pay for their own trash collection service?

J9. How about libraries and museums - should tax money be used to help support these, or should people who use them have to pay enough to support them?

J10. As you probably know, land that is owned by private schools and universities in the city by law cannot be taxed. Do you think this law should be changed or not?

J11. Also, as you probably know, land that is owned by churches in the city, by law, cannot be taxed. Do you think this law should be changed or not?

J12. Why do you feel that way?

REPORT ON THE EMERGENCY SCHOOL ASSISTANCE PROGRAM

The Emergency School Assistance Program (ESAP) has, through the nature of its flexibility, provided diversified approaches attempting to identify and devise solutions to problems arising from desegregation.

The original funding of $1,150,989.00 was divided into general categories established in the proposal, e.g., Community Relations, Pupil Personnel Services, Special Curriculum Revision. The funds in each category were then apportioned to schools based on three groupings (A, B, and C) dependent upon the amount of integration of the student body which had taken place during the 1969-70 school year and projected for 1970-71.

Community Involvement

Each school in the system received $525 to be used in community relations and parental involvement. Eighty-five schools have proposed some type of action to include members of the community. The approach has often been an indirect one to get people working together on a problem of common interest. These programs have involved such diverse activities as get-togethers, workshops on community beautification or the new math, and the employment of a person to work door to door answering questions and combating rumors.

Special Pupil Personnel Services

Four dollars for each first grade child in the group A and B schools were provided for behavior modification. In addition, some schools asked to utilize funds originally allocated to Supplies and Materials to assist in behavior modification. Various techniques were proposed in 16 schools. Two workshops in behavior modification techniques were held using consultants from the Georgia Mental Health Institute for a period of six weeks. In the Area V Workshop, two-thirds of the teachers were new white teachers teaching in predominantly black schools, and one-third of the group was black teachers teaching in predominantly white schools. All had expressed dissatisfaction with their

teaching because of disciplinary problems. The second workshop was held by teacher in-service training in the spring, whereby 55 additional teachers were released to work on improvement of classroom management in the integrated classroom.

Special Curriculum Revision

Each of the 12 schools in group A and the 25 schools in group B were provided funds for the improvement of communication, in addition each high school in the system received funds to help devise courses dealing with problems of desegregation, and further, all schools received a sum to be used to purchase materials and supplies and equipment for the lower academic one-third of the student body. The latter ranged from $166 for the smallest of the C elementary schools to $6,480 for the largest A high school.

The heaviest concentration of expenditure by schools has been in the purchasing of materials, supplies, and equipment. One hundred twenty-five of one hundred fifty-seven schools have utilized their funds primarily in the purchase of material items to enhance Communication Skills Laboratories, individual instruction, and provide multi-ethnic books.

Experimental work in curriculum development and individualization of instruction based on the Duluth Model will be carried out in several schools this fall.

Teacher Preparation Program

Some funds in this category were allocated to all schools and most often the funds were used to supplement usage of funds in other categories.

Teacher preparation projects have been planned in 59 of 157 schools. In 24 schools, students' services have been employed in connection with various project plans such as helping new teachers become acquainted with the school community via walking tours. A citywide Communication Skills Laboratory

workshop has recently been completed.

To develop teaching teams and improvement of instruction through the use of team teaching across ethnic lines, five schools are holding a workshop which started in June and will continue into August.

A special citywide workshop for teachers new to the system has been planned for late summer.

Seven schools in Area IV participated in the Instructional Development Institute Workshop. This is a system of instructional development in which the first stage is to define the problem and identify it, analyze the setting, and organize the management process. The second stage of development incorporates identifying objectives, specifying methods and constructing prototypes. The third stage is evaluation, calling for teaching prototypes, analyzing results and implementing and recycling where necessary.

Dr. Robert Waggoner, Coordinator of Music, has planned a city wide workshop for music teachers in late August to emphasize the background materials for black studies in music, whereby black music will be studied in more diversity than just "spiritual" and "blues" music.

Special Student To Student

There were 16 proposals establishing direct student-to-student tutoring programs. Often these tutorial programs were conducted by high school students with their feeder elementary schools in order to establish better rapport and quell rumor and fear in the community. The major portion of the activities of the ESAP team during May was expended in the establishment of the Sky Lake Camp project as a student-to-student activity.

This modular, problem solving, fourth-quarter course of which the camp community experiment is an integral part, calls for two days in which the class

meets in their respective middle or high schools. The classes of twenty students, accompanied by their teacher, then go to Sky Lake by chartered transportation for a ten-day period in a controlled environment, after which they return to their respective schools to further refine the solutions they proposed for the problems relating to the desegregation process. Parents are encouraged to join into the community for the weekend their son or daughter is in camp. Of the 29 middle and secondary schools, all but three are participating in the program.

The structure of the program in the controlled environment calls for classes in human relations, leadership, problem solving techniques, problems across ethnic lines and individual school problems. Other classes in science, art and swimming are also provided. Physical activities such as canoeing, tennis, softball, basketball, volley ball and table tennis are also provided. Provisions for teacher training in value identification and problem solving techniques are built into the program while the students are involved in their classes with the camp staff and the teacher is "free".

Adjustments were found to be necessary in curriculum on almost a day-to-day basis to deal with needs reflected by the camp population. The effectiveness of the program will not be immediately measurable, but problem areas are being identified and correction made. Feedback from the sessions has provided the basis of a continually revision so that each session has proceeded somewhat smoother than those preceding it. Discipline problems which some adults had originally feared, have not materialized.

Follow-up on the schools participating in the program will continue through the summer and into the fall.

The lack of lead-time provided by the government for the establishment of the fourth-quarter course proved a serious defect. Selection of a corps of camp staff personnel highly qualified in their respective areas, and provisions

for the logistical support for the camp was accomplished only by the cooperation of the Purchasing, Personnel and Administrative Services Departments.

FOR INFORMATION

BRIEF EXPLANATION OF SCHOOL CAPACITY

Within reasonable limits, student capacity of any given school facility is primarily the function of specific educational programs conducted at the facility, how it is organized, and the teacher-pupil ratio at any given time. Programs, organization, and teacher-pupil ratios vary from time to time and from school to school. Therefore, the capacity at each school will vary accordingly.

Further, most schools experience overcrowding and operate at under capacity in one or more specific areas, programs or departments within the same school at some time. No school is ever perfectly balanced in space utilization.

Since these and other complicating factors make single capacity numbers inaccurate to varying degrees, a reasonable approximation of student capacity is used for planning purposes. The attached report of capacities is simply based upon the number of teaching spaces (any regular and reasonably adequate space a principal would assign a class to meet on a regular basis), the number of supplementary classrooms and other acceptable space and the current staffing goal (teacher-pupil ratio) of the system as a whole.

Interviewer's Kit

For Reviewing Title I of the Elementary and Secondary Education Act of 1965 (P. L. 89-10)

Public Law 89-10
89th Congress, H. R. 2362
April 11, 1965

An Act

79 STAT. 27.

To strengthen and improve educational quality and educational opportunities in the Nation's elementary and secondary schools.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Elementary and Secondary Education Act of 1965". Elementary and Secondary Education Act of 1965.

TITLE I—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR THE EDUCATION OF CHILDREN OF LOW-INCOME FAMILIES AND EXTENSION OF PUBLIC LAW 874, EIGHTY-FIRST CONGRESS

SEC. 2. The Act of September 30, 1950, Public Law 874, Eighty-first Congress, as amended (20 U.S.C. 236–244), is amended by inserting: 64 Stat. 1100.

"TITLE I—FINANCIAL ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES IN AREAS AFFECTED BY FEDERAL ACTIVITY"

immediately above the heading of section 1, by striking out "this Act" wherever it appears in sections 1 through 6, inclusive (other than where it appears in clause (B) of section 4(a)), and inserting in lieu thereof "this title", and by adding immediately after section 6 the following new title: 67 Stat. 532. 20 USC 239.

"TITLE II—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR THE EDUCATION OF CHILDREN OF LOW-INCOME FAMILIES

"DECLARATION OF POLICY

"SEC. 201. In recognition of the special educational needs of children of low-income families and the impact that concentrations of low-income families have on the ability of local educational agencies to support adequate educational programs, the Congress hereby declares it to be the policy of the United States to provide financial assistance (as set forth in this title) to local educational agencies serving areas with concentrations of children from low-income families to expand and improve their educational programs by various means (including preschool programs) which contribute particularly to meeting the special educational needs of educationally deprived children.

"KINDS AND DURATION OF GRANTS

"SEC. 202. The Commissioner shall, in accordance with the provisions of this title, make payments to State educational agencies for basic grants to local educational agencies for the period beginning July 1, 1965, and ending June 30, 1968, and he shall make payments to State educational agencies for special incentive grants to local educational agencies for the period beginning July 1, 1966, and ending June 30, 1968.

46-250 (10)—O—65

"BASIC GRANTS—AMOUNT AND ELIGIBILITY

"SEC. 203. (a)(1) From the sums appropriated for making basic grants under this title for a fiscal year, the Commissioner shall reserve such amount, but not in excess of 2 per centum thereof, as he may determine and shall allot such amount among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective need for such grants. The maximum basic grant which a local educational agency in Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands shall be eligible to receive shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this title.

"(2) In any case in which the Commissioner determines that satisfactory data for that purpose are available, the maximum basic grant which a local educational agency in a State shall be eligible to receive under this title for any fiscal year shall be (except as provided in paragraph (3)) an amount equal to the Federal percentage (established pursuant to subsection (c)) of the average per pupil expenditure in that State multiplied by the sum of (A) the number of children aged five to seventeen, inclusive, in the school district of such agency, of families having an annual income of less than the low-income factor (established pursuant to subsection (c)), and (B) the number of children of such ages in such school district of families receiving an annual income in excess of the low-income factor (as established pursuant to subsection (c)) from payments under the program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act. In any other case, the maximum basic grant for any local educational agency in a State shall be determined on the basis of the aggregate maximum amount of such grants for all such agencies in the county or counties in which the school district of the particular agency is located, which aggregate maximum amount shall be equal to the Federal percentage of such per pupil expenditure multiplied by the number of children of such ages and families in such county or counties and shall be allocated among those agencies upon such equitable basis as may be determined by the State educational agency in accordance with basic criteria prescribed by the Commissioner. For purposes of this subsection the 'average per pupil expenditure' in a State shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all local educational agencies in the State (without regard to the sources of funds from which such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding year. In determining the maximum amount of a basic grant and the eligibility of a local educational agency for a basic grant for any fiscal year, the number of children determined under the first two sentences of this subsection or under subsection (b) shall be reduced by the number of children aged five to seventeen, inclusive, of families having an annual income of less than the low-income factor (as established pursuant to subsection (c)) for whom a payment was made under title I for the previous fiscal year.

49 Stat. 627.
42 USC 601-609.

"Average per pupil expenditure."

"(3) If the maximum amount of the basic grant determined pursuant to paragraph (1) or (2) for any local educational agency for the fiscal year ending June 30, 1966, is greater than 30 per centum of the sum budgeted by that agency for current expenditures for that year (as determined pursuant to regulations of the Commissioner), such maximum amount shall be reduced to 30 per centum of such budgeted sum.

"(4) For purposes of this subsection, the term 'State' does not include Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

"(b) A local educational agency shall be eligible for a basic grant for a fiscal year under this title only if it meets the following requirements with respect to the number of children aged five to seventeen, inclusive, of families having an annual income of less than the low-income factor (as established pursuant to subsection (c)):

"(1) In any case (except as provided in paragraph (3)) in which the Commissioner determines that satisfactory data for the purpose of this subsection as to the number of such children of such families are available on a school district basis, the number of such children of such families in the school district of such local educational agency shall be—

"(A) at least one hundred, or

"(B) equal to 3 per centum or more of the total number of all children aged five to seventeen, inclusive, in such district,

whichever is less, except that it shall in no case be less than ten.

"(2) In any other case, except as provided in paragraph (3), the number of children of such ages of families with such income in the county which includes such local educational agency's school district shall be one hundred or more.

"(3) In any case in which a county includes a part of the school district of the local educational agency concerned and the Commissioner has not determined that satisfactory data for the purpose of this subsection are available on a school district basis for all the local educational agencies for all the counties into which the school district of the local educational agency concerned extends, the eligibility requirement with respect to the number of children of such ages of families of such income for such local educational agency shall be determined in accordance with regulations prescribed by the Commissioner for the purposes of this subsection.

"(c) For the purposes of this section, the 'Federal percentage' and the 'low-income factor' for the fiscal year ending June 30, 1966, shall be 50 per centum and $2,000, respectively. For each of the two succeeding fiscal years the Federal percentage and the low-income factor shall be established by the Congress by law.

"Federal percentage."
"Low-income factor."

"(d) For the purposes of this section, the Commissioner shall determine the number of children aged five to seventeen, inclusive, of families having an annual income of less than the low-income factor (as established pursuant to subsection (c)) on the basis of the most recent satisfactory data available from the Department of Commerce. At any time such data for a county are available in the Department of Commerce, such data shall be used in making calculations under this section. The Secretary of Health, Education, and Welfare shall determine the number of children of such ages from families receiving an annual income in excess of the low-income factor (established pursuant to subsection (c)) from payments under the program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act on the basis of the best available data for the period most nearly comparable to those which are used by the Commissioner under the first two sentences of this subsection in making determinations for the purposes of subsections (a) and (b). When requested by the Commissioner, the Secretary of Commerce shall make a special estimate of the number of children of such ages who are from families having an annual income less than the low

49 Stat. 627.
42 USC 601-609.

income factor (established pursuant to subsection (c)) in each county or school district, and the Commissioner is authorized to pay (either in advance or by way of reimbursement) the Secretary of Commerce the cost of making this special estimate. The Secretary of Commerce shall give consideration to any request of the chief executive of a State for the collection of additional census information.

"SPECIAL INCENTIVE GRANTS

"SEC. 204. Each local educational agency which is eligible to receive a basic grant for the fiscal year ending June 30, 1967, shall be eligible to receive in addition a special incentive grant which does not exceed the product of (a) the aggregate number of children in average daily attendance to whom such agency provided free public education during the fiscal year ending June 30, 1965, and (b) the amount by which the average per pupil expenditure of that agency for the fiscal year ending June 30, 1965, exceeded 105 per centum of such expenditure for the fiscal year ending June 30, 1964. Each local educational agency which is eligible to receive a basic grant for the fiscal year ending June 30, 1968, shall be eligible to receive in addition a special incentive grant which does not exceed the product of (c) the aggregate number of children in average daily attendance to whom such agency provided free public education during the fiscal year ending June 30, 1966, and (d) the amount by which the average per pupil expenditure of that agency for the fiscal year ending June 30, 1966, exceeded 110 per centum of such expenditure for the fiscal year ending June 30, 1964. For the purpose of this section the 'average per pupil expenditure' of a local educational agency for any year shall be the aggregate expenditures (without regard to the sources of funds from which such expenditures are made, except that funds derived from Federal sources shall not be used in computing such expenditures) from current revenues made by that agency during that year for free public education, divided by the aggregate number of children in average daily attendance to whom such agency provided free public education during that year.

"Average per pupil expenditure."

"APPLICATION

"SEC. 205. (a) A local educational agency may receive a basic grant or a special incentive grant under this title for any fiscal year only upon application therefor approved by the appropriate State educational agency, upon its determination (consistent with such basic criteria as the Commissioner may establish)—

"(1) that payments under this title will be used for programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) (A) which are designed to meet the special educational needs of educationally deprived children in school attendance areas having high concentrations of children from low-income families and (B) which are of sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting those needs, and nothing herein shall be deemed to preclude two or more local educational agencies from entering into agreements, at their option, for carrying out jointly operated programs and projects under this title;

"(2) that, to the extent consistent with the number of educationally deprived children in the school district of the local educational agency who are enrolled in private elementary and secondary schools, such agency has made provision for including

special educational services and arrangements (such as dual enrollment, educational radio and television, and mobile educational services and equipment) in which such children can participate;

"(3) that the local educational agency has provided satisfactory assurance that the control of funds provided under this title, and title to property derived therefrom, shall be in a public agency for the uses and purposes provided in this title, and that a public agency will administer such funds and property;

"(4) in the case of any project for construction of school facilities, that the project is not inconsistent with overall State plans for the construction of school facilities and that the requirements of section 209 will be complied with on all such construction projects;

"(5) that effective procedures, including provision for appropriate objective measurements of educational achievement, will be adopted for evaluating at least annually the effectiveness of the programs in meeting the special educational needs of educationally deprived children;

"(6) that the local educational agency will make an annual report and such other reports to the State educational agency, in such form and containing such information, as may be reasonably necessary to enable the State educational agency to perform its duties under this title, including information relating to the educational achievement of students participating in programs carried out under this title, and will keep such records and afford such access thereto as the State educational agency may find necessary to assure the correctness and verification of such reports;

"(7) that wherever there is, in the area served by the local educational agency, a community action program approved pursuant to title II of the Economic Opportunity Act of 1964 (Public Law 88-452), the programs and projects have been developed in cooperation with the public or private nonprofit agency responsible for the community action program; and

78 Stat. 516.
42 USC 2781-2831.

"(8) that effective procedures will be adopted for acquiring and disseminating to teachers and administrators significant information derived from educational research, demonstration, and similar projects, and for adopting, where appropriate, promising educational practices developed through such projects.

"(b) The State educational agency shall not finally disapprove in whole or in part any application for funds under this title without first affording the local educational agency submitting the application reasonable notice and opportunity for a hearing.

"ASSURANCES FROM STATES

"SEC. 206. (a) Any State desiring to participate in the program of this title shall submit through its State educational agency to the Commissioner an application, in such detail as the Commissioner deems necessary, which provides satisfactory assurance—

"(1) that, except as provided in section 207(b), payments under this title will be used only for programs and projects which have been approved by the State educational agency pursuant to section 205(a) and which meet the requirements of that section, and that such agency will in all other respects comply with the provisions of this title, including the enforcement of any obligations imposed upon a local educational agency under section 205(a);

"(2) that such fiscal control and fund accounting procedures will be adopted as may be necessary to assure proper disbursement

of, and accounting for, Federal funds paid to the State (including such funds paid by the State to local educational agencies) under this title; and

"(3) that the State educational agency will make to the Commissioner (A) periodic reports (including the results of objective measurements required by section 205(a)(5)) evaluating the effectiveness of payments under this title and of particular programs assisted under it in improving the educational attainment of educationally deprived children, and (B) such other reports as may be reasonably necessary to enable the Commissioner to perform his duties under this title (including such reports as he may require to determine the amounts which the local educational agencies of that State are eligible to receive for any fiscal year), and assurance that such agency will keep such records and afford such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

Records.

"(b) The Commissioner shall approve an application which meets the requirements specified in subsection (a), and he shall not finally disapprove an application except after reasonable notice and opportunity for a hearing to the State educational agency.

"PAYMENT

"SEC. 207. (a)(1) The Commissioner shall, subject to the provisions of section 208, from time to time pay to each State, in advance or otherwise, the amount which the local educational agencies of that State are eligible to receive under this title. Such payments shall take into account the extent (if any) to which any previous payment to such State educational agency under this title (whether or not in the same fiscal year) was greater or less than the amount which should have been paid to it.

"(2) From the funds paid to it pursuant to paragraph (1) each State educational agency shall distribute to each local educational agency of the State which is not ineligible by reason of section 203(b) and which has submitted an application approved pursuant to section 205(a) the amount for which such application has been approved, except that this amount shall not exceed an amount equal to the total of the maximum amount of the basic grant plus the maximum amount of the special incentive grant as determined for that agency pursuant to sections 203 and 204, respectively.

"(b) The Commissioner is authorized to pay to each State amounts equal to the amounts expended by it for the proper and efficient performance of its duties under this title (including technical assistance for the measurements and evaluations required by section 205(a)(5)), except that the total of such payments in any fiscal year shall not exceed 1 per centum of the total of the amount of the basic grants paid under this title for that year to the local educational agencies of the State.

"(c)(1) No payments shall be made under this title for any fiscal year to a State which has taken into consideration payments under this title in determining the eligibility of any local educational agency in that State for State aid, or the amount of that aid, with respect to the free public education of children during that year or the preceding fiscal year.

"(2) No payments shall be made under this title to any local educational agency for any fiscal year unless the State educational agency finds that the combined fiscal effort (as determined in accordance with regulations of the Commissioner) of that agency and the State with

respect to the provision of free public education by that agency for the preceding fiscal year was not less than such combined fiscal effort for that purpose for the fiscal year ending June 30, 1964.

"ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS

"SEC. 208. If the sums appropriated for the fiscal year ending June 30, 1966, for making the payments provided in this title are not sufficient to pay in full the total amounts which all local and State educational agencies are eligible to receive under this title for such year, such amounts shall be reduced ratably. In case additional funds become available for making payments under this title for that year, such reduced amounts shall be increased on the same basis that they were reduced.

"LABOR STANDARDS

"SEC. 209. All laborers and mechanics employed by contractors or subcontractors on all construction projects assisted under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5). The Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z-15) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

49 Stat. 1011;
78 Stat. 238.
64 Stat. 1267.
63 Stat. 108.

"WITHHOLDING

"SEC. 210. Whenever the Commissioner, after reasonable notice and opportunity for hearing to any State educational agency, finds that there has been a failure to comply substantially with any assurance set forth in the application of that State approved under section 206(b), the Commissioner shall notify the agency that further payments will not be made to the State under this title (or, in his discretion, that the State educational agency shall not make further payments under this title to specified local educational agencies affected by the failure) until he is satisfied that there is no longer any such failure to comply. Until he is so satisfied, no further payments shall be made to the State under this title, or payments by the State educational agency under this title shall be limited to local educational agencies not affected by the failure, as the case may be.

"JUDICIAL REVIEW

"SEC. 211. (a) If any State is dissatisfied with the Commissioner's final action with respect to the approval of its application submitted under section 206(a) or with his final action under section 210, such State may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

72 Stat. 941.

"(b) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified

findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

"(c) Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

62 Stat. 928.

"NATIONAL ADVISORY COUNCIL

"SEC. 212. (a) The President shall, within ninety days after the enactment of this title, appoint a National Advisory Council on the Education of Disadvantaged Children for the purpose of reviewing the administration and operation of this title, including its effectiveness in improving the educational attainment of educationally deprived children, and making recommendations for the improvement of this title and its administration and operation. These recommendations shall take into consideration experience gained under this and other Federal educational programs for disadvantaged children and, to the extent appropriate, experience gained under other public and private educational programs for disadvantaged children.

"(b) The Council shall be appointed by the President without regard to the civil service laws and shall consist of twelve persons. When requested by the President, the Secretary of Health, Education, and Welfare shall engage such technical assistance as may be required to carry out the functions of the Council, and the Secretary shall make available to the Council such secretarial, clerical, and other assistance and such pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out such functions.

Report to President and Congress.

"(c) The Council shall make an annual report of its findings and recommendations (including recommendations for changes in the provisions of this title) to the President not later than March 31 of each calendar year beginning after the enactment of this title. The President shall transmit each such report to the Congress together with his comments and recommendations.

"(d) Members of the Council who are not regular full-time employees of the United States shall, while serving on business of the Council, be entitled to receive compensation at rates fixed by the President, but not exceeding $100 per day, including travel time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b-2) for persons in Government service employed intermittently."

60 Stat. 808;
75 Stat. 339,340.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 3. (a) Clause (A) of section 3(c)(4) of the Act of September 30, 1950, Public Law 874, Eighty-first Congress, as amended (20 U.S.C. 238 (c)(4)(A)) is amended by striking out "), and inserting ", but excluding funds available under title II) is,".

67 Stat. 531;
70 Stat. 971.

(b) The sentence which immediately follows clause (B) of section 4(a) of such Act (20 U.S.C. 239(a)(B)) is amended by inserting "(exclusive of funds available under title II)" immediately after "Federal funds".

67 Stat. 532.

(c)(1) Such Act is further amended by inserting "TITLE III—GENERAL" above the heading for section 7, and by redesignating sections 7, 8, and 9, and references thereto, as sections 301, 302, and 303, respectively. 64 Stat. 1107. 20 USC 242-244.

(2) Subsections (b) and (c) of the section of such Act redesignated as section 302 are amended by striking out "this Act" wherever it appears and inserting in lieu thereof "title I".

DEFINITIONS

SEC. 4. (a) Paragraph (2) of the section of the Act of September 30, 1950, Public Law 874, Eighty-first Congress, as amended, redesignated by section 3 of this Act as section 303, is amended to read as follows:

"(2) The term 'child', except as used in title II, means any child who is within the age limits for which the applicable State provides free public education." "Child."

(b) Paragraph (4) of such section 303 is amended by inserting before the period at the end thereof ", except that for the purposes of title II such term does not include any education provided beyond grade 12".

(c) Paragraph (5) of such section 303 is amended by inserting immediately before the period at the end thereof the following: ", or any expenditures made from funds granted under title II of this Act or titles II or III of the Elementary and Secondary Education Act of 1965".

(d)(1) Paragraph (8) of such section 303 is amended by inserting "American Samoa," after "the District of Columbia,", and by inserting after "the Virgin Islands" the following: ", and for purposes of title II, such term includes the Trust Territory of the Pacific Islands".

(2) Sections 3(d) and 6(c) of such Act (20 U.S.C. 238(d), 241(c)) are each amended by inserting "American Samoa," after "Guam," each time that it appears. 64 Stat. 1102; 67 Stat. 530, 532, 535.

(e) Such section 303 is further amended by adding at the end thereof the following new paragraphs:

"(11) The term 'county' means those divisions of a State utilized by the Secretary of Commerce in compiling and reporting data regarding counties.

"(12) The term 'construction' includes the preparation of drawings and specifications for school facilities; erecting, building, acquiring, altering, remodeling, improving, or extending school facilities; and the inspection and supervision of the construction of school facilities.

"(13) The term 'school facilities' means classrooms and related facilities (including initial equipment) for free public education and interests in land (including site, grading, and improvements) on which such facilities are constructed, except that such term does not include those gymnasiums and similar facilities intended primarily for exhibitions for which admission is to be charged to the general public.

"(14) The term 'equipment' includes machinery, utilities, and built-in equipment and any necessary enclosures or structures to house them, and includes all other items necessary for the functioning of a particular facility as a facility for the provision of educational services, including items such as instructional equipment and necessary furniture, printed, published, and audio-visual instructional materials, and books, periodicals, documents, and other related materials.

"(15) For the purpose of title II, the term 'elementary school' means a day or residential school which provides elementary educa-

tion, as determined under State law, and the term 'secondary school' means a day or residential school which provides secondary education, as determined under State law, except that it does not include any education provided beyond grade 12."

EXTENSION OF TITLE I OF PUBLIC LAW 874

EIGHTY-FIRST CONGRESS

64 Stat. 1101; 67 Stat. 530, 532; 78 Stat. 1109.

SEC. 5. Sections 2(a), 3(b), and 4(a) of title I of the Act of September 30, 1950, Public Law 874, Eighty-first Congress, as amended (20 U.S.C. 237(a), 238(b), 239(a)), are each amended by striking out "1966" each place where it appears and inserting in lieu thereof "1968".

TITLE II—SCHOOL LIBRARY RESOURCES, TEXTBOOKS, AND OTHER INSTRUCTIONAL MATERIALS

APPROPRIATIONS AUTHORIZED

SEC. 201. (a) The Commissioner shall carry out during the fiscal year ending June 30, 1966, and each of the four succeeding fiscal years, a program for making grants for the acquisition of school library resources, textbooks, and other printed and published instructional materials for the use of children and teachers in public and private elementary and secondary schools.

(b) For the purpose of making grants under this title, there is hereby authorized to be appropriated the sum of $100,000,000 for the fiscal year ending June 30, 1966; but for the fiscal year ending June 30, 1967, and the three succeeding fiscal years, only such sums may be appropriated as the Congress may hereafter authorize by law.

ALLOTMENT TO STATES

SEC. 202. (a) From the sums appropriated for carrying out this title for any fiscal year, the Commissioner shall reserve such amount, but not in excess of 2 per centum thereof, as he may determine and shall allot such amount among the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs for assistance under this title. From the remainder of such sums, the Commissioner shall allot to each State an amount which bears the same ratio to such remainder as the number of children enrolled in the public and private elementary and secondary schools of that State bears to the total number of children enrolled in such schools in all of the States. The number of children so enrolled shall be determined by the Commissioner on the basis of the most recent satisfactory data available to him. For purposes of this subsection, the term "State" shall not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(b) The amount of any State's allotment under subsection (a) for any fiscal year which the Commissioner determines will not be required for such fiscal year shall be available for reallotment from time to time, on such dates during such year as the Commissioner may fix, to other States in proportion to the original allotments to such States under subsection (a) for that year but with such proportionate amount for any of such other States being reduced to the extent it exceeds the

sum the Commissioner estimates such State needs and will be able to use for such year; and the total of such reductions shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amount reallotted to a State under this subsection during a year from funds appropriated pursuant to section 201 shall be deemed part of its allotment under section (a) for such year.

STATE PLANS

SEC. 203. (a) Any State which desires to receive grants under this title shall submit to the Commissioner a State plan, in such detail as the Commissioner deems necessary, which—

(1) designates a State agency which shall, either directly or through arrangements with other State or local public agencies, act as the sole agency for administration of the State plan;

(2) sets forth a program under which funds paid to the State from its allotment under section 202 will be expended solely for (A) acquisition of library resources (which for the purposes of this title means books, periodicals, documents, audio-visual materials, and other related library materials), textbooks, and other printed and published instructional materials for the use of children and teachers in public and private elementary and secondary schools in the State, and (B) administration of the State plan, including the development and revision of standards relating to library resources, textbooks, and other printed and published instructional materials furnished for the use of children and teachers in the public elementary and secondary schools of the State, except that the amount used for administration of the State plan shall not exceed for the fiscal year ending June 30, 1966, an amount equal to 5 per centum of the amount paid to the State under this title for that year, and for any fiscal year thereafter an amount equal to 3 per centum of the amount paid to the State under this title for that year;

(3) sets forth the criteria to be used in allocating library resources, textbooks, and other printed and published instructional materials provided under this title among the children and teachers of the State, which criteria shall—

(A) take into consideration the relative need of the children and teachers of the State for such library resources, textbooks, or other instructional materials, and

(B) provide assurance that to the extent consistent with law such library resources, textbooks, and other instructional materials will be provided on an equitable basis for the use of children and teachers in private elementary and secondary schools in the State which comply with the compulsory attendance laws of the State or are otherwise recognized by it through some procedure customarily used in the State;

(4) sets forth the criteria to be used in selecting the library resources, textbooks, and other instructional materials to be provided under this title and for determining the proportions of the State's allotment for each fiscal year which will be expended for library resources, textbooks, and other printed and published instructional materials, respectively, and the terms by which such library resources, textbooks, and other instructional materials will be made available for the use of children and teachers in the schools of the State;

(5) sets forth policies and procedures designed to assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of State, local, and private school funds that would in the absence of such Federal funds be made available for library resources, textbooks, and other printed and published instructional materials, and in no case supplant such State, local, and private school funds;

(6) sets forth such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State (including any such funds paid by the State to any other public agency) under this title; and

(7) provides for making such reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(b) The Commissioner shall approve any State plan and any modification thereof which complies with the provisions of subsection (a).

PAYMENTS TO STATES

SEC. 204. (a) From the amounts allotted to each State under section 202 the Commissioner shall pay to that State an amount equal to the amount expended by the State in carrying out its State plan. Such payments may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

(b) In any State which has a State plan approved under section 203(b) and in which no State agency is authorized by law to provide library resources, textbooks, or other printed and published instructional materials for the use of children and teachers in any one or more elementary or secondary schools in such State, the Commissioner shall arrange for the provision on an equitable basis of such library resources, textbooks, or other instructional materials for such use and shall pay the cost thereof for any fiscal year ending prior to July 1, 1970, out of that State's allotment.

PUBLIC CONTROL OF LIBRARY RESOURCES, TEXTBOOKS, AND OTHER INSTRUCTIONAL MATERIAL AND TYPES WHICH MAY BE MADE AVAILABLE

SEC. 205. (a) Title to library resources, textbooks, and other printed and published instructional materials furnished pursuant to this title, and control and administration of their use, shall vest only in a public agency.

(b) The library resources, textbooks, and other printed and published instructional materials made available pursuant to this title for use of children and teachers in any school in any State shall be limited to those which have been approved by an appropriate State or local educational authority or agency for use, or are used, in a public elementary or secondary school of that State.

ADMINISTRATION OF STATE PLANS

SEC. 206. (a) The Commissioner shall not finally disapprove any State plan submitted under this title, or any modification thereof, without first affording the State agency administering the plan reasonable notice and opportunity for a hearing.

(b) Whenever the Commissioner, after reasonable notice and opportunity for hearing to such State agency, finds—

(1) that the State plan has been so changed that it no longer complies with the provisions of section 203(a), or

(2) that in the administration of the plan there is a failure to comply substantially with any such provisions,

the Commissioner shall notify such State agency that the State will not be regarded as eligible to participate in the program under this title until he is satisfied that there is no longer any such failure to comply.

JUDICIAL REVIEW

SEC. 207. (a) If any State is dissatisfied with the Commissioner's final action with respect to the approval of its State plan submitted under section 203(a) or with his final action under section 206(b), such State may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code. 72 Stat. 941.

(b) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(c) The court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code. 62 Stat. 928.

TITLE III—SUPPLEMENTARY EDUCATIONAL CENTERS AND SERVICES

APPROPRIATIONS AUTHORIZED

SEC. 301. (a) The Commissioner shall carry out during the fiscal year ending June 30, 1966, and each of the four succeeding fiscal years, a program for making grants for supplementary educational centers and services, to stimulate and assist in the provision of vitally needed educational services not available in sufficient quantity or quality, and to stimulate and assist in the development and establishment of exemplary elementary and secondary school educational programs to serve as models for regular school programs.

(b) For the purpose of making grants under this title, there is hereby authorized to be appropriated the sum of $100,000,000, for the fiscal year ending June 30, 1966; but for the fiscal year ending June 30, 1967, and the 3 succeeding fiscal years, only such sums may be appropriated as the Congress may hereafter authorize by law.

APPORTIONMENT AMONG STATES

SEC. 302. (a) From the sums appropriated for carrying out this title for each fiscal year, the Commissioner shall reserve such amount, but not in excess of 2 per centum thereof, as he may determine and shall apportion such amount among the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands, according to their respective needs for assistance under this title. From the remainder of such sums the Commissioner shall apportion $200,000 to each State and shall apportion the remainder of such sums among the States as follows:

(1) he shall apportion to each State an amount which bears the same ratio to 50 per centum of such remainder as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all the States, and

(2) he shall apportion to each State an amount which bears the same ratio to 50 per centum of such remainder as the population of the State bears to the population of all the States.

For purposes of this subsection, the term "State" does not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(b) The number of children aged five to seventeen, inclusive, and the total population of a State and of all the States shall be determined by the Commissioner on the basis of the most recent satisfactory data available to him.

(c) The amount apportioned under this section to any State for the fiscal year ending June 30, 1966, shall be available for payments to applicants with approved applications in that State during that year and the next fiscal year.

(d) The amount apportioned to any State under subsection (a) for any fiscal year which the Commissioner determines will not be required for the period for which that amount is available shall be available for reapportionment from time to time, on such dates during that period as the Commissioner may fix, among other States in proportion to the amounts originally apportioned among those States under subsection (a) for that year, but with the proportionate amount for any of the other States being reduced to the extent it exceeds the sum the Commissioner estimates that State needs and will be able to use for that period; and the total of these reductions shall be similarly reapportioned among the States whose proportionate amounts were not so reduced. Any amount reapportioned to a State under this subsection from funds appropriated pursuant to section 301 for any fiscal year shall be deemed to be a part of the amount apportioned to it under subsection (a) for that year.

USES OF FEDERAL FUNDS

SEC. 303. Grants under this title may be used, in accordance with applications approved under section 304(b), for—

(a) planning for and taking other steps leading to the development of programs designed to provide supplementary educational

activities and services described in paragraph (b), including pilot projects designed to test the effectiveness of plans so developed; and

(b) the establishment, maintenance, and operation of programs, including the lease or construction of necessary facilities and the acquisition of necessary equipment, designed to enrich the programs of local elementary and secondary schools and to offer a diverse range of educational experience to persons of varying talents and needs by providing supplementary educational services and activities such as—

(1) comprehensive guidance and counseling, remedial instruction, and school health, physical education, recreation, psychological, and social work services designed to enable and encourage persons to enter, remain in, or reenter educational programs, including the provision of special educational programs and study areas during periods when schools are not regularly in session;

(2) comprehensive academic services and, where appropriate, vocational guidance and counseling, for continuing adult education;

(3) developing and conducting exemplary educational programs, including dual-enrollment programs, for the purpose of stimulating the adoption of improved or new educational programs (including those programs described in section 503(a)(4)) in the schools of the State;

(4) specialized instruction and equipment for students interested in studying advanced scientific subjects, foreign languages, and other academic subjects which are not taught in the local schools or which can be provided more effectively on a centralized basis, or for persons who are handicapped or of preschool age;

(5) making available modern educational equipment and specially qualified personnel, including artists and musicians, on a temporary basis to public and other nonprofit schools, organizations, and institutions;

(6) developing, producing, and transmitting radio and television programs for classroom and other educational use;

(7) providing special educational and related services for persons who are in or from rural areas or who are or have been otherwise isolated from normal educational opportunities, including, where appropriate, the provision of mobile educational services and equipment, special home study courses, radio, television, and related forms of instruction, and visiting teachers' programs; and

(8) other specially designed educational programs which meet the purposes of this title.

APPLICATIONS FOR GRANTS AND CONDITIONS FOR APPROVAL

SEC. 304. (a) A grant under this title for a program of supplementary educational services may be made to a local educational agency or agencies, but only if there is satisfactory assurance that in the planning of that program there has been, and in the establishing and carrying out of that program there will be, participation of persons broadly representative of the cultural and educational resources of the area to be served. For the purposes of this section, the term "cultural and educational resources" includes State educational agen-

"Cultural and educational resources."

cies, institutions of higher education, nonprofit private schools, public and nonprofit private agencies such as libraries, museums, musical and artistic organizations, educational radio and television, and other cultural and educational resources. Such grants may be made only upon application to the Commissioner at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary. Such applications shall—

(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the applicant;

(2) set forth a program for carrying out the purposes set forth in paragraph (a) or paragraph (b) of section 303 and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

(3) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the applicant for the purposes described in paragraphs (a) and (b) of section 303, and in no case supplant such funds;

(4) in the case of an application for assistance under this title which includes a project for construction of necessary facilities, provide satisfactory assurance (A) that reasonable provision has been made, consistent with the other uses to be made of the facilities, for areas in such facilities which are adaptable for artistic and cultural activities, (B) that upon completion of the construction title to the facilities will be in a State or local educational agency, and (C) that the requirements of section 308 will be complied with on all construction projects assisted under this title;

(5) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this title; and

(6) provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the area served, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

Records.

(b) Applications for grants under this title may be approved by the Commissioner only if—

(1) the application meets the requirements set forth in subsection (a);

(2) the program set forth in the application is consistent with criteria established by the Commissioner for the purpose of achieving an equitable distribution of assistance under this title within each State, which criteria shall be developed by him on the basis of a consideration of (A) the size and population of the State, (B) the geographic distribution of the population within the State, (C) the relative need of persons in different geographic areas and in different population groups within the State for the kinds of services and activities described in paragraph (b) of

section 303, and their financial ability to provide those services and activities, and (D) the relative ability of particular local educational agencies within the State to provide those services and activities;

(3) in the case of an application for assistance for a program for carrying out the purposes described in paragraph (b) of section 303, the Commissioner determines (A) that the program will utilize the best available talents and resources and will substantially increase the educational opportunities in the area to be served by the applicant, and (B) that, to the extent consistent with the number of children enrolled in nonprofit private schools in the area to be served whose educational needs are of the type which the supplementary educational activities and services provided under the program are to meet, provision has been made for participation of such children; and

(4) the application has been submitted for review and recommendations to the State educational agency.

(c) Amendments of applications shall, except as the Commissioner may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

PAYMENTS

SEC. 305. (a) From the amounts apportioned to each State under section 302 the Commissioner shall pay to each applicant in that State which has an application approved under this title an amount equal to the total sums expended by the applicant under the application for the purposes set forth therein.

(b) Payments under this title may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

ADVISORY COMMITTEE

SEC. 306. (a) The Commissioner shall establish in the Office of Education an Advisory Committee on Supplementary Educational Centers and Services, consisting of the Commissioner, who shall be Chairman, and eight members appointed, without regard to the civil service laws, by the Commissioner with the approval of the Secretary.

(b) The Advisory Committee shall advise the Commissioner (1) on the action to be taken with regard to each application for a grant under this title, and (2) in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including the development of criteria for approval of applications thereunder. The Commissioner may appoint such special advisory and technical experts and consultants as may be useful in carrying out the functions of the Advisory Committee.

(c) Members of the Advisory Committee shall, while serving on the business of the Advisory Committee, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including travel time; and, while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b-2) for persons in the Government service employed intermittently.

60 Stat. 808; 75 Stat. 339, 340.

RECOVERY OF PAYMENTS

SEC. 307. If within twenty years after completion of any construction for which Federal funds have been paid under this title—

(a) the owner of the facility shall cease to be a State or local educational agency, or

(b) the facility shall cease to be used for the educational and related purposes for which it was constructed, unless the Commissioner determines in accordance with regulations that there is good cause for releasing the applicant or other owner from the obligation to do so,

the United States shall be entitled to recover from the applicant or other owner of the facility an amount which bears to the then value of the facility (or so much thereof as constituted an approved project or projects) the same ratio as the amount of such Federal funds bore to the cost of the facility financed with the aid of such funds. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which the facility is situated.

LABOR STANDARDS

SEC. 308. All laborers and mechanics employed by contractors or subcontractors on all construction projects assisted under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a–5). The Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z–15) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

49 Stat. 1011; 78 Stat. 238.
64 Stat. 1267.
63 Stat. 108.

TITLE IV—EDUCATIONAL RESEARCH AND TRAINING

SEC. 401. The second section of the Act of July 26, 1954 (20 U.S.C. 332), entitled "An Act to authorize cooperative research in education", is redesignated as section 3 and the material which precedes it is amended to read as follows:

68 Stat. 533.

"PURPOSE

"SEC. 1. The purpose of this Act is to enable the Office of Education more effectively to accomplish the purposes and to perform the duties for which it was originally established.

"EDUCATIONAL RESEARCH AND RESEARCH TRAINING

"SEC. 2. (a)(1) The Commissioner of Education (hereinafter in this Act referred to as the 'Commissioner') is authorized to make grants to universities and colleges and other public or private agencies, institutions, and organizations and to individuals, for research, surveys, and demonstrations in the field of education (including programs described in section 503(a)(4) of the Elementary and Secondary Education Act of 1965), and for the dissemination of information derived from educational research (including but not limited to information concerning promising educational practices developed under programs

carried out under the Elementary and Secondary Education Act of 1965) and, without regard to sections 3648 and 3709 of the Revised Statutes (31 U.S.C. 529; 41 U.S.C. 5), to provide by contracts or jointly financed cooperative arrangements with them for the conduct of such activities; except that no such grant may be made to a private agency, organization, or institution other than a nonprofit one.

"(2) No grant shall be made or contract or jointly financed cooperative arrangement entered into under this subsection until the Commissioner has obtained the advice and recommendations of a panel of specialists who are not employees of the Federal Government and who are competent to evaluate the proposals as to the soundness of their design, the possibilities of securing productive results, the adequacy of resources to conduct the proposed research, surveys, or demonstrations, and their relationship to other similar educational research or dissemination programs already completed or in progress.

"(b) The Commissioner is authorized to make grants to public and other nonprofit universities and colleges and to other public or nonprofit agencies, institutions, and organizations to assist them in providing training in research in the field of education (including such research described in section 503(a)(4) of the Elementary and Secondary Education Act of 1965), including the development and strengthening of training staff and curricular capability for such training. Grants under this subsection may, when so authorized by the Commissioner, also be used by such grantees (1) in establishing and maintaining research traineeships, internships, personnel exchanges, and pre- and post-doctoral fellowships, and for stipends and allowances (including traveling and subsistence expenses) for fellows and others undergoing training and their dependents not in excess of such maximum amounts as may be prescribed by the Commissioner, or (2), where the grantee is a State educational agency, in providing for such traineeships, internships, personnel exchanges, and fellowships either directly or through arrangements with public or other nonprofit institutions or organizations. No grant shall be made under this subsection for training in sectarian instruction or, for work to be done in an institution, or a department or branch of an institution, whose program is specifically for the education of students to prepare them to become ministers of religion or to enter upon some other religious vocation or to prepare them to teach theological subjects.

"(c) In addition to the authority granted by section 603(b) of the Elementary and Secondary Education Act of 1965, funds available to the Commissioner for grants or contracts or jointly financed cooperative arrangements under this section shall, with the approval of the Secretary, be available for transfer to any other Federal agency for use (in accordance with an interagency agreement) by such agency (alone or in combination with funds of that agency) for purposes for which such transferred funds could be otherwise expended by the Commissioner under the foregoing provisions of this section, and the Commissioner is likewise authorized to accept and expend funds of any other Federal agency for use under this section.

"(d) The Commissioner shall transmit to the Congress annually a report concerning the research, surveys, and demonstrations, the information disseminating activities, and the training in research initiated under this Act, the recommendations made by research specialists pursuant to subsection (a)(2), and any action taken with respect to such recommendations." Report to Congress.

CONFORMING AMENDMENTS

Ante, p. 44.

SEC. 402. The section of such Act redesignated as section 3 is amended by striking out "this Act" and inserting in lieu thereof "section 2".

CONSTRUCTION OF REGIONAL FACILITIES FOR RESEARCH AND RELATED PURPOSES

SEC. 403. Such Act is further amended by adding the following new sections at the end thereof:

"CONSTRUCTION OF REGIONAL FACILITIES FOR RESEARCH AND RELATED PURPOSES

"SEC. 4. (a) There is authorized to be appropriated over a period of five fiscal years beginning with the fiscal year ending June 30, 1966, $100,000,000 in the aggregate, to enable the Commissioner to carry out the purposes of this section. Sums so appropriated shall remain available until expended for payments with respect to projects for which applications have been filed under this section before July 1, 1970, and approved by the Commissioner before July 1, 1971.

"(b) Whenever the Commissioner finds that the purposes of this Act can best be achieved through the construction of a facility for research, or for research and related purposes (as defined in this section), and that such facility would be of particular value to the Nation or a region thereof as a national or regional resource for research or related purposes, he may make a grant for part or all of the cost of constructing such facility to a university, college, or other appropriate public or nonprofit private agency or institution competent to engage in the types of activity for which the facility is to constructed, or to a combination of such agencies or institutions, or may construct or make arrangements for constructing such facility through contracts for paying part or all of the cost of construction or otherwise. The Commissioner may, where he deems such action appropriate, make arrangements, by contract or otherwise, for the operation of such facilities or may make contributions toward the cost of such operation of facilities of this nature whether or not constructed pursuant to, or with the aid provided under, this section. Title to any facility constructed under this section, if vested in the United States, may be transferred by the Commissioner on behalf of the United States to any such college or university or other public or nonprofit private agency or institution, but such transfer shall be made subject to the condition that the facility will be operated for the purposes for which it was constructed and to such other conditions as the Commissioner deems necessary to carry out the objectives of this title and to protect the interests of the United States.

"(c) All laborers and mechanics employed by contractors or subcontractors in the performance of work on construction of any project under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5). The Secretary of Labor shall have, with respect to the labor standards specified in this clause, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z-15), and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

49 Stat. 1011; 78 Stat. 238.

64 Stat. 1267.

63 Stat. 108.

"(d) Payments under this section shall be made in advance or by way of reimbursement, in such installments consistent with construction progress, and on such conditions as the Commissioner may determine.

"(e) As used in this section, the term 'research and related purposes' means research, research training, surveys, or demonstrations in the field of education, or the dissemination of information derived therefrom, or all of such activities, including (but without limitation) experimental schools, except that such term does not include research, research training, surveys, or demonstrations in the field of sectarian instruction or the dissemination of information derived therefrom. "Research and related purposes."

"DEFINITIONS

"SEC. 5. As used in this Act—

"(1) The term 'State' includes, in addition to the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, and the Virgin Islands.

"(2) The term 'State educational agency' means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

"(3) The term 'nonprofit' as applied to any agency, organization, or institution means an agency, organization, or institution owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

"(4) The terms 'construction' and 'cost of construction' include (A) the construction of new buildings and the expansion, remodeling, and alteration of existing buildings, including architects' fees, but not including the cost of acquisition of land or off-site improvements, and (B) equipping new buildings and existing buildings, whether or not expanded, remodeled, or altered.

"SHORT TITLE

"SEC. 6. This Act may be cited as the 'Cooperative Research Act'."

TITLE V—GRANTS TO STRENGTHEN STATE DEPARTMENTS OF EDUCATION

APPROPRIATIONS AUTHORIZED

SEC. 501. (a) The Commissioner shall carry out during the fiscal year ending June 30, 1966, and each of the four succeeding fiscal years, a program for making grants to stimulate and assist States in strengthening the leadership resources of their State educational agencies, and to assist those agencies in the establishment and improvement of programs to identify and meet the educational needs of States.

(b) For the purpose of making grants under this title, there is hereby authorized to be appropriated the sum of $25,000,000 for the fiscal year ending June 30, 1966; but for the fiscal year ending June 30, 1967, and the three succeeding fiscal years, only such sums may be appropriated as the Congress may hereafter authorize by law.

APPORTIONMENT AMONG STATES

SEC. 502. (a)(1) From 85 per centum of the sums appropriated for carrying out this title for each fiscal year, the Commissioner shall reserve such amount, but not in excess of 2 per centum of such 85 per centum of such sums, as he may determine and shall apportion such amount among the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands according to their respective needs for assistance under this title. From the remainder of such 85 per centum of such sums the Commissioner shall apportion $100,000 to each State, and shall apportion to each State such part of the remainder of such 85 per centum of such sums as the number of public school pupils in the State bears to the number of public school pupils in all the States, as determined by the Commissioner on the basis of the most recent satisfactory data available to him. For purposes of this paragraph, the term 'State' does not include the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands.

(2) Fifteen per centum of the sums appropriated pursuant to section 501 for each fiscal year shall be reserved by the Commissioner for grants for special projects pursuant to section 505.

(b)(1) The amount apportioned to any State under paragraph (1) of subsection (a) for any fiscal year which the Commissioner determines will not be required for that year shall be available for reapportionment from time to time, on such dates during that year as the Commissioner may fix, to other States in proportion to the amounts originally apportioned among those States under subsection (a)(1) for that year, but with the proportionate amount for any of the other States being reduced to the extent it exceeds the sum the Commissioner estimates that State needs and will be able to use for that year; and the total of these reductions shall be similarly reapportioned among the States whose proportionate amounts were not so reduced. Any amount reapportioned to a State under this subsection from funds appropriated pursuant to section 501 for any fiscal year shall be deemed part of the amount apportioned to it under subsection (a)(1) for that year.

(2) In accordance with regulations of the Commissioner any State may file with him a request that a specified portion of the amount apportioned to it under subsection (a)(1) be added to the amount apportioned to another State under that subsection for the purpose of meeting a portion of the Federal share (as defined in section 503 (b)) of the cost of carrying out one or more programs or activities under an approved application of that other State. If the Commissioner finds that the programs or activities with respect to which the request is made would meet needs of the State making the request and that use of the specified portion of the amount apportioned to that State, as requested by it, would assist in carrying out the purposes of this title, that portion shall be added to the amount apportioned to the other State under subsection (a)(1) to be used for the purpose referred to above. The Federal share of the total funds expended for such programs or activities shall be adjusted on the basis of the proportion of such total funds so expended by each participating State from the amounts originally apportioned to each such State.

GRANTS FROM APPORTIONED FUNDS

SEC. 503. (a) From the amount apportioned to any State for any fiscal year under section 502 the Commissioner may, upon approval of an application or applications therefor submitted to him by such State through the State educational agency, make a grant or grants to such agency equal to the Federal share of expenditures incurred by such agency for the planning of, and for programs for, the development, improvement, or expansion of activities promoting the purposes set forth in section 501(a) and more particularly described in such application and for which such application is approved, such as—

(1) educational planning on a statewide basis, including the identification of educational problems, issues, and needs in the State and the evaluation on a periodic or continuing basis of education programs in the State;

(2) providing support or services for the comprehensive and compatible recording, collecting, processing, analyzing, interpreting, storing, retrieving, and reporting of State and local educational data, including the use of automated data systems;

(3) dissemination or support for the dissemination of information relating to the condition, progress, and needs of education in the State;

(4) programs for conducting, sponsoring, or cooperating in educational research and demonstration programs and projects such as (A) establishing and maintaining curriculum research and innovation centers to assist in locating and evaluating curriculum research findings, (B) discovering and testing new educational ideas (including new uses of printed and audio-visual media) and more effective educational practices, and putting into use those which show promise of success, and (C) studying ways to improve the legal and organizational structure for education and the management and administration of education in the State;

(5) publication and distribution, or support for the publication and distribution, of curricular materials collected and developed at curriculum research centers and elsewhere;

(6) programs to improve the quality of teacher preparation, including student-teaching arrangements, in cooperation with institutions of higher education and local educational agencies;

(7) studies or support for studies concerning the financing of public education in the State;

(8) support for statewide programs designed to measure the educational achievement of pupils;

(9) training and otherwise developing the competency of individuals who serve State or local educational agencies and provide leadership, administrative, or specialist services throughout the State, or throughout the area served by a local educational agency, through the initiation, improvement, and expansion of activities such as (A) sabbatical leave programs, (B) fellowships and traineeships (including educational expenses and the cost of travel) for State educational agency personnel to pursue graduate studies, and (C) conducting institutes, workshops, and conferences (including related costs of operation and payment of the expenses of participants); and

(10) providing local educational agencies and the schools of those agencies with consultative and technical assistance and services relating to academic subjects and to particular aspects of edu-

cation such as the education of the handicapped, school building design and utilization, school social work, the utilization of modern instructional materials and equipment, transportation, educational administrative procedures, and school health, physical education, and recreation.

(b)(1) For the purposes of this section the Federal share for any State shall be 100 per centum for fiscal years ending prior to July 1, 1967. Thereafter the Federal share for any State shall be 100 per centum less the State percentage, except that (A) the Federal share shall in no case be more than 66 per centum or less than 50 per centum, and (B) the Federal share for the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands shall be 66 per centum. The "State percentage" for any State shall be that percentage which bears the same ratio to 50 per centum as the per capita income of that State bears to the per capita income of all the States (excluding the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands).

(2) The Federal share for each State for the fiscal years beginning July 1, 1967, and July 1, 1968, shall be promulgated by the Commissioner between July 1 and August 31, 1966, and the Federal share for each State for the fiscal year beginning July 1, 1969, shall be promulgated by the Commissioner between July 1 and August 31, 1968. Such Federal share shall be computed on the basis of the average of the per capita incomes of each State and of all the States (excluding the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands) for the three most recent consecutive years for which satisfactory data are available from the Department of Commerce.

APPROVAL OF APPLICATIONS FOR GRANTS FROM APPORTIONED FUNDS

SEC. 504. An application for a grant under section 503 may be approved by the Commissioner only upon his determination that—

(a) each of the proposed projects, programs, and activities for which it is approved meets the requirements of section 503(a) and will make a significant contribution to strengthening the leadership resources of the applicant or its ability to participate effectively in meeting the educational needs of the State;

(b) the application contains or is supported by adequate assurance that Federal funds made available under the approved application will be so used as to supplement, and to the extent practical, increase the amounts of State funds that would in the absence of such Federal funds be made available for projects and activities which meet the requirements of section 503(a);

(c) the application sets forth such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State (including any such funds paid by the State to agencies, institutions, or organizations) under this title; and

Records.

(d) the application provides for making such reports, in such form and containing such information, as the Commissioner may require to carry out his functions under this title, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

SPECIAL PROJECT GRANTS

SEC. 505. Fifteen per centum of the sums appropriated pursuant to section 501 for each fiscal year shall be used by the Commissioner to make grants to State educational agencies to pay part of the cost of experimental projects for developing State leadership or for the establishment of special services which, in the judgment of the Commissioner, hold promise of making a substantial contribution to the solution of problems common to the State educational agencies of all or several States.

PAYMENTS

SEC. 506. Payments pursuant to grants under this title may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Commissioner may determine.

INTERCHANGE OF PERSONNEL WITH STATES

SEC. 507. (a) For the purposes of this section, the term "State" means a State or any agency of a State engaged in activities in the field of education, but it does not include a local educational agency; and the term "Office" means the Office of Education.

(b) The Commissioner is authorized, through agreements or otherwise, to arrange for assignment of officers and employees of States to the Office and assignment of officers and employees in the Office to States, for work which the Commissioner determines will aid the Office in more effective discharge of its responsibilities as authorized by law, including cooperation with States and the provision of technical or other assistance. The period of assignment of any officer or employee under an arrangement shall not exceed two years.

(c)(1) Officers and employees in the Office assigned to any State pursuant to this section shall be considered, during such assignment, to be (A) on detail to a regular work assignment in the Office, or (B) on leave without pay from their positions in the Office.

(2) Persons considered to be so detailed shall remain as officers or employees, as the case may be, in the Office for all purposes, except that the supervision of their duties during the period of detail may be governed by agreement between the Office and the State involved.

(3) In the case of persons so assigned and on leave without pay—

(A) if the rate of compensation (including allowances) for their employment by the State is less than the rate of compensation (including allowances) they would be receiving had they continued in their regular assignment in the Office, they may receive supplemental salary payments from the Office in the amount considered by the Commissioner to be justified, but not at a rate in excess of the difference between the State rate and the Office rate; and

(B) they may be granted annual leave and sick leave to the extent authorized by law, but only in circumstances considered by the Commissioner to justify approval of such leave.

Such officers and employees on leave without pay shall, notwithstanding any other provision of law, be entitled—

(C) to continuation of their insurance under the Federal Employees' Group Life Insurance Act of 1954, and coverage under the Federal Employees Health Benefits Act of 1959, so long

68 Stat. 736.
5 USC 2091 note.
73 Stat. 708.
5 USC 3001 note.

as the Office continues to collect the employee's contribution from the officer or employee involved and to transmit for timely deposit into the funds created under such Acts the amount of the employee's contributions and the Government's contribution from appropriations of the Office; and

(D) to credit the period of their assignment under the arrangement under this section toward periodic or longevity step increases and, upon payment into the civil service retirement and disability fund of the percentage of their State salary, and of their supplemental salary payments, if any, which would have been deducted from a like Federal salary for the period of such assignment and payment by the Commissioner into such fund of the amount which would have been payable by him during the period of such assignment with respect to a like Federal salary, to treat (notwithstanding the provisions of the Independent Offices Appropriation Act, 1959, under the head "Civil Service Retirement and Disability Fund") their service during such period as service within the meaning of the Civil Service Retirement Act;

72 Stat. 1064.
5 USC 2267 note.
70 Stat. 743.
5 USC 2251 note.

except that no officer or employee or his beneficiary may receive any benefits under the Civil Service Retirement Act, the Federal Employees Health Benefits Act of 1959, or the Federal Employees' Group Life Insurance Act of 1954, based on service during an assignment hereunder for which the officer or employee or (if he dies without making such election) his beneficiary elects to receive benefits, under any State retirement or insurance law or program, which the Civil Service Commission determines to be similar. The Office shall deposit currently in the funds created under the Federal Employees' Group Life Insurance Act of 1954, the Federal Employees Health Benefits Act of 1959, and the civil service retirement and disability fund, respectively, the amount of the Government's contribution under these Acts on account of service with respect to which employee contributions are collected as provided in subparagraph (C) and the amount of the Government's contribution under the Civil Service Retirement Act on account of service with respect to which payments (of the amount which would have been deducted under that Act) referred to in subparagraph (D) are made to such civil service retirement and disability fund.

68 Stat. 736.
5 USC 2091 note.
73 Stat. 708.
5 USC 3001 note.

(4) Any such officer or employee on leave without pay who suffers disability or death as a result of personal injury sustained while in the performance of his duty during an assignment hereunder, shall be treated, for the purposes of the Federal Employees' Compensation Act, as though he were an employee, as defined in such Act, who had sustained such injury in the performance of duty. When such person (or his dependents, in case of death) entitled by reason of injury or death to benefits under that Act is also entitled to benefits from a State for the same injury or death, he (or his dependents in case of death) shall elect which benefits he will receive. Such election shall be made within one year after the injury or death, or such further time as the Secretary of Labor may for good cause allow, and when made shall be irrevocable unless otherwise provided by law.

39 Stat. 742.
5 USC 751 note.

(d) Assignment of any officer or employee in the Office to a State under this section may be made with or without reimbursement by the State for the compensation (or supplementary compensation), travel and transportation expenses (to or from the place of assignment), and allowances, or any part thereof, of such officer or employee

during the period of assignment, and any such reimbursement shall be credited to the appropriation utilized for paying such compensation, travel or transportation expenses, or allowances.

(e) Appropriations to the Office shall be available, in accordance with the standardized Government travel regulations, for the expenses of travel of officers and employees assigned to States under an arrangement under this section on either a detail or leave-without-pay basis and, in accordance with applicable law, orders, and regulations, for expenses of transportation of their immediate families and expenses of transportation of their household goods and personal effects, in connection with the travel of such officers and employees to the location of their posts of assignment and their return to their official stations.

(f) Officers and employees of States who are assigned to the Office under an arrangement under this section may (1) be given appointments in the Office covering the periods of such assignments, or (2) be considered to be on detail to the Office. Appointments of persons so assigned may be made without regard to the civil service laws. Persons so appointed in the Office shall be paid at rates of compensation determined in accordance with the Classification Act of 1949, and shall not be considered to be officers or employees of the Office for the purposes of (1) the Civil Service Retirement Act, (2) the Federal Employees' Group Life Insurance Act of 1954, or (3) unless their appointments result in the loss of coverage in a group health benefits plan whose premium has been paid in whole or in part by a State contribution, the Federal Employees Health Benefits Act of 1959. State officers and employees who are assigned to the Office without appointment shall not be considered to be officers or employees of the Office, except as provided in subsection (g), nor shall they be paid a salary or wage by the Office during the period of their assignment. The supervision of the duties of such persons during the assignment may be governed by agreement between the Commissioner and the State involved.

63 Stat. 954; 78 Stat. 400. 5 USC 1071 note. 70 Stat. 743. 5 USC 2251 note. 68 Stat. 736. 5 USC 2091 note. 73 Stat. 708. 5 USC 3001 note.

(g)(1) Any State officer or employee who is assigned to the Office without appointment shall nevertheless be subject to the provisions of sections 203, 205, 207, 208, and 209 of title 18 of the United States Code.

Conflict-of-interest. 76 Stat. 1121.

(2) Any State officer or employee who is given an appointment while assigned to the Office, or who is assigned to the Office without appointment, under an arrangement under this section, and who suffers disability or death as a result of personal injury sustained while in the performance of his duty during such assignment shall be treated, for the purpose of the Federal Employees' Compensation Act, as though he were an employee, as defined in such Act, who had sustained such injury in the performance of duty. When such person (or his dependents, in case of death) entitled by reason of injury or death to benefits under that Act is also entitled to benefits from a State for the same injury or death, he (or his dependents, in case of death) shall elect which benefits he will receive. Such election shall be made within one year after the injury or death, or such further time as the Secretary of Labor may for good cause allow, and when made shall be irrevocable unless otherwise provided by law.

39 Stat. 742. 5 USC 751 note.

(h) The appropriations to the Office shall be available, in accordance with the standardized Government travel regulations, during the period of assignment and in the case of travel to and from their places

of assignment or appointment, for the payment of expenses of travel of persons assigned to, or given appointments by, the Office under an arrangement under this section.

(i) All arrangements under this section for assignment of officers or employees in the Office to States or for assignments of officers or employees of States to the Office shall be made in accordance with regulations of the Commissioner.

ADMINISTRATION OF STATE PLANS

SEC. 508. (a) The Commissioner shall not finally disapprove any application submitted under section 504, or any modification thereof, without first affording the State educational agency submitting the application reasonable notice and opportunity for a hearing.

(b) Whenever the Commissioner, after reasonable notice and opportunity for hearing to the State educational agency administering a program under an application approved under this title, finds—

(1) that the application has been so changed that it no longer complies with the provisions of section 504(a), or

(2) that in the administration of the plan there is a failure to comply substantially with any such provision,

the Commissioner shall notify such State educational agency that the State will not be regarded as eligible to participate in the program under this title until he is satisfied that there is no longer any such failure to comply.

JUDICIAL REVIEW

SEC. 509. (a) If any State is dissatisfied with the Commissioner's final action with respect to the approval of an application submitted under section 504(a) or with his final action under section 508(b), such State may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action as provided in section 2112 of title 28, United States Code.

72 Stat. 941.

(b) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(c) The court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

62 Stat. 928.

PERIODIC REVIEW OF PROGRAM AND LAWS

SEC. 510. (a) The Secretary shall, within ninety days after the date of enactment of this title, appoint an Advisory Council on State Departments of Education for the purpose of reviewing the administration of the programs for which funds are appropriated pursuant to this title and making recommendations for improvement of such

administration, and reviewing the status of and making recommendations with respect to such programs and this title and with respect to other Acts under which funds are appropriated to assist State educational agencies to administer Federal programs relating to education.

(b) The Council shall be appointed by the Secretary without regard to the civil service laws and shall consist of twelve persons who shall, to the extent possible, include persons familiar with the educational needs of the Nation, persons familiar with the administration of State and local educational programs, and persons representative of the general public.

(c) The Secretary is authorized to engage such technical assistance as may be required to carry out the functions of the Council, and the Secretary shall, in addition, make available to the Council such secretarial, clerical, and other assistance and such pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out such functions.

(d) The Council shall make an annual report of its findings and recommendations (including recommendations for changes in the provisions of this title and of other education Acts) to the Secretary not later than March 31 of each calendar year beginning after the enactment of this title. The Secretary shall transmit each such report to the President and the Congress together with his comments and recommendations.

Report to President and Congress.

(e) Members of the Council who are not regular full-time employees of the United States shall, while serving on business of the Council, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including travel time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b-2) for persons in Government service employed intermittently.

60 Stat. 808; 75 Stat. 339, 340.

TITLE VI—GENERAL PROVISIONS

DEFINITIONS

SEC. 601. As used in titles II, III, and V of this Act—

(a) The term "Commissioner" means the Commissioner of Education.

(b) The term "construction" means (1) erection of new or expansion of existing structures, and the acquisition and installation of equipment therefor; or (2) acquisition of existing structures not owned by any agency or institution making application for assistance under this Act; or (3) remodeling or alteration (including the acquisition, installation, modernization, or replacement of equipment) of existing structures; or (4) a combination of any two or more of the foregoing.

(c) The term "elementary school" means a day or residential school which provides elementary education, as determined under State law.

(d) The term "equipment" includes machinery, utilities, and built-in equipment and any necessary enclosures or structures to house them, and includes all other items necessary for the functioning of a particular facility as a facility for the provision of educational services, including items such as instructional equipment and necessary furniture, printed, published, and audio-visual instructional materials, and books, periodicals, documents, and other related materials.

(e) The term "institution of higher education" means an educational institution in any State which—

(1) admits as regular students only individuals having a certificate of graduation from a high school, or the recognized equivalent of such a certificate;

(2) is legally authorized within such State to provide a program of education beyond high school;

(3) provides an educational program for which it awards a bachelor's degree, or provides not less than a two-year program which is acceptable for full credit toward such a degree, or offers a two-year program in engineering, mathematics, or the physical or biological sciences which is designed to prepare the student to work as a technician and at a semiprofessional level in engineering, scientific, or other technological fields which require the understanding and application of basic engineering, scientific, or mathematical principles or knowledge;

(4) is a public or other nonprofit institution; and

(5) is accredited by a nationally recognized accrediting agency or association listed by the Commissioner pursuant to this paragraph or, if not so accredited, is an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited: *Provided, however*, That in the case of an institution offering a two-year program in engineering, mathematics, or the physical or biological sciences which is designed to prepare the student to work as a technician and at a semiprofessional level in engineering, scientific, or technological fields which require the understanding and application of basic engineering, scientific, or mathematical principles or knowledge, if the Commissioner determines that there is no nationally recognized accrediting agency or association qualified to accredit such institutions, he shall appoint an advisory committee, composed of persons specially qualified to evaluate training provided by such institutions, which shall prescribe the standards of content, scope, and quality which must be met in order to qualify such institutions to participate under this Act and shall also determine whether particular institutions meet such standards. For the purposes of this paragraph the Commissioner shall publish a list of nationally recognized accrediting agencies or associations which he determines to be reliable authority as to the quality of education or training offered.

(f) The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(g) The term "nonprofit" as applied to a school, agency, organization, or institution means a school, agency, organization, or institution owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(h) The term "secondary school" means a day or residential school which provides secondary education, as determined under State law, except that it does not include any education provided beyond grade 12.

(i) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(j) The term "State" includes, in addition to the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, and the Virgin Islands and for purposes of title II and title III, such term includes the Trust Territory of the Pacific Islands.

(k) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

ADVISORY COUNCILS

SEC. 602. (a) The Commissioner may, without regard to the civil service laws, and subject to the Secretary's approval in such cases as the Secretary may prescribe, from time to time appoint, in addition to the advisory councils and committees authorized in preceding titles, an advisory council of ten members to advise and consult with the Commissioner with respect to his functions under this law.

(b) Members of such an advisory council who are not regular full-time employees of the United States shall, while attending meetings or conferences of such council or otherwise engaged on business of such council, be entitled to receive compensation at a rate fixed by the Secretary, but not exceeding $100 per diem, including travel time, and, while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b-2) for persons in the Government service employed intermittently.

60 Stat. 808; 75 Stat. 339, 340.

FEDERAL ADMINISTRATION

SEC. 603. (a) The Commissioner may delegate any of his functions under this Act or any Act amended by this Act, except the making of regulations, to any officer or employee of the Office of Education.

(b) In administering the provisions of this Act or any Act amended by this Act, the Commissioner is authorized to utilize the services and facilities of any agency of the Federal Government and of any other public or nonprofit agency or institution in accordance with appropriate agreements, and to pay for such services either in advance or by way of reimbursement, as may be agreed upon.

FEDERAL CONTROL OF EDUCATION PROHIBITED

SEC. 604. Nothing contained in this Act shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system, or over the selection of library resources, textbooks, or other printed or published instructional materials by any educational institution or school system.

LIMITATION ON PAYMENTS UNDER THIS ACT

SEC. 605. Nothing contained in this Act shall be construed to authorize the making of any payment under this Act, or under any Act amended by this Act, for religious worship or instruction.

Approved April 11, 1965.

THE AUTHORS are professional educators. Each was a faculty member at Emory University in the Division of Teacher Education when this report was prepared. Dr. Donald Ross Green and Dr. James A. Jordan, both associate professors of education, and Dr. W. J. Bridgeman, assistant professor of education, still teach at Emory, Atlanta, Ga. Dr. Clay V. Brittain, former assistant professor of education at Emory, recently moved to Washington, D. C., to work for the U.S. Office of Education. Their provocative findings and suggestions for improving education in rural schools go beyond the problems of consolidation and desegregation and make interesting reading.

Samuel L. Adams

Director of Research

CHAPTER I

Introduction

In the Spring of 1964 we spent a number of days visiting the school systems of a county in Georgia and a county in South Carolina. We wanted to look at examples of southern rural school systems. For many years the schools in the large cities of the nation have struggled with the educational deficiencies imposed on them by migrants from the rural South. We went to look at the roots of this problem. We went knowing then, as we know now, that large numbers of people from such areas grow up without an adequate education. We also knew before we started that school segregation did not help the situation; in fact, desegregation of the schools was in our minds as a certainly proper and a probably helpful step. Unquestionably what we saw in these two counties was influenced by our preconceptions.

Still, we were strongly impressed in two ways. First, in both school systems large numbers of intelligent, energetic, and sensitive people are performing remarkably well and in a professional fashion. We, therefore, do not believe that if one could put an appropriate number of the teachers and administrators drawn from one of our better suburban districts into these two systems, many of the school problems would thereby be solved. Secondly, the feature of life in these communities that struck me most forcefully was the dominant role played by race and segregation in the lives of all. Even the two of us raised in the South were impressed all over again with the salience of race in the thoughts, actions, and patterns of life of the citizens, white and Negro alike, in these two counties.

These two impressions have been the leading influences in what we see as the educational problems facing rural areas of this sort and what we think might be done about these problems. The first impression has led us to propose drastic changes in the arrangement of the school system. It seemed clear to us that, if people of the calibre we encountered in these county school systems are unable to do any better than they are doing, it is not possible to achieve the desired improvements in chil-

dren's learning by doing more adequately the same sort of things. It seemed evident to us that some basic changes in the system itself would be necessary to accomplish much. Our second strong impression suggested what the first step in this direction needs to be. We concluded that the starting point for improvement of education in such communities must be the complete elimination of segregation. It seems to us that these two basic propositions have not been fully faced by those concerned with education, either in communities of this sort or anywhere else in the country.

To be sure, the situation has changed dramatically since the Spring of 1964. The Civil Rights Act of 1964 and the Elementary and Secondary Education Act of 1965 mean that formal desegregation of school systems in counties of this sort is beginning to take place and that relatively large amounts of federal funds are now available to these systems. These are helpful steps, but by themselves they are not enough.

It is our purpose in this report to explain why they are not enough and especially why, after formal desegregation, ordinary school improvements are still likely to prove inadequate. To this end our discussion will include brief descriptions of the conditions of living and of education we found in the counties visited; these examples are offered in the hope that our discussion of the nature of the basic educational problem will be clearer. Finally, again using the two school systems for illustration, we shall offer some suggestions for changes in the standard pattern of schooling which we believe indicate the kind of alterations conditions in the rural South make necessary.

Inadequate education is a prominent feature of life for most people growing up in the rural South; so is poverty, so is segregation. We have asserted that the elimination of segregation is the first step toward making the education adequate. But this simple assertion does not dispose of the matter because segregation is not a simple matter; it is complicated, and it is a particularly difficult fact to come to terms with in education. Segregation doesn't just mean that white children go to "white" schools with white teachers (but Negro janitors), while Negro children go to "black" schools with Negro teachers (and no janitors). Segregation creeps into the fiber of the society and

culture within which education as a process takes place. There are many practices which could be cited as part of the general fact of segregation, but it isn't always clear just how these practices affect education—only that they do, directly or indirectly.

What does it mean for education when Negro adults, regardless of status and personal attainment, are all called by their first names by all the members of the white community they meet? What does it mean for education if there are no Negro doctors or Negro lawyers in a community on the one hand, and no white janitors or white maids on the other? What does it mean for education if life is so arranged that to the casual, uninformed visitor, the group which in fact constitutes the majority in a community appears to be a tiny and unimportant minority? What does it mean for education when the language used in all the books studied by a child is not the same as that used by anyone like him? What does it mean when all the pictures in the books, about both present and past times, are of members of another group?

To put it another way, education always takes place in a context. If a community being served by a school is largely lower middle class, then this fact tells something about the kinds of values and the kinds of expectations children bring to school with them. It tells something about the kinds of things that parents are likely to want for their children, and are likely to expect the school to provide. If 50% of a high school's graduates go on to college, then certain kinds of educational practices are obviously more appropriate than others. If 70% of the children who leave high school go into industrial jobs, then certain other kinds of practices are called for.

In rural southern communities, these ordinary difficulties are multiplied by the fact of segregation. One can expect some of the white students in the community to return as doctors or lawyers, and the like. But what of the Negro students? The manners and mores of the great middle class are perhaps obviously appropriate for the white students, but are they for the Negroes? Every student must be taught the responsibilities of good citizenship, such as the responsibility of voting, but are Negroes expected to vote? Whatever facet of the community

one chooses to study in order to relate it to educational practice, the picture is complicated by the fact of segregation, and if the full intellectual development of all children is the goal of education, then segregation is inappropriate. Segregation is corrosive of the basic processes that make it possible for education to take place.

For example, a child who asks questions about the society around him must be answered honestly, for his full intellectual growth. In fact a child needs the stimulation to ask such questions as well as honest answers to the questions to attain this growth. The answers one can give to a Negro child in a fully segregated society amount either to the assertion that he is inferior, or that he is being treated unjustly. A child who accepts the notion that he is inferior loses much of his drive to achieve. A child who believes he is being treated unjustly is angry and frustrated, so that while he will have strong drives, he will not learn to think well or clearly. Thus, either answer will arouse feelings that will thereafter interfere with intellectual growth. The remaining alternative, and probably the course adopted most often, is to prevent the children from asking questions. This, also, interferes with adequate education.

An analogous difficulty is created for the white child. In such communities he also is not encouraged to ask questions about segregation and certainly it must often happen that when he does the answers given are not accurate, although on occasion they may be honest as the teacher sees it. These conditions also are less than positive contributions to intellectual growth. However, for the white child, in contrast to the Negro, there is the encouragement and stimulation to intellectual growth that can come from the belief in one's superior ability to learn. Probably more serious are the distorted views of his responsibilities as a citizen that develop as he learns to ignore the incongruities between the practices of segregation and the statements about equality and freedom he is asked to learn.

In short, it is immediately, painfully, and unmistakably obvious that in southern rural communities Negroes are assigned an inferior role, and it follows directly that for Negro children especially, proper intellectual growth is impossible. Segregation is both the symbol of this situation and the means for its main-

tenance. Consequently, we do not believe a proper education for any child, white or Negro, can be provided in a segregated system.

But school desegregation is only one of the changes needed to eliminate segregation as an influence on education, and it is beyond the scope of this report (and our ability) to discuss the ways of accomplishing legal desegregation. Our suggestions are designed to help solve the educational problems that remain after this necessary condition to intellectual development has been established.

This does not mean that we shall avoid further consideration of the fact of segregation. As a pervasive and dominant feature of life, its role in education requires repeated attention. We shall assume, however, that the educational practices we are proposing will take place in school systems in which all concerned treat race as irrelevant to educational decisions. Recognizing that this assumption is currently contrary to fact let us turn to our second proposition. It is that legal desegregation is only the first step and that in rural Black Belt areas profound educational problems will remain. The nature of these problems can best be understood by looking more closely at the life of these areas.

CHAPTER II

Two Rural Counties

A. *Geography and Economics*

Burke County is just south of Augusta on the Savannah River. As counties go in Georgia, Burke is large; it is roughly triangular with each side extending for about 40 miles. While not flat, there are no large hills and most of the land is arable. There is one central town, Waynesboro, in which about one-fourth of the county's 20,000 residents live. The remaining three-fourths are spread throughout the county in such a way that there are few clusters of population sufficient to support schools. There are a half-dozen much smaller towns scattered around the county, several of them near the apexes of the

triangle; these towns are rapidly dying, and in some cases, are already too small to justify a school of their own.

This dispersion creates problems of several kinds. It complicates the sheer mechanical problem of getting children together in sufficient numbers for a sufficient length of time to have a full school day. It means that many children spend unreasonable lengths of time getting to and from school, and, for many of the children, that contact with other children outside their own families is largely limited to the chances schools (and buses) provide.

These facts are important because children probably do more to educate each other than schools as such do, which is one reason why it is difficult to raise the educational level of a community by "good" schools or lower it by "bad" schools. We do not mean that a group of children without a school would learn what they would in school. We mean that by acting as models for each other, by setting standards and by supporting or squelching each other's interests and expectations, the children in the classes of all but the most rare teachers set both the upper and lower limits of achievement. The most strenuous efforts of teachers, principals, and superintendents rarely alter these limits. For the most part, the time and effort spent going to and from schools is not a very constructive force in children's education. Long rides in crowded, noisy buses do not provide learning conditions conducive to academic progress. These particular educational problems are probably characteristic of most rural school systems, although they undoubtedly vary in degree.

The economic conditions in Burke County also create educational problems.[1] Historically, the county depended on agriculture (principally cotton) for its economic health, and agricultural activities are important sources of livelihood still, especially for Negroes. The county has a few small industries which do not depend upon agriculture. These industries have not greatly increased in number or size in recent years, and have not been able to counteract the problems created by the shrinking number of jobs in agriculture; they mostly employ only

[1]What follows describes the facts to be found in Tables 1, 2, and 3. For some, reading the tables will suffice.

whites, the group least in need of job opportunities. Cotton production was once an adequate basis for a plantation economy employing many people. Twenty-five years ago, farming alone employed more people than are in the total labor force today. But while there is still substantial cotton acreage, it has proved to be an increasingly inadequate source of income for the county.

The amount of land being farmed has declined a bit (10% since 1945), but the number of farms has declined even more (50% since 1945), because the size of farms has increased (84% since 1945). Burke County has always had some large plantations. It still does. But for a long time Burke also had many small farms, a number of which were owned by Negroes. The average size of farms is increasing partly because these Negro farmers are being put out of business. The declining number of Negro farm operators indicates that the Negro is among the first victims of the complex and mounting pressures on small farmers. Heavy machinery and technically trained personnel are increasingly necessary for successful farming. All of these phenomena, then, point to the same thing: a dramatic reduction in the need for unskilled farm labor, a fact which means in a place like Burke that there is no longer much need for Negro labor.

Table 1 shows these and other economic facts about Burke County. One obvious consequence of these conditions is widespread poverty, especially among Negroes. As shown in Table 2, the 1960 census data indicate the median family income of Burke Negroes was approximately $1,200 a year, less than half of the $3,000 per year now commonly cited as the minimum needed by the typical family in the United States. Only 11% of the Negro families in Burke County had in 1960 incomes of $3,000 or more per year, while two-thirds of the white families had incomes meeting or exceeding this minimum. In short, a large portion of Negroes in Burke County live in conditions of severe poverty and have little prospect of change as long as they remain in the county. There are also substantial numbers of whites who live in conditions of poverty, but their prospect of a better future is not quite so plainly unattainable.

It is not surprising that the Negro population in Burke has decreased more than 18% between 1950 and 1960, while the white population has remained fairly stable (see Table 3). Not too many years ago, Negroes made up more than 80% of the population in Burke County. Today, about two-thirds of the population is Negro, but among adults the ratio of whites to Negroes is beginning to approach 1 to 1. It should be noted that not only does this suggest that Negroes tend to have larger families than the white residents of the county, but it also reflects the fact that a great many Negro parents leave their children in the county while they go to cities to work. A crude survey taken in Edgefield County suggests that approximately 25% of the Negro children in the schools had one or both parents working and living somewhere else (usually in the North). While the parents migrate, they frequently let the county educate their children. Migration, then, relieves the county of less of the educational burden than the migration rate suggests.

Edgefield County is across the Savannah River in South Carolina about as far north of Augusta as Burke is south of Augusta. Like Burke, it is roughly triangular, but a bit smaller, with each side running roughly 30 rather than 40 miles. In one sense, it is even smaller than that size indicates, since much of the northern border of the county is part of Sumter National Forest, and is thinly populated. The county has three sizeable towns: Edgefield, Johnston, and Trenton. While Trenton is shrinking, both Edgefield and Johnston are reasonably vigorous communities more than holding their own in size (i.e. slight growth, as in Waynesboro). Another important difference is that while Edgefield was also once primarily a cotton producing county, it is now a peach producing area, and much of the land is in peach orchards. The agricultural problems of the county seem slightly less severe than those of Burke County, but a glance at Table 1 will show that the changes have been about the same with respect to number of farms, their size, and the role played by Negro operators. Exactly as in Burke, the number of farms has decreased dramatically while average size has increased, and it has been the Negro operator who has been

squeezed the most. In Edgefield as in Burke, agriculture is no longer the principal kind of employment.

Unlike Burke, however, employment opportunities for Negroes in industry have increased. The number of such jobs is still not large, but the difference in direction of change is probably one reason why Edgefield has lost less of its Negro population (see Tables 2 and 3).

Perhaps the most prominent difference is the use the citizens of Edgefield County make of employment opportunities outside the county. For example, a perceptible number of citizens of the community work at the Savannah River Project, a large nearby Atomic Energy Commission installation. Burke County, directly across the river from the project (but the nearest bridge is in Augusta), has few residents who work at the project, and has at least some prominent citizens who are pleased rather than irritated at this lack of involvement with the federal government. In Edgefield, both whites and Negroes find work outside the county, not only at the Savannah River Project but in Aiken, Augusta, and in the counties east and north of Edgefield. Nevertheless, while Negroes have not been totally excluded from industrial jobs in Edgefield, to date at least, industrial employment has not been a substantial solution to their problems. Income of the people in Edgefield, while a little better than in Burke, still puts a substantial number of whites and most of the Negroes in the poverty-stricken category. The median family income among Negroes in Edgefield, as Table 2 indicates, was approximately $1,600 a year. This is severe poverty. The consequences with respect to population have been much the same in Edgefield as in Burke, the Negro population having declined about 10% between 1950 and 1960. Furthermore, the white population declined by about 3% as well. Back in 1920, the Negroes were about three-quarters of the population in Edgefield County; now they are barely more than half. The rate of Negro emigration from Edgefield in proportion to the total population, however, has decreased in recent years, compared with the 1930's and 1940's.

In both Burke and Edgefield Counties, and in counties similar to them, unless there are dramatic changes in trends, large numbers of children will continue living and going to

school under conditions of severe poverty, with little prospect of bettering themselves in their home communities. Most of those who do succeed in getting educated will leave home. The prospects for those who stay are dim indeed among the Negroes. A fair number of the better educated and more successful white youths will also find it advantageous to leave these counties, as they, too, have been doing.

The consequences for education are many. These affect Negro and white students somewhat differently. If a Negro student and his parents are to see that education is a path to an adequate livelihood as an adult, they must recognize that the student is preparing to live somewhere else. In other words, they must have enough foresight and enough knowledge of the world to understand what is needed in other parts of the country. Generally speaking, such knowledge and foresight come through education. On the other hand, the white student, although he may also see greater opportunities outside of his county, can see that he probably can make an adequate living at home, provided he acquires an appropriate education. For whites, education provides immediate visible opportunities; for Negroes, education provides the only possible opportunity, but it is less visible. This lack of visibility is only one of the reasons why the educational efforts of the school systems are not very successful, and why segregation stymies educational progress.

One way of describing this situation is to say that for the Negro attempting to live in his home, neither education nor anything else leads anywhere. Essentially, it is a situation of "no hope." This problem's solution clearly involves recommendations that go far beyond the field of education.

There are no educational recommendations that will be sufficient even to attack the problems of "no hope" in education, because these problems stem from the function of education in a society. What good will imaginatively conceived vocational education programs be if there is no place in society for the use of skills developed? What good will supplementary educational services be if education itself fits an individual to live in a social, cultural, and economic milieu that simply does not exist? Educational recommendations cannot have their proper effect unless something is done to allow the *use* of edu-

cation by all members of society. In order for education to have its desired effect, the problem of giving hope to education must be addressed and solved *by the community*. Fundamentally, this means that the community must display to the school that educational accomplishment entitles one to social, cultural, and economic rewards. The rural communities of the Black Belt South do not do this, and until and unless they do, plans, energies, and money poured into their schools will do little to solve their basic educational problems.

This means that Negroes must be allowed to compete openly for jobs, and that there must be jobs; it means that cultural opportunities must be made available to all who want them and are ready to appreciate them, and that there must *be* cultural opportunities; it means that social interaction must become a function of natural factors such as temperament, education, concern, and interest. In sum there are no *educational* recommendations we can make that will restore hope to education; to alter the function of education for the Negro community means to make the good things of a free society available to all men.

B. *The School*

At first glance, the schools of Burke County appear to be much like those anywhere. The buildings and the classrooms, ranging from old to new, look much like those one would encounter anywhere in the United States. Of the roughly 7,000 children of school age in the county, about 4,500 Negro and 1,800 white are enrolled in the schools; apparently, some 700-800 children, mostly Negro, are not in school. The white population is served by three high schools and five elementary schools, while the Negro population is served by one high school and six elementary schools. Average daily attendance of students in the system is fair, but is higher among the white (88%) than among the Negro (78%) students. This difference is at least partly because some Negro children do not enter school in the fall until after crops are harvested. Both the curriculum and the general arrangements of the schools appear fairly typical of what one might find in any school.** The

**For a summary of educational statistics, see Table 4.

system is probably not unlike those in the rural South generally but, if anything, somewhat better than the average of these systems. In fact, given the basic conditions in which the system functions, it can be called a good system.

We have already described two of these conditions: the severe and widespread poverty and the low and decreasing density of population in most of the county. A third condition is partly but not entirely a consequence of the first. This is the fact that monies for school operations in Burke County are very nearly at the minimum the state permits. About 88% of these school funds come from the state (1963-64 data), and what little the county raises over and above that required by the state is spent for the teachers in unconsolidated white schools that the state will not support. In spite of the extensive poverty in the county, it could clearly spend more for education. Per pupil expenditures for the county in average daily attendance figures were slightly over $265 in 1963-64. The corresponding figures for Atlanta, for Georgia as a whole, and for the entire country were $380, $295, and $460, respectively.

The fourth and last condition is—as of 1964-65 at least—total segregation, the importance of which we have already discussed briefly. Actually, there are two parallel school systems with an entirely white superstructure. The parallelism is not perfect, since the Negro system is not only twice as large but is fully consolidated and in fairly new but poorly equipped buildings. The Negro high school is about as well equipped as the white high schools. Most of these structures were built shorly after the 1954 Supreme Court decision. The white schools are not fully consolidated, are only partly in modern buildings, but are, with the exception noted, somewhat better equipped and more adequately staffed (numerically, at least) than the Negro schools. Segregation is, of course, a universal fact of life in this county, and it should be noted that the discrepancies favoring the white schools over the Negro schools are far smaller than the discrepancies in almost all other aspects of life.

Within the limits of these conditions, it is fair to rate the school system a pretty good one. Despite its shortcomings, the physical facilities are not markedly poor for American schools

(although the libraries are); the paper qualifications of the school personnel are at the state average; and the children do somewhat better academically than some data on Georgia children indicate as state average. Table 5 shows some of these data in the form of average lag in grade placement scores of Georgia children relative to national norms. Burke County children appear to do a bit better than this; white high school children are close to the national norms, and it appears probable that the Negro children, though considerably lower than the national norm, are a bit above the state average for Negroes. Dropout rates and progress through school also meet state averages insofar as it is possible to get hard data on this matter; neither the state nor the county keeps records adequate for fully assessing this point. However, the age-grade enrollment figures shown in Table 6 seem to indicate that the rate at which children progress through the grades is much like that found elsewhere in the state. Finally, it should be carefully noted that the system has its quota of able, competent, and industrious school personnel; all things considered, perhaps more than its share in the Negro system.

Obviously, even within the social and economic framework given, improvements are possible. Consolidation could be completed; more local money could be found; libraries could be developed; and so on indefinitely. But the same sort of statement could be made about almost any school system. For those who like the status quo in the community and especially those interested in maintaining total segregation and minimum expenditure for school operation, the system is satisfactory. In the white community, such satisfaction is a common, perhaps dominant, feeling. There are, of course, some white citizens who want improvements in the white schools, but they do not appear to be an important segment of the community. Perhaps a few of these same people, but not many of them, are dissatisfied with the conditions in the Negro schools.

Among the Negro population, dissatisfaction with the schools is probably not common either. In fact, for large numbers of the Negroes in this county the schools are better than they really believe is necessary. While among the Negro school personnel there is some dissatisfaction with conditions, many

of them are pleased because conditions are vastly better than they were only a few short years ago. It would be difficult to maintain that any substantial proportion of the Negro community is unhappy with the schools, especially since it appears doubtful that there are many outside the professional personnel who are aware of the shortcomings that exist.

To repeat, within the framework of the basic conditions outlined, the school system is performing well and to the satisfaction of the people being served, and we suspect that few school systems working within familiar conditions do much better. Let us look more closely, however, at what this means. Taking the white schools first, although they serve a clientele well above the average of the county socially, economically, and intellectually, their students do not typically fall into an above-average group on a national basis. Only about 40% graduate from high school, and of these only two-thirds go to college; even this relatively privileged minority in the county, i.e., the white citizens, do not contribute their share of developed talent to the nation. Only so long as Burke County can maintain its relative isolation will this white system prove satisfactory even to the county itself.

Clearly, however, the white schools are not where the serious problems in the county's educational system lie, in any immediate sense. They are to be found instead in the Negro schools and in the Negro community. Problems here are very serious indeed. These schools, like most in Georgia, do far better than they did a few short years ago but, still, fewer than 40% of the students reach grade ten, and only about one in seven graduate from high school (see Table 6). When it is recognized that for these Negro children in Burke, as almost anywhere else in similar areas, a high school diploma represents, on the average, a level of academic and intellectual development far short of the typical tenth grade student in the United States (see Table 5) the seriousness of this problem can be seen. It appears probable that among the 400-450 Negro children of a given age in the county, fewer than 20 will ever develop intellectually and academically to a point where they might be called average in this nation. Of about 4,500 school children, 4,200 must be classified as academically retarded or

slow by the end of their school careers. This appalling fact is evidently characteristic of the rural South.

Although there are some differences, the similarities between Burke's schools and those of Edgefield are more marked than the differences. Those differences that exist are not large. The white schools in Edgefield County seem a little more open to the world, and somewhat more intellectually diverse and stimulating. Strom Thurmond High School in Edgefield is not only well equipped, but reflects an attempt to incorporate new ideas in school planning into its structure. The new Waynesboro High School in Burke County is much less well equipped, and does not show signs of such an attempt. Perhaps another symptom, or perhaps a cause, of this difference is the fact that the white high schools in Edgefield were recently consolidated in spite of an ancient football rivalry. The Negro schools are fully consolidated, a little less well equipped than the Negro schools in Burke County, and more than in Burke Negro schoolmen seemed committed to working within the current framework and to not attempting any serious alteration of the prospects of their students. To repeat, these differences are not large, and are, of course, mainly impressions. The accomplishments of both school systems are similar, whether one is talking about Negro children or white, and we believe that both of these school systems are at least as good as most similar rural systems. We must also emphasize that whatever criticism we might make of these schools—and obviously many are possible—the thing that sets them apart from others in this country is not their physical arrangements, their curricula, their books, or even the professional characteristics of their teachers. What is different is the product.

We suspect many people will find this assertion hard to accept, since it is part of the widely believed American educational mythology that all educational deficiencies can be attributed to poor teaching. This is false.* We are not claiming, of course, that these schools are staffed by the cream of the crop, and we do not deny that better teachers, better books, libraries, and other facilities might, here as everywhere else,

*For a discussion of this point see Green, D. R., *Educational Psychology*, Prentice-Hall, 1964.

improve matters—a little at least, and maybe even a lot. But we do not believe that achievement scores of the sort shown in Table 5 can be explained this way, if for no other reason than that these schools and these teachers are not very different from those to be found elsewhere. Many cities which pay high salaries and which have adequate equipment have whole schools of students who perform no better than these children, probably for many of the same reasons, most of which depend on who the children are. The reason is plain. As we noted earlier, education takes place in a cultural context. All over this country in communities in which children are "disadvantaged"—in city slums, on Indian reservations, among migrant workers—similar achievement scores are found. The currently popular term used to describe this phenomenon in educational circles is "cultural deprivation."

Giving it a name does not solve the problem or even explain its nature. The phenomenon has drawn a great deal of attention in recent years, focusing largely on the slums of large cities. But it is not just a problem of the cities. It is not just a problem of segregation or of poverty, and it can involve a majority of the children in a community. The serious and widespread deficiencies in the educational systems of the rural South cannot be readily solved within a standard framework. The schools of a county like Burke or Edgefield could be rather easily made to be like those of one of our "good" suburban systems in all respects but one, because they are not very different now. But they cannot be made "just like" because the students are different, they belong to a different culture, and the "standard" American school is ill-suited to their needs.

This matter has been the subject of some research, but much remains to be learned in spite of the recent attention it has been getting. Although current knowledge is largely derived from research among children in city slums, it provides some clues as to what kinds of educational procedure might be effective in a rural setting.

CHAPTER III

Cultural Deprivation*

Many children in the rural Black Belt, particularly Negro children, can be classified as "culturally deprived." We assert that it is for this reason that school is so relatively unsuccessful among these children.

What do we mean (and what do we not mean) when we say that some individual is "culturally deprived"? Broadly speaking, we mean that there have been omissions and deficiencies in the background of the individual so that in comparison with the "typical" individual in the culture under consideration he has had little opportunity to acquire the knowledge, skills, and abilities needed for successful functioning in society. In particular, then, we are asserting that the skills and abilities, the knowledge and information, and, to some extent, the values that the children of the very poor rural Southerner learn in their childhood at home, especially if they are Negro, do not provide an adequate foundation for their schooling.

Note that we are not saying that such children do not acquire any knowledge, ability, or values at home. However, there is no doubt that regardless of what these children do learn at home, they do not learn—or do not learn well—those things that the standard school procedures and patterns of organization make it necessary that children know in order to progress successfully in school.

In all groups to which the label "culturally deprived" has been applied, the children start school with marked language

---

*The material of this section is our interpretation of the research on the topic of cultural deprivation. We have not cited this research directly but references to most of it can be found in one or more of the following:

Bloom, B. S., Davis, A., and Hess, R., *Compensatory Education for Cultural Deprivation*. New York, 1965.

Green, D. R., *Educational Psychology*. Englewood Cliffs, N. J., 1964.

Passow, H. (ed.), *Education in Depressed Areas*. New York. 1963.

Reissman, F., *The Culturally Deprived Child*. New York, 1962.

For those interested in pursuing the language problem the following two references will be more helpful than the preceding four:

Bernstein, B., "Social Class and Linguistic Development: A Theory of Social Learning," in Halsey, A. H. *et al.* (eds.), *Education, Economy and Society*. Glencoe, Ill., 1961.

Loban, W. A., *The Language of Elementary School Children*. National Council of Teachers of English, 1963.

deficits. These deficiencies usually create difficulties in school work immediately, because language skills are needed for learning to read and most schools make reading the first and foremost order of business. The child who cannot succeed reasonably promptly in learning to read almost always faces continuous failure from that point on and may quite realistically lose hope of ever having any real school success even if he does gradually learn to read a bit.

The seriousness of the consequences of this language deficiency is much clearer than its exact nature. It has traditionally been assumed that lower class children—and, in fact, all those children rating low in language proficiency—have learning problems because they do not know enough words and thus lack the concepts needed. Such views have shaped the programs offered in most schools.

Educators have known for a long time that language facility is an important factor in academic success and programs to increase the vocabularies and language skills of children are part of the curricula of all schools. For example, direct vocabulary instruction, in which children compile lists of new words and look up their meanings, has been a technique used widely for many years. These traditional approaches are not, however, a hopeful line of attack, because, in spite of the effort and ingenuity that has been put into them, they have not done the job.

It now appears that vocabulary deficiencies may not be the root of the problem. In fact, culturally deprived children often use a rather large number of words accurately. To be sure, in comparison with the middle class children, those of the lower class are not nearly so familiar with the words normally used in the school, and it is true also that these children do not know much about many of the objects and paraphernalia of middle class life in America. Television is helping to change this. Because of this they have special problems in understanding many of the things talked about in their textbooks and in relating these things to their own lives. But it should be understood that this particular sort of problem is not so much a deficit as it is a difference. It is to be sure a difference that calls for action. A child can and should read about life in

other places and other cultures; but he ought to read and learn about his own as well, since that is his base of reality and the beginning of all thought. In short, this so-called deficit is in the school material and not in the child's mind.

In any case, the importance of sheer knowledge of words is not entirely clear since recent work in this area suggests that the difficulty is more subtle. It lies in the flexibility and skill children develop in their language usage. Culturally deprived children (or adults for that matter) use a language that at first blush is not very different from that of anybody else. But on closer examination it appears that they use relatively large numbers of standard expressions and cliches that fit the situation generally, but that lack precision and clarity. The symbolism used is descriptive, concrete, visual, and of a low order of generality. Nuances of feeling are expressed by non-verbal means. The language used in a given situation lacks both the variety and specificity to the situation one finds in the language of middle class children and it deals with abstract ideas relatively rarely. Although he often knows the words needed, the culturally deprived child will seldom use alternative ways of saying something even though such variations can be used to make meanings clear, to draw distinction, and to add emphasis. Instead the same standard phrasing is used over and over. In addition, hypotheses and conditional statements are infrequent, as are all indications of tentativeness and uncertainty.

It seems probable that these and related deficits carry over to listening as well as reading skills, thereby creating extra problems for these children everywhere they turn. Perhaps more than any other single thing, they need to learn to play with language meanings, to learn to get variety and nuance of meaning into their speech, to increase their appreciation and awareness of the value in the distinctions and refinements of meaning that shifts in word order and the addition of subordinate and qualifying expressions can bring. We are talking about communication and the expression of ideas, and, therefore, this training must involve speech in use, and it must be functional

*We hope very much that this notion will not be read as necessarily asking for more of the pedestrian "real life" material which seems to plague our school texts. Children find poetry, fantasy, and sheer word play (e.g., nonsense rhymes) intelligible and functional in their lives.

in the children's lives from the start;* for this it follows that practice in communicating and elaborating their own ideas, not those of others, comes first. Furthermore, this practice must be extensive in each of as many kinds and varieties of situations as possible if it is seriously to affect the thinking of children.

Conversations with adults aware of the possibilities of the language and concerned with helping the child learn to use it is, it seems, the most effective way for children to learn these language skills, at least until reading becomes a prominent part of the child's life (if it ever does), and perhaps still even then. Probably this training is most effective in the early pre-school years when basic language patterns are being established.

But use of language is not the only problem. Among others, all of which are very closely related to language, there is the apparently slower perceptual development of the disadvantaged child, i.e., his more restricted awareness of the perceptual discriminations possible among many sensory dimensions, such as size and volume. These children are not likely to be taught, or rewarded, at home for learning the appropriate quantitative discriminations among objects or to attach the proper descriptive labels to objects (e.g., "tall" rather than "big," and so on). Consequently, orderly development of abstract quantitative concepts is hindered.

Relative to middle class children, lower class children tend to be concrete minded; they are oriented toward objects and direct physical action, rather than toward abstractions and conceptual manipulation. They often continue more or less indefinitely to learn through motor or physical actions; that is, they tend to persist in a mode of thinking that depends on the manipulation of objects, whereas middle class children usually begin to shift to symbolic and verbal substitutes for action sometime between the ages of ten and fourteen.

Perhaps related to this is another intellectual difference which through its effect on motivation has far reaching educational consequences. Lower class children seem to have shorter attention spans, memory, and (therefore?) what may be called anticipation span; that is, they function more with reference to immediate than distant goals. For the middle class person, long range goals are usually fairly specific in character. In

contrast, in the lower class the future is regarded in more general and vague notions and for the most part is not considered as something one controls through present action. Hence, present behavior has a kind of rational relation to future goals for the middle class person which it does not have for those in the lower class. The middle class person anticipates within a broader time perspective.

That culturally deprived children do not see as clearly specific long range goals to which present behavior appears to be rationally connected helps cause what has been called the "deferred gratification pattern." They are not inclined to delay or renounce impulse gratification in favor of future gain. Future goals have a degree of reality for middle class children which they do not have for lower class children. Middle class children are exposed to more consistent patterns of rewards and punishments for impulse control and achievement. The adult models to which they are exposed day after day manifest a degree of self-discipline not generally seen in the adults with whom the lower class has close emotional ties.

Anxiety reduction is probably also a factor in the disadvantaged person's failure to manifest the deferred gratification pattern. Grinding poverty and the intense threat under which he, especially if Negro, lives is almost certain to evoke a high level of anxiety, the reduction of which is to some extent effected through impulse gratification.

Passivity in the lower class child, especially the Negro, is another facet of the motivational pattern related to achievement. One important manifestation of this passivity in the school is the child's failure to ask questions and seek clarification where it is needed. That these children should tend to be passive is not surprising. Their first hand experience most certainly does not teach them that the environment can be manipulated, controlled, and changed by anything they do. The Negro boy is likely to come to school having had no direct experience with a successful male model.

This whole pattern—the tendency to be passive, impulse-directed, and to lack motivation for achievement—is related to and perhaps rooted in the child's concepts of self. The most pernicious psychological consequence of a caste system must

surely be the tendency for individuals to accept as accurate for themselves the social definitions of inferiority inherent in the system.

For example, there are a number of studies which indicate (a) that Negroes from young childhood on tend toward low self-acceptance; (b) that Negro children of pre-school age express greater preference for white than Negro children; (c) that they are later than white children in acknowledging their racial identity; and (d) the result is that at an older age level Negro students tend to judge themselves inferior to white students even in the face of objective evidence tending to contradict such judgments.

Finally, we should add that the homes of these children do not help them do well in school for other reasons. The parents don't know how to teach their children how to learn. They tend to be particularly inept as teachers of their own children (again partly a language problem). Also the homes usually lack books and there are rarely places for students to read and study in peace and quiet.

In the face of all these severe problems, an ordinary school as typically constituted at present is fighting a losing battle. These schools are organized and run on the assumption that the child had been growing in the ordinary middle class home, and that he has had the years of direct individual training that this implies. Whenever this assumption is not justified the school tends to fail.

To succeed the school needs to provide substitutes for the experiences these children lack.

1. The children need extended contact with educated adults as early as possible in their lives; the school must provide many additional opportunities for these children to converse with each other, with older children, and with adults about all kinds of things. This experience should have a degree of direction and order and lead the child in the direction of the abstract.

2. The school must also provide the deprived children with more assistance in the important pre-adolescent years. First, they need help in learning to deal with problems using abstractions, both with words and with other sym-

bol systems; thus the school must do more than it now does to help the children shift to adult patterns of thinking. Second, the school must help the child develop long range goals. This means that he must see visible and believable steps along the way to these goals. If he is to remain in contact with his family without conflict, the older members of his family, older brothers and sisters as well as parents, must also come to believe in both the goodness and the real possibility of these goals. Third, the school must provide the child with solid evidence that effort, persistence, and self-discipline in school tasks are expected and rewarded.

3. To inculcate these attitudes and to avoid misunderstanding and conflict means that the adolescents and adults in the community must also be drawn into these efforts sufficiently both to support and at least to some degree understand the school's objectives.

CHAPTER IV

Specific Suggestions For Education

We have tried to make clear that education takes place in a social context. What schools can accomplish is tightly limited by the environment within which those schools operate. Schools of a rural slum are not likely to produce persons able to be constructive members of a community unless the school gets into the children's home and neighborhood life. It follows that an educational program which offers full opportunities for intellectual growth to all children is not possible where economic and other forms of social advancement are racially segregated. This is categorically true, we believe, for the Negro children. It is true as well for the white children, though present arrangements are much less unsatisfactory for their intellectual growth.

Education can be more successful when schools are desegregated. But only partially so, because, again, education occurs in a context, and when life and opportunities outside the school are segregated, the best efforts of schoolmen to develop the talents of students will be handicapped severely.

Even were all segregation removed in Black Belt counties, their educational problems would still be immense, because of the economic and cultural lags burdening them. We have said, therefore, that improvement of the schools along standard lines is not the answer. If the states of Georgia and South Carolina (or the United States) were to pour unstinted resources into Burke and Edgefield schools, the educational results would not be greatly different, if the added resources only helped the counties do what they are now doing better.

We have said that basic transformations of the Black Belt schools are needed, by which we mean new practices aimed at compensating for the cultural handicaps brought by the children to the school-door. Given the economics of the Black Belt, even such basic transformations cannot be expected to overcome the handicaps imposed by the environment on the children —schools cannot do everything—but in time, perhaps, they could reverse the environmental conditions, and they can, in any event, truly educate a larger proportion of the children than they now manage.

What we are going to describe here, then, will be some specific possible ways of proceeding. We do not claim that our suggestions are the prescription, but rather that they are examples of the sorts of things that are needed. In some cases, other alternatives are both possible and practical. As indicative of the kind of changes which we believe could result in more successful education in the rural South, we would suggest:

1. Nursery-kindergarten units for children ages three through five;
2. The use of boarding units for children in the middle grades (four, five, and six);
3. The employment of senior high school students in the system, so that all students from the tenth grade up who want or are interested in work will have an opportunity to earn at least $50 a month as a part of their school program;
4. An intercounty and college (or university) cooperative program involving a coordinated plan of consolidation, joint purchasing, and joint inservice and preservice

teacher training programs in cooperation with the college.

Beyond these steps and out of them we would expect such things as expanded remedial reading and library services (e.g., a set of mobile reading clinics and mobile library-bookstores, selling paperback books at nominal cost, serving the associated counties), expanded guidance services, and various special education services using, in many cases, college personnel and facilities. One simple but essential step would be to insure that no child is inadequately fed (breakfast as well as free lunches should be offered) or clothed. We would also expect that Job Corps, Work Study, and Community Action Programs financed through the "poverty program" (Economic Opportunity Act of 1964) would be inaugurated. Furthermore, the school buildings should be open twelve or more hours a day; libraries and supervised study halls should be available afternoons and evenings; evening adult education programs should be offered; extensive summer programs should be developed; and so on indefinitely. We shall not describe all of these steps. Instead, we shall elaborate only the four steps suggested above.

A. *The Nursery and Kindergarten Program*

There is a tendency in some quarters to hold out nursery schools as a panacea for cultural deprivation; they are not that. Nevertheless, where, as in the Black Belt, the problem is the lack of educational growth in the home, there is a pressing need to get the children as early as possible into organized learning opportunities and to establish school-parent relationships. We think there should be a pre-school program for these five year olds.

This program would be aimed specifically at those coming from the poorest homes. Day-care centers and nursery schools do not necessarily prove very beneficial to children, so the nature of the program is all-important. The kind we are envisaging might be like that described by Gray and Klaus.*

Their program centered first on attitudes toward achievement; trying to increase the child's achievement motivation, his

*Gray, S. W., and Klaus, R. A., *Early Training Project: Interim Report,* 1963.

ability to persist toward a goal and to delay gratification, and to arouse interest in school-type activities such as listening to stories and looking at books. Secondly, they attempted to improve aptitudes for achievement by developing the more simple and basic concepts needed in school work, increasing perceptual discrimination, and improving language usage.

Gray and Klaus worked on number and color concepts and concepts concerning objects of the world in which they live. In addition they stressed position words and action categories, such as walk, run, jump, and hop. They tried to increase the children's abilities to recognize forms, shapes, and patterns and to discriminate among sounds, tastes, odors, and textures. In language development their major efforts consisted of encouraging the children to talk and in placing them in situations where language was necessary. The central operating feature of the program was the procedure of reinforcement. They used both concrete reinforcement, such as candy, and social reinforcement in the form of physical contact with adults: petting, hugging, and so forth. Throughout their work, particularly at the beginning, they made efforts to make sure that reinforcement of the behavior they desired was as immediate and consistent as possible. Gradually they moved away from concrete reinforcement and made efforts to develop verbal rewards as reinforcers.

A program of this sort, to be effective, calls for trained teachers and for careful planning. But if the teachers running each class thoroughly understand what it is they are trying to do they can quite readily and easily make use of assistants who are much less well-trained; high school students—both male and female—provided they receive some training related to the program, could work successfully and helpfully, to both themselves and the pupils, in such a nursery school situation. We would propose that high school students be offered a course in child care, and training as part of this course work, and that for pay—say $10 per week—they spend two three-hour periods a week acting as assistants to the teachers.* These teachers should be part of the staff of the high school course.

---

*Untrained adults might well be employed as aides also, and it should be evident that there are opportunities for tie-ins with adult education programs too.

A course of this sort is part of the curriculum of many high schools, but some preliminary training of all teachers would be desirable and probably easily arranged through the associated college.

Contact with parents is also essential, and one of the activities of the teachers should be to maintain it. Trained social workers should also be involved in this part of the program. Attendance of at least the three and four year olds should be a matter of parental choice. The regular teaching staff and the social workers should be the ones who reach the parents and persuade them to send their children to these schools. Having a pre-school program creates transportation problems both because of added numbers of children to carry and because these very young children should spend only three or four hours a day at school. These problems will be minimized, however, if the school system, instead of having large school buses, has a number of station wagons or smaller buses which carry maybe nine or ten children, and if carefully selected high school students be employed to drive them. For the system as a whole we would propose a large increase in the number of vehicles and a reduction in the size of their load so that the length of trips to and from school for most of the children in the system could be reduced. This would cost more money, but a fair portion of that money would go into the pockets of students in the system, and we believe that tangible economic rewards for staying in school are important for the same reasons that concrete reinforcement should be used initially in the pre-school classes.

We may finally note in passing that Gray and Klaus report gains in the I.Q.'s of the children with whom they dealt. Similar results have been obtained by a number of other researchers. But it is the nature of the program that counts, not the sheer existence of such schools. Nursery schools which are largely custodial institutions, in which the children play without a planned program of learning, do not serve any educational function and merely cost money.

B. *Boarding Units*

Our second suggestion is the establishment of boarding units connected with each of the elementary schools in the

county. Like the preceding suggestion, this is directed primarily to the poorest children, and again its use would be voluntary and it would be necessary to gain agreement from the parents. We are proposing that children in grades four, five, and six spend three months each year in one of these boarding units, whenever the parents will agree to this.

As in the previous suggestion the important element is what is done, not the mere existence of these boarding units. Most important would be the quality of the teachers. The chance of extensive, warm, personal contact with adults who represent middle class patterns of living, thinking, and values represents one of the principal reasons for these units, since realistic models of this sort, for many of the children of the rural South, are not handy. In addition there would be the opportunity to live in an organized, stable environment in which books, music, art, and conversation are standard and valued activities.* They also would have a chance to get some intensive tutoring during this time, and could be helped with their study habits. It would be expected that each group would take a number of trips, especially to cities, since that is where many of them will in due course live.

In fact, it might be well to plan a fourth quarter in grade seven, spent at a residential unit in a city. Perhaps some cities would be willing to develop exchange programs with counties, sending children to the boarding units in the county and accepting an equal number in a unit in the city for a quarter. Three months in a city school accompanied by a careful orientation to the city might add much to the perspective of these children about the need for education. The city children could probably profit at least as much from a period of time in a rural community.

We envisage these units as having about 21 children, seven to eight from each grade, with approximately equal numbers of boys and girls. A unit would be staffed by two regular teachers who carry a partial load in that school (e.g., share classes with an intern), one male and one female, plus

*At this point we would ask the reader to re-read what we have said about the instructional need to relate material to the children's own life. See above, page 3.

two intern teachers in training (one might have had some previous experience, while the other might be a beginner). In addition, from three to five high school students would be allotted to each unit each quarter to act as assistants before and after school. These students would not only be given room and board but also paid something — say $40 a month. The interns would also receive some pay, perhaps half-rate for the half-year that they would be expected to be in residence. In addition to the direct service that student assistants (drawn from the same cultural background) and interns would give, they would also provide the children with a sort of graduated series of models so that being like the — hopefully — admired and loved teacher might not seem so impossible; i.e., the children could see steps along the road and the possibility of variation. The regular school cafeteria could supply food but a dining room in the residence unit to be used for all three meals should be included in the plans. Mealtime is one of the periods of day when the kind of personal contact envisaged could be built.

The children would follow the regular school program by and large, would go home on weekends, and the teachers and interns would be expected to carry regular duties in the school. The teachers should receive a regular salary plus their room and board for these duties.* They should be required to go through a special training program offered by the associated college or university in order to hold these positions. This could lead to a hierarchy of teacher ranks justifying substantial salary differences, related to competence and responsibility rather than pure seniority and course credits. There is reason to believe that the position of teachers in these units would have substantial attraction to good young teachers and interns. Some of these interns could be in preservice training but it should also be possible to include an internship in these schools as a part of the advanced training of teachers with one or two years of experience. Further, it

*It is of interest to note that the notion of having such prerequisites attached to teachers' positions is actually traditional in counties like Burke, many of which used to maintain "teacherages" or teacher residences.

could result in drawing to such rural systems a quality of teacher that they have been having difficulty in finding at the present time.

There is substantial reason to believe that schools of this sort can have marked effects on students; but it is open to question whether or not the period of time suggested — three months for each of three or four years — would be adequate to accomplish these goals. However, it is believed that at the very least these schools would have positive effects on motivation of the youngsters and that they would go into junior high grades sufficiently interested in doing good work so that the school could hold them.

C. *Employment of Senior High School Students in the School*

The third proposal is that all interested students who are doing adequate work in the tenth grade and up have an opportunity to earn at least $10 a week as a part of their school program. By employing these students as assistants in the nursery school program, in the residential units, and as drivers, several hundred could be so employed. Other employment that would be both educational for them and a service to the school system surely could be found. It should be noted that by keeping these young people in school, competition with adults for jobs should be reduced. These activities can be of substantial educational value; in fact, the assistants in both the two programs suggested above could well turn out to be the chief beneficiaries of these programs if the school system and especially the teachers involved devote proper attention to helping these students understand what they are doing. The reason for paying the students, of course, is to provide an incentive for these adolescents to stay in school and to give them concrete representation of the fact that the community and society at large value their attendance in school. It should be noted that the school system should also have a fund to provide direct scholarship assistance to students who need it and, in special cases, without the associated duties. A school board should always remember that it costs parents money to send children to school, even though the schools do not charge tuition.

D. *Intercounty Cooperation*

Some problems of rural systems are simply a function of size: the system cannot justify the variety of specialized personnel and facilities that are practical in a large system where the cost can be spread over thousands of pupils. Segregation and the continued use of small, unconsolidated units obviously accentuate these problems but they will exist even if the schools are consolidated and integrated.

There should be, therefore, intercounty associations for the better coordination of school attendance areas. Once these associations are started, other cooperative ventures could develop, such as consolidated purchasing, intercounty technical service, and materials centers (audio-visual services, programmed materials, curriculum materials, professional publications, etc.). We are *not* talking about the consolidation of counties, but rather cooperative ventures.

Cogent reasons for intercounty consolidation and a statewide plan for it are embodied for Georgia in the recent "Peabody" report. It should be recalled, however, that children already spend more time in travel than is sound practice. Cooperation can solve this and will be needed for some children regardless of district size. School districts should not get so large and far away that the people in the district are not interested in them. The notion of local responsibility has merit because it is, potentially at least, a powerful educational force which can function to create a sense of belonging and identity in the students. This asset should not be discarded lightly.

An additional and possibly necessary feature of this intercounty cooperative association is the inclusion of a nearby teacher training institution, which probably would be necessary if the boarding units are to function in the manner we have described. What we are proposing here does not seem to us to exceed the institutional resources already available: in Georgia, for example, there are 10 public supported and 14 private colleges and universities now offering approved teacher training programs; in South Carolina, there are 4 and 13.

These colleges should establish teacher training programs analogous to the so-called internship master of arts in teaching programs now to be found at various universities around the country (e.g., Chicago, Emory, Harvard, Stanford, etc.), and some of their students should do their internship in the residential units of these counties. The colleges should also provide consultant services for the expanded remedial reading programs, guidance programs, and many other facets of both the regular and new programs. This arrangement would supply the interns and provide the school systems with a first chance at young beginning teachers as well as provide a way of obtaining special services to students and inservice training for teachers otherwise awkward to arrange. Large colleges might well become members of several such associations.

E. *Is It Practical?*

One immediate response to these recommendations will be assertions such as "Dreamwork," "Impractical," "It won't work," "You haven't considered. . . ," "Don't you realize that. . . ," and above all, "Too expensive." We believe these ideas *can* be made to work, and that the many difficulties we haven't discussed here (an endless number) *can* be solved, and that the product would justify the cost. This country could and should spend much more on the education of its children than is now the case. Furthermore, the cost of these proposals is high only relative to what a rural southern county now spends. It is probable that to do these things might cost twice what is now spent. Let us look at what it might cost in a county the size of Burke.

The nursery-kindergarten would add around $300 per pupil per year (early education is cheap, later on it is not) or about $250,000 a year. This figure is based on the assumption of roughly 800 pupils in a class of 20-25 students staffed by a senior teacher, a junior teacher (or a nonprofessional assistant), and two (or three) high school assistants. Each teacher would have two classes, one in the morning and one in the afternoon. This figure also is based on the assumption that present structures could be used with relatively small alterations and additions.

The boarding units might seem expensive at first glance but most of the salaries could be charged to the regular instructional budget. The staff would be carrying teaching loads in the school at about ¾ rate (two teachers and two interns carrying three classes). Consequently, the eight or nine boarding units a county the size of Burke might require would probably cost no more than $300,000 a year.

The student assistance program (beyond that accounted for in the two preceding items) would add another $300,000, assuming that about 800 students in senior high school would be earning about $10 a week. This totals $850,000. The consolidation and intercounty cooperation should at least break even since substantial efficiency would be gained.

To be cautious, and to allow for the additional steps we mentioned but have not detailed, add $250,000 more for a total of $1,100,000, a figure that is a bit under the 1964 school budget in Burke County. Since Burke spent about $265 per child in average daily attendance in 1963-64, and since we are hopefully adding about 25-30% to the average daily attendance count, the per pupil figure comes to around $400, an outrageously modest figure which is under the national median (because we are not proposing here to change the salary scale of the teachers, though probably we should).

"Where does this million plus come from?" First of all, through proper tax equalization measures and by raising assessments to a proper level (e.g., 50% of fair value), the county itself could raise much more. Furthermore, many features could be financed by state and federal funds now available; e.g., Title IV of the Civil Rights Act, the Economic Opportunity Act, the National Defense Education Act, and above all, the Elementary and Secondary Education Act of 1965. The colleges' costs would partly be included in their regular budget since they now train teachers; furthermore, summer and in-service institutes (summer schools for children running on shortened days offer very good teacher training possibilities) can often be financed through federal programs. Additional state funds for cooperative undertakings should be forthcoming. It does not seem fanciful to us, therefore, to expect that federal funds would (and should) play a large

role in meeting this budget and that the state would add to the additional local effort. In short, we believe that suggestions as basic as ours could be adapted to most rural counties and could be financed if the community were really interested in its children's education. All of our recommendations are directed toward doing something about the problems of learning that children with certain kinds of backgrounds are likely to have. In the Black Belt South, most of these children are Negro, but that they are has nothing to do with the reasons for our recommendations.

The communities in the rural South must become genuine communities in which every person is a member with a stake in community growth and development. The educational problems of these communities ramify into the problems of the whole social and economic context. We have tried to suggest that the transformation of education in some sense calls for the transformation of a community. We think such a transformation can be brought about in the South only with the help of genuine local effort and concern. Our recommendations are based upon the belief that sound educational decisions must be directed toward bringing about the maximum development of all the children in a community and upon the belief that the maximum growth and enrichment of a community cannot be achieved unless every member of the community has, and can be led to see that he has, a real stake in the outcome of community affairs.

NOTES TO TABLE 4:

[1] Data are for 1963-64 for Burke County, and for 1962-63 for Edgefield County.

[2] Elementary schools in Burke vary in the number of grades in the school, but all figures are for grades 1-7 inclusive for Burke County, and grades 1-8 in Edgefield.

[3] Includes non-teaching principals.

[4] Almost all of the remainder is from the state; federal funds are not important in the budgets of these systems, especially in Burke County.

[5] The difference between the counties largely represents two factors: teacher-pupil ratios and its teacher scales, for the periods considered. It may be noted that Georgia has one scale whereas S. C. has scales that depend on scores on the National Teacher Exam, a test emphasizing verbal facility. Negro teachers tend to score low on this test.

[1] The figures in the body of the table indicate the number of children of a given age (column heading) in a given grade (row heading). Thus, for example, of 155 white children age 14, 83 and 26 were in grades 9 and 10 respectively. The remaining 44 were over age for grade being in grades 5, 6, 7, and 8.

[2] Includes transfer and others not listed in age-grade roster.

[3] Based on assumption of 160 white and 430 Negro children in each age group.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D.C. 20202

ESEA Title I Program Guide #44
DCE/P&P

TO : Chief State School Officers **March 18, 1968**

FROM : Harold Howe II
U.S. Commissioner of Education

SUBJECT: Revised Criteria for the Approval of Title I, ESEA, Applications from Local Educational Agencies (Supersedes Program Guide #36)

State educational agencies may approve grants to local educational agencies under Title I only upon application and after making certain determinations which, "consistent with such basic criteria as the Commissioner may establish," meet the requirements of Section 105(a). Also, Section 803(c) of the ESEA, as amended, states that the Commissioner shall require the adoption by State and local authorities of effective procedures for the coordination of all ESEA programs with other public and private programs, including community action programs, having the same or similar purposes. The revised criteria (attached) reflect the requirements of both Sections 105(a) and 803(c).

The revised criteria are based on the law and are derived from the regulations. They consist, essentially, of two types of statements; (a) those requiring specific determinations with respect to size, scope, and quality of program, participation of private school children, evaluation, dissemination, and the training of education aides; and (b) items requiring a showing by the applicant that in preparing its application it has taken into account certain priorities such as the various needs of educationally deprived children, the need for both regular school year and summer programs, and the relationship of the Title I program to the regular school program.

The criterion (Item VII) in Program Guide #36 on construction and equipment has been superseded by two separate criteria, one on construction and another on equipment. The explanatory sentence referring to a specific percentage of total project costs to be budgeted for equipment and construction has been deleted.

The criteria (numbered and underlined) and the accompanying explanations of factors to be considered in the development of approvable projects, along with this letter of transmittal, have been prepared for distribution by State offices to local educational agencies. Please let us know of your arrangements for such a distribution in your State.

Attachment

cc: State Title I Coordinators, ESEA

Criteria for Applications for
Grants to Local Educational Agencies
under Title I, ESEA

Title I of the Elementary and Secondary Education Act of 1965 requires that the State educational agency make certain determinations "consistent with such basic criteria as the Commissioner may establish. . . ."

These determinations must be made with respect to: selection of project areas; size, scope, and quality of projects and their potential for meeting the needs of educationally deprived children; participation of children enrolled in private schools; coordination of the Title I program with other programs having the same objectives; dissemination of information; methods and procedures for evaluating the results of the program; and the training of education aides.

The following criteria are based on the law and the regulations and were formulated to meet the need for a set of general statements of the essential characteristics of an approvable Title I program. Each criterion (numbered and underlined) is stated as an affirmative "finding" and is followed by an explanation of some of the factors to be considered in developing a program that will meet the criterion.

Each local educational agency should review its Title I program to be sure that none of these criteria has been overlooked before submitting an application to the State educational agency for its approval.

The State educational agency will review the application and advise the applicant which criteria, if any, have not been met. Unless the State educational agency finds that each criterion has been met, the application may not be approved.

1. THE SELECTION OF ATTENDANCE AREAS FOR TITLE I PROJECTS

1.1 The attendance areas selected for Title I projects are those areas which on the basis of the best available information have high concentrations of children from low-income families.

Authority: 20 USC 241e(a)(1)

Section 105(a)(1) of Title I requires that projects be designed to meet the needs of educationally deprived children living in school attendance areas with high concentrations of children from low-income families. By regulation the attendance areas with high concentrations of children from low-income families are those areas where the concentration of such children is as high as or higher than the average concentration for the district as a whole.

An "attendance area" for the purposes of Title I is an area served by a public school. For each such attendance area data must be secured on (a) the total number of children who according to their ages are eligible to attend the public school serving that area and (b) the number of such children who are from low-income families.

In making this determination it is not necessary for the LEA to use a particular income level, although a level of $2,000 or $3,000 would be appropriate, but the same level should be used for all attendance areas. In some cases income data are not available or are out-of-date and the number of children from low-income families will need to be estimated on the basis of the number of such children who are in families receiving Aid to Families with Dependent Children (AFDC), or who are receiving free lunches. Housing, health, or employment statistics may also be used in estimating the number of children from low-income families in each attendance area. Whatever data are used must be used uniformly throughout an applicant's district.

Normally the attendance units should be ranked according to the percentage of children from low-income families. However, in districts with extremely large variation in the sizes of the populations of its attendance units, such units may be ranked according to the average number of children per attendance unit. If necessary for reasons of equity the attendance units determined to have high concentrations of children from low-income families may include some areas ranked on one basis and some on the other. In such a case, however, the total number of attendance areas accepted as eligible areas for Title I purposes should not exceed the number of such units that would have been eligible if only one basis, i.e., percentage or average number of children from low-income families, had been used.

Elementary and secondary school attendance areas in the same school district may be ranked separately on the basis of the percentage or numerical concentrations of children from low-income families among the children eligible to attend such schools.

In all cases the number of children considered eligible to attend a particular school consists of all children of the appropriate ages including children attending private schools and children who have dropped out of school.

In some cases a whole school district or a group of contiguous school attendance areas may be regarded as a single area of high concentration of children from low-income families. This may be done, however, only if there are no wide variances in the concentrations of children from low-income families.

Some schools have no well-defined attendance area boundaries or receive numbers of children from outside the areas that have been designated for those schools. It may be necessary to base the ranking of the attendance areas for such schools on the percentage or number of children from low-income families actually enrolled in those schools while recognizing that other children, as explained below, will be included in the "target population" if the area is found to have a higher than average concentration of children from low-income families.

The purpose of the attendance area requirement is to identify the "target populations" of children who are to be considered for participation in Title I activities on the basis of educational deficiency and need for special services. Thus, for schools without well-defined boundaries or where children have been transferring in or out on open enrollment or freedom-of-choice plans, the "target population" should include (a) all of the children who are attending the particular public school which on the basis of enrollment has a high concentration of children from low-income families; (b) children who have been attending that school; and (c) children who would be attending that school if they were not attending a private school or another public school under a freedom-of-choice, open enrollment, or another plan designed to bring about desegregation.

2. COMPREHENSIVE ASSESSMENT OF NEEDS

2.1 The priority needs of educationally deprived children in the eligible attendance areas (target populations) were determined in consultation with teachers, parents, private school authorities, and representatives of other agencies which have a genuine and continuing interest in such children. The evidence of need and the bases for the assignment of priorities have been documented.

Authority: 20 USC 241e(a)(1)

The term "educationally deprived children" has been defined in the Title I regulations as:

> ". . . those children who have need for special educational assistance in order that their level of educational attainment may be raised to that appropriate for children of their age. The term includes children who are handicapped or whose needs for such special educational assistance result from poverty, neglect, delinquency, or cultural or linguistic isolation from the community at large." /45 CFR 116.1(i)/

The first step in the development of a compensatory program to meet the needs of such children is to evaluate the evidence concerning the educational deficiencies of children who live in the eligible attendance areas. If necessary, additional evidence should be secured before extensive programming is undertaken. The evaluation of the previous year's Title I program often provides considerable information concerning the educational deficiencies of children in the areas where Title I projects have been conducted. Specific attention should be given to the information available on educational retardation, results of educational tests, linguistic or racial isolation, welfare and nutrition, physical and mental handicaps, and other pertinent information on which the incidence and severity of the needs of children in the project areas can be established.

It is essential that public and private school teachers and other staff members, parents, and representatives of related programs and agencies be involved in the early stages of program planning and in discussions concerning the needs of children in the various eligible attendance areas. They are often able to corroborate or offer insights concerning the evidence of educational deficiencies. They will be much more likely to lend support to a program of special educational services if, as a result of their involvement, they understand the premises on which such a program is based.

Officials of community action, welfare, juvenile protection, and other agencies which have responsibilities for helping people--children or adults--overcome the effects of poverty are among those to be consulted concerning their views on the needs of the children in eligible attendance areas.

The objective of the consultations concerning the educational needs of children in the eligible attendance areas should be the development of a carefully documented list of needs in order of priority for the following groups of children:

Preschool Children

The general need for early diagnosis and for compensatory educational services for preschool children in predominantly low-income areas is widely recognized. Many of these children, while yet without regular school experience, already show a lack of intellectual and social growth. Unless they can be motivated and stimulated they are not likely to experience much success in their first years in the regular school program.

The applicant should definitely consider the needs of preschool children in planning its Title I program. Opportunities for children to participate in Project Head Start should be fully explored with the local community action agency, and full advantage should be taken of the availability of this resource. Where Head Start funds are not available or are insufficient, the applicant should give priority consideration to meeting the needs of preschool children through the use of Title I funds or, if possible, through the coordinated use of Head Start and Title I funds.

Community action groups are often interested in programs for preschool children, particularly if they are involved or have been involved as grantee agencies for Head Start programs funded under the Economic Opportunity Act of 1964. Every effort should be made to assist such groups to secure Head Start grants and thus reduce the demand for similar programs under Title I. In highly impoverished areas a community action agency may be able to provide health and welfare services for preschool children on the basis of financial need while the school-oriented program for all of the children of preschool age living in that area is provided under Title I.

Where Day Care Centers have been established for children in families receiving Aid to Families with Dependent Children (AFDC), the local educational agency in consultation with the Head Start program grantee should explore the possibility of their adding needed educational components to the programs to be conducted in those Centers.

Children in Early Elementary School

The needs of children in the early elementary school grades should be carefully assessed. These children already manifest in their behavior the intellectual and social deprivation that has characterized their lives. There is considerable evidence that special programs can be helpful for educationally deprived children in those grade groups. The development of such a program will require a careful assessment of the particular characteristics, behavioral patterns, and needs of the children who live in the applicant's eligible attendance areas.

Applicants should identify the needs of children in the early elementary school grades to preserve and build on progress they may have made in Head Start and Title I preschool classes. Priority consideration should be given by the applicant to such children in the Title I program in order to avoid interruption of needed enriched services, including health and welfare services which they had been receiving under Head Start or other quality preschool programs. Applicants should be encouraged to consider programs of instruction and services outlined in the criteria for the Follow Through program to assure that sequential learning experiences are made available to children based on preschool and kindergarten preparation for cognitive growth and development.

Children in Later Elementary School and Secondary School Years

It is in the later elementary and secondary school years that educational deficiencies become most apparent and most difficult to treat. By this time many of the children are no longer responding in any positive way to their school environment and are well on their way to becoming dropouts. Their academic and behavioral problems are extremely varied and complex and will require the most careful study in order to establish the needs on which an effective compensatory program can be developed. Remedial programs should be built on a thorough consideration of the potential of individualized instruction, tutoring and personalized guidance services.

Dropouts

The needs of children who have actually dropped out of the regular school program should also receive specific attention. With the help of other agencies these children should be located and identified and every effort should be made to evaluate their educational needs in order to provide a sound basis for the planning of special educational programs to meet those needs.

Children in Institutions

Children in institutions for neglected or delinquent children who have been counted in determining the applicant's allocation, even though they may not be living in an eligible attendance area, are to be considered as eligible for participation in Title I projects. Opportunities should be provided for the participation of such children in services designed to meet their needs.

Handicapped Children

The unmet needs of handicapped children should be considered. It is expected that such children will be included in Title I programs in project areas where the existing level of services for such children is recognized as being inadequate. Diagnostic procedures should be required as a part of all service programs for these children. Coordination with Title VI, ESEA, programs must be demonstrated.

Non-English Speaking Children

Every applicant should be aware of the needs of non-English speaking and bilingual children who live in the eligible attendance areas. Special efforts should be made to meet the needs of these children through Title I or through another program in order that they may learn to participate fully in the life of their community. The strengths of their ethnic backgrounds should be utilized in the development of special programs related to their needs.

The needs of the children in each of the foregoing groups should be stated in behavioral terms and, when appropriate, with reference to objective measures of educational growth or achievement. These needs must be set forth on the Title I application in order of priority.

3. PLANNING

3.1 The Title I program was planned as an integral part of a comprehensive compensatory educational program involving the coordinated use of resources from other programs and agencies.

Authority: 20 USC 241e(a)(1) and 883(c)

While the authority of Title I is directed solely toward the special needs of educationally deprived children, there are other programs and agencies which are also authorized to provide services to meet some of those same needs. It is important, therefore, when the priority needs of the children have been determined, that the various other agencies and program representatives be aware of those needs, particularly with respect to needs for improved nutrition, treatment and prevention of diseases and disabilities, and other needs indirectly related to the educational process.

Program representatives in the local educational agency and in the other interested agencies should develop the broad objectives for the comprehensive compensatory educational program. Once these objectives have been agreed upon, consultations should begin on the organization and utilization of all available resources to realize these objectives. This will require careful examination of the authority and responsibility of each of the various agencies. Each agency, however, should explore how it can most effectively, within its authority and responsibility, contribute to the realization of the objectives of the compensatory educational program.

Many of the other agencies involved in assessing the needs of children have been serving children and parents in various ways and may be receptive to new ideas about how their services can be more effective. If these agencies have new funds or are reprogramming the use of existing funds, it is very important that this be made known to the local public school authorities so that Title I funds are not inadvertently programmed for the same purposes.

The local educational agency itself should also examine the possibility of using other Federal grant programs, such as other titles of ESEA, NDEA, and EPDA, to meet the needs of children in the project areas. For some local educational agencies additional State funds or private funds may be available for this purpose. The Title I application should provide information concerning related programs and the specific provisions that will be made for coordination.

Some of the other agencies may have to follow economic criteria with respect to the selection of children and families for services, whereas the local educational agency must use educational criteria in selecting children from among those who live in areas that meet required economic criteria. Many of the same children, however, will be found to be in need of services on grounds of both economic and educational deprivation. Under these circumstances it is important that the agency with the major responsibility and the best resources deliver each of the needed services in coordination with, but without duplication of, the work of the other agencies.

Some program objectives, therefore, will be the primary responsibility of the local Title I program; others will fall to other Federal (direct grant or State plan) programs to be conducted by the local educational agency, to the federally financed programs of other agencies, to various State and local programs and, in some cases, to private agencies. If a Model Cities program or a Neighborhood Services Center is in operation or is being planned, the appropriate program representatives should be consulted concerning the need for the coordination of their programs with the compensatory education program.

The Title I application should present sufficient information to show that the resources available to the local educational agency and to other local agencies have been considered in planning the program and that where appropriate those resources have been committed to certain program objectives. The application should show not only that the resources of other programs were considered in planning but also that there will be appropriate coordination of related services in the actual operation of a comprehensive program.

All proposals to provide health, nutrition, welfare, and recreation services under Title I should be fully justified on the basis that the resources of other agencies are not adequate to meet high priority needs for these services.

4. PROGRAM DESIGN

4.1 Consideration has been given to the relationship of the Title I program to the regular school program and to the possibility of modifying that program so as to provide a better base for the addition of supplementary compensatory educational services.

Authority: 20 USC 241e(a)(1)

Probably the most obvious indication of a child's need for special educational assistance under Title I is his inability to respond constructively to the regular school program. In many cases this program can be modified and integrated with the services to be

provided under Title I so as to provide the child with a total program adapted to his special needs. In this connection, the requirement that applicants maintain regular school programs in the project areas at the same levels as they would have been maintained if Title I funds were not available applies only to expenditures and not to the program itself.

The Title I program, if it is to be truly supplementary, must be designed to extend and reinforce the regular school program. Insofar as possible, the regular school program, the Title I program, and any other special programs should be designed as a total program to meet the needs of the children to be served. This may require revision of the regular school curriculum and will in any event require communication between regular school and Title I staff concerning their respective programs and the ways in which they can be improved to better meet the needs of the educationally deprived children involved in both programs.

4.2 <u>The application shows that the Title I program is based on a consideration of the relative needs of children at all ages and grade levels and is designed to meet a limited number of high priority needs which cannot be met through the regular school program or other programs</u>.

Authority: 20 USC 241e(a)(1)

Title I resources should be concentrated on those children who are most in need of special assistance. Normally this process will involve determinations of both the needs of individual groups of children and of the possibilities for success in working with those groups. Decisions should be made in terms of the effectiveness of providing comprehensive services to a limited number of children in a few groups as opposed to the ineffectiveness of spreading diluted services over all eligible children in all groups. Consideration must also be given to the availability of assistance from other agencies and programs for specific groups of children.

4.3 <u>The Title I program is based on clearly stated objectives and desired outcomes and, if executed as planned, will very likely result in reduction of educational deficiency</u>.

Authority: 20 USC 241e(a)(1)

The compensatory education objectives to be met through Title I should be clearly and realistically stated in terms of the types of changes that are sought and the degree of change that is expected by the end of the year as a result of each major activity. Where appropriate, reference should be made to evaluations of similar activities carried on during preceding years, the program changes that have been made as a result of such evaluations, and

the types of improved performance expected by the end of the new program year. As applicants gain more and more experience they should become more precise concerning what they expect to accomplish through their Title I programs.

4.4 Due consideration has been given to the provisions of Title I services not only during the regular school year but also during the summer.

Authority: 20 USC 241e(a)(1)

Applicants should examine closely the possibility for meeting urgent needs through summer programs. The summer period provides opportunities for new activities which, while designed to overcome educational deficiency, can be more specifically and extensively adapted to the needs of the children to be served. Special efforts should be made, however, to be sure that the children who participate receive assistance designed to continue the gains they have made in the preceding school year or to prepare them for the next school year's activities under the regular school or the Title I program.

4.5 Educationally deprived children enrolled in private schools will have genuine opportunities to participate in the Title I program on the basis of need as determined by the comprehensive assessment of the needs of all children in the eligible low-income areas. The high priority needs of private school children residing in those areas will be met with services that are comparable in scope and quality to those provided to meet the high priority needs of public school children.

Authority: 20 USC 241e(a)(2)

The applicant's assessment of needs of children at various grade and age levels must include the children in the eligible public school attendance areas who are enrolled in private schools. This assessment is to be carried out in consultation with private school authorities and to provide the basis for (a) determining the special services in which private school children will have genuine opportunities to participate, and (b) selecting the private school children for whom such services are to be provided.

The needs of private school children in the eligible areas may not be identical with those of public school children and, hence, may require different services and activities. Those services and activities, however, must be comparable in quality, scope, and opportunity for participation to those provided for public school children with needs of equally high priority. "Comparability" of services should be attained in terms of the numbers of educationally deprived children in the project area in both public and private schools and related to their specific needs, which in turn should produce an equitable sharing of Title I resources by both groups of children.

The application should provide sufficient evidence to assure the State educational agency that the local educational agency will maintain administrative direction and control over Title I activities conducted on private premises. Title I instructional activities and related services, the use of equipment, and all personnel performing services on private premises under the Title I program are to be under the active supervision of the applicant local educational agency.

4.6 The applicant's Title I program will be conducted in a limited number of eligible attendance areas and will provide relatively higher concentrations of services in areas having the highest incidence of poverty.

Authority: 20 USC 241e(a)(1)

The applicant should make sure that the needs of children in eligible areas with the highest incidence of poverty have been met before considering the needs of children in eligible areas in which the incidence is much lower. The program in the areas with the highest incidence should be designed to serve a larger proportion of children and to provide them with a greater variety of services than programs in areas with lesser incidences of poverty.

4.7 Title I services will be programmed so that those services will be concentrated on a limited number of children.

Authority: 20 USC 241e(a)(1)

The Title I program, if it is to have "sufficient size, scope and quality to give reasonable promise of substantial progress," as required by the Act, must be concentrated on a limited number of children. Furthermore, it should be expected that each child will need not a single service but a variety of services which should be provided under Title I and, if possible, through other agencies.

The proposed Title I expenditure per child is an indication of the concentration of effort. The greater the concentration of effort, as indicated by investment per child, the greater the likelihood that the program will have a significant impact on the children in the program. The investment per child on an annual basis for a program of compensatory educational services which supplement the child's regular school activities should be expected to equal about one-half the expenditure per child from State and local funds for the applicant's regular school program. The investment per child per year for a program such as a preschool program which provides all of the services for the child involved should be expected to equal the applicant's full expenditure per pupil from State and local funds.

5. IMPLEMENTATION OF TITLE I PROGRAMS

5.1 The proposed staffing pattern is appropriate for the activities and services to be provided.

Authority: 20 USC 241e(a)(1)

The ratio of project staff to the number of children to be served should be high enough to provide concentrated, individualized services. Use should be made of a variety of personnel other than professional classroom staff. Parents of participating children, volunteers, and persons in the community with special skills should be considered in the selection of the staff needed to provide the specified services.

5.2 Inservice training will be geared specifically to the requirements of the Title I program and the needs of the Title I staff.
Authority: 20 USC 241e(a)(1)

The orientation, indoctrination, and development of the personnel who have been selected to conduct the Title I program is probably the most critical phase of the Title I program. The concentration of the Title I program on children who have not been developing satisfactorily under the regular school program indicates the need for new approaches to the development of teaching and other personnel.

The methods of preparing personnel to undertake specific Title I activities and for their continued inservice development should be closely geared to those activities. Furthermore, the inservice training program should be of sufficient size and depth to have an impact on the participant and the Title I program. Case studies of other ongoing programs, "sensitivity" training, and other approaches specifically designed to help teachers do a better job of providing special services for and relating to children with special needs should be tried and evaluated. Institutions of higher education should be involved in conducting training programs for Title I personnel and in following up with the evaluation of those programs. The use of old ready-made courses not related to problems confronting the Title I staff should, of course, be avoided.

5.3 Specific provision has been made for professional staff members and education aides assigned to assist them to participate together in coordinated training programs.
Authority: 20 USC 241e(a)(11)

The 1967 amendments to Title I specifically require as a condition for the approval of projects involving the use of education aides the presentation of well-developed plans for training programs in which the aides and the professional staff members they will assist participate together. The program provided for such staff members and their aides should, as stated in item 5.2, Inservice Training, be closely allied to the tasks they will be performing. Each Title I application involving the use of education aides should set forth (a) definite proposals for the joint training of those aides and the professional staff members with whom the aides will work or (b) a detailed description of such a program in which most

of the aides and the professional staff members they will assist have already participated. Special attention should be given to the development of the most effective ways the professional staff members and their aides can work together and of ways in which a long-term training program may assist both professional staff members and aides to take on increasing responsibilities. If appropriate, consideration should be given to providing the aides with training leading toward teacher certification. Such training may begin with Title I funds and continue as long as the aides are employed in Title I activities. After this, other appropriate funding should be sought.

5.4 The Title I program includes appropriate activities or services in which parents will be involved.

Authority: 20 USC 241e(a)(1)

The applicant should demonstrate that adequate provision has been made in the Title I program for the participation of and special services for the parents of children involved in the programs. The employment of parents in the Title I projects is but one way to implement this provision. The primary goal of such activities and services should be to build the capabilities of the parents to work with the school in a way which supports their children's well-being, growth, and development.

5.5 Title I activities or services will be offered at locations where the children can best be served.

Authority: 20 USC 241e(a)(1)

All Title I program activities must be designed for educationally deprived children who live in eligible attendance areas but should be offered at locations where those children can best be served. Any proposed Title I activities (including the construction of school facilities) which, because of location or for other reasons, would in effect prolong the racial, social, or linguistic isolation of the children to be served would be self-defeating and should not be approved. Applicants for Title I funds should design effective compensatory education programs which include, where appropriate, measures for fostering integration in the community.

In some cases, the locations where the children can best be served will be outside the project area. The application should indicate clearly the locations both inside and outside the project areas where Title I services will be offered and the number of children from inside and outside the project areas who will participate at each such location.

No child who lives in a project area and who would otherwise receive Title I services is to be denied such services because of his exercise of a right to enroll in another school. Children residing outside the project areas who can benefit from the services may participate on a space-available basis.

5.6 Expenditures for equipment will be limited to the minimum required to implement approved Title I activities or services.
Authority: 20 USC 241e(a)(1)

All requests for the approval of funds for the purchase of initial or replacement equipment must be fully justified. This means that the applicant must show that (a) equipment has been selected and designated for specific purposes in connection with proposed project activities, (b) the proposed equipment is essential to the effective implementation of the project, (c) such equipment is not available in the applicant's regular or Title I inventories for use in the project, and (d) the applicant has the trained staff to utilize the proposed new equipment effectively or that arrangements will be made to prepare staff for such use. The State educational agency will review existing Title I inventories and insure that equipment already purchased with Title I funds is being effectively used for Title I purposes. Equipment that is no longer appropriate for use in Title I projects should be sold or transferred to the applicant's regular inventory and the appropriate amounts refunded to the Federal Government.

5.7 Title I funds will be used for construction only when necessary to implement projects designed to meet the highest priority needs of educationally deprived children in the applicant's district.
Authority: 20 USC 241e(a)(1)

Whenever possible Title I activities and services should be organized and scheduled for operation in existing facilities. If existing facilities cannot be used, consideration should first be given to the rental of space in ready-made permanent or portable facilities. Rental or construction of school facilities (including portable units) not specifically related to a Title I project activity should not be allowed except in unusual situations where (a) such construction is necessary in order to bring children together at locations where they can be served effectively under Title I and (b) the local educational agency is unable to provide such facilities with its own funds. The construction of permanent new facilities should be regarded as a local responsibility except in extreme cases of financial need.

5.8 The Title I program includes provisions for the dissemination of information to teachers and administrators for their use in planning and conducting projects.

Authority: 20 USC 241e(a)(9)

In addition to the dissemination that takes place through inservice training programs for the Title I staff, relevant information concerning compensatory education from such sources as research and demonstration reports should be made available through appropriate forms of communication to Title I and other school personnel servicing participating children. Emphasis should be placed on the dissemination of information which will contribute to improved program planning and operation both in the applicant's district and in other districts. Conversely, applicants should be able to demonstrate that their Title I staff members in planning program activities have considered the information that has been made available to them. Applicants should develop information dissemination programs to include involvement of the community and parents of children served by the project. Dissemination procedures should include such things as annual reports, newsletters, news releases and other material for newspapers, magazines, radio, and television for the purpose of informing the public and other educators about program objectives and procedures and gain support of the project.

6. EVALUATION

6.1 The Title I program includes specific evaluation procedures that are appropriate for the services to be provided and consistent with approved program objectives. Adequate staff and other resources will be provided to implement the procedures.

Authority: 20 USC 241e(a)(6)

The Title I application must include a description of the methods and procedures to be used to evaluate each major activity. No application can be approved unless these procedures are described in sufficient detail to enable the State educational agency to appraise their potential effectiveness.

The application should also contain sufficient information for the State educational agency to determine the adequacy of the resources the local educational agency expects to use in carrying out the evaluation of its major program activities. Private school officials should be involved in the formulation of evaluation procedures for any activity in which private school children are expected to participate.

The adequacy of the applicant's plans and resources for evaluation must be assessed in terms of the objectives that have been approved for the program and the nature of the major activities.

7. TITLE I FUNDS SUPPLEMENTARY TO STATE AND LOCAL FUNDS

7.1 The Title I program and the regular school program have been planned and budgeted to **assure** that Federal funds will supplement and not supplant State or local funds and that State and local funds will be used to provide services in the project areas that are comparable to the services provided in non-project areas.

Authority: 20 USC 240e(a)(1)

It is expected that services provided within the district with State and local funds will be made available to all attendance areas and to all children without discrimination. The instructional and ancillary services provided with State and local funds for children in the project areas should be comparable to those provided for children in the non-project areas, particularly with respect to class size, special services, and the number and variety of personnel. Title I funds, therefore, are not to be used to supplant State and local funds which are already being expended in the project areas or which would be expended in those areas if the services in those areas were comparable to those for non-project areas. This means that services that are already available or will be made available for children in the non-project areas should be provided on an equal basis in the project areas with State and local funds rather than with Title I funds. It is intended also, in the application of this policy, that as services initiated in the project areas under Title I are extended to children residing in non-project areas the applicant will assume full support of those services under its regular school budget. This will release Title I funds to provide new activities for eligible children.

FINANCIAL ASSISTANCE
TO MEET THE SPECIAL EDUCATIONAL NEEDS
OF EDUCATIONALLY DEPRIVED CHILDREN

REGULATIONS

TITLE I OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965 PUBLIC LAW 89-10

TITLE 45, PART 116 of the CODE OF FEDERAL REGULATIONS Revised and Amended as of November 28, 1968

Compiled from
Federal Register (February 9, 1967) 32 F.R. 2742-2752
and (November 28, 1968) 33 F.R. 17788-17790

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

Discrimination Prohibited – Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore, the Elementary and Secondary Education Act of 1965, Title I program, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with this law.

Title 45—PUBLIC WELFARE

Chapter I—Office of Education, Department of Health, Education, and Welfare

PART 116—FINANCIAL ASSISTANCE TO MEET THE SPECIAL EDUCATIONAL NEEDS OF EDUCATIONALLY DEPRIVED CHILDREN

Federal financial assistance made pursuant to the regulations set forth below is subject to the regulation in 45 CFR Part 80, issued by the Secretary of Health, Education, and Welfare and approved by the President to effectuate the provisions of section 601 (42 U.S.C. 2000d) of the Civil Rights Act of 1964 (Public Law 88-352).

Subpart A—Definitions

Sec.
116.1 Definitions.

Subpart B—Eligibility for and Amount of Grants and Payments

116.2 Eligibility of local educational agencies.
116.3 Determination of maximum grants and payments.
116.4 Allocation of county aggregate maximum grants by State educational agencies.
116.5 Local educational agencies in more than one county.
116.6 Local educational agencies with overlapping jurisdictions or serving children from another school district.
116.7 Changes in local educational agencies.
116.8 Special incentive grants.
116.9 Ratable reductions and reallotments.
116.10–116.15 [Reserved]

Subpart C—Project Applications

116.16 Project applications.
116.17 Project covered by an application.
116.18 Size, scope, and quality of projects.
116.19 Participation by children enrolled in private schools.
116.20 Title to property and control over funds.
116.21 Requirements with respect to construction.
116.22 Provision for measurement of educational achievement and evaluation of programs.
116.23 Reports by local educational agencies.
116.24 Relation to other programs.
116.25 Dissemination and utilization of results of educational research and demonstrations.
116.26–116.30 [Reserved]

Subpart D—Duties and Functions of State Education Agencies

116.31 Participation by States.
116.32 Certificate of State attorney general.
116.33 Allocation to local educational agencies.
116.34 Approval of applications from local educational agencies.
116.35–116.40 [Reserved]

Subpart E—Payments

Sec.
116.41 Payments to States.
116.42 Obligation of Federal appropriations.
116.43 Distributions to State or local educational agencies.
116.44 Limitation on payments to a State.
116.45 Limitations on payments to a local educational agency.
116.46 Use of Federal funds and liquidation of obligations by State or local educational agencies.
116.47 Expenditures by State and local educational agencies.
116.48 State fiscal control and audit.
116.49–116.50 [Reserved]

Subpart F—General Provisions

116.51 Approval of State applications.
116.52 Withholding by the Commissioner.
116.53 Allowable expenditures.
116.54 Retention of records.
116.55 Inventories of equipment.
116.56 Financial interest of officials.
116.57 Copyrights and patents.

AUTHORITY: The provisions of this Part 116 issued under sec. 7, 64 Stat. 1107, as renumbered sec. 301, 79 Stat. 35; 20 U.S.C. 242. Interpret or apply secs. 201–212, 301–303, as added or renumbered by 79 Stat. 27–36, and 111(f), 80 Stat. 1196, 20 U.S.C. 241a–241l, 242–244 and 883(c).

Subpart A—Definitions

§ 116.1 Definitions.

As used in this part—

(a) "Act" means the Elementary and Secondary Education Act of 1965 (Public Law 89-10). Title II of Public Law 874, 81st Congress, which was added by Title I of said Elementary and Secondary Education Act of 1965, is hereinafter in this part referred to as Title I of the Act.

(b) "Attendance area" means, in relation to a particular public school, the geographical area in which the children who are normally served by that school reside. An attendance area for an elementary school may not necessarily be coterminous with an attendance area for a secondary school.

(c) "Average daily attendance" means (1) average daily attendance in elementary and secondary schools, not beyond grade 12, as determined in accordance with State law and (2) in the case of schools for handicapped children operated or supported by a State agency, the average number of children under 21 years of age participating per day for the length of a normal school year in an organized program in such schools of instruction which is recognized under State law as furnishing elementary or

secondary education, but not beyond grade 12. Daily attendance shall be measured by the number of daily hours of participation in such instruction as the State agency determines to be appropriate for children with the particular handicap involved, except that any such instruction for more than 1 hour, but less than 3 hours, a day shall be deemed to constitute a maximum of one-half day of attendance. Time spent primarily in custodial care or in medical treatment or therapy cannot be counted in determining school attendance.

(d) "Average per pupil expenditure" in a State or in the United States means the aggregate of current expenditures (as defined in paragraph (h) of this section but otherwise without regard to the sources of funds from which such expenditures are made) of all those local educational agencies in the State, or in the United States, as the case may be, which are boards of education or other legally constituted local school authorities having administrative control and direction of free public education in a county, township, independent or other school district, including those State agencies which operate and maintain facilities for the providing of free public education in a county, township, or other school district, plus any such current expenditures made directly by the State for operation of those local educational agencies, and the sum thereof divided by the aggregate number of children in average daily attendance to whom those local educational agencies provided free public education. As used in this paragraph, "the United States" means the States of the Union and the District of Columbia.

(e) "Commissioner" means the U.S. Commissioner of Education.

(f) "Construction" means the erecting, building, acquiring, altering, remodeling, improving, or extending of school facilities, and includes the preparation of drawings and specifications for school facilities and the inspection and supervision of the construction of school facilities.

(g) "County" means a division of a State of the Union which is treated as a county by the Secretary of Commerce in compiling and reporting data regarding counties.

(h) "Current expenditures" means expenditures for free public education, including expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plants, and fixed charges, and net expenditures to cover deficits for food services and student body activities, but not including expenditures for community services, capital outlay and debt service, or any expenditures made from funds granted under Titles I, II, or III of the Act.

(i) "Educationally deprived children" means those children who have need for special educational assistance in order that their level of educational attainment may be raised to that appropriate for children of their age. The term includes children who are handicapped or whose needs for such special educational assistance result from poverty, neglect, delinquency, or cultural or linguistic isolation from the community at large.

(j) "Elementary school" means a day or residential school which provides elementary education, as determined under State law.

(k) "Equipment" includes machinery, utilities, and built-in equipment and any necessary enclosures or structures to house them, and includes all other items necessary for the functioning of a particular facility as a facility for providing educational services, including such items as instructional equipment and necessary furniture, printed, published, and audiovisual instructional materials, and books, periodicals, documents, and other related materials. Equipment does not include supplies which are consumed in use or which may not reasonably be expected to last longer than 1 year.

(l) "Federal percentage" means 50 percent of the average per pupil expenditure in a State, or, where applicable, in the United States, for a prior fiscal year, which is used as a factor in computing maximum grants under Title I of the Act.

(m) "Fiscal year" means a period beginning on July 1 and ending on the following June 30. (A fiscal year is designated in accordance with the calendar year in which the ending date of the fiscal year occurs.)

(n) "Free public education" means education which is provided at public expense, under public supervision and direction, and without tuition charge, and which is provided as elementary or secondary education, not above grade 12 in a State. Elementary education may, if so determined under State law, include education below grade 1 meeting the above criteria.

(o) "Handicapped children" means mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by reason thereof require special education.

(p) "An institution for delinquent children" means a public or private nonprofit residential facility which is oper-

ated primarily for the care of, for an indefinite period of time or for a definite period of time other than one of short duration, children who have been adjudicated to be delinquent children.

(q) "An institution for neglected children" means a public or private nonprofit residential facility (other than a foster home) which is operated primarily for the care of, for an indefinite period of time, at least ten children who have been committed to the institution, or voluntarily placed in the institution, and for whom the institution has assumed or been granted custodial responsibility pursuant to applicable State law, because of the abandonment or neglect by, or death of, parents or persons acting in the place of parents.

(r) "Local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. The term includes any State agency which is directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children. It also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(PARAGRAPH (s) AMENDED NOVEMBER 28, 1968, 33 F.R. 17788)

(s) "Low-income factor" means the limit of family annual income which is used in determining families with low annual incomes for the purpose of Title I of the Act. For fiscal years 1968, 1969, and 1970, the low-income factor is $2,000, except that when the appropriations under Title I of the Act are sufficient to satisfy all maximum grants to local educational agencies computed by using that factor, the low-income factor is $3,000.

(t) "Program" means an overall plan with respect to funds made available under Title I of the Act during a fiscal year which is intended to be put into effect by a State or local educational agency or the Department of the Interior through one or more projects.

(u) "Project" means an activity, or a set of activities, proposed by a State or local educational agency or the Department of the Interior and designed to meet certain of the special educational needs of certain educationally deprived children.

(v) "Project area" means the attendance area, or combination of attendance areas, having a high concentration of children from low-income families which, without regard to the location of the project itself, is designated as the area whose children are to be served by the project. The term does not apply to a project to be carried out by a State agency at a school operated or supported by that agency for handicapped children or for children in institutions for neglected or delinquent children.

(w) "School facilities" means classrooms and related facilities (including initial equipment) for free public education and interests in land (including site grading and improvements) on which such facilities are constructed, but does not mean gymnasiums or similar facilities intended primarily for use for exhibitions for which admission is to be charged to the general public.

(x) "Secondary school" means a day or residential school which provides secondary education, as determined under State law, but not beyond grade 12.

(y) "Service function" means an educational service which is performed by a legal entity, such as an intermediate agency, whose jurisdiction does not extend to the whole of the State and which is authorized to provide consultative, advisory, or educational program services to public elementary or secondary schools, or which has regulatory functions over agencies having administrative control or direction of public elementary or secondary schools, rather than a service which is performed by a cultural or educational resource.

(z) "State" means a State of the Union, the District of Columbia, Wake Island, Puerto Rico, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands.

(aa) "State educational agency" means the officer or agency primarily responsible for the State supervision of public elementary and secondary schools.

(bb) "Works of art" means those items, which may be in the nature of fixtures, that are incorporated in school facilities primarily because of their esthetic value. The cost of a work of art that is in the nature of a fixture shall be the estimated additional cost of incorporating those special esthetic features which exceed the general requirement of excellence of architecture and design.

(PARAGRAPHS (cc), (dd), AND (ee) ADDED NOVEMBER 28, 1968, 33 F.R. 17788

(cc) "Migratory child of a migratory

agricultural worker," includes, for purpose of planning and administering programs and projects, a child who has migrated with his parents but who, with the concurrence of his parents, resides in the area served by a State educational agency which carries out a program or project for migratory children of migratory agricultural workers, but a child shall not be considered migratory under this inclusion for a period of more than 5 years.

(dd) "National effort index" means the percentage expressing the ratio of expenditures from all non-Federal sources in all States of the Union and the District of Columbia for public elementary and secondary education to the total personal income in all the States of the Union and the District of Columbia.

(ee) "State effort index" means the percentage expressing the ratio of expenditures from all non-Federal sources in a State of the Union or the District of Columbia for public elementary and secondary education to the total personal income in that State or the District of Columbia.

Subpart B—Eligibility for and Amount of Grants and Payments

§ 116.2 Eligibility of local educational agencies.

(PARAGRAPH (a) AMENDED NOVEMBER 28, 1968 33 F.R. 17788)

(a) A local educational agency in the State of the Union or the District of Columbia is eligible for a grant under Title I of the Act for a fiscal year if the Commissioner determines on the basis of satisfactory data available to him that the number of children aged 5 to 17, inclusive, in families residing in the school district of that local educational agency and having an annual income of less than the low-income factor, in families residing in that school district and receiving an annual income in excess of the low-income factor from payments under a State plan approved under Title IV of the Social Security Act, living in that school district in institutions for neglected or delinquent children (other than children for whom a State agency is directly responsible for providing free public education), and living in foster homes in that school district and being supported with public funds, amounts to at least 10.

(b) If the Commissioner does not have available satisfactory data on a school district basis, a local educational agency is eligible for such a grant if the school district served by it is located in whole or in part in a county in which the Commissioner determines that there are 10 or more of such children.

(c) The foregoing provisions of this section are not applicable to a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children.

§ 116.3 Determination of maximum grants and payments.

(PARAGRAPH (a) AMENDED NOVEMBER 28, 1968, 33 F.R. 17738)

(a) The maximum grant for which a local educational agency in a State of the Union or the District of Columbia (other than a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) is eligible to receive under Title I of the Act will be determined by the Commissioner, if satisfactory data are available for that purpose, by multiplying the sum of (1) the number of children aged 5 to 17, inclusive, in families residing in the school district of the local educational agency and having an annual income of less than the low-income factor prescribed in § 116.1(s), (2) the number of children of those ages in families residing in the school district and receiving, from payments under the program of aid to families with dependent children under a State plan approved under Title IV of the Social Security Act, an annual income in excess of the low-income factor prescribed in § 116.1(s), (3) the number of children of those ages living in the school district in institutions (other than institutions operated by the United States) for neglected or delinquent children (other than children for whom a State agency is directly responsible for providing free public education) and (4) the number of children of those ages living in foster homes in the school district and being supported with public funds, by the Federal percentage prescribed in § 116.1(1) of the average per pupil expenditure in that State or, if greater, in the United States.

(b) Unless the Commissioner determines that satisfactory data are available to enable him to determine the maximum grant for which a local educational agency is eligible, he shall determine the aggregate of the maximum grants for which all local educational agencies (other than State agencies directly responsible for providing free pub-

lic education for handicapped children or for children in institutions for neglected or delinquent children) in each county of each State of the Union are eligible. Such an aggregate is hereinafter in this part referred to as a county aggregate maximum grant. Such county aggregate maximum grants will be allocated by State educational agencies among the several local educational agencies in each county in accordance with the provisions of §§ 116.4, 116.5, and 116.6.

(c) A county aggregate maximum grant will be determined in the same manner as a maximum grant is computed under paragraph (a) of this section except that the numbers of such children residing in the county, instead of the numbers of such children residing in an individual school district, are to be used in the computation.

(d) The amount of the grants to Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands, and the amount of the payments to the Department of the Interior to meet the special educational needs of educationally deprived children on reservations serviced by elementary and secondary schools operated for Indian children by that Department, are the amounts allotted to them by the Commissioner according to their respective needs from the sums appropriated for the purposes of Title I of the Act.

(PARAGRAPH (e) AMENDED NOVEMBER 28, 1968, 33 F.R. 17798)

(e) The maximum grant for which a State agency directly responsible for providing free public education for handicapped children, or for children in institutions for neglected or delinquent children is eligible will be determined by multiplying the number of children in average daily attendance, and receiving free education at schools for such children which are operated or supported by that State agency by the Federal percentage prescribed in § 116.1(l) of the average per pupil expenditure in that State or, beginning with fiscal year 1968 in the case of handicapped children and beginning with fiscal year 1969 in the case of children in institutions for neglected or delinquent children, in the United States, if higher. The provisions of this paragraph (e) do not apply to Puerto Rico, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands.

(PARAGRAPH (f) AMENDED NOVEMBER 28, 1968, 33 F.R. 17788)

(f) The maximum grant for which a State educational agency in a State of the Union or the District of Columbia is eligible for establishing or improving programs for migratory children of migratory agricultural workers is the sum of the estimated number of such migratory children aged 5 to 17, inclusive, who reside in the State full time and the full time equivalent of the estimated number of such migratory children aged 5 to 17, inclusive, who reside in the State part time, multiplied by the Federal percentage of the average per pupil expenditure in the States of the Union and the District of Columbia or, beginning with fiscal year 1969, in that State, if greater. The estimate of the number of such migratory children will be derived by the Commissioner from the best data available to him of the number of intrastate migratory workers, and of the average number of interstate migratory workers, in the several States of the Union and the District of Columbia.

§ 116.4 Allocation of county aggregate maximum grants by State educational agencies.

(a) To the extent that a county aggregate maximum grant is based on children aged 5 to 17, inclusive, living in institutions for neglected or delinquent children, the county aggregate maximum grant shall be allocated among those local educational agencies in whose districts those institutions are located on the basis of the number of such children living in those institutions.

(b) The remainder of the county aggregate maximum grant shall be allocated by the State educational agency among the several local educational agencies whose school districts lie within the county as provided in paragraphs (c) and (d) on the basis of those available data which it deems best to reflect the current distribution in the county of children aged 5 to 17, inclusive, from low-income families, including families receiving payments under the program of aid to families with dependent children under a State plan approved under Title IV of the Social Security Act, without regard to the amount of such payments, and children in foster homes.

(c) If the State educational agency has available data showing the distribution among the several school districts in the county of the children aged 5 to 17, inclusive, from families receiving any aid for dependent children and if it deems that such data reflect the current distribution in the county of all children aged 5 to 17, inclusive, from low-income families and in foster homes, then the allocation among local educational agencies of such remainder of the county

aggregate maximum grant shall be made solely on the basis of such data.

(d) If the available data referred to in paragraph (c) of this section are not deemed to reflect the current distribution in a county of all children aged 5 to 17, inclusive, from low-income families and in foster homes, then the State educational agency may combine those data with other available data on such weighted basis as it deems appropriate and best to reflect the current distribution in the county of such children or use such other method as it deems appropriate for that purpose.

(e) If the total allocation to a local educational agency as otherwise computed pursuant to this section would be less than an entitlement to a grant computed on the basis of 10 children, that local educational agency may be disregarded in the allocation of a county aggregate maximum grant among the local educational agencies in that county.

(f) If the allocation of entitlement to a maximum grant to a local educational agency as otherwise computed pursuant to this section would, without regard to any pro rata reduction, reduce the entitlement of that agency to an amount which is less than its maximum grant for the previous year, the State educational agency may modify that allocation of entitlement to a maximum grant to the extent necessary to make an orderly adjustment in the program of the local educational agency.

§ 116.5 Local educational agencies in more than one county.

The allocation to a local educational agency pursuant to § 116.4 shall be made separately for each county in which a part of the school district served by that local educational agency is located. The maximum grant for such a local educational agency shall be the sum of its allocations from county aggregate maximum grants.

§ 116.6 Local educational agencies with overlapping jurisdictions or serving children from another school district.

In any case in which two or more local educational agencies (other than State agencies directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) have responsibility for different groups of children in a district, or serve school districts which overlap, or in any case in which a local educational agency provides free public education for a substantial number of children residing in the school district of another local educational agency, the State educational agency may allocate the amount of the maximum grants among such local educational agencies in such manner as it determines will best carry out the purposes for which the grants under Title I of the Act are respectively made available.

§ 116.7 Changes in local educational agencies.

(a) In any case in which there is a merger or consolidation of local educational agencies during the school year, the maximum grant which each was eligible to receive shall become available to the surviving or consolidated agency. The surviving or consolidated agency shall be responsible for projects previously approved for each of the agencies participating in the merger or consolidation.

(b) In any case in which the geographical area of a school district served by a local educational agency is diminished, or divided with another local educational agency, during the school year, the State educational agency shall redetermine the maximum grants by using the same method used in making the original determination. However, nothing herein shall preclude the completion, where appropriate, of previously approved projects by the agency originally submitting the projects by itself or through a cooperative undertaking.

(SECTION 116.8 AMENDED NOVEMBER 28, 1968, 33 F.R. 17788)

§ 116.8 Special incentive grants.

(a) A State educational agency of a State of the Union or the District of Columbia is eligible for a special incentive grant for fiscal year 1969 and fiscal years thereafter if that State's effort index for the preceding fiscal year exceeds the national effort index for that year.

(b) The amount of the special incentive grant to which an eligible State educational agency is entitled will be determined by multiplying the amount of $1 for each 0.01 percent by which that State's effort index for the preceding fiscal year exceeds the national effort index for that preceding fiscal year by the aggregate number of children counted for purposes of entitling local educational agencies within that State to grants in accordance with paragraphs (a), (e), and (f) of § 116.3. If the sum of the amounts for all eligible States exceed the amount appropriated for special incentive grants for any fiscal year, such amounts shall be ratably reduced. No State educational agency

shall receive in any year more than 15 percent of the total amount appropriated for special incentive grants for that year.

(c) Special incentive grants may be made available to local educational agencies upon application to the State educational agency. Grants shall be distributed to local educational agencies which have the greatest need for additional funds for approvable Title I projects. All other sections of this part, except those applying to the distribution of funds, shall apply to the use of special incentive grants.

(d) The availability of special incentive grants to a State shall not affect the eligibility of the State educational agency for funds for administration and for technical assistance to local educational agencies with respect to the measurement of educational achievement and evaluation of programs called for by § 116.22.

§ 116.9 Ratable reductions and reallotments.

(PARAGRAPH (a) AMENDED NOVEMBER 28, 1968, 33, F.R. 17788

(a) If the sums appropriated for any fiscal year are not sufficient to pay in full the amounts which all local and State educational agencies and the Department of the Interior are eligible to receive under Title I of the Act for that year, the amounts available to State and local educational agencies (other than those in Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands) will, subject to such limitations as may be applied by statute to funds appropriated under Title I of the Act, be ratably reduced, except that the amounts made available to State educational agencies for administration and technical assistance with respect to the measurement of educational. achievement and evaluation of projects will not be reduced below $150,000. Inasmuch as the amounts available for allotment among Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Department of the Interior for grants and payments are, in the first instance, based on the sums appropriated, such amounts are not subject to pro-rata reduction under this paragraph.

(PARAGRAPH (b) AMENDED NOVEMBER 28, 1968, 33, F.R. 17788

(b) The Commissioner may set dates by which State educational agencies (other than those in Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands) must certify to him the amounts for which applications of State and local educational agencies (including State agencies directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) have been or will, during that fiscal year, be approved by such agencies and by which such State educational agencies must file applications with the Commissioner for establishing or improving programs for migratory children of migratory agricultural workers. Subject to such limitations as may be applied by statute to funds appropriated under Title I of the Act, the excess of the amounts made available to such State and local educational agencies in accordance with paragraph (a) of this section over the amounts which the State educational agency determines such agencies will use (including amounts necessary to fund such special arrangements as may be made by the Commissioner for education of migratory children of migratory agricultural workers) shall be made available, first by State educational agencies to other educational agencies in the particular State but not to make available to an agency more than the maximum basic grant to which that agency is entitled. The amounts made available under this paragraph for distribution within a State shall be distributed among the State and local educational agencies which apply for additional funds and which have the greatest needs to redress inequities inherent in, or mitigating hardships caused by, the application of the provisions of §§ 116.3 and 116.4. The needs of the State and local educational agencies, and the amounts to which they shall be eligible, shall be determined on the basis of the extent to which the State educational agency determines the application of those provisions fail, as a result of population shifts, changing economic conditions, or other reasons, to reflect actual needs. In the event excess amounts are still available after applying the foregoing provisions of this paragraph, those excess amounts will be distributed by the Commissioner among other States of the Union or the District of Columbia in accordance with their needs as determined by the Commissioner for use by local educational agencies having the greatest need therefor. In no event, however, will the total amount made available to an agency exceed the maximum basic grant to which that agency is entitled.

(c) The Commissioner may set dates

by which State educational agencies in Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands must certify to him the amounts for which applications have been or will, during that fiscal year, be approved by such agencies, and by which the Department of the Interior will report to the Commissioner the amount needed by that Department for Title I projects. The excess of the amounts made available to any of such agencies or the Department of the Interior over the amounts which the Commissioner determines are needed by them will be redistributed among other such agencies and the Department of the Interior according to their respective needs for such amounts as redetermined by the Commissioner at that time.

(PARAGRAPH (d) AMENDED NOVEMBER 28, 1968, 33 F.R. 17788)

(d) In the event that additional funds are made available for making payments under Title I of the Act for that year, such additional funds will be applied to increase ratably the amounts available under paragraphs (a) and (b) of this section to State and local educational agencies in States other than Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands and, to the extent called for by the Act appropriating such additional funds, the amounts available for allotment for grants and payments among the Department of the Interior and, together with appropriate additional amounts for administration and technical assistance, Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands. The amounts available to State educational agencies for administration and technical assistance will be ratably increased pursuant to this paragraph only to the extent that the amounts made available for grants, in the case of Puerto Rico, Guam, Wake Island, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands, are increased above $2,500,000 or in the case of any other State, above $15 million. In no event, however, will the total amount made available to an agency exceed the maximum grant to which that agency is entitled.

§§ 116.10–116.15 [Reserved]

Subpart C—Project Applications

§ 116.16 Project applications.

(a) Grants under Title I of the Act to a local educational agency (including a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) will be made on the basis of applications therefor which are submitted to the State educational agency and approved by it in an aggregate amount not in excess of the amount of the funds made available for that local educational agency.

(b) Grants under Title I of the Act to a State educational agency for establishing or improving programs for migratory children of migratory agricultural workers will be made on the basis of applications therefor which are submitted to the Commissioner and approved by him. Such a grant will not exceed the amount of the funds made available by the Commissioner for that State educational agency after setting aside such amounts as are necessary for carrying out special arrangements with other public or nonprofit private agencies for conducting educational programs for migratory children of migratory agricultural workers when the Commissioner determines that a State is unable or unwilling to conduct such educational programs or that such special arrangements will result in more efficient and economic administration of educational programs for such children or that they will add to the welfare or educational achievement of such children.

(c) Payments under Title I of the Act to the Department of the Interior for a program to meet the special educational needs of educationally deprived children on reservations serviced by elementary and secondary schools operated for Indian children by that Department will be made on the basis of an application submitted by that Department to the Commissioner and approved by him.

(d) Subject to the reallotment authority in § 116.9, no State or local educational agency may assign any part of its eligibility to another agency. This does not, however, prevent a State educational agency from exercising its authority under § 116.6 nor prevent two or more applicants in one or more States from conducting a joint program or project (including a planning project) through a combined use of funds made available to them.

§ 116.17 Project covered by an application.

(a) An application for a grant under Title I of the Act by a local educational agency (other than a State agency directly responsible for providing free public education for handicapped children or for children in institutions for ne-

glected or delinquent children) shall set forth a project for educationally deprived children residing in a project area composed of school attendance areas having high concentrations of children from low-income families or a project for serving children living in institutions for neglected or delinquent children, which project shall have been designed specifically to meet special educational needs of those educationally deprived children. The project itself shall be carried out at locations where the needs of the educationally deprived children can best be served. It may involve the participation of educationally deprived children residing outside the project area if such a participation will not dilute the effectiveness of the project with respect to children residing in the project area.

(b) A State or local educational agency (including a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) may apply for a grant in an amount not exceeding one percent of the maximum grant it is eligible to receive or $2,000, whichever is greater, for planning during the current fiscal year which was, or will be, directly related to programs or projects to be carried out under Title I of the Act and has resulted, or is reasonably likely to result, in a program which will be carried out, if funds are necessary for that purpose because of the innovative nature of the program or project or because the local educational agency lacks the resources necessary for adequate planning.

(c) Each application for a grant under Title I of the Act by such a local educational agency, other than an application for a grant for planning, shall designate the project area or the institution or special school for which the project is designed. A project area may include one or more attendance areas having high concentrations of children from low-income families, but the project area must be sufficiently restricted in size in relation to the nature of the project as to avoid jeopardizing its effectiveness in meeting the aims and objectives of the project. Each such application shall describe the special educational needs identified with educationally deprived children residing in the project area at which the project is directed. Each local educational agency shall design its projects in such a manner, and apply them to such school attendance areas having high concentrations of children from low-income families, as will best meet the special educational needs of the educationally deprived children.

(d) A school attendance area for either a public elementary or a public secondary school may be designated as a project area if the estimated percentage of children from low-income families residing in that attendance area is as high as the percentage of such children residing in the whole of the school district, or if the estimated number of children from low-income families residing in that attendance area is as large as the average number of such children residing in the several school attendance areas in the school district. In certain cases, the whole of a school district may be regarded as an area having a high concentration of such children and be approved as a project area, but only if there are no wide variances in the concentrations of such children among the several school attendance areas in the school district.

(e) In the case of such a project undertaken jointly by two or more such local educational agencies, the project area with respect to each school district must be one that qualifies as a project area under paragraph (d) of this section. However, the whole of the project area must be considered in determining whether it is sufficiently restricted in size in relation to the nature of the project as to maintain its effectiveness in meeting the aims and objectives of the project.

(f) The project for which an application for a grant is made by a local educational agency should be designed to meet the special educational needs of those educationally deprived children who have the greatest need for assistance. However, none of the educationally deprived children who are in need of the special educational services to be provided shall be denied the opportunity to participate in the project on the ground that they are not children from low-income families or on the ground that they are not attending school at the time.

(g) Each such project must be tailored to contribute particularly toward meeting one or more of the special educational needs of educationally deprived children and should not be designed merely to meet the needs of schools or of the student body at large in a school or in a specified grade in a school.

(PARAGRAPH (h) REVISED NOVEMBER 28, 1968, 33, F.R. 17789)

(h) Each application for a grant under Title I of the Act for educationally deprived children residing in a project

area shall contain an assurance that the use of the grant funds will not result in a decrease in the use for educationally deprived children residing in that project area of State or local funds which, in the absence of funds under Title I of the Act, would be made available for that project area and that neither the project area nor the educationally deprived children residing therein will otherwise be penalized in the application of State and local funds because of such a use of funds under Title I of the Act. For the purposes of this paragraph, the failure to use State or local funds to provide to a project area or to children residing therein services comparable to those services which have been, or are to be, generally provided to other areas or children will be deemed to constitute a penalization of that project area or of those children. No project under Title I of the Act will be deemed to have been designed to meet the special educational needs of educationally deprived children unless the funds made available for that project are to be used to supplement, and not supplant, State or local funds.

(i) No application for a project grant under Title I of the Act may cover the construction of school facilities unless such construction is demonstrated as being essential in order to assure the success of a program or project under Title I of the Act. If the construction of school facilities is so demonstrated as being essential for a program or project, the application must nevertheless comply with other requirements of Title I of the Act and the regulations in this part, such as the requirements in § 116.21 in regard to labor standards and overall State construction planning and, in relation to the overall program, the requirements in § 116.19 in regard to participation by children enrolled in private schools.

(j) A project by a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children may include the acquisition of equipment and, in the case of schools owned by that State or a public agency of that State, the construction of school facilities. Each project of such a State agency shall be designed to meet the special educational needs of children attending schools operated or supported by that State agency.

(PARAGRAPH (k) REVISED NOVEMBER 28, 1968, 33, F.R. 17789)

(k) An application by a State educational agency to the Commissioner for a grant under Title I of the Act for the education of migratory children of migratory agricultural workers shall describe a program designed to meet the special educational needs of such migratory children. The application shall describe the individual projects that are contemplated and identify the local educational agencies, if any, through which the projects will be carried out, which application shall be in sufficient detail to enable the Commissioner to determine whether he will exercise his authority to make special arrangements pursuant to section 105(c)(2) in Title I of the Act. Within the total of the grants made available for the program, the program covered by an approved application may, without altering the essential nature of the program, be modified from time to time to reflect changing conditions. The State educational agency shall notify the Commissioner of any such modifications.

(l) An application by the Department of the Interior to the Commissioner for payments to meet the special educational needs of educationally deprived children on reservations serviced by elementary and secondary schools operated for Indian children by that Department shall describe a program or individual projects designed to meet the special educational needs of educationally deprived children who attend such schools or who are eligible to attend such schools or to participate in preschool programs of that Department. The program shall include a provision for grants to local educational agencies with respect to out-of-State Indian children in the elementary or secondary schools of such agencies under special contracts with the Department of the Interior, which grants shall not exceed, for each such child one-half the average per pupil expenditure in the State in which the agency is located. The application shall describe the overall program under Title I of the Act of the Department of the Interior which will administer the program to Indian children on the basis of its determination of their special educational needs. An application by the Department of the Interior will be approved by the Commissioner upon his determination that the program in that application complies with the applicable requirements of Title I of the Act and the regulations in this part. Individual projects to carry out the approved program of the Department of the Interior will be implemented by that Department in a manner consistent with such requirements. The Department of the Interior will advise the Commissioner

as to the manner the Department's program is being implemented, including a description of each individual project.

(PARAGRAPH (m) ADDED NOVEMBER 28, 1968, 33, F.R. 17789)

(m) An application for a project which involves the use of education aides shall include evidence that the local educational agency has provided, or will provide, a coordinated program for the joint training of the aides and the professional staff whom they will assist.

§ 116.18 Size, scope, and quality of projects.

(a) Each application by a State or local educational agency for a grant (other than one for a planning project) must propose projects of sufficient size, scope and quality as to give reasonable promise of substantial progress toward meeting the needs of educationally deprived children for whom the projects are intended. The program of a local educational agency must involve the expenditure of at least $2,500 or such lesser amount as may be set by the State educational agency upon its determination that it would be impossible, for such reasons such as distance or difficulty of travel, for the applicant to join effectively with other local educational agencies for the purpose of meeting that dollar requirement. The budget for a project shall avoid imprudent, extravagant or wasteful expenditures which would tend to defeat the intent of the Act to meet the special educational needs of educationally deprived children. The project application must justify any proposed expenditures above the level of expenditures by the applicant for other comparable activities.

(b) Each application for a grant (other than one for a planning project) or for payments to the Department of the Interior shall provide an assessment of the special educational needs of the educationally deprived children who would be eligible to receive benefits under Title I of the Act or incorporate by reference the assessment contained in a prior application. Each such application for a grant shall describe the objectives of the project in relation to those special educational needs. It must demonstrate that the project has been sufficiently well planned to meet those objectives and that the project makes adequate provision for its implementation in an effective manner.

(c) A joint application may be made by two or more eligible educational agencies for grants to each for a single project (including a planning project) to be carried out jointly or through other arrangements between or among such educational agencies.

(d) The program of a local educational agency entitled to funds under Title I of the Act on the basis of children living in institutions for neglected or delinquent children shall provide for the special educational needs of such children.

(e) Applications for grants (other than those for planning projects) or payments are to be concentrated on a limited number of projects and applied to a limited number of educationally deprived children so as to give reasonable promise of promoting to a marked degree improvement in the educational attainment, motivation, behavior or attitudes of children.

(PARAGRAPH (f) ADDED NOVEMBER 28, 1968, 33, F.R. 17789)

(f) Each local educational agency shall provide for the maximum practical involvement of parents of educationally deprived children in the area to be served in the planning, development, operation, and appraisal of projects, including their representation on advisory committees which may be established for the local Title I program.

§ 116.19 Participation by children enrolled in private schools.

(a) Each local education agency shall provide special educational services designed to meet the special educational needs of educationally deprived children residing in its district who are enrolled in private schools. Such educationally deprived children shall be provided genuine opportunities to participate therein consistent with the number of such educationally deprived children and the nature and extent of their educational deprivation. The special educational services shall be provided through such arrangements as dual enrollment, educational radio and television, and mobile educational services and equipment. Such opportunities shall be made available to those educationally deprived children who reside in the public school attendance area designated as the project area or in a geographical area reasonably coterminous with the project area. If it is not practicable to apply a project to children enrolled in private schools because they are enrolled in a private school located in another school district, the applicant may make arrangements for such children with the local educational agency serving such other school district, including where appropriate the making of a joint project application.

(b) The needs of educationally deprived children enrolled in private

schools, the number of such children who will participate in the program and the types of special educational services to be provided for them, shall be determined, after consultation with persons knowledgeable of the needs of these private school children, on a basis comparable to that used in providing for the participation in the program by educationally deprived children enrolled in public schools.

(c) The opportunities for participation by educationally deprived children in private schools in the program of a local educational agency under Title I of the Act shall be provided through projects of the local educational agency which furnish special educational services that meet the special educational needs of such educationally deprived children rather than the needs of the student body at large or of children in a specified grade. The application for each project shall show the number of educationally deprived children enrolled in private schools who are expected to participate therein and the degree and manner of their expected participation.

(d) Any project to be carried out in public facilities and involving a joint participation of children enrolled in private schools and children enrolled in public schools shall include such provisions as are necessary to avoid classes which are separated by school enrollment or religious affiliation of the children.

(e) Public school personnel may be made available on other than public school facilities only to the extent necessary to provide special services (such as therapeutic, remedial, or welfare services, broadened health services, school breakfasts for poor children, and guidance and counseling services) for those educationally deprived children for whose needs such special services were designed and only when such services are not normally provided by the private school. The application for a project including such special services shall provide assurance that the applicant will maintain administrative direction and control over those services. Subject to the provisions of § 116.20, mobile or portable equipment may be used on private school premises for such period of time within the life of the current project for which the equipment is intended to be used as is necessary for the successful participation in that project by educationally deprived children enrolled in private schools. Provisions for special educational services for educationally deprived children enrolled in private schools shall not include the paying of salaries for teachers or other employees of private schools, except for services performed outside their regular hours of duty and under public supervision and control, nor shall they include the using of equipment other than mobile or portable equipment, on private school premises or the constructing of private school facilities.

(f) In the event that the special educational needs of the educationally deprived Indian children attending private schools on a reservation cannot be met by the appropriate local educational agency because of the remote location of those schools, the Department of the Interior shall design its program to meet the special educational needs of such educationally deprived Indian children through appropriate arrangements that provide genuine opportunities for participation by such educationally deprived Indian children which are consistent with the number of such children and the nature and extent of their educational deprivation.

(g) The foregoing provisions of this section, other than those relating to the construction of private school facilities, do not apply to the use of funds granted to a State agency because of its direct responsibility for providing free public education for handicapped children or for children in institutions for neglected or delinquent children.

§ 116.20 Title to property and control over funds.

(a) Control over the use of funds provided under Title I of the Act, and title to and administrative control over property acquired with such funds, shall be in a public agency, which will exercise such control. Such funds and property shall be used for the purposes provided in Title I of the Act, but such a use shall not inure to the benefit of any private school. The incidental use of such property for other purposes is permitted only for related educational purposes on public premises and only so long as such a use does not interfere with the carrying out of a Title I project.

(b) Equipment acquired with funds provided under Title I of the Act may, in certain cases, be placed on private school premises for a limited period of time, but the title to and administrative control over such equipment must be retained and exercised by a public agency. In exercising that administrative control, the public agency shall not only keep records of, and account for, the equipment but shall also assure itself that the equipment is being used solely for the purposes of the project, and remove the equipment from the private school premises when necessary to avoid its being

used for other purposes or when it is no longer needed for the purposes of the project.

(c) The application by a local educational agency must contain a satisfactory assurance that the funds provided under Title I of the Act, and property derived therefrom, will at all times be under the control of, and be administered by, a public agency in accordance with the provisions of the Act and the regulations in this part.

§ 116.21 Requirements with respect to construction.

(a) In a case of a project involving the construction of school facilities, the application for a grant shall provide assurances that all laborers and mechanics employed by contractors or subcontractors on such construction will be paid wages at rates not less than those determined by the Secretary of Labor to be prevailing on similar construction in the locality in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5); that such contractors and subcontractors will comply with the regulations in 29 CFR Part 3 (see 29 F.R. 97), and include all clauses required by 29 CFR 5.5 (a) and (c) (see 29 F.R. 100, 101, 13463, and 29 CFR Part 3, Subpart B—Interpretation of the fringe benefits provisions of the Davis-Bacon Act—published at 29 F.R. 13465); and that the nondiscrimination clause prescribed by Executive Order No. 11246 of September 24, 1965 (30 F.R. 12319), will be incorporated in any contract for construction work, or modification thereof, as defined in said Executive Order.

(b) In developing plans for the construction of school facilities, the applicant agency shall give due consideration to excellence of architecture and design and to the inclusion of works of art, for which funds under Title I of the Act will be available in an amount not in excess of 1 percent of the cost of such construction including the providing of works of art. In any event, the construction must be functional, must be undertaken in an economical manner, and must not be elaborate in design or extravagant in the use of materials.

(c) The State educational agency shall not approve a project involving the construction of school facilities unless it determines that the construction is consistent with overall State plans for construction. It shall not approve such a project involving construction, other than minor remodeling, altering or improving of school facilities, unless the approval is conditioned upon approval of the construction plans and specifications by the State educational agency, and further conditioned upon the award of a construction contract on or before a date specified in the project application as providing a reasonable period of time taking into consideration the nature of the program or project to be served by the construction of the school facilities and the magnitude of the construction to be undertaken, which date shall in no event be later than June 30 of the following fiscal year. Such plans and specifications shall be approved only after due consideration has been given, to the extent appropriate in view of the uses to be made of the facilities, of the accessibility of the facilities to, and the usability of them by, handicapped persons, and of their compliance with the minimum standards contained in "American Standard Specifications for Making Buildings and Facilities Accessible to, and Usable by the Physically Handicapped" approved by the American Standard Association, Inc., with appropriate usable segments of "Building Standards of the University of Illinois Rehabilitation Center" and "Occupancy Guide-Department of Veterans Benefits, Regional Offices, Veterans Administration," and with such other standards in that regard as the Secretary of Health, Education, and Welfare may prescribe or approve.

(d) In the planning of the construction of school facilities involving the use of funds under Title I of the Act, each State and local educational agency shall, in accordance with the provisions of Executive Order No. 11296 of August 10, 1966 (31 F.R. 10663), and such rules and regulations as may be issued by the Department of Health, Education, and Welfare to carry out those provisions, evaluate flood hazards in connection with such school facilities, and as far as practicable, avoid the uneconomic, hazardous, or unnecessary use of flood plains in connection with such construction.

(e) All contracts for construction (as defined in § 116.1(f)) shall be awarded to the lowest qualified bidder on the basis of open competitive bidding except that, if one or more items of construction are covered by an established alternative procedure, consistent with State and local laws and regulations, which is approved by the State agency as designed to assure construction in an economical manner consistent with sound business practice, such alternative procedure may be followed.

(PARAGRAPH (f) ADDED NOVEMBER 28, 1968, 33, F.R. 17739)

(f) The State educational agency shall

not approve a project involving construction of school facilities if it finds that such construction would lead to, or would tend to maintain, the cultural or linguistic isolation of children.

§ 116.22 Provision for measurement of educational achievement and evaluation of programs.

(a) Each application by a State or local educational agency or by the Department of the Interior shall describe the procedures and techniques to be utilized in making at least annually an evaluation of the effectiveness of its program under Title I of the Act in meeting the special educational needs of educationally deprived children, including appropriate objective measurements of educational achievement.

(b) The measurement of educational achievement under such a program shall include the measuring or estimating of educational deprivation of those children who will participate in the program and the comparing, at least annually, of the educational achievement of participating children with some objective standard or norm. The type of measurement used by a local educational agency should give particular regard to the requirement that the State educational agency report to the Commissioner on the effectiveness of the programs in that State in improving the educational achievement of educationally deprived children.

(c) The evaluation of programs and projects should, consistent with the nature and extent of participation by children enrolled in private schools, be extended to such participation.

§ 116.23 Reports by local educational agencies.

Each application by a local educational agency (including a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) shall provide assurance that it will render to the State educational agency an annual report and such other reports, in such form, and containing such information, as may be reasonably necessary to enable the State educational agency to perform its duties under Title I of the Act, including the measurements of educational achievement and program effectiveness required by § 116.22. The local educational agency shall keep such program and fiscal records, and afford such access thereto, as the State educational agency may find necessary to assure the correctness and verification of such reports and the expenditure of funds granted under Title I of the Act.

§ 116.24 Relation to other programs.

(a) Each application for a grant under Title I of the Act shall demonstrate that, in the development of the program or project, the applicant has taken into consideration those benefits that are or may be made available for the affected children through various agencies of the Federal Government, as well as through State and local agencies and private nonprofit organizations, and has coordinated the program or project with programs available through such agencies or organizations, including community action programs under Title II (42 U.S.C. 2781–2831) of the Economic Opportunity Act of 1964 and shall further demonstrate that there will be similar coordination in the operation of the program or project. The purpose of the foregoing is to avoid a duplication of benefits and to assure the most effective use of funds under Title I of the Act toward meeting the special educational needs of educationally deprived children.

(b) Each application by a State educational agency for a grant to establish or improve programs of education for migratory children of migratory agricultural workers shall demonstrate that in planning the program and the projects comprising that program there has been, and in carrying out such program and projects there will be, appropriate coordination with programs administered under Part B of Title III (42 U.S.C. 2861) of the Economic Opportunity Act of 1964. Each such application shall also describe the manner in which the program and projects are coordinated with similar programs and projects in other States, including the transmittal of pertinent information with respect to school records of such migratory children.

(c) In the coordination with other programs the commingling of funds under Title I of the Act with funds under such other programs is not authorized, but the simultaneous use of funds under each of those programs to finance identifiable portions of a single project is permitted.

(d) The application by the Department of the Interior for payment to meet the special educational needs of educationally deprived children on reservations serviced by elementary and secondary schools operated for Indian children shall contain an assurance that the program and projects have been developed in cooperation with appropriate Indian representatives and community action agencies and that the program and projects will be coordinated

with appropriate Federal, State, and local authorities and private nonprofit organizations.

§ 116.25 Dissemination and utilization of results of educational research and demonstrations.

(a) Each application by a State or local educational agency for a grant, or by the Department of the Interior for a payment, shall describe the methods to be used by the applicant for reviewing, selecting, and disseminating to teachers and educational administrators significant information on the latest developments and most recent experiments in education so that such information will be available for use in program planning and operation. The provisions in that regard may include, among other things, in-service education, the use of professional librarians on library informational systems, professional workshops and seminar consultations and visitations, and reports on the organization, operation and outcome of projects under Title I of the Act.

(b) Promising educational practices developed through projects of the applicant, or through information disseminated to it by other applicants, shall be considered for, and to the extent deemed appropriate and not in violation of the assurance called for by paragraph (h) of § 116.17, may be adopted in, all of the schools of the applicant through the use of available funds other than those under Title I of the Act.

§§ 116.26–116.30 [Reserved]

Subpart D—Duties and Functions of State Educational Agencies

§ 116.31 Participation by States.

(a) Any State desiring to participate in the grant programs under Title I of the Act shall, through its State educational agency, submit to the Commissioner an application for such a participation. Each State educational agency seeking a grant for establishing or improving programs of education for migratory children of migratory agricultural workers shall submit a separate application for such a grant to the Commissioner pursuant to § 116.17(k).

(b) Each application by a State educational agency shall provide the official name of the agency responsible for carrying out the functions of a State educational agency under Title I of the Act.

(c) The application for participation by the State in the grant program shall contain an assurance of the State educational agency that each application by a local educational agency (including a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) approved by the State educational agency will comply with the requirements of Title I of the Act and the regulations in subpart C of this part, that the State educational agency will require each such local educational agency to carry out all assurances given by it in, and to perform all obligations imposed on it in connection with, its approved applications for grants, and that the State educational agency will in all other respects comply with the requirements imposed on it by Title I of the Act and the regulations in this part.

(d) The application for participation by the State in the grant program shall contain an assurance that fiscal control and fund accounting procedures will be adopted to assure the proper disbursement of, and accounting for, Title I funds paid to the State, including such sums as may be paid to State and local educational agencies with respect to approved projects.

(e) The State educational agency shall designate the officer who will receive and have custody of funds granted to the State under Title I of the Act, who will pay to State and local educational agencies the amounts distributed to them, who will receive the repayments by State and local educational agencies of such portion of the funds paid to them as remain unexpended at the close of the period for which they were made available for expenditure, and who will pay out the amounts expended by the State educational agency for the performance of those duties which are imposed on it pursuant to Title I of the Act and the regulations in this part.

(f) Each application by a State educational agency shall contain an assurance that it will make periodic reports to the Commissioner evaluating the effectiveness of the programs and projects of State and local educational agencies, and the use by such educational agencies of grants under Title I of the Act, in improving the educational attainment of educationally deprived children. Such reports shall include the results of objective measurements of educational achievement under the programs of the several participating educational agencies with particular reference to progress made toward meeting the special educational needs of educationally deprived children.

(g) Each application by a State educational agency shall contain an assurance that it will make such other reports to the Commissioner as he may reason-

ably require from time to time to enable him to perform his duties under Title I of the Act. Such reports shall include a disclosure of any allegations of substance which may be made by local educational agencies or private individuals or organizations of actions by State or local educational agencies contrary to the provisions of Title I of the Act or the regulations in this part, a summary of the result of any investigations made or hearings held with respect to those allegations, and a statement of the disposition by the State educational agency of those allegations. It is recognized that the responsibility with respect to the resolution of such matters rests, in the first instance, in the State educational agency.

(h) Each application by a State educational agency shall contain an assurance that it will keep such records, and afford the Commissioner such access thereto, as he may find necessary to assure the correctness of the reports required to be made and the adequacy of the fiscal control over and the accounting for Title I funds paid to the States.

§ 116.32 Certificate of State attorney general.

The application for participation by a State in the grant program under Title I of the Act, and each application for a grant to establish or improve programs of education for migratory children of migratory agricultural workers, shall include a certificate by the State attorney general or other appropriate State legal officer to the effect that the agency submitting the application has the authority under State law to perform the duties and functions of a State educational agency under Title I of the Act and the regulations in this part, including those arising from the assurances given in the application.

§ 116.33 Allocation to local educational agencies.

(a) In those instances in which the determination of the Commissioner with respect to the maximum amount of grants relates only to county aggregate maximum grants, the State educational agency shall allocate such county aggregate maximum grants among the local educational agencies within the counties on the basis of such criteria as the State educational agency may apply in accordance with § 116.4 and § 116.6.

(b) The State educational agency shall promptly advise the Commissioner of its allocations of county aggregate maximum grants among the several local educational agencies in each county and the criteria on which such allocations were based.

(PARAGRAPH (c) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(c) The State educational agency shall advise the Commissioner of the amounts needed to fund those applications by local educational agencies for grants which are approved by the State educational agency, together with appropriate information concerning each of the projects covered by such applications, and of the additional amount not in excess of (1) one percent of the maximum grants to State and local educational agencies of the State as adjusted pursuant to § 116.9 or (2) $150,000 (or $25,000 in the case of Puerto Rico, Wake Island, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands), whichever is greater, which is required by the State educational agency for administration and for technical assistance to local educational agencies with respect to the measurement of educational achievement and evaluation of programs called for by § 116.22.

§ 116.34 Approval of applications from local educational agencies.

(a) The State educational agency shall review all applications by local educational agencies (including State agencies directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) in the State for grants under Title I of the Act to determine whether such applications meet the requirements of the Act and the regulations in subpart C of this part. The State educational agency shall not approve such an application unless it determines that the application does effectively meet the requirements of the Act and the regulations in subpart C of this part and that the State educational agency is able to give the Commissioner the assurances with respect to that application which are required by the regulations in this subpart. The State educational agency shall not approve an application by a local educational agency which, together with other approved applications by that agency, exceeds the amount available for grants to that agency.

(b) The State educational agency may approve an application in part or for less funds than is called for by the application only if such an approval does not have the effect of altering the proj-

ect to such an extent that it no longer provides reasonable promise of substantial progress toward meeting the special educational needs of educationally deprived children.

(c) The State educational agency shall not finally disapprove any application in whole or in part without first affording the local educational agency submitting the application reasonable notice and opportunity for a hearing with respect to such action.

(d) The terms and provisions of each approved project shall be made available, by the State educational agency, and by the affected local educational agency or agencies, for public inspection.

§§ 116.35–116.40 [Reserved]

Subpart E—Payments

§ 116.41 Payments to States.

(a) The maximum amount of all payments which may be made to a State for grants under Title I of the Act is the aggregate of the maximum eligibilities of all State and local educational agencies of the State for grants and the maximum eligibility of the State educational agency for administration and technical assistance with respect to the measurement of educational achievement and evaluation of projects, as that aggregate is adjusted pursuant to § 116.9.

(b) The Commissioner will, during the fiscal year, pay to each State an amount which is equal to the aggregate amount for which projects of State and local educational agencies are approved by the State educational agency or by the Commissioner, plus such amount as the State educational agency is entitled to and expends for such administration and technical assistance. The Commissioner may make advances to each State submitting an application for participation in the program under Title I of the Act and requesting such an advance.

(c) Until such time as the Commissioner has finally determined the maximum eligibilities for grants of all State and local educational agencies in all the States, he will make a tentative ratable reduction in the amounts payable to States and will further limit such amounts in order for him to be in a position to make such final ratable reductions as may be necessitated by the amount of the available appropriations.

(d) Each local educational agency receiving a distribution of grants for approved programs and projects shall, at the end of the period for which expenditures of such grants are authorized, release to the State educational agency any unexpended balances of such grants. The State educational agency shall report to the Commissioner the amount of such unexpended balances as well as the unexpended balances of grants to the State educational agency for such administration and technical assistance, and all such unexpended balances shall be taken into account by the Commissioner in making payments to the State thereafter.

§ 116.42 Obligation of Federal appropriations.

(PARAGRAPHS (a) AND (b) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(a) The notification by the Commissioner to State educational agencies and the Department of the Interior of the amounts made available for approval by those agencies and the Department of the Interior will be regarded as obligating the Government of the United States in the amounts specified. Federal appropriations so obligated will remain available for use as prescribed in § 116.46.

(b) The notification by the Commissioner to State educational agencies of the amounts available to those agencies for administration and technical assistance with respect to the measurement of educational achievement and evaluation of programs in accordance with the provisions of section 107(b) in Title I of the Act will be regarded as obligating the Government of the United States. Federal appropriations so obligated will remain available for use as prescribed in § 116.46.

(c) The approval by the Commissioner of applications by State educational agencies for establishing or improving programs of education for children of migratory agricultural workers will be regarded as obligating the Government of the United States for the amounts approved for such projects. Federal appropriations so obligated will remain available for use by such State educational agencies as prescribed in § 116.46.

§ 116.43 Distributions to State or local educational agencies.

(a) Subject to the provisions of § 116.45, the State educational agency in each State participating in the program under Title I of the Act shall distribute to eligible State and local educational agencies the sums made available to the State educational agency by the Commissioner for the programs or projects of such State and local educational agencies approved by the State educational agency or the Commissioner during the fiscal year for which the Federal appropriations are made available.

(b) Federal funds so made available to a State educational agency shall be drawn down by the State educational agency or transferred to local educational agencies in installments substantially coinciding with the need for such funds based upon the estimated rates of expenditure by such State or local educational agencies.

§ 116.44 Limitation on payments to a State.

No payments by the Commissioner under Title I of the Act will be made to a State for any fiscal year in which the State has taken such payments into consideration in determining the eligibility of a local educational agency for State aid, or in determining the amount of that aid, with respect to the free public education of children in such a way as to penalize the local educational agency in relation to the availability of State or local funds.

§ 116.45 Limitations on payments to a local educational agency.

(a) No payments to a State under Title I of the Act for any fiscal year may be paid by the State educational agency to a local educational agency unless the State educational agency finds that the combined fiscal effort of that local educational agency and the State with respect to the provision of free public education by that local educational agency for the preceding fiscal year was not less than such a combined fiscal effort for that purpose for the second preceding fiscal year.

(b) For purposes of this section, fiscal effort by a local educational agency shall be measured by the amount of the current expenditures per pupil by the local educational agency other than expenditures from funds derived from Federal sources for which the local educational agency is required to account to the Federal Government directly or through the State educational agency, such as funds under Titles I, II, and III of the Act, Titles III and V of the National Defense Education Act of 1958, and the Economic Opportunity Act of 1964. Expenditures by a State with respect to a local educational agency rather than by such a local educational agency itself shall be deemed to have been maintained at the same level in the preceding fiscal year as in the second preceding fiscal year unless the basis for making such expenditures has been altered or if such expenditures are assumed by such a local educational agency. In such an event, the actual expenditures of that nature shall be taken into account in both years in determining combined fiscal effort. A combined fiscal effort in the preceding fiscal year shall not be deemed to be a reduction from that in the second preceding fiscal year unless the per pupil expenditure in the preceding fiscal year is less than that in the second preceding fiscal year by more than 5 percent. Any such reduction in fiscal effort by a local educational agency for any fiscal year by more than 5 percent will disqualify a local educational agency unless the local educational agency is able to demonstrate to the satisfaction of the State educational agency that such a reduction was occasioned by an unusual event, such as the removal of a large segment of property from the tax rolls, that could not have been fully anticipated or reasonably compensated for by the local educational agency and that fiscal effort of the local educational agency does not otherwise indicate a diminished fiscal effort.

§ 116.46 Use of Federal funds and liquidation of obligations by State or local educational agencies.

(a) Federal funds granted under Title I of the Act to State and local educational agencies shall remain available until August 31 following the fiscal year in which such amounts were made available for use by such State and local educational agencies for projects approved during that fiscal year. Grants for construction of school facilities shall remain available for use for that purpose for a reasonable period of time as determined pursuant to § 116.21(c).

(b) Federal funds made available under Title I of the Act to State educational agencies for administration and technical assistance will remain available for such use until the close of the current fiscal year.

(c) For the purposes of this section a use of funds under Title I of the Act by a State or local educational agency will be determined on the basis of documentary evidence of binding commitments for the acquisition of goods or property, for the construction of school facilities, or for the performance of work, or on the basis of a reservation of funds for administrative activities in connection with the completion of project activities such as evaluation and auditing activities, except that the use of funds for personal services other than those for administrative activities for which such a reservation of funds has been made, for services performed by public utilities, for travel, and for rental of equipment and facilities shall be determined respectively on the basis of the time such services were rendered, such travel was performed, and such rented equipment and facilities were used.

(d) Federal funds under Title I of the Act shall not be available for use with respect to binding commitments (other than those relating to personal services, utility services, travel, or the rental of equipment or facilities) entered into, or with respect to personal services, utility services, travel or the rental of equipment or facilities rendered or performed by or for a State educational agency with respect to administration or technical assistance prior to the effective date of the approval by the Commissioner of the State application for participation, which in no event will be earlier than the date on which it was received by the Commissioner in substantially approvable form and appropriations are made for that purpose.

(e) Federal funds granted to State educational agencies for establishing or improving programs of education under Title I of the Act for migratory children of migratory agricultural workers, and Federal funds distributed to local educational agencies (including State agencies directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) for programs under Title I of the Act, shall not be available with respect to binding commitments (other than those relating to personal services, utility services, travel, or the rental of equipment or facilities) entered into prior to, or with respect to personal services, utility services, travel, or the rental of equipment or facilities rendered or performed prior to, the effective date of the approval by the Commissioner of the State application for participation or (except for commitments or services related to planning projects) prior to the date on which the applicant was notified that the application of the State or local educational agency for a grant with respect to that project was submitted for approval to the State educational agency or the Commissioner in substantially approvable form. Federal funds from two separate fiscal year appropriations are not available for payment with respect to a single such commitment.

(PARAGRAPH (f) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(f) Obligations entered into by State and local educational agencies and payable out of funds under Title I of the Act shall be liquidated prior to the end of the fiscal year following the fiscal year in which such funds are made available for use by such agencies unless prior to the end of that following fiscal year the State educational agency determines that the time for so liquidating specific obligations should be extended, extends such time, and notifies the Commissioner of the extension.

§ 116.47 Expenditures by State and local educational agencies.

(a) Amounts granted or distributed to State or local educational agencies for approved projects may be expended by such agencies for such projects in the amounts for which they were approved by the Commissioner or the State educational agency. Amounts for approved projects may, within the limit of the amounts made available to the State or local educational agency for programs or projects, be varied upward or downward by 10 percent of such respective amounts upon the determination by the State or local educational agency that such projects and the program of that agency will continue to meet the requirements of Title I of the Act and the regulations in this part. A variation in excess of 10 percent may be made only with the approval of the Commissioner or the State educational agency which approved the original project.

(PARAGRAPH (b) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(b) All proceeds from the sale of property being inventoried pursuant to the provisions of § 116.55 but not less than the fair market value of such property, the net proceeds from the rental of such property, and any income received as the result of the conduct of an approved project shall be credited to the Federal Government.

§ 116.48 State fiscal control and audit.

(a) The State educational agency shall, for that agency and local educational agencies, provide for such fiscal control and fund accounting procedures as may be necessary for the proper disbursement of funds paid to the State and to local educational agencies under Title I of the Act.

(b) All expenditures by local educational agencies or by State educational agencies of Federal funds granted under Title I of the Act shall be audited either by State auditors or by other appropriate auditors. The State educational agencies shall, with due regard for Federal auditing requirements, provide for appropriate audit standards for that purpose. The results of such audits shall be used to substantiate State agency records and shall be made available to Federal auditors. Federal auditors shall be given access to such records or other

documents as may be necessary to substantiate the results of such audits.

§§ 116.49–116.50 [Reserved]

Subpart F—General Provisions

(SECTION 116.51 AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

§ 116.51 Approval of State applications.

The Commissioner will approve each application by a State, through its State educational agency, to participate in the grant program under Title I of the Act if he determines that the application meets the requirements of section 106(a) in Title I of the Act and the regulations in Subpart D of this part. He will not finally disapprove any State application, or any application by a State educational agency for migratory children of migratory agricultural workers, except after reasonable notice and opportunity for a hearing to the State educational agency with respect to the disapproval of that application.

§ 116.52 Withholding by the Commissioner.

(a) Whenever the Commissioner, after reasonable notice and opportunity for a hearing to any State educational agency, finds that there has been a failure to comply substantially with any assurance set forth in the application of that State, or in the application of that State educational agency, approved by the Commissioner, for a grant to establish or improve programs of education for migratory children of migratory agricultural workers, he will notify the agency that further payments will not be made to the State under Title I of the Act (or, in his discretion, that the State educational agency will not make further payments under Title I of the Act to specified local educational agencies affected by the failure) until he is satisfied that there is no longer any such failure to comply. Until the Commissioner is so satisfied, further payments under Title I of the Act will not be made to that State or payments by the State educational agency will be limited to payments to local educational agencies not affected by the failure, as the case may be.

(b) Prior to initiating a hearing under this section, the Commissioner will attempt to resolve any apparent differences between him and the State educational agency regarding the interpretation or application of the provisions of Title I of the Act and the regulations in this part, including any apparent differences with respect to the disposition of matters reported by the State educational agency pursuant to § 116.31(g). Nothing herein shall be deemed to prevent any State educational agency from seeking the advice of the Commissioner prior to disposing of such matters.

§ 116.53 Allowable expenditures.

(a) Federal funds made available to State and local educational agencies may be used by those agencies for such expenditures as are reasonably necessary for carrying out approved projects.

(b) Federal funds granted to State educational agencies for administration and for technical assistance to local educational agencies with respect to the measurements of educational achievement and evaluation of the effectiveness of projects in meeting the special educational needs of educationally deprived children may be used by those agencies for such expenditures as are reasonably necessary for carrying out those activities.

(c) Federal funds made available under Title I of the Act to local educational agencies and to State educational agencies may be used only for those expenses which are incurred as a result of the grant program under that title. They include expenses such as those for:

(1) Salaries, wages, and other personal service costs of permanent and temporary staff employees and consultants for the performance of services reasonably necessary for the grant program under Title I of the Act, including the costs of regular contributions of employers to retirement, workmen's compensation, and welfare funds, and payments for leave earned with respect to such services;

(2) Communications;

(3) Utilities;

(4) The purchase of consumable supplies, including stationery;

(5) Printing and acquisition of printed and published materials;

(6) Travel and transportation expenses;

(7) Acquisition (by purchase or lease) and maintenance and repair of necessary equipment;

(8) Minor alterations in previously completed building space for use in the program under Title I of the Act;

(9) The rental of office space in privately and publicly owned buildings for use in the administration of the program under Title I of the Act, subject to the following provisions:

(i) The expenditures for the space are necessary for and properly related to the efficient administration of the program;

(ii) The State will receive the benefits of the expenditures during the period

of occupancy commensurate with such expenditures;

(iii) The amounts paid are not in excess of comparable rental in the particular locality;

(iv) In the case of a publicly owned building, like charges are made to other State or local agencies occupying similar space for similar purposes;

(10) The acquisition of leasehold and other interests in land necessary for educational agencies to carry out approved projects successfully; and

(11) In exceptional cases, the construction of buildings, and the structural alteration of existing buildings.

(d) The expenditure of funds under Title I of the Act shall not be included in the determination of average per pupil expenditure pursuant to § 116.1(d) or in the determination of fiscal effort pursuant to § 116.45.

(PARAGRAPH (e) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(e) None of the funds under Title I of the Act may be used for religious worship or instruction.

§ 116.54 Retention of records.

(PARAGRAPH (a) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(a) Subject to the provisions of paragraph (c) of § 116.55, each State educational agency and local educational agency receiving a grant under Title I of the Act shall keep intact and accessible all records relating to such Federal grants or the accountability of the grantee for the expenditure of such grants (1) for 5 years after the close of the fiscal year in which the expenditure was made, or (2) until the State educational agency is notified that such records are not needed for administrative review, whichever is the earlier.

(b) The records involved in any claim or expenditure which has been questioned shall be further maintained until necessary adjustments have been made and such adjustments have been reviewed and approved by the Department of Health, Education, and Welfare.

§ 116.55 Inventories of equipment.

(a) Each State and local educational agency shall maintain an inventory of all equipment it has acquired with funds under Title I of the Act and placed in the temporary custody of persons in a private school. Such inventories shall be maintained until the equipment is discharged from such custody and, if costing $100 or more per unit, for the expected useful life of the equipment or until its disposition.

(b) Each State educational agency and each local educational agency shall maintain inventories of all other equipment it has acquired with funds under Title I of the Act and costing $100 or more per unit for the expected useful life of the equipment or until its disposition.

(PARAGRAPH (c) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(c) The records of such inventories of equipment shall be retained for a period of one year following the period for which the inventories are required under this section to be maintained.

§ 116.56 Financial interest of officials.

No board or staff member of a State or local educational agency may participate in an administrative decision with respect to a grant program under Title I of the Act if such a decision appears likely to result in any benefit or remuneration, such as a royalty, commission, contingent fee, or brokerage fee, or other benefit to him or any member of his immediate family.

§ 116.57 Copyrights and patents.

(SECTION 116.57 AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(a) If a copyright is obtained on materials produced through a project with financial assistance under Title I of the Act, the Federal Government shall be granted a nonexclusive, irrevocable, royalty-free license to reproduce and publish the material so copyrighted, including the power to sublicense for all governmental purposes.

(b) Any materials of a patentable nature produced through a project with financial assistance under Title I of the Act shall be subject to the provisions of Parts 6 and 8 of this title.

May 22, 1969

Dear Friend:

We understand that you are concerned about the programs in your local school system that are being funded by Federal money appropriated under Title I of the Elementary and Secondary Education Act of 1965. We, too, are concerned about what is happening as a result of Title I in your school system and school systems throughout the country.

It is appropriate that local community groups and National organizations take a look at the extent to which educationally disadvantaged children are benefiting, or not benefiting, from the Federal, Title I investment.

The enclosed series of interviews with local school officials and parents should help assist you in your local effort and us in our National effort to learn the facts about Title I programs.

We appreciate your assistance and stand ready to do whatever we can to help you deal with local issues that may arise regarding Title I. Please return the filled out interviews to the address indicated above.

Thank you.

Sincerely,

Ruby G. Martin

(Mrs.) Ruby G. Martin

2. School Visits . . . . . White

3. Interview With Local Title I Coordinator . . . . . Yellow

4. Interview With Principal Or Teacher . . . . . Orange

5. Interview With Parents And Individuals In The Community . . . . . Green

Also included for your information and use are copies of:

1. The Elementary and Secondary Education Act of 1965 (P.L. 89-10);

2. The Title I Regulations issued by the Department of Health, Education, and Welfare; and

3. ESEA Title I Program Guide # 44 (Commissioner's Criteria for State Approval of Title I ESEA Applications from Local School Systems).

SCHOOL VISITS

1. Look for similarities and differences between what is going on and what is available in the Title I and non-Title I schools.

2. Look for signs that Title I money is being spent in the school: is there new, shiny equipment; are the classrooms small (some school systems use Title I money to reduce the pupil-teacher ratio); and are there new textbooks and reading materials?

3. If there are new materials and equipment, are the teachers using it; do the children know how to use it?

4. Are there teachers' aids in the school? If so, what are they doing? Find out if they know anything about Title I and Title I programs.

5. Are any Title I people in evidence, such as reading coordinators, audiovisual coordinators?

6. If you have the opportunity, talk to a classroom teacher or an aide and ask them about new programs, materials, and techniques.

7. If there is a lunch room, library, special reading facilities, look at them. Are they adequate? Are they new? Are they being used?

LOCAL TITLE I COORDINATOR

1. How much money under Title I (P.L. 89-10) has been allocated to your school district per fiscal year and how much has been spent per fiscal year since the program began?

2. What is the total enrollment of the district? What is the racial composition of the enrollment? Black? White? Mexican-American? Other?

3. How many schools in the district? How many Title I schools? How many non-Title I schools are participating in Title I programs because they enroll eligible children?

4. How many total eligible children are there, by race or national origin in your district?

5. How was eligibility determined?

6. How many children participated in Title I programs in each year of the programs operation.

7. What schools had Title I assistance of any kind in each of the years of the program? List the schools? What is the racial composition (in percentage) of each of these schools?

8. How was Title I money spent in each of the years of the program? Is money allocated on a per school basis or on a program basis? (Get a detailed account of number of persons hired, in what capacity, amount of money expended on equipment, instructional materials, and construction.)

9. What are the indices of poverty in the entire school system and in the area served by Title I? How was the Title I target population identified?

10. How were the needs of educationally disadvantaged children determined?

11. On what basis did you determine to establish the various Title I programs now operating?

12. In general, how were (are) decisions made for the Title I program?

13. Why were certain programs dropped after the first year and others added? Who made these decisions and on what basis?

14. Were principals and teachers involved in the Title I program? In planning? Program design? Execution? Did principals and teachers exercise any decision-making authority with respect to the kinds of programs to be established?

15. Were community groups, neighborhood groups, parenty groups, civic groups, or civil rights groups involved at any stage in the program planning? If so, which groups and specifically how were they involved.

16. Has there been any public discussion of your Title I program? At school board meetings? PTA or neighborhood meetings? Community action agency meetings? Public forums? Newspapers, radio, television?

17. What has the impact been on the target children? How was the impact determined? What kind of evaluation has been done of Title I programs? Do you have any indication that there has been any perceptable change in children or their school performance as a result of having been included in a Title I project?

18. What other resources (federal, state, or local) were brought to bear on the education problems of poor children besides the Title I effort? (e.g. Title III ESEA, Headstart, School Lunch Program).

19. What special programs for poor children and in general did the school district operate before Title I became available?

20. What other programs have been funded in this district by Title I? Handicapped children? Migrants? Indians?

21. What non-public school children have been involved in the Title I program?

a) How was their eligibility determined?

b) How many children are served?

c) Were their needs determined separately from the public school children or were non-public school children simply admitted to the program established by the public schools?

d) How do non-public school children participate in the program?

22. What has been the impact of Title I programs in non-target ineligible schools?

a) What has been the attitude of teachers and other staff members toward Title I schools?

b) Have teachers or children had any opportunity to observe Title I programs firsthand?

c) Have programs in non-target schools been affected in any measurable way by the increased resources going into poverty-area schools?

d) What equipment or other resources are now available to the entire school district as a result of Title I?

23. What kinds of working relationships has the local district had with the state Title I coordinator?

24. Has the state set special policies or requirements beyond the criteria established by Congress in P.L. 89-10?

25. How many visits have state officials made to local districts since the program began? In the last (1968-9) school year?

26. To your knowledge, have any parents complimented or filed complaints about the Title I program?

27.	Audit Reviews	Since Title I began	1968-9 School Year
	Program Review prior to granting Title I application		
	Program Review or evaluation after project has been in operation		
	Site visits to schools or centers		
	Inventory of equipment		
	Other		

28. From your experience, what are the greatest benefits and most serious disadvantages of the Title I program as it now operates?

29. Impression of Interview.

INTERVIEW WITH PRINCIPAL OR TEACHER

When you visit a local district, you should make every effort to interview at least one principal of a Title I school and at least one teacher in a Title I school. During the summer months, principals are likely to be available even if the Title I regular program is not in operation.

Some assistance from community contacts should be sought in identifying which principal might be the best one to interview. Choose carefully because not all principals will talk. Many will be tight-lipped. However, you should be able to locate one who is eager to tell you about the "bugs" in the Title I program.

Assure the interviewee that his name will not be used in connection with anything he says and that you will not report your conversation to anyone in the central office or to the principal.

These problems settled, your interview should proceed smoothly.

LOCAL PRINCIPAL OR TEACHER

NAME: _____

LOCAL PRINCIPAL OR TEACHER

1. Please describe the Title I program in your school this past year. Has it changed in any way since the program began?

2. What is your function with regard to the Title I program?

3. About how many children in this school participate in any way in a Title I program? What proportion is the number of the total school enrollment?

4. What is the racial compostion of the student body in this school? Of the faculty?

5. How are parents and the community involved in the Title I program? To what extent were they involved in the planning for the project?

6. Are teachers and principals involved in decision-making regarding any phase of the Title I program?

7. What is your impression as to how decisions are made about expenditure of Title I money?

8. Were any teachers or teachers' aides hired with Title I money?

9. Were the teachers or aides new to the school or new to the school system the year they were hired?

10. Were there in-service training programs carried out with Title I money for teachers or teachers' aides?

11. Has the total number of teachers and other staff members at your school increased or stayed just about the same since Title I was brought into your school?

12. Are Title I children kept separate from non eligible children in your school? In what way? What effect do you think this has on both the target and non-target children? On the faculty?

13. Is there a community relations component in the Title I program? If so, how does it operate?

14. Was any equipment purchase with Title I funds? Is any of this equipment in your school? Do you have sufficient equipment?

15. If so, do your find it useful? Has it been used? Do the teachers know how to use it?

16. Was any construction, remodeling or renovating or purchase of mobile units done with Title I funds?

17. Was the equipment purchased for the Title I schools comparable to the equipment or facilities already available at non-Title I schools?

18. Was a food, health, medical, or clothing program carried out in this school with Title I funds? If so, how did it operate? Did all children participate: If not, how were participating children selected?

19. Does the school receive Federal funds from other sources for school lunch purposes, e.g., the National School Lunch Program? If so, how are the children who participate in this program selected?

20. To your knowledge, how were the needs of the eligible children determined?

21. Do you believe that there are some serious needs of the eligible children in your school that are not being met presently by the Title I program?

22. Can you point to any differences between the Title I schools and the non-Title I schools in your district or area? Do non-Title I schools have special teachers, lower pupil-teacher ratio, other facilities that your schools does not have?

23. Have there been any desegregation plans put into effect in your district? At your school? Please describe.

24. How was Title I used in conjunction with the desegregation plan?

25. Is there a Title I summer program in your school or school district? Please describe.

26. Can you make any assessment of the impact of Title I programs on the participating children?

27. Was any kind of evaluation of the Title I program performed? If so, do you know its results?

28. What do you think are the positive and negative aspects of the Title I program as it operates in your school or school district?

29. Impressions of interview.

Interview with Parents and Individuals in the Community

As many parents and individuals in the community should be interviewed as possible. They may not be familiar with Title I and programs under Title I, as such; however, they will know if there are new teachers, teacher aides, and new equipment in their children's school.

They will especially know if there are food programs in the school; and, will be happy to talk about any program which is visible to them.

You will probably be able to figure out whether the programs they discuss are Title I programs.

PLEASE ASSURE PARENTS AND CITIZENS THAT THEIR NAMES WILL NOT BE USED IN A REPORT OR IN DISCUSSING THE INFORMATION THEY GIVE WITH TITLE I STATE, FEDERAL, OR LOCAL OFFICIALS.

1. How many children do you have?

2. How many of them are in public school?

3. What school do they go to?
   Is this school a Title I school to your knowledge?

4. If it is a Title I school, what new programs have you noticed in the school?

5. Are there facilities in your child's school to serve a hot lunch?
If so, when were they installed or otherwise made available?

6. Is there a school lunch program in the school?
If so, when did it begin?

7. Does your child/or children get lunch at the school?

8. If they do, do you pay the regular price for it, or do they get it at a reduced price, or do they get it free?

9. Have your children received any medical, dental or clothing benefits from the school?

10. Was there a school board or a community meeting to discuss Title I funds and how the money should be spent, in your community?

13. Is there a parent-student-school program in your school?

14. Do you know what kind of school programs are being paid for with Title I money in your community?

PAGE (s) MISSING

15. What kind of educational programs do you feel would be most helpful to your children?

16. To your knowledge, have any complaints been raised about the use of Title I funds?

17. Impression of the interview.

F. General Form

NOTE:

The Elementary and Secondary Act of 1965 expires June 30, 1970. Congress is now debating a new law which may make some changes in the current law. This manual only covers the current law.

§1. WHAT TITLE I FUNDS ARE

Title I funds are federal funds for a special category of children who are educationally deprived. The funds are authorized under Title I of the Elementary and Secondary Education Act of 19~5. It is a 100% federally financed program which administered by the state Department of Education. The money is to be used to raise the educational level of limited numbers of educationally deprived children living in low-income areas. In Mississippi the money is usually used in local school districts for reading programs, food services, teacher load reduction, guidance counseling, and summer sessions. The amount of the grant for a school district has varied in Mississippi between $10,000 and $1,000,000 a year deprnding upon the number of low-income children in the area.

§2. HOW IT WORKS IN GENERAL

The federal government through the Department of Health, Education and Welfare (HEW) gives Title I funds each year to the state Department of Education in Jackson. The state Title I unit in turn gives money to the school district superintendent monthly.

The school district superinttndent and his Title I coordinator are the persons who decide where the money is to go. Every year they write an application which lists what the money is to be spent on and how much these things will cost. The proposal is sent to the State Title I office in Jackson where it is approved. It does not go to Washington.

§3. HOW A PROPOSAL IS MADE

The superintendent is told the maximum amount of money his school district can get. The amount is determined by the number of children from low-income families in the district.*

Next the superintendent must determine where the money is to to. The money by law must go where the need is the greatest. The Local Advisory Committee (See §) tells him the views of parents and establishes priotities among these needs. They recommend a general plan for the concentration of this money in certain schools. They, together with the superintendent and Title I coordinator, pound out the proposal. The Title I coordinator does the technical work of determining exactly how much money each propram will cost, what equipment will be needed, and how many people will be hired. But the Local Advisory Committee will set the goals and then propose the specific ways they want to reach these goals.

---

*Low income means under $2000 a year. This figure is given by HEW in Washington and is based on the 1960 census. The superintendent updates it by making a survey and also adding the number of foster home children. The state Title I office then takes this total number of low-income children and multiplies it by half the per pupil expenditure in the United States (½ of $) to get the maximum amount a school district is able to receive.

In setting these goals, the Local Advisory Committee is to keep in mind that the money by law must go to help "educationally deprived children." Educationally deprived children are those children

> "who are handicapped or whose needs for such special educational assistance result from poverty, neglect, delinquence, or cultural or linguistic isolation from the community at large."

Since almost all black schools in Mississippi are on lower educational levels than their companion white schools, the money should almost entirely be going to black children. These children are called target children.

§4. WHICH SCHOOLS GET TITLE I MONEY

It is important to know that the money is directed at target populations (target children) not to target schools. That means the money goes where the greatest concentrations of these children go. The money goes to only those schools (1) where there is a higher percentage of low-income children than the percentage for the entire district of (2) where the school has a larger number of low-income children than the average number of such children in all the schools in the district. Not all the children in these target schools are to be served; only those who are "educationally deprived."

Be on the lookout for the common practice of denying black children in tutoring, free eye glasses, medical examinations, or

free school lunches when they transfer to white schools.

Also be on the lookout for NON-eligible white children getting Title I benefits solely because eligible black children have enrolled in that particular white school. Extension of Title I benefits beyond eligible transfer students is illegal.

Finally, you should make certain that equipment bought with Title I money is not placed in non-target schools or used for mainly non-target children.

Many superintendents wrongly believe that Title I money can be spread out thinly and be used for general purposes. The project area must be restricted in size so that the project can be effective. It should not be tailored to meet the needs of an entire school system, an entire student body, or an entire grade. The whole idea of Title I is to concentrate federal money on a limited number of children whose needs are greatest and bring them up to the level of other children their age.

§5. WHAT TITLE I MONEY MAY BE USED FOR

There are two basic activities that Title I money may be used for--instructional projects and service projects. In order to have a service project, the school district must also have an instructional project. Title I funds, for example, cannot be used exclusively for guidance counseling and free lunches (service projects) when there is not also an instructional project. Instructional projects for educationally deprived children include the following categories:

Reading
Physical Education/Recreation
Business Education/Office Occupations
Cultural Enrichment--General
English Language Arts
Foreign Languages
Home Economics
Art
Industrial Arts
Kindergarten
Mathematics
Music
Pre-Kindergarten
Science

Work Study
Speech Therapy
Special Education for the Handicapped
Vocational
Reduction of Class size/ Additional Teaching Staff
Teacher Aides and Other Subprofessional help

Service projects for educationally deprived children include the following categories:

Food-Breakfast
Food-Lunch
Food-Other
Clothing
Waiver of Fees for Books, Supplies and Materials
Health
Psychiatric Services
School Social Work (Including Home-School Visiting)
Attendance Services

Guidance and Counseling
Library ervices
Curriculum Materials Center
Tutoring/After School Study Center
Guidance and Counseling
Related Services for Parents
In-Service Training for Staff Personnel
Pre-Service Training for Staff Personnel

The basic problem is that there are no guidelines to determine just what Title I funds may be used for. The school superintendent has almost unlimited discretion. His only limitations are (1) that the money go to "educationally deprived" children and (2) that it go where the need is the greatest.

§6. WHAT TITLE I MONEY MAY NOT BE USED FOR

A. Title I funds may not be used for direct salary increases. A regular full-time employee of the school system may receive additional money under Title I only by devoting extra hours such as nighttime or Saturday teaching. These extra hours must be documented. Title I money cannot be used to pay superintendents or principals so they can work on a twelve-month contract instead of only during the school year. (Anyone hired as a full-time Title I teacher or administrator, of course, would have all of his salary paid by Title I funds. But anyone hired as a Title I employee must work full-time in Title I and not work in the general school program). Title I money cannot pay salaries of administrative staff who would have been paid by the State anyway if there were not a Title I program.

B. Title I funds may not go to overhead costs such as heating, janitor supplies, and building maintenance unless this can be directly traced to projects benefiting the most urgent needs of educationally deprived children.

C. Title I money may not be used to supplant state and local money. It is supplementary only. It may not be used to pay for costs which should be borne by the local school budget. (See Appendix D). The best way to detect this misuse of funds is by looking in the narrative section of the project application form and by questioning individual school principals. Title I money, for example, should not be used to paint the rooms, repair the buildings, or buy bathroom supplies since these items should be

taken care of by the regular school budget as they are in the white schools.

D. Title I money may not be used to supplant other Federal programs money such as the school lunch programs under the Department of Agriculture. A superintendent may not take away money from a school lunch program and replace it with Title I money to support the program. Neither can he discriminate and give school lunch program money only to certain schools and then use Title I money to give the other schools a comparable school lunch program.

E. Title I money is not to be used for construction of school buildings unless this construction is demonstrated as being essential in order to assure the success of a program or project. The reason for this is that the money is supposed to benefit educationally deprived children now. When a building is built or a mobile caassroom is bought, there is no way of knowing how it will be used in the future. It could very well be used for a purpose not contemplated by Title I. In addition, construction costs are great and would take up a sizable portion of the grant. This diminishes the effectiveness of other programs for educationally deprived children by draining money out of them. Since the money is first to go where the need is greatest, construction should be questioned as the best use of the Title I money. Title I funds, if used for construction, cannot be used to maintain segregation. For example, where there is adequate space for black pupils to be assigned to white schools, Title I funds cannot be used to build additions or mobile classrooms for the black schools to overcome crowded conditions there.

F. Title I money is not to go to imprudent, extravagant, or wasteful expenditures such as landscaping, paving, air conditioners, or elaborate audio-visual which is not used.

G. Title I funds are not to be used to equalize the schools, (See Appendix D.) Black school facilities, food services, and transportation must be brought up to the same level as that of their companion, white schools with state and county money. Title I funds are supplementary and are only to be used to boost the levels of education and services in schools attended by high concentrations of low-income children after such equalization by state and county funds has occurred. The way to detect this improper use of Title I funds is to ask the school superintendent, visit each black school and each white school in the district and to examine the school buildings themselves.

H. Title I money cannot be used in any way to support private segregationist schools and homes for the neglected that are located in the school district.

I. Title I money is not to go for general or district-wide purposes. For example, Title I cannot be used to hire a remedial reading teacher who serves all schools or to buy lawn-mowing equipment to be used at all schools.

J. Title I money cannot be used to maintain segregation, Money cannot be used in black schools to build additions, add mobile classrooms, or otherwise increase their capacity when black children could be assigned to less crowded nearby white schools. It cannot be used to have all-black pre-school remedial, or summer school programs especially if others are offered to whites by state funds or on a tuition basis.

K. Title I funds cannot be spent to transfer black teachers from the regular state payroll to a temporary Title I payroll unless the teachers signigicantly change their job and do

different daily functions than they did before. Title I should not be used in such a way as to demote black teachers.

L. There are many other improper uses of Title I funds which you can detect by common sense.

(1) Title I funds may not be used for discrimination in hiring Title I employees. Title I secretaries, clerks and coordinators should not be all-white where blacks could be hired.

(2) Title I funds may not be used to pu curriculum supply centers nearby white schools when the black schools are the ones that are to be benefited.

(3) Title I funds cannot be used for things unrelated to project purposes such as a sewage disposal system financed under the guise of improving health and recreation.

(4) Title I funds cannot be used to buy biases textbooks, films, or library books for black pupils.

J7 HOW TO FIND OUT HOW TITLE I MONEY IS SPENT IN YOUR SCHOOL DISTRICT

The school superintendent and his Title I coordinator, if there is one, have all the information in their files. You should approach the local Title I coordinator first since he is more likely to be helpful. In some instances he may even be eager to tell you about the program. You approach him by saying that you have contacted to participate in a nationwide survey for your comments on the effectiveness of Title I projects. (Attached are questioms you will want to ask him). A little praise may go a long way. Ask to go on a tour of the schools for comparison. After you have done all this, then ask to see the files. It is improtant that you look through the files because you cannot otherwise find out in detail how the money was spent and whether

the information by hand. The Office of Education in Washington has interpreted that to mean school officials must "provide reasonable access to those materials for purposes of copying, including total reproduction, such as xeroxing, at the citizen's expense." (See Appendix C). You will need to spemd a lot of time examining the files because the way the information is listed will require you to refer back and forth through several documents for each project.

§8. WHAT YOU WILL FIND IN THE FILES

You will want to examine the files systematically and start from the most recent year and work backward. There are certain documents in the files which are most revealing:

Project Application Form

This is the key document in the files. Although the application form varies from year to year, the forms for 1967-68, and 1969-70 school years are similar.

The best parts to turn to are the budget analysis (which lists exactly how much money is to be spent on what) and the planning attachment which describes the project in narrative form and justifies its need. For earlier years the form was divided into basic data part and a project part. The basic data part is most useful to get comparative data on waht things were like before Title I came along. It provides a fertile source for documenting how Title I funds were used to equalize the schools when thes should have been done with state and local funds instead. The project part identifies the individual project and breaks down the expenditures.

Budget Amendment Applications

Later on in the year each year more money is available and sometimes superintendents are unable to do with the original money what they wanted to do. These things call for budget amend-

PAGE (s) MISSING

ments. This is where you are more likely to find fringe items and extravagant expenditure requests.

Other Documents

There are also in the file Quarterly Reports, Project Completion Reports, Profile Evaluations, Statistical Reports, Local Advisory Committee Reports, letters of transfer, monthly Requests for Dispursement of Funds, and a few more things. They may prove helpful, depending on how deeply you intend to probe.

See Appendix F for two forms which you can put important Title I information on.

§9. LOCAL ADVISORY COMMITTEES

There must be maximum practical involvement of parents in Title I programs. Federal Program Guide #46 requires each school district to have a Local Advisory Committee as of July, 1968. (See Appendix E for a copy of this document). There is no requirement concerning the number of people on the committee, but at least 50% of the committee must be parents of disadvantaged children and representatives of the poor from local anti-poverty agencies. The functions of Local Advisory Committees are to:

(1) present the views of the parents
(2) recommend a general plan of where the money should go
(3) participate in developing the actual proposals
(4) write comments---pro and con---which are to be forwarded with the application
(5) hear complaints and suggestions
(6) participate in appraising the programs

That means the Local Advisory Committee is not to be a group of hand-picked by the superintendent to take a back seat

BEST COPY AVAILABLE

in policymaking and to rubber-stamp his proposals. This committee is to show promise of bringing about a high degree of parent participation. If the Local Advisory Committee fails to meet these standards, then you should ask that new people be placed on it or in the alternative, form your own Local Advisory Committee and seek recognition with the state Title I office by sending in your own recommendations and appraisals.

§10. COMPLAINTS

After you inspect the files, interview the Title I coordinator, and tour the schools, your group may be dissatisfied because Title I funds are in some cases not going to the children, or are going to the wrong children. You should draft a formal complaint in the form of a letter. All complaints should be thouroughly documented, if at all possible.

Complaints should be addressed to:

Dr. G.H. Johnston
Superintendent
State Department of Education
P.O. Box 771
Jackson, Mississippi

For complaints to be effective, courtesy copies must be sent to two federal officials in Washington,

Dr. James Allen
Commissioner of Education
U.S. Office of Education
400 Maryland Avenue, S.W.
Washington, D.C. 20202

Dr. Regina Goff
Assistant Commissioner
Office of the Programs
for the Disadvantaged
U.S. Office of Education
400 Maryland Avenue, S.W.
Washington, D.C. 20202

Please also send a courtesy copy to us at 538½ North Farish Street, Jackson, Mississippi 39202.

BEST COPY AVAILABLE

Most complaints will concern (1) your not being able to inspect or copy the files, (2) the use of Title I money to take the place of state and local money in black schools and (3) the lack of parents being able to participate in planning proposals.

You should not just send your complaints directly to Washington because they will send it right back to the state. But you should also not just send your complaint to the state either. Unless the state knows you are also sending it to Washington, they may not do anything about it. So send it to both places.

When a complaint is received by the state, the state superintendent should direct your superintendent to hold a public hearing and answer the complaint. Your superintendent's answer and a report of the hearing will then be sent back to the state and then to Washington and eventually forwarded to you. If the answer is unsatisfactory or the hearing is a whitewawh, you should write to Washington directly and also notify us. (A sample complaint is included in Appendix A).

Your group will also want to attend a monthly school board meeting. Ask the Board of Trustees to justify things which you do not believe are right. Be prepared to offer better ways the money could be spent. This will cause them to stop taking you for granted.

§11. ENFORCEMENT PROCEDURES

There are many enforcement procedures but they have not been used because few people know about them and because of politics. The state Title I office is not supposed to approve a project unless it meets the requirements of the law. R. 116.34(a). The state Title I office is supposed to require the local superintendent to carry out the project in a way which will not preserve racial segregation. R. 116.34(c).

The state Title I office is supposed to send to Washington any complaints, a summary of hearings held, and a statement of how the problem was finally settled. R. 116.32(g). It is the responsibility of the state Title I office to settle all complaints. R. 116.32(g). Washington cannot do much other than hold a hearing and cut off Title I funds for the entire state. Cutting off funds for the entire state is drastic and probably would never be done. They have been able to send federal review teams of two to some 20 counties im Mississippi to conduct an investigation. If, after your superintendent conducts the hearings you requested, things have not changed and your group cannot cause things to be corrected, you will want to ask for a federal review team to visit your school district. You should make this request to Dr. James Allen, Commissioner of Education, 400 Maryland Avenue, S.W., Washington, D. C. 20202.

§12. TITLE I AND SCHOOL DESEGREGATION

The 1964 Civil Rights Act (Title VI) outlaws racial discrimination in any program getting money from the federal government. HEW has issued "Guidelines" to enforce this and tp make sure that federal money (like Title I money) will not go to segregated school systems.

SCHOOL DISTRICTS UNDER A COURT ORDER TO DESEGREGATE are automatically eligible to receive Title I money.

SCHOOL DISTRICTS UNDER H.E.W. PLANS OF DESEGREGATION may be cut off from title I funds if they don't desegregate enough according to the "Guidelines." First, they are put on "deferred status" which means the HEW held a hearing and decided that the school district was not complying with the "Guidelines." That puts the school district on notice that

its Title I money can be cut off. No new Title I projects can be started or old ones expanded. Old projects can only continue at the same level. If the school district does not desegregate more, then Title I funds will eventually (1-3 years) be cut off.

SCHOOL DISTRICTS UNDER NO PLAN OF DESEGREGATION are not able to get Title I money. These school districts are ones who decided they would rather deny their children of thousands of federal dollars than desegregate their school system. Parent groups in these school districts are urged to consult civil rights lawyers or the Justice Department for help.

SAMPLE COMPLAINT

Dr. G.H. Johnston
Superintendent
State Department of Education
P.O. Box 771
Jackson, Mississippi 39205

Dear Superintendent Johnston:

I am a member of the black community of Jonesville, Mississippi. I write this letter as secretary of the Committee for Better Education, a group of poverty-level parents who are concerned about the education of our children. We believe thousands of dollars of Title I money are being misused in our school district.

The Jonesville School District consists of three black schools and two white schools serving 2300 pupils, the majority of whom are black. Although we have a Title I coordinator, the project is run by Superintendent Joe Blow.

On May 10, 1969, we visited Superintendent Blow to see the terms and provisions of the Title I projects in our schools. He let us look at the application form for 1968-69 but would not let us get a copy. He refused to let us look in the files

or examine past applications. He was tight-lipped about projects for this fall. When we asked to see the list of Local Advisory Committee members and the minutes of their meetings, he told us they were not available and were confidential.

The Local Advisory Committee was hand-picked and does not represent the parents of the target children. We were told it only met once and no parents, even the ones on the committee, were there.

No CAP agencies or anti-poverty groups were contacted for suggestions and coordination of efforts, even though they were supposed to have been. No one bothered to talk with MAP or Delta Opportunities Center.

Title I money is not being spent where the need is greatest. Last year it was used to buy $12,000 worth of band uniforms and $3,647 of language laboratory equipment at Lincoln High School. That same money should go to provide more free lunches for hungry children at Carver Elementary.

Under freedom of choice, many black children transferred to the white school. They received free school lunches in the black school under Title I but not in the white school. This practice discourages desegregation.

Also $68,000 of Title I money was used in 1967 to pay for six mobile classrooms at Carver Elementary when there was space at Jefferson Davis Elementary, the white school for the children.

In addition, $1,742 was spent in 1966 to buy supplies for non-eligible white children at Jefferson Davis Elementary solely because some black children transferred there.

All thur of the administrative people hired under Title I are white. Black people could have been hired. The guidance counselor that was hired under Title I for our black schools has her office in the white Jefferson Davis High School and spends most of her time there.

Title I funds are being used to bring the black schools

up to the same level as the white schools when state money should be doing this. Over $2,300 was used in the summer of 1968 to pay for repairs at Linclon High School such as painting and light fixtures. The white school has a janitor of its own paid under state funds. All the janitors at the black schools are paid out of Title I money.

Under these circumstances, we want you to direct Superintendent Blow to immediately hold a public hearing on these issues. A hearing will do no good unless all the parents of target children are invited, too. Please advise us of what corrective measures you, as State Superintendent, also plan to take. The seriousness of this matter requires your immediate response.

Sincerely,

Mrs. Lula Mae Springer
Secretary
Committee for Better Education

(PARAGRAPH (c) AMENDED NOVEMBER 28, 1968, 33, F.R. 17790)

(c) The State educational agency shall advise the Commissioner of the amounts needed to fund those applications by local educational agencies for grants which are approved by the State educational agency, together with appropriate information concerning each of the projects covered by such applications, and of the additional amount not in excess of (1) one percent of the maximum grants to State and local educational agencies of the State as adjusted pursuant to § 116.9 or (2) $150,000 (or $25,000 in the case of Puerto Rico, Wake Island, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands), whichever is greater, which is required by the State educational agency for administration and for technical assistance to local educational agencies with respect to the measurement of educational achievement and evaluation of programs called for by § 116.22.

§ 116.34 Approval of applications from local educational agencies.

(a) The State educational agency shall review all applications by local educational agencies (including State agencies directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children) in the State for grants under Title I of the Act to determine whether such applications meet the requirements of the Act and the regulations in subpart C of this part. The State educational agency shall not approve such an application unless it determines that the application does effectively meet the requirements of the Act and the regulations in subpart C of this part and that the State educational agency is able to give the Commissioner the assurances with respect to that application which are required by the regulations in this subpart. The State educational agency shall not approve an application by a local educational agency which, together with other approved applications by that agency, exceeds the amount available for grants to that agency.

(b) The State educational agency may approve an application in part or for less funds than is called for by the application only if such an approval does not have the effect of altering the project to such an extent that it no longer provides reasonable promise of substantial progress toward meeting the special educational needs of educationally deprived children.

(c) The State educational agency shall not finally disapprove any application in whole or in part without first affording the local educational agency submitting the application reasonable notice and opportunity for a hearing with respect to such action.

(d) The terms and provisions of each approved project shall be made available, by the State educational agency, and by the affected local educational agency or agencies, for public inspection.

§§ 116.35–116.40 [Reserved]

Subpart E—Payments

§ 116.41 Payments to States.

(a) The maximum amount of all payments which may be made to a State for grants under Title I of the Act is the aggregate of the maximum eligibilities of all State and local educational agencies of the State for grants and the maximum eligibility of the State educational agency for administration and technical assistance with respect to the measurement of educational achievement and evaluation of projects, as that aggregate is adjusted pursuant to § 116.9.

(b) The Commissioner will, during the fiscal year, pay to each State an amount which is equal to the aggregate amount for which projects of State and local educational agencies are approved by the State educational agency or by the Commissioner, plus such amount as the State educational agency is entitled to and expends for such administration and technical assistance. The Commissioner may make advances to each State submitting an application for participation in the program under Title I of the Act and requesting such an advance.

(c) Until such time as the Commissioner has finally determined the maximum eligibilities for grants of all State and local educational agencies in all the States, he will make a tentative ratable reduction in the amounts payable to States and will further limit such amounts in order for him to be in a position to make such final ratable reductions as may be necessitated by the amount of the available appropriations.

(d) Each local educational agency receiving a distribution of grants for approved programs and projects shall, at the end of the period for which expenditures of such grants are authorized, release to the State educational agency any unexpended balances of such grants. The State educational agency shall re-

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D.C. 20202

Bureau of Elementary and
Secondary Education

RECEIVED JUN 25 1969

Mrs. Ruby Martin
Washington Research Project
1823 Jefferson Place, N.W.
Washington, D. C. 20036

Dear Mrs. Martin:

This is in response to your telegram of June 23, 1969, requesting clarification of the rights of access to Title I project information at the State and local level, with particular reference to the citizen's right to reproduce copies of Title I documents at his own expense.

A State and local educational agency in making the terms and provisions of each approved project available for public inspection is also expected to provide reasonable access to those materials for purposes of copying, including total reproduction, such as xeroxing, at the citizen's expense.

A copy of this letter is being sent to Mr. Darnelly Brabham, Coordinator of Title I, ESEA, State Department of Education, Rutledge Building, Room 201, Columbia, South Carolina 29201, for his reference in connection with your request for information on local Title I projects on file in the South Carolina State Department of Education.

Sincerely yours,

John F. Hughes, Director
Division of Compensatory Education

cc: Mr. Brabham

APPENDIX C

(PARAGRAPH (h) REVISED NOVEMBER 28, 1968, 33, F.R. 17789)

(h) Each application for a grant under Title I of the Act for educationally deprived children residing in a project area shall contain an assurance that the use of the grant funds will not result in a decrease in the use for educationally deprived children residing in that project area of State or local funds which, in the absence of funds under Title I of the Act, would be made available for that project area and that neither the project area nor the educationally deprived children residing therein will otherwise be penalized in the application of State and local funds because of such a use of funds under Title I of the Act. For the purposes of this paragraph, the failure to use State or local funds to provide to a project area or to children residing therein services comparable to those services which have been, or are to be, generally provided to other areas or children will be deemed to constitute a penalization of that project area or of those children. No project under Title I of the Act will be deemed to have been designed to meet the special educational needs of educationally deprived children unless the funds made available for that project are to be used to supplement, and not supplant, State or local funds.

(i) No application for a project grant under Title I of the Act may cover the construction of school facilities unless such construction is demonstrated as being essential in order to assure the success of a program or project under Title I of the Act. If the construction of school facilities is so demonstrated as being essential for a program or project, the application must nevertheless comply with other requirements of Title I of the Act and the regulations in this part, such as the requirements in § 116.21 in regard to labor standards and overall State construction planning and, in relation to the overall program, the requirements in § 116.19 in regard to participation by children enrolled in private schools.

(j) A project by a State agency directly responsible for providing free public education for handicapped children or for children in institutions for neglected or delinquent children may include the acquisition of equipment and, in the case of schools owned by that State or a public agency of that State, the construction of school facilities. Each project of such a State agency shall be designed to meet the special educational needs of children attending schools operated or supported by that State agency.

(PARAGRAPH (k) REVISED NOVEMBER 28, 1968, 33, F.R. 17789)

(k) An application by a State educational agency to the Commissioner for a grant under Title I of the Act for the education of migratory children of migratory agricultural workers shall describe a program designed to meet the special educational needs of such migratory children. The application shall describe the individual projects that are contemplated and identify the local educational agencies, if any, through which the projects will be carried out, which application shall be in sufficient detail to enable the Commissioner to determine whether he will exercise his authority to make special arrangements pursuant to section 105(c)(2) in Title I of the Act. Within the total of the grants made available for the program, the program covered by an approved application may, without altering the essential nature of the program, be modified from time to time to reflect changing conditions. The State educational agency shall notify the Commissioner of any such modifications.

(l) An application by the Department of the Interior to the Commissioner for payments to meet the special educational needs of educationally deprived children on reservations serviced by elementary and secondary schools operated for Indian children by that Department shall describe a program or individual projects designed to meet the special educational needs of educationally deprived children who attend such schools or who are eligible to attend such schools or to participate in preschool programs of that Department. The program shall include a provision for grants to local educational agencies with respect to out-of-State Indian children in the elementary or secondary schools of such agencies under special contracts with the Department of the Interior, which grants shall not exceed, for each such child one-half the average per pupil expenditure in the State in which the agency is located. The application shall describe the overall program under Title I of the Act of the Department of the Interior which will administer the program to Indian children on the basis of its determination of their special educational needs. An application by the Department of the Interior will be approved by the Commissioner upon his determination that the program in that application complies with the applicable requirements of Title I of the Act and the regulations in this part. Individual projects to carry out the approved program of the Department of the Interior will be implemented by that Department in a manner consistent with such requirements. The Department of the Interior will advise the Commissioner

APPENDIX D

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D.C. 20202

ESEA Title I Program Guide #46
DCE/P&P

July 2, 1968

TO : Chief State School Officers

FROM : Harold Howe II HH
U.S. Commissioner of Education

SUBJECT: Community and Parent Involvement in Title I, ESEA, Programs

Item 2.1 of the revised criteria for the approval of Title I, ESEA, applications requires a finding that:

2.1 The priority needs of educationally deprived children in the eligible attendance areas (target populations) were determined in consultation with teachers, parents, private school authorities and representatives of other agencies which have a genuine and continuing interest in such children. The evidence of need and the bases for the assignment of priorities have been documented.
Authority: 20 USC 241e (a)(1)

The criteria also require, as indicated in item 3.1 and the discussion following that item, that the same groups, agencies, parents and others be involved in a comprehensive analysis of the resources available to meet those needs and in the development of a comprehensive compensatory educational program for the coordinated use of Title I funds and of the resources from other programs and agencies.

To carry out effectively the intent of these criteria, each Title I applicant must have an appropriate organizational arrangement. This means, in effect, that local advisory committees will need to be established for the planning, operation, and appraisal of a comprehensive compensatory educational program.

I. Composition of the Local Advisory Committee

A. It is suggested that at least 50 percent of the membership of the committee consist of parents of disadvantaged children attending schools serving the area where projects will be conducted, representatives of the poor from the Community Action Agency and parent members of the Head Start advisory committee, if there is a Head Start project in the community, and representatives of other neighborhood-based organizations which have a particular interest in the compensatory educational program.

APPENDIX E

B. The committee should also include school staff members representing the regular and special programs to be offered in the project areas, representatives of private schools, and leaders of other agencies and organizations. Where model cities or neighborhood service center projects are being planned, representatives from those projects should also be included on the advisory committee for the comprehensive compensatory educational program.

II. Principal Functions

The local advisory committee should have specific functions, such as:

A. Supply information concerning the views of parents and children about unmet educational needs in the Title I project areas and establish priorities among these needs.

B. Recommend a general plan for the concentration of funds in specific schools and grade levels.

C. Participate in the development of proposals which are particularly adapted to bridging the gap between the needs of the pupils and the curriculum of the school.

D. Make written concurring or dissenting comments to be forwarded with the application.

E. Act as a hearing committee for suggestions to improve the compensatory educational program.

F. Hear complaints about the program and make recommendations for its improvement.

G. Participate in appraisals of the program.

Each State educational agency should be prepared to assist local educational agencies in achieving full community involvement in the development and implementation of the local compensatory educational program. In this connection, please note that the new application form in Section II-A provides opportunities for LEA's to outline their comprehensive planning activities, including the involvement of other programs and agencies. Applicants should also outline the activities that they carried on through their local advisory committees and describe the membership of those committees.

Some States have already established requirements or developed guidelines or handbooks for community involvement. We would be interested in receiving copies of any such materials you may have circulated and also

descriptions of specific local activities designed to bring about community involvement in the development of compensatory educational programs in your State.

Advisory committees, of course, present only limited opportunities for parental participation. Careful attention in the appraisal of a Title I program should also be given to item 5.4 of the criteria:

> The Title I program includes appropriate activities or services in which parents will be involved.
>
> Authority: 20 USC 241e (a)(1)

The proposed activities or services for parents to be provided at the school or neighborhood level should show promise of bringing about a high degree of participation and cooperation in support of the specific compensatory educational activities being provided for their children.

Searching for Hyphenated Americans

W-S-J 4/13/72

By CHRISTOPHER G. TRUMP

All of us can agree that it is wrong to deny a person a job on account of his or her racial or ethnic background. The question is: How can this concept, which is also a matter of law, be made to work?

The Department of Health, Education and Welfare believes it has found the answer. In a massive assault on American institutions of higher learning, HEW is demanding an "affirmative action" program, without specifying exactly what that means, under pain of excommunication from all federal funds.

Universities are in effect being asked to prove their innocence, which is, of course, infinitely more difficult to prove than guilt. An absence of overt or suspected discrimination claims is not an acceptable affirmative action, nor is a solemn oath of good faith on the part of the university administration.

According to J. Stanley Pottinger, director of HEW's Office for Civil Rights, federal funds will be withheld if a university fails to develop goals "to increase the number of minority members and women in faculty and staff positions."

Lest there be any confusion as to what is meant by goals, Mr. Pottinger helpfully adds: "Goals are not quotas. . . . Goals are targets to aim for." So much for the basic philosophy. In fact, the goals appear to be dependent on an exercise in quantification that boggles the imagination.

A Freezing of Funds

Three times within the past 30 months Columbia University's affirmative action program has been rejected by HEW, with a resulting freeze of some $13 million in federal grants. The problem was less in an enunciation of goals than in a gathering of data from which HEW could deduce whether Columbia discriminated against, among others, minority groups—the "protected classes," in the latest HEW jargon.

The first problem in seeking out such data is quite basic to the operation: Which Americans belong to a protected class? Columbia, for example, lists four protected classes: Black-Negro, Oriental, American Indian, Spanish-surnamed American.

On the other hand, Brooklyn College listed five classes in the fall of 1971; American Indian, Black, Indian (Asian), Oriental, Puerto Rican. Three months later Indian (Asian) was removed from the list, to be replaced by Italian American.

In an article, "Quotas by Any Other Name," (Commentary, January 1972), Earl Raab cited seven classes in the San Francisco area schools: Negro/Black, Chinese, Japanese, Korean, American Indian, Filipino, Spanish-speaking/Spanish-surname.

All three listings have one further category: white and other.

In short, one's annointment as a hyphenated American in a protected class appears to depend upon institutional whim and geographical location.

The second problem is mainly tactical: How can a candid and accurate survey be taken, when most states have made it a matter of law that a person's race or ethnic background is his or her own business? New York law, for example, prohibits any oral or written inquiry into a person's racial, ethnic or religious background.

William Miles, a spokesman for the state's Division of Human Rights, stated that his office would take a dim view of any direct survey or printed questionnaire to meet the data requirements of HEW.

Columbia University conducted a shadowy census of its 10,000 employes last November by appointing "census reporters" in each of its divisions. These reporters were to make ethnic identifications "based upon the reporter's general knowledge and observation of the employe." In the case of applicants for a job—and HEW demands all applicants also be classified, whether subsequently employed or not—the reporter is asked to "conduct a *visual survey* of the new personnel."

Since such an attempt at armchair anthropology is subject to mistaken identity, the directive helpfully suggests that the "employe may be included in the minority group to which he or she appears to belong or is regarded in the community as belonging." Under no circumstance, however, is the individual to know that he or she is being so assayed.

The ethnic guessing game adds a new dimension to review of applications and employment interviews. In the case of blacks, skin color would probably be the principal consideration. What about Orientals? Is it skin color, facial features, possibly the spelling of the name—perhaps a combination of all three? The American Indian class is a bit more difficult—we might mistakenly categorize an individual as an Oriental on the basis of facial features. The Spanish-surnamed American places the entire emphasis on a name, although an explanatory note in Columbia's directive states the person should be from Mexico, Puerto Rico, Cuba, Spain or Latin America. But a name can be tricky: The national hero of Chile is a man named O'Higgins. Jim Plunkett, the professional football player, is Mexican-American. What about country of origin? Haitians are likely to have French surnames, while West Indians and Guyanans claim English heritage.

The mistaken identities are likely to be the exception, but ethnic identification ought to be beyond error.

Further, the whole process is fraught with peril. In a recent speech, Columbia's President William J. McGill said, "If we take one more step into the centralization of the hiring process, and we tell the faculty they must consider race and sex as criteria, this place will blow sky high."

'No Choice'

Brooklyn College, despite New York State law, has taken a more direct route in amassing its data. Its faculty and staff twice were asked to fill out detailed questionnaires, dealing in part with the individual's race and ethnic background. In a covering letter of Dec. 27, 1971, President John W. Kneller urged his colleagues to submit the data since "considerable sums which the university receives from the federal government are in jeopardy." He concluded, "At this stage of the game, we have no choice but to perform this task as quickly and expeditiously as possible."

Not so, wrote Belle Zeller, chairman of the Legislative Conference of the City University of New York, the collective-bargaining agent for more than 8,000 full-time faculty members: "I feel we have no recourse other than to disregard requests to complete this questionnaire. It should remain exactly as it was received—blank."

Prof. Zeller states she is unalterably opposed to discriminatory practices and that the conference "is vigorously pursuing all cases of discrimination that come to its attention. However, I am firmly convinced that the use of questionnaires . . . is a serious danger to the entire college community and most of all to those very individuals, already suffering from discrimination, whom the survey purports to serve."

Brave words. But the blunt truth is that HEW's contract compliance division is simply not interested in whether universities vigorously pursue "all cases of discrimination." Remember, innocence must be proved. This means data, data and still more statistics. Simply put, a government bureaucracy seems constitutionally unable to rationalize its mission except by quantification.

Racism and ethnic classification are risky enterprises, particularly when institutionalized by government. The objective is always lofty. But for more than a century American Indians were a "protected class" as wards of a federal bureaucracy. The abysmal record of that exercise speaks for itself.

The chief peril in seeking to end discrimination by the numbers is that it is unlikely to achieve the basic objective: a change in attitude on the part of those doing the hiring in academia. There can be no question that the clubby, "old boy" method of selecting faculty and administrators from the same, traditional social and ethnic stratum is beyond redemp-

The chief peril in seeking to end discrimination by the numbers is that it is unlikely to achieve the basic objective: a change in attitude on the part of those doing the hiring in academia. There can be no question that the clubby, "old boy" method of selecting faculty and administrators from the same, traditional social and ethnic stratum is beyond redemption. Yet, as Harvard University's Nathan Glazer wrote, can the implied stigma of minority group membership be overcome if it "is deemed a permanent disability, requiring a lower level of job achievement?"

Supine Administrators

At this juncture university administrators have assumed a supine posture vis a vis HEW. For one thing no one wants to appear to be against wiping out discrimination. For another, federal funds are crucial to their survival (almost half Columbia's budget is comprised of government funds).

But look at it another way. *Dispensing* these funds is also vital to the federal bureaucracies that grant them. Might not HEW, in a concerted action by all universities, be persuaded to stop the weaseling?

If the search for the hyphenated American in academia is an overriding national concern let HEW draw up a uniform compilation of all the ethnic groups it seeks to protect. Then let it formulate a standard application form for all jobs in institutions of higher education—one that spells out exactly what the government is after, be it race, national origin, sex, religion or physical appearance.

Granted that in the past such an overt inquiry would have been viewed as an invitation to discrimination. Granted, again, that there may be those—both among the unprotected as well as the protected—who will object because for more than a generation we have come to eschew such nosiness in employment applications.

But no matter. If affirmative action is that important then it should be clearly defined. The goals or quotas should be promulgated to all faculty, staff and prospective employes, not on an institutional basis, but on a national scale ordained by HEW. Then, if that is still possible, universities might hope to get on with an employment policy that has always made sense: Hiring and advancement based on skill, preparation and potential for the position in question.

Mr. Trump is assistant dean of Columbia University's Graduate School of Journalism.

Judge Denies Move To Delay Integration In Detroit Schools

5/10/72

By a WALL STREET JOURNAL *Staff Reporter*

DETROIT—A federal judge here denied a Justice Department request to delay deciding the city's school desegregation case until Congress acts on President Nixon's plan for a moratorium on court-ordered busing.

Judge Stephen J. Roth, who has ruled that the city's school system is unlawfully segregated, rejected the government request on the ground the Detroit case doesn't match the conditions for governmetn intervention specified in the civil rights law.

He also denied a motion that would have allowed Justice Department intervention, though he did rule that the government may file a "friend of the court" brief stating its views.

The Justice Department's Detroit request, filed in late March, was the first of a number of such motions filed in school integration cases after Mr. Nixon announced his moratorium plan.

Judge Roth initially refused to grant the motions immediately, scheduling a hearing on the government request and proceeding with hearings to consider possible integration plans, some involving massive cross-district busing. Those hearings have ended and the judge is expected to order a Detroit integration plan soon.

Dixie School Integration Gains Imperiled By Laxity, Official Bias, Rights Bloc Says

5/24/72

By NEIL MAXWELL
Staff Reporter of THE WALL STREET JOURNAL

ATLANTA—A coalition of civil rights organizations charged that many gains made in integrating Dixie schools in the 18 years since the Supreme Court outlawed segregation are in danger of being lost.

Their report blames several factors, such as the "negative" leadership of the President of the U.S., "inactivity and even opposition" of federal agencies and lack of diligence by civil rights organizations, including one that helped write the report.

It contends that at least a dozen major Southern districts—Birmingham, Ala., Beaumont, Texas, and New Orleans among them—are operating under desegregation plans that are "shockingly inadequate." Other urban districts, it charges, are eroding desegregation gains by such tactics as building new schools in segregated neighborhoods, allowing whites to transfer from heavily black schools, and by discouraging black leadership by heavy suspensions for offenses that were treated more lightly in the days of segregation.

But it also congratulates some Southern cities, some of them the scenes of racial atrocities in years past, for deciding to end dual schools and taking purposeful strides toward that goal. Among them: Jackson, Miss., Orangeburg, S.C., Greensboro, N.C., and Tampa.

In citing those cities, the report says that the striking difference between them and others where meaningful integration is an obvious failure is leadership. And the difference is that leaders in those communities "are trying with imagination and effort to make equality of educational opportunity a reality."

Atlanta and Birmingham

Atlanta is noted as a city where integration moves have halted but desegregation still has a long way to go. Eleven years after schools were first integrated and nearly a year after the courts ruled the system officially and fully integrated, investigators found that 47 of the 162 schools are all black, while one remains all white. Another 29 are more than 98.5% black and another 26 are more than 90% white.

In Birmingham, Ala., an investigator found that of 89 schools, 18 are all black, 13 are all white, 14 others are more than 90% black and six others more than 90% white. He also found two new schools opening this year, both all white, and a new high school under construction, which he reported will be all black.

The report was sharply critical of a lack of court actions in recent years to change desegregation plans that clearly aren't working. It notes that freedom of choice is still practiced in Beaumont.

Seven years of freedom of choice have "produced a system of quasi-desegregation within which 68% of the black students in the district are still attending segregated, all-black schools," it says. (The problems with freedom of choice are that blacks who choose to attend white schools expose themselves and their families to harassment, and that hardly any, if any, whites choose to go to the black schools.)

In New Orleans, where efforts to desegregate the system date back to 1951, "the lack of legal initiatives over the past five years has lulled it into the comfortable acceptance of schools which are still highly segregated," the report says. It implies criticism of the NAACP Legal Defense and Educational Fund, which helped with the case and also helped compile the report. In New York, the defense fund declined to comment.

There are other factors mentioned, such as a white flight to nearby school systems that are nearly all white and an easy transfer system that allows many students to switch from schools they don't want to attend.

The report says such situations, plus a south-wide rash of private schools, are responsible for the fact that "resegregation is an alarming fact of life in many school systems of the urban South." Further, it adds, "this trend has been aided by federal and local state action" because of housing programs that are forming newly segregated schools as they establish "new ghettoes."

Once inside of formerly segregated schools, many black students are running into some overwhelming problems that are a threat to the integration process, the report says. For example, it says, "because most school systems are using some means of grouping students according to 'ability,' a large number of black students are congregated in the lower academic groups of Southern urban schools. Our monitors found a large number of classes that are all black or all white or which are disproportionately of one race."

Intimidation of Blacks

One thing that would help, it says, would be for the Department of Health, Education and Welfare to stop regarding a class as integrated if it has a single child of the opposite race in it. The system allows large numbers of blacks to be grouped together with only token white representation.

Another problem for blacks in white schools is intimidation by white security officers and the threat of expulsion, the report says. It says guards or police carrying truncheons or other weapons are frequently used to patrol halls in places such as Savannah and Macon, Ga., St. Petersburg, Fla., Baton Rouge and New Orleans. The recommendation: "Police should be removed from schools."

A sharp increase in suspensions also is seen as a problem. In St. Petersburg, they jumped from 5,500 in the 1969-70 school year to 8,200 the next, which was the first year of significant desegregation. This year, the estimate is 9,000 to 9,500.

At one integrated high school in Norfolk, Va., the report says, 96% of the students expelled are black, and in Columbia, S.C., 741 blacks and 267 whites were suspended in a recent three-month period.

"Suspensions and expulsions of students have become so widespread as to raise serious questions concerning the effectiveness of these methods to enforce discipline," the report says, adding that "a disproportionate percentage are black."

Information for the 130-page report was gathered by workers representing the American Friends Service committee, the Washington Research Project, the Southern Regional Council, the NAACP Legal Defense and Educational fund, the Delta Ministry of the National Council of Churches and the Alabama Council on Human Relations. They visited 43 Southern urban school districts.

Showdown in Denver

School-Integration Case Could Decide How Far North's Cities Must Go

High Court May Tell Future Of Busing and Finally Rule On De Facto Segregation

6/15/72

Ironic Site for Confrontation

By RICHARD A. SHAFFER
Staff Reporter of THE WALL STREET JOURNAL

DENVER—This mile-high city, proud of its racial harmony, promises to be the scene of the next major showdown in the civil rights movement, and one of its most ironic landmarks.

The Supreme Court later this year will focus on Denver in its first full-scale inquiry into segregated schooling outside the South. Many observers believe it will use the occasion finally to decide the important issue of how far the country must go in school desegregation.

"The time is ripe to look squarely at the major unanswered questions in school integration," says Alexander M. Bickel, professor of law at Yale University. "Denver is the best opportunity the court has to do that."

The case may also radiate other effects, including direction of how desegregation is to be achieved. Observers say that if anything short of a constitutional amendment can halt the expanding use of school buses for racial mixing, the Denver case is probably it. On the other hand, they add, if the Supreme Court demands more school integration here, increased busing to achieve racial balance probably would soon be ordered in most other major cities, North as well as South.

Impact Either Way

"No matter which way it goes, the Denver decision will have a national impact," says James Nabrit, an attorney for the NAACP Legal Defense and Education Fund, which is participating in the case.

The big questions before the court are whether school segregation, regardless of its cause, is unconstitutional because of its harmful effects, and, if so, what must be done to uproot it.

The Supreme Court held in 1954 that Southern-style de jure segregation, imposed by Jim Crow laws, violates the 14th Amendment guarantee of "equal protection of the laws." It hasn't ruled on the legality of Northern-style de facto segregation, which, in its pure form, is accidental, the result of housing patterns. Of late, however, federal courts outside the old Confederacy have begun to doubt that there is really a difference between de facto and de jure segregation. Denver's is the first such case the Supreme Court has agreed to review, and some interested observers, such as Prof. Bickel, contend that "the mere fact that the court has accepted it probably means it is finally ready to rule on the de facto question."

An equally remarkable aspect of this case, however, is the irony of the site: Blacks, the main force behind the case, fare comparatively well in Denver. A case in point is education. Even in the city's poorest sectors, the average Negro has a high school education, or two years more than the nationwide average for

well in Denver. As city-wide points is cited. Even in the city's poorest sectors, the average Negro has a high school education, or two years more than the nationwide average for blacks and the highest level for poverty-area blacks in any of the nation's 25 largest cities. In addition, government figures show black schools here are less segregated than those in two-thirds of the nation's other largest school districts.

Many Federal Offices

The economic picture is similar. In 1969, for instance, the average Negro family income in Denver was about $7,300, compared with a national average for Negroes of about $6,000. According to a government survey of poverty areas, unemployment among poor blacks here is lower than in many (although not all) metropolitan areas. Denver's 11% rate compares favorably with 14% in Pittsburgh, 16% in Los Angeles and 13% in Detroit, although it's well above New York's 8.6% and Washington's rate of 4.4%.

One reason is that the federal government —a traditional path out of the ghetto—has more offices in Denver than in any city outside Washington, providing 24,488 jobs, an estimated 10% of them held by blacks.

The comfort of the Denver black, at least when compared to the plight of those of his race in most major cities, is evident to a visitor driving along Welton and 26th Streets in Five Points, one of the two major black communities here. Along well-paved streets, backdropped by the snow-capped Rocky Mountains, residents mow their lawns, prune flowering shrubs or paint the trim on their houses.

Home-ownership is high among Denver blacks, partly because open housing laws are more strongly enforced here than anywhere else in the country, according to a Ford Foundation report.

Not Heaven, Not Harlem

Denver has no skyscraping urban renewal projects, and its low-cost housing is spread throughout the city. As a result, its low-income areas bear scant resemblance to the decaying, rat-infested ghettoes of New York, Newark, Chicago and Cleveland. Even in Five Points, most people live in neat and clean single-family homes.

"Denver may not be heaven, but it's not Harlem either," comments Linwood Evans, a black attorney for the Legal Aid Society of Metropolitan Denver.

In fact, Denver blacks are neither the city's biggest minority, nor its most deprived. Negroes total 47,011, about 9% of the population, while Mexican-Americans, at 68,790, account for 13%. Although the average Spanish-surnamed family is more affluent than the average Negro family, the proportion of Mexican-Americans living in the slums has been rapidly increasing as the proportion of Negroes decreases. In 1967, the latest year for which figures are available, three of every four Mexican-Americans here lived in the ghetto, up from two of every three in 1960. Over the same period, the fraction of the Negro population living in the ghetto declined to 37% from 71%.

Education underscores this difference. By nearly every measure—achievement test scores, percentage of parents on welfare, neighborhood property values and rental—the

Please Turn to Page 31, Column 1

Showdown in Denver: Integration Case May Set Rules for the North

Continued From First Page

city's worst schools tend to be Mexican-American, not Negro. The dropout rate for Hispano students, 80%, is twice the rate for black students.

Clearly, however, most Mexican-Americans don't want integrated schooling. Less than one percent of the city's Hispano children are bused to white schools under the city's voluntary integration plan, one-seventh of the proportion of blacks participating. Apparently through their own efforts, the proportion of Mexican-American children attending predominately Mexican-American elementary schools climbed to 59% in 1971, from 53% five years earlier. And in recent local elections, the traditionally Democratic Spanish-speaking bloc has voted 4-to-1 for antibusing candidates supported by Republicans.

"Sending our children to Anglo (white) schools isn't the answer," explains Betty Salazar, a mother and consultant in the Denver Community Relations Commission. "We want them in classes where Spanish is spoken, so they can understand the teacher, and where our cultural heritage is respected and preserved."

Even some black leaders here who once regarded school integration as the most promising route to improved education for their children have changed their minds. "We no longer feel it's the solution to our problems," says James F. Reynolds, a black who is executive director of the Colorado Civil Rights Commission. Observes another Negro, state Sen. George Brown: "A whole lot of people who were pushing for it got tired of beating their heads against a wall."

Paradox or not, however, Denver's case seems destined to determine the future course of school desegregation, for although minorities may be better off here than many other places, they're disadvantaged by comparison to Denver whites, especially in the field of education.

Specifically, the Supreme Court case focuses on Five Points, the inner-city area just northeast of downtown. After a lengthy series of hearings, climaxed in May 1970, Federal District Judge William Doyle found no evidence that the neighborhood had been intentionally segregated and found nothing akin to a law separating the races.

But he did find that in the core-city schools, students were reading as much as two grade levels below the citywide average and that a primary factor was segregation. Thus, the de facto segregation was unconstitutional because it resulted in unequal educational opportunity, Judge Doyle said, and he ordered busing to achieve integration in the classrooms. The 10th U.S. Circuit Court of Appeals subsequently overturned this ruling, holding in effect that de facto segregation doesn't violate the Constitution, regardless of its impact, thus setting the scene for appraisal by the nation's highest court.

While the Denver situation is steeped with ironies, the biggest of them all may be the changes the recent focus of judicial inquiry has wrought in this city, which long regarded its racial situation casually and with hardly a sour note.

For instance, until the widely publicized court wrangle here, which began in 1969, the city's school population held relatively steady at 96,000. Then suddenly, the year Judge Doyle ordered racial busing, 3,000 students left the system. Nearly all of them were white students in elementary school who transferred to suburban schools, school officials say.

"We've tried not to say much about it, but the truth is this case has created a serious 'white flight' problem," says Denver School Board President Stephen Knight. "If this trend continues, our elementary schools will be less than 50% white within five years."

School Lines to Block Integration Ruled Out

6/23/72

Atl. Const.

WASHINGTON (U P I) — With the Nixon-appointed bloc in solid opposition, the Supreme Court Thursday barred state and local governments from setting up new school zone if such redistricting impedes desegregation.

The vote in an Emporia, Va., case was 5 to 4 with all four of the justices named by President Nixon dissenting. In a companion case from Scotland Neck, N.C., the decision was unanimous with the dissenting four filing a concurring opinion.

Justice Potter Stewart who wrote both majority opinions declared: "A new school district may not be created where its effect would be to impede the process of dismantling a dual system."

The rulings reversed the findings of the 4th U.S. Circuit Court of Appeals and upheld decisions made by federal district judges that the new districts were impermissible. The appeals court held it must be shown that the "primary purpose" of the redistricting is to retain as much segregation as possible.

Stewart stressed that the effect of redistricting, not its motivation, was the controlling factor.

"We have focused on the effect — not the purpose or motivation of a school board's action in determining whether it is a permissible method of dismantling a dual system," he wrote. "The existence of a permissible purpose cannot sustain an action that has an impermissible effect."

The Emporia, Va., dispute arose when Greenville County schools were ordered to integrate in 1969. Emporia however became a second-class city in 1967 — a status which allows a community to operate its own schools separately.

This would have changed the racial make-up in city schools from 66 per cent black and 34 per cent white to 52 per cent black and 48 per cent white. The county would have been left with a ratio of 72.2 black and 27.9 white.

Chief Justice Warren E. Burger in a dissenting opinion shared by Justices Harry A. Blackmun, Lewis F. Powell, Jr., and William H. Rehnquist argued that there was no basis for concluding that the city had a "discriminatory purpose."

He said the district judge who blocked the move "was reaching for some hypothetical perfection in racial balance rather than the elimination of a dual school system."

Burger and the other dissenters agreed the Scotland Neck, N.C., case presented a different problem. The schools in the community of approximately 3,000 had been operated as part of the Halifax County system since 1936.

When pnder prodding by the Justice Department, a desegregation program was set up in 1969, the North Carolina General Assembly enacted a law providing for a new school district entirely within the town's limits and retaining a white majority.

In agreeing with Stewart's majority opinion, Burger commented it was undisputed that the Scotland Neck creation was "substantially motivated by the desire to create a predominantly white system . . ."

The court also:

—Ruled 6 to 2 that unions may legally make political contributions in federal elections if the funds come from voluntary donations. The decision reversing the conviction of two St. Louis union local leaders may have a bearing on the recent conviction of United Mine Workers President W. A. "Tony" Boyle and Secretary-Treasurer John Owens on charges of violating the same federal law.

Mrs. Elizabeth Duncan Koontz, Director of the Women's Bureau of the U. S. Department of Labor, will be in Atlanta November 18-19 to confer with regional federal officials.

At 4:30 PM on the 18th, Mrs. Koontz will be in the English Suite of the Regency Hyatt House to discuss and answer your questions on the changing status of the American woman.

A biography of Mrs. Koontz is enclosed for your background information.

Bill Allgood

Should you have special needs relative to your coverage, call us at 526-5495 prior to noon, Wednesday, November 18th. We will be happy to assist you in any way possible.

ELIZABETH DUNCAN KOONTZ
Director, Women's Bureau

Mrs. Elizabeth Duncan Koontz, who was appointed Director of the Women's Bureau in the Department of Labor, February 7, 1969, comes to her new post from the National Education Association, which she has served as president since July 1968. She is the first Negro to head the Women's Bureau and was the first of her race to serve as President of NEA. On January 30, 1969, she was appointed U. S. Delegate to the United Nations Commission on the Status of Women.

Mrs. Koontz has devoted most of her life to the field of education. From 1945 until she became president of NEA she was a special education teacher at Price High School, Salisbury, N. C., from which she herself graduated in 1935. Her work there was with slow learners and disadvantaged children.

Earlier Mrs. Koontz held teaching positions in public schools in Winston-Salem, Landis, and Dunn, N. C. She also taught summer sessions at Livingstone College in Salisbury.

She received a bachelor of arts degree in English and elementary education from Livingstone College and a master's degree in elementary education from Atlanta University, Atlanta, Ga. She did graduate work at Columbia University and Indiana University. Because of her interest in children whose background in formal education is

limited, she pursued additional training in the field of special education for slow learners at North Carolina College, Durham.

Mrs. Koontz has been active in numerous educational organizations. A life member of NEA, she served as president of its largest department, the Association of Classroom Teachers in 1965. She is a member of the NEA's Council for Exceptional Children and of the North Carolina Council and the National Association for Retarded Children. In 1965-68 she was a member of the President's Advisory Council on Education of Disadvantaged Children.

She has also held membership on such diverse bodies as the Family Service Council of North Carolina, the North Carolina Council on Human Relations, and the Education Committee of the National Urban League. She is an honorary member of Zeta Phi Beta Sorority. She served on the North Carolina Governor's Commission on the Status of Women.

Mrs. Koontz has traveled widely. In 1964 she was one of 16 Americans who visited the Soviet Union at the request of Saturday Review magazine. Two years earlier she represented NEA on a trip to West Berlin to observe the effects of the Berlin Wall on education. She has also attended conferences in Vancouver, B. C., Canada; Dublin, Ireland; and Seoul, Korea, of the World Confederation of Organizations of the Teaching Profession (WCOTP), an educational

advisory and consultative body working with but independent of the United Nations Educational, Scientific and Cultural Organization (UNESCO). Before and after the trip to the conference in Korea, she visited numerous countries around the world.

Mrs. Koontz has been the recipient of several awards and honorary degrees, including an honorary doctor of humane letters degree and the Distinguished Alumni Medallion for Achievement from her alma mater, Livingstone College, and the Distinguished Teacher Award from the Civitan Club of Salisbury.

MAY WE HELP YOU

to continue the dialog begun during . . .

. . . *the Poor People's Campaign?*

During the spring of 1968, representatives of the Poor People's Campaign visited the U.S. Department of Health, Education, and Welfare and the Office of Education, an operating agency within the Department. These representatives pointed to a number of areas in which the Department and the Office of Education might be more responsive to the needs of the poor. Among their suggestions, they stated that the Department should "establish a national structure and mechanism which provides for continuous input by poor black, brown, and white people in the design, development, operation, and evaluation of all federally funded education programs."
In response, the Commissioner of Education instructed the Office of Programs for the Disadvantaged, part of the Office of the Commissioner since 1965, to determine whether the poor are being adequately served by Federal education programs and to seek to ensure that the Federal legislation to provide educational benefits for the poor is being applied fully.

To carry out this assignment, the Office of Programs for the Disadvantaged:

- Receives inquiries and complaints through telephone conversations and personal interviews as well as by mail.
- Works to resolve the complaints it receives as follows:

1. The Office of Programs for the Disadvantaged (OPD) first contacts the complaining party (by telephone, if feasible) for additional information and to assure that the exact nature of the problem is understood.

2. OPD then takes the complaint to the program concerned, learns what action is intended, and relays this information to the complaining party.

3. OPD remains in touch both with staff members of the program involved and with the complainant while the matter is being studied. The complaining party is encouraged to inquire at any time about the status of his complaint and to inform OPD of any additional developments which relate to it. Such additional information is immediately shared with all officials involved.

4. OPD promptly notifies the complaining party when final decision is made on the complaint and encourages him to express an opinion on the effectiveness of that action. If the solution arrived at is unsatisfactory to the complainant, OPD continues its assistance to all parties concerned until a better approach is found, or until all possible alternatives are exhausted.

The Office of Programs for the Disadvantaged has cooperated both with government and nongovernment officials in dealing with matters such as the inability of the poor to meet the costs of public education, alleged discrimination by local school districts against minority group members of their teaching staffs, and possible misuse of Federal funds at the local level.

- Promotes serious consideration of recommendations relating to the improvement of Federal education programs through its contacts in the Office of Education, the U.S. Department of Health, Education, and Welfare, and in other Federal Departments.

By early 1969, the Office of Programs for the Disadvantaged had received excellent recommendations from local communities concerning Office of Education programs, including those in bilingual education, and manpower development. Several important suggestions regarding innovative methods for teaching the disadvantaged have also been forwarded to OPD.

You are encouraged to write the Office of Programs for the Disadvantaged with your recommendations or observations on Federal education programs.

In addition, the Office of Programs for the Disadvantaged:

- Compiles material relating to techniques for teaching the disadvantaged.
- Prepares analytical studies on socio-educational problems.
- Disseminates information relating to education of the disadvantaged.
- Holds regional conferences to clarify the intent of Federal legislation concerning the education of the disadvantaged and to provide the Office of Education with greater insight into local problems related to the operation of education programs. Conference participants have represented such organizations as the Urban League, NAACP, Southern Christian Leadership Conference, Ministerial Alliance, Congress of Racial Equality, and American Friends Service Committee.

If you wish us to help you continue the dialog begun in 1968, write, call, or visit the Office of Programs for the Disadvantaged to tell us of your questions, recommendations, or complaints.

Mr. Emory Via
Southern Regional Council
52 Fairlie Street, N. W.
Atlanta, Georgia 30303

Dear Mr. Via:

I appreciated your talking to me about my idea for an SRC study of the ideas of black leaders in Memphis regarding the definition and practical approaches to "quality" education. I enclose herewith a proposal for such a study for your further consideration.

I assume that if you should wish to proceed with it, it would be subject to staff discussion there. I have therefore phrased the proposal in rather general, discursive terms--it amounts to a summary of what I tried to say to you. I am perfectly open to suggestions for modifying the proposal. I do not have any fancy "methodology" to recommend but may say that I am thinking of the project as an investigative report of interviews and discussions with not more than fifteen or twenty persons. They should be mostly blacks, the elective and appointive officials who now have a duty to the whole community--legislators, city councilmen, members of the school board, transportation authority, etc., school administrators and teachers. I am sure that Mrs. Coe's cooperation would be essential.

Sincerely yours,

Redding Sugg

A Proposal for a Southern Regional Council Study

AFTER INTEGRATION, WHAT?

by Redding S. Sugg, Jr.

Now that black leaders in Memphis are gaining positions in government and education and have a responsibility to the whole community rather than to the black part of it alone, it may be expected that their views as to the particulars of "quality" education have been affected. So far, "quality" education has been a slogan. What has been realistically aimed at has been "equal" education, defined as education carried on in schools with prescribed degrees of racial integration in administration, faculty, and student body. Integration remains the most vocal demand of black leaders as they insist upon busing to achieve it to their satisfaction. It emerges ever more clearly, however, as a device for bringing about general social change rather than as a specifically educative device. There are signs that the black leaders have begun to question whether "equal" education is the same as "quality" education.

I propose an inquiry among selected black leaders in Memphis, taken as a representative situation, as to the principles which should be reflected in the curriculum of the integrated public schools. I would set this inquiry in the perspective of a review of the literature of "quality" education, curriculum reform, etc., in the nation since 1954. The Memphis record should be searched for comment and recommendations on

the issue during the same period.

Historically, the democratization of American education, in which the integration of blacks is only the latest and most tempestuous chapter, has meant compromise on curriculum. As various groups have been mixed into the educational system, the compromise has taken the form of deliberate vagueness as to curriculum requirements which, if strictly defined, might seem to favor one group over another. This vagueness, while it may have been a necessary aspect of accommodating groups of widely different cultural backgrounds, has tended to subvert the disciplinary side of curriculum, indispensable though this is to any sort of "quality" education. Consensus as to a national social ideal, from which curriculum might be more definitively derived, remains a transcendental goal. In practice, what are often called "white middle class values" have functioned as the justification of curriculum, much honored in the breach.

The drive for integration is usually explained by black leaders in Memphis as the only way blacks can be sure that black children will have access to schools as good as those provided for whites. The curriculum in such schools was determined by "white" values, often attacked as inimical to black children. A certain ambivalence among black leaders may be formulated by putting into their mouths the question: We know what we want to bus black children away <u>from</u>, but what are we busing them <u>to</u>? This is matched on the white side by a suspicion that in demanding a "unitary" school system the blacks seek to destroy the "white" curriculum which re-

mains as all that the city has in the way of "quality." In this impasse, at least the issues begin to be clarified. How good is the "white" or "quality" curriculum? What, exactly, do black children need in the way of curriculum and do their needs differ ultimately from those of whites?

I propose to find out how far the black leaders have gone in thinking about such questions. How do they conceive of a satisfactory curriculum for integrated public schools? It would be necessary to get down to cases--of what, specifically, should the curriculum consist, grade by grade and subject by subject?

Assuming that the black leaders believe that a satisfactory curriculum can be devised, I should then like to inquire to what extent they are prepared to accept the disciplinary side of curriculum. Any curriculum, whether bookish or technical, "academic" or "vocational," is selective if seriously instituted. Accommodation and compromise--what Dewey called the "psychologizing" of subject-matter--are no doubt necessary aspects of the art of teaching; but if a curriculum is seriously instituted, accommodation and compromise cannot be entirely on the side of the school. A certain percentage of pupils, larger or smaller according to the standards set, will prove unable to complete the curriculum.

The proposed inquiry would extend, therefore, to the ideas of the black leaders as to the means of reducing the trauma of school failure, presumably through alternative programs of training and employment and the control of "elitism."

Acceptance of the disciplinary side of curriculum implies, further, readiness to shift the drive for social change from the school to other agencies and to relieve the school of the tasks, so subversive of curriculum, of providing "compensatory" education and merely custodial care for pupils who cannot cope with curriculum. From the point of view of education, the problem is whether certain preventive measures in the community at large might be substituted for the compensatory or frankly custodial ones now required of school. Do the black leaders of Memphis foresee a time when the school might be left to a more narrowly defined educative function while the departments of sanitation, public health, housing, and transportation were pressed to serve all areas of the city equally, to provide compensatory services to black slum districts, and --in short--to take responsibility for maintaining an environment in which black children would be more likely than they now are to reach school age in a condition adequate for profiting by the curriculum?

Experience Since finishing college and serving in the U. S. Army Air Forces in the China-Burma-India Theater during World War II, Redding S. Sugg, Jr., has alternated writing, on either a staff or a free-lance basis, with teaching college English. His first job was the editorship of a weekly newspaper, and for several years he was a staff associate of the Southern Regional Education Board, Atlanta, responsible for publications and public information. He has taught at the Georgia Institute of Technology, Georgia State College, and Memphis State University.

Books Editor, NUCLEAR ENERGY IN THE SOUTH (1957); co-author with R. H. Leach, THE ADMINISTRATION OF INTERSTATE COMPACTS (1959); co-author with G. H. Jones, THE SOUTHERN REGIONAL EDUCATION BOARD (1960); all published by the Louisiana State University Press.

Articles Has appeared in such publications as THE AMERICAN PSYCHOLOGIST, THE ANNALS of the American Academy of Political and Social Science, THE ATLANTA JOURNAL-CONSTITUTION, THE DELTA REVIEW, THE JOURNAL OF AESTHETICS AND ART CRITICISM, THE JOURNAL OF HIGHER EDUCATION, PHILOLOGICAL QUARTERLY, and THE SOUTHERN FOLKLORE QUARTERLY.

Reports Wrote, researched, or edited numerous reports and studies related to various fields of higher education for the Southern Regional Education Board during the 1950's and early 1960's. Designed, researched, and wrote two Background Papers on aspects of higher education and manpower planning published in mimeograph by the Atlanta Region Metropolitan Planning Commission (1963).

News & PR Edited weekly NORTHWEST ALABAMIAN, Fayette, Alabama, in 1946-47. As staff associate of Southern Regional Education Board (1952-55) produced newsletters, releases, and promotional brochures.

Education University of North Carolina, A. B. in English, 1943. University of Texas, M. A., 1948, and Ph. D. in English, 1952. Fulbright student at University of Paris, 1951-52.

Personal Married to Dr. Helen White, ~~Associate~~ Professor of Engilsh, Memphis State University, who collaborates in free-lance projects. Hobbies include gardening, ~~photography~~, swimming, travel.

Desegregation in Louisiana SCHOOLS IN

Rez

Private Schools

Although much has been made of the "white flight" to non-public schools during the period of heavy school desegregation, 1971-72 data obtained by the Information Center on School Desegregation indicate that enrollment in non-public schools has declined by 9,380 since the 1970-71 school year.

This school year 152,259 students are enrolled in non-public schools throughout the state. Of the total, 134,450 are white and 17,881 are black.

Easily tabbed as a peak year for non-public schools in the state, the 1970-71 total non-public enrollment was 161,711 of which 143,333 were white and 18,318 black. Last year the total number of non-public schools rose to 456, or 40 over the 1967-68 school year total of 416.

Statewide figures for the current year indicate that the loss in non-public enrollment was partially offset by an increase in state public school enrollment. Last year 836,632 students were enrolled in public schools throughout the state; the 1971-72 total is 843,586, an increase of 6,954 students.

A large percentage of private school enrollment continues to be classified as Catholic although Catholics as a percent of total private school enrollment have declined from 85 percent in 1967-68 to 74 percent this school year. The decline is explainable in part by the closure of a number of Catholic schools and the concurrent rise of non-sectarian private schools since the 1967-68 school year.

There were 121,509 students enrolled in Catholic schools in 1967-68. This total declined notably in the following two school years, rose briefly to 121,264 in 1970-71 and declined in the current school year by 8,597 for a 1971-72 total of 112,667.

If non-public schools other than Catholic are compared to statewide Catholic trends a significant increase from 21,504 in 1967-68 to 42,324 in 1969-70 can be noted. Enrollment dropped to 40,447 last year and further declined by 855 for a total of 39,592 this school year.

PUBLIC AND NON-PUBLIC ENROLLMENT SINCE 1967

Year	Public	Catholic	Non-Catholic
1967-68	830,656	121,509	21,504
1968-69	851,850	115,430	20,320
1969-70	840,573	112,606	42,324
1970-71	836,632	121,264	40,447
1971-72	843,586	112,667	39,592

SELECTED PRIOR STUDIES OF
REAL ESTATE RESEARCH CORPORATION

Real Estate Research Corporation is the oldest and largest consulting firm engaged exclusively in analysis of land use and public affairs. The staff of nearly 200 in 10 regional offices handles about 2,500 assignments per year for public agencies at all levels of government and for private companies and institutions. Continuous involvement in real estate markets throughout the country provides Real Estate Research Corporation with long-range perspectives on urban growth patterns and the elements that can cause those patterns to change.

The company's professional staff is experienced in conducting socioeconomic analyses and strategy studies for local government agencies, private firms, and national associations. These studies cover a wide range of subjects, but they are characterized by offering pragmatic recommendations for solving complex problems. In the following list of assignments, the focus is upon school desegregation, educational planning, and race relations.

A. Achieving Effective Desegregation

At the request of the President's Cabinet Committee on Education and the Office of Education, Real Estate Research Corporation conducted a survey and analysis of existing knowledge and experience of school desegregation in the United States. This five-part study was completed in September 1971.

The major document, titled Achieving Effective Desegregation, contains the major findings concerning the specific techniques and methods that have proven most effective in helping individual school districts carry out desegregation. The report was designed essentially as a handbook for practical, everyday usage by local school officials seeking to achieve effective desegregation, and by federal officials funding applications for desegregation assistance. The major portion of this report is now being published by Lexington Books (a division of D. C. Heath) for nationwide distribution. The Real Estate Research Corporation staff members cited as co-authors are Al Smith, Anthony Downs, and M. Leanne Lachman.

The other products of this comprehensive study included formulation of policy guidelines for federal administrators, overall design of a national data system to provide the basis for evaluating national and local desegregation progress,

submission of four papers prepared by outside experts on specific aspects of desegregation, and compilation of a bibliography of school desegregation literature.

It should be emphasized that the definition of "effective desegregation" developed in our study extends beyond physical desegregation. It concentrates upon social adjustment and encompasses school-community relations, student adaptation, administrative concerns, teacher training, and curriculum change. For each of these five subject areas, techniques are presented for bringing about change.

B. Competition and Community Schools

This assignment for The Brookings Institution involved preparation of an analytical essay on the relationship of competition to the concept of community schools, especially in big cities. It included an analysis of possible means of evaluating educational performance in schools, plus. development of alternative means of increasing the degree of competition in the provision of education in urban areas. This study has been published in the volume of essays, Community Control of Schools.

C. Report on the Impact of White Racism on the Operation of Public and Private Institutions in the United States

For the Civil Rights Commission, Real Estate Research Corporation prepared a study that relates recommendations for the reduction of racial tension to the specific community or subfederal level groups best suited to implement them. It was contended that, in order to establish a method of operation for increasing active participation of citizen and civic groups, a staff must understand the capabilities and desires of such groups to participate in suggested programs. This assignment included preparation of an essay published by the Commission under the title, Racism in America and How to Combat It.

D. Background Research and Draft Preparation for the Report of the National Advisory Commission on Civil Disorders

Real Estate Research Corporation participated extensively in the preparation of the Commission's study and report in several ways. First, we developed the research plans and the overall organization. Second, staff members

organized, analyzed, and reported on the field investigation materials collected by the Commission in more than 20 cities; we also assisted in the investigation. Third, Real Estate Research Corporation performed research on the relevance of proposed and ongoing programs to prevent civil disorders, developed and evaluated long-range strategies and program alternatives for alleviating socioeconomic problems, and performed cost analyses of various programs. Fourth, Real Estate Research Corporation wrote the initial drafts of five of the Report's 17 chapters.

One of our specific assignments was to develop educational policy recommendations for presentation to the Commission and for inclusion in the Report. After interviewing leading educational experts across the country, we developed a program of suggested strategies and policy recommendations to combat unequal educational opportunities in urban ghetto areas. This analysis also required extensive fact-finding on the nature and degree of racial inequality in educational opportunity in central-city, low-income areas.

E. Residential Segregation by Income and Race -- Its Nature, Its Relation to Schools, and Ways to Ameliorate It

This was testimony presented before the Senate Select Committee on Equal Educational Opportunity. Dr. Anthony Downs outlined a process by which major changes in existing attitudes, behavior patterns, and institutional structures could be realized in order to alter residential segregation. Dr. Downs explored the causes of residential segregation and their impacts on community schools and the educational and social experience offered. He presented both long-range and short-term tactics to develop an overall social, financial, and psychological strategy to achieve dispersal of low- and moderate-income housing throughout major metropolitan areas.

F. Projections of Population and School Enrollments by Community Area for the City of Chicago, 1970 and 1975

For the Chicago Board of Education, Real Estate Research Corporation performed detailed demographic analysis of existing population and recent trends based on Census and enrollment data; projections of future population using a complex computer simulation model; breakdown of projections by 75 small areas and adjustment to take into account future urban renewal and other development plans; and derivation of white and nonwhite enrollment forecasts for the 75 areas.

A similar study was prepared for the Archdiocese of Chicago School Board, projecting population as of 1970 and 1975 in the north and northwestern portions of Cook County, then estimating the proportion of the population that would be Catholic, and then projecting the number of elementary and high school age children in Catholic families in the area.

G. A Plan for Educational Investment

This analysis for the New England Regional Planning Commission was part of a housing action program prepared for the six-state New England region. The overall program related housing policy to social need and to the regional development plan.

H. Comprehensive Housing Strategy for the City of Cincinnati

This study is funded with 701 planning grants and is designed to result in a housing strategy that can be used to monitor and direct housing development in the neighborhoods of the City of Cincinnati. The work program will be completed by mid-October 1972, and the full strategy development will take about 15 months. This policy planning assignment is directed by a local Working Review Committee on Housing, which includes representatives of local, regional and federal government, community residents, financial institutions, trade unions, realtors, and housing interest groups. This unique undertaking will provide a model for strategy development for cities throughout the United States.

The fact that Real Estate Research Corporation was selected to assist the City of Cincinnati in developing a housing strategy is cited here to demonstrate the company's thorough knowledge of housing market analysis. Since resegregation is so closely tied to changing residential patterns in a city, such knowledge is essential for development of action recommendations to reverse resegregation trends.

DR. ANTHONY DOWNS

Staff writer for The National Market Letter

Author of Who Are The Urban Poor? published by the Committee for Economic Development

Author of Racism in America published by the U. S. Civil Rights Commission

ALAN J. SMITH
Senior Analyst
Washington, D.C. Office

Academic:

Harpur College, Binghampton, N.Y.; B.A., 1963, History and Economics
Syracuse University; Master of Regional Planning, 1967
Doctoral Work, Doctor of Social Science Program

Experience

Mr. Smith has been with Real Estate Research Corporation since 1967. In his capacity as an analyst he has conducted numerous demographic studies. During the course of this work, Mr. Smith has made estimates and projections of growth in school enrollment and the demand for school facilities. In addition to his work, Mr. Smith has been involved in campus planning studies and studies of municipal and school expenditures and financing. Examples of this work include analysis of the impact of a large Federal facility, the Weston, Illinois Accelerator plant, on municipal and school expenditures and the Community Renewal Plan for Utica, New York. Work was also completed on the potential for using school campuses as a basis for redeveloping neighborhood areas on the Near West Side of Chicago.

More recently, Mr. Smith has conducted research into the problems of providing housing and transportation for low-and moderate-income families. As part of this work Mr. Smith has studied the impact of physical and racial isolation on community attitudes and the effects of transportation on the travel behavior of school children. Examples of this work include A Housing Strategy Study for Greenville County, South Carolina; Low-Income Housing, Utica, New York; and The Demand for Transportation in Pittsburgh's Model Neighborhood. The former study was conducted as part of the Urban Mass Transportation Administration's Center City Transportation Project.

Prior to joining Real Estate Research Corporation, Mr. Smith was employed as an urban planner and economist with Syracuse City Planning and Urban Renewal Agencies, the Onondaga County Planning Department, Economic Consultants, Inc., and Sargent, Webster, Crenshaw and Folley, Architects and Engineers. In his capacity with these organizations, he conducted a broad range of general planning and renewal studies, as well as research into the problems of school enrollment and campus planning in Syracuse, New York.

In addition to the above work, Mr. Smith has completed extensive studies and research into the fields of location theory and space economics and metropolitan problems including a study of the problem of "Planning and Financing Public Education in Metropolitan Areas."

ROGER MALEK
Senior Analyst
San Francisco Office

Academic

University of California - B.S. - Architecture

Experience

Mr. Malek's professional experience includes extensive involvement with social and community program planning and development. As an integral part of his overall interest in relating problems of institutional service and change to program development, he has participated actively in the application of user surveys, consumer studies, group interaction methods, and research findings as applied to institutional development planning.

Significant projects of Mr. Malek's that involved these methods include a planning study for The Evergreen State College in the State of Washington and a comprehensive study to assist the San Francisco Public Library in its evaluation of library use patterns throughout the system and its financial and physical planning for new main library facilities. Mr. Malek is presently involved in a study for the Drew Postgraduate Medical Center in the Watts section of Los Angeles; the primary thrust of the assignment is development of health programs that will be responsive to the needs of the community.

Mr. Emory Via, Director
Center for Human Resource Development
THE SOUTHERN REGIONAL COUNCIL
5 Forsyth Street
Atlanta, Georgia 30303

Dear Mr. Via:

I am writing to you at the suggestion of George Esser of the National Affairs Division of The Ford Foundation. He has indicated that you may be interested in the World of Work program which is currently being conducted by the Educational Systems Development Corporation in cooperation with the New Orleans Public Schools.

For your information, I have enclosed a brief description of the World of Work program and also a description of the purposes and organization of the Educational Systems Development Corporation.

We are currently seeking financial support for the continuation of the World of Work program during the 1970-71 school year. I would therefore appreciate the opportunity to discuss with you the type of additional information which you might need to determine the possible interest of The Southern Regional Council in providing partial support for this effort.

If you wish to discuss this matter, please do not hesitate to call me at AC504/866-5427. I will look forward to your reply.

Very truly yours,

Glenn Hontz

EDUCATIONAL SYSTEMS DEVELOPMENT CORPORATION

P. O. BOX 4233, NEW ORLEANS, LOUISIANA 70118

The Educational Systems Development Corporation seeks to stimulate educational improvements through research and innovative programs. It is designed to work closely with existing educational institutions and other agencies to develop programs as they are required to meet critical needs.

An an independent agency, ESDC is not restricted by the purposes or administrative regulations of any school system, college, or other agency. This avoids any conflict of interest within the internal operation of a given institution, which might result if ESDC were subsumed under that institution. This independence also insures the freedom necessary to effectively foster needed changes. It further permits ESDC to stimulate cooperative efforts among a wide variety of educational institutions and social or governmental agencies which have not previously focused their collective efforts on certain educational problems.

PURPOSES

The basic purpose of ESDC is to stimulate research and development in areas of critical educational need. More specifically, it undertakes activities to:

1) Identify and analyze educational problems and to determine areas of needed development.

2) Develop research studies and pilot programs to test the effectiveness of educational innovations in practical settings.

3) Provide the training required for personnel to carry forth these programs successfully.

ORGANIZATION

The Educational Systems Development Corporation is legally constituted under the provisions of the State of Louisiana Revised Statutes pertaining to the organization of non-profit corporations and is classified as a tax exempt organization under the regulations of the Internal Revenue Code.

The program of ESDC is planned under the guidance of an Executive Board comprised of representatives from the fields of education, business, medicine, government, and industry. Program activities are administered by a permanent professional staff. As necessary, additional professional and clerical personnel are secured to plan, conduct and evaluate specific program activities. These personnel include project directors, consultants, instructors, secretarial assistants and others required for the duration of a certain project.

Labor? Soc?

SUPPORT

Support for specific program activities is sought from appropriate foundations and from certain agencies of federal, state and local government. In addition, general support for administrative costs and for extensions of specific programs is provided through private and corporate gifts and donations.

PRESENT PROGRAM

Support for specific research and development projects administered by ESDC has been provided by the following institutions and organizations:

Contract Basis?

City of New Orleans
Economic Development Administration
Humble Oil and Refining Company
International Business Machines
Jefferson Parish School Board
National Alliance of Businessmen
New Orleans Voluntary Equal Employment Council
Orleans Parish School Board
Plans for Progress Program
Shell Oil Company

EDUCATIONAL SYSTEMS DEVELOPMENT CORPORATION

P. O. BOX 4233, NEW ORLEANS, LOUISIANA 70118

what other projects?

A SUMMARY OF

THE WORLD OF WORK PROJECT

During the past three years, the World of Work Project has developed and field tested several innovative instructional programs and procedures which have now been adopted by schools in the New Orleans metropolitan and suburban area. Significant among these are: a series of six half-hour educational T.V. programs dealing with topics relative to occupational information and career decision-making, a seven-week unit of study for use at the junior high school level, a directory of community resources for use by teachers and counselors in planning field trips to business and industrial sites for school classes, an illustrated student newsletter dealing with the local, state, and national employment picture, a series of career-day activities held at schools throughout urban and suburban New Orleans which provides opportunities for students from all socioeconomic backgrounds to discuss their career interests with personnel in various career categories, and a comprehensive directory of instructional materials in the field of occupational and career information for use by teachers and students.

During 1968-69, the instructional programs developed as a part of the World of Work Project reached a total of 4,136 secondary school students and more than 360 elementary school students. In-service training programs were conducted for 36 teachers and counselors who in turn became agents for change by conducting orientation and training sessions for fellow teachers and counselors at their respective schools.

The long-range objective of the World of Work Project is to develop and field test an articulated program of career education for students in elementary, junior high and senior high schools. This program seeks to provide up-to-date instruction in occupational information so the teacher-counselor teams can assist the students in ultimately making their own sound decisions in career selection. Pilot programs to accomplish this purpose are field tested on a trial basis and then thoroughly researched in practical settings before they are installed as part of the regular school program. This procedure has proved to be highly effective in developing programs which are practical within the realistic setting of the local school situation and which are also meaningful and motivating for students.

The overall schedule of past and future phases of the project are outlined below:

1966-67	1967-68	1968-69	1969-70	1970-71
Junior High Pilot Program	Junior High Research & Evaluation	Junior High In-Service Training	Junior High In-Service Training	Junior High In-Service Training Concluded
		Elementary Pilot Program	Elementary Pilot Program cont'd.	Elementary Research & Evaluation
			Senior High Pilot Program introduced	Senior High Pilot Program cont'd.

The general intent of this design is to initiate pilot programs which test the general feasibility of certain methods and materials at a given grade level and, thereupon, to design a research and evaluation effort to carefully appraise the practical effectiveness of these methods and materials. Stemming from this evaluation, the next step is to design in-service training programs which provide the necessary instruction for teachers to utilize newly developed methods. In this manner, the program is implemented throughout the entire school system as a regular part of the curriculum experience of all children. This well-established procedure for educational innovation has proved highly successful in the New Orleans area.

The long-range objective of the World of Work Program is to create a complete curriculum extending from elementary through high school. The program seeks to increase progressively each student's understanding of careers, to help him form favorable attitudes toward himself and his future role in the labor force, and to provide him with the skills essential for effective career planning.

The World of Work Project is administered by the Educational Systems Development Corporation and is conducted in cooperation with the New Orleans Public Schools. Principal financial support for this program is currently being provided by the National Alliance of Businessmen and the New Orleans Voluntary Equal Employment Council, with supplementary contributions from local business firms.

Southern Regional Office
78 Marietta Street, N.W.
Atlanta, Georgia

Dear Ken:

I have your letter of invitation to participate in your VISTA Training Program on the evenings of February 2nd and 3rd. I plan to be there.

I would like to present some general background on regional economic and political developments, changes in the region, some comments on the patterns of Negro-white relations, some problems and prospects of working with both whites and Negroes, and some of the sources of hope in the Southern scene.

It would be my intention to keep the initial presentation short and then see where the questions and comments lead us. Perhaps for the first evening, since you would like to use the film, "The Face of the South", we should simply show it and have a brief comment from me and let that combination stand for my presentation before getting into the discussion.

I plan now to join you for dinner on both evenings.

Sincerely,

Emory F. Via, Director
Labor Program

Mis

Dear Mr. Bia:

This letter is to confirm your participation in our VISTA Training Progran on the evenings of February 2nd and 3rd to discuss, in perspective, the picture of the South as seen by the Southern Regional Council.

As suggested, both evening sessions will begin at 7 p.m. On February 2, 1967, we would like to start with the film, THE FACE OF THE SOUTH, and have you follow-up with some discussion about the uniqueness of this region in terms of its political, social, and racial complextion.

We are trying to encourage total participation of our trainees and will recommend that you present an overview for the first thirty (30) minutes and build your presentation around questions which may be raised by participating individuals.

On February 3rd, beginning at 7 p.m., we would like you to follow-up the meeting with further details in line with the points we raised on the telephone.

Be kind enough to provide us with a confirmation letter and a brief statement about those areas which you expect to cover.

Our evening sessions are being held on the Old Gammon Campus, 9 McDonough Boulevard, S. E. We will be happy if you would wish to have dinner with us there at 6 p.m.

Yours very truly,

E. K. JONES VISTA TRAINING CENTER

February 3, 1967

Dear Friend and Co-worker:

You are cordially invited to spend an evening "wining and dining" with the Brotherhood of Sleeping Car Porters and the Ladies Auxiliary of the Atlanta Division.

Time: Friday, March 10, 1967

Place: Parliament House, 70 Houston Street, N.E.

The occasion -- a Testimonial Dinner honoring three courageous leaders of Labor, who during the early struggles of the Brotherhood inspired the porters and their wives to stand side by side in defiance of the mighty Pullman Company to build the Union.

Be it known that the lowly Pullman porters working under the most trying and deplorable conditions changed the status from equipment on the car to a first-class citizen. We invite you to hear our success story.

A cocktail party at 6:30 P.M. will precede the Testimonial Dinner scheduled for 7:30 P.M.

Speaking on the occasion will be our International President and Counselor A. Philip Randolph and others.

The honorees are: Mrs. Gertrude Ross, President of the Atlanta Division Ladies Auxiliary; Mr. Thomas Culpepper, President of the Atlanta Division of the Brotherhood and Mr. B. F. Hurt, former president of the Division.

For your convenience we are enclosing a reservation card. Please make reservations early.

Looking forward with a great deal of pleasure to seeing you on Friday, March 10, 1967.

Sincerely and fraternally yours,

H. B. McCONNELL

Dear Ken:

Here is an outline indicating most of the topics which I discussed with the group. You well know, in such an informal give-and-take, that some items were treated in greater detail than others.

It was a good group and I was happy to be with them. Lots of differences in background and experience which make it difficult to know just how effectively I made contact with what they most needed to know.

All good wishes as the group progresses through its training program.

Sincerely,

Emory F. Via

MILES COLLEGE
BIRMINGHAM, ALABAMA 35208

OFFICE OF THE PRESIDENT

February 17, 1967

Mr. Emory Via
Southern Regional Council
5 Forsyth Street
Atlanta, Georgia

Dear Mr. Via:

On March 13-14, 1967, Miles College again joins with metropolitan ~~Birmingham as~~ partners in progress in a new venture. In cooperation with the U. S. Labor Department and the University of Houston, we are sponsoring a conference on manpower. This is my personal invitation and urgent request that you will come as a participant in this conference.

The conference aims to look at the manpower needs of the nation, but particularly, in metropolitan Birmingham. As we focus on these needs, we will be making an effort to look at the resources in this community with a view to finding ways of recruiting the kinds of people needed by business and industry, and offering them the assistance in counseling and training to make them more marketable and available. The U. S. Labor Department is sending a special team to the community in cooperation with the state and local employment offices as participants and leaders for this conference.

This conference is not a conference where people will be talked to, as much as where we talk together. I have said to the people in Washington and Dr. J. Earl Williams of Houston, that the leaders of this community are ready to move forward with any program that will improve the labor supply, that will upgrade present employees, and that will provide means of moving underemployed and overemployed into the labor market.

If you will attend this conference or will send one of your top executives, please call my office, 788-4641, and confirm this invitation.

Please find enclosed a tentative program.

Yours truly,

L. H. Pitts

Schedule for Dr. Emory Via
March 16, 1967

11:30 Arrive Campus

12:30 Lunch with students and Mr. Feurer and Mrs. McCray

1:30 Political Science class - Mr. Feurer

3:00 Senior Seminar in Sociology - Sumner 104 - Mrs. McCray

M E M O R A N D U M

March 14, 1967

TO: Emory Via

FROM: Ed Stanfield

Lest I somehow miss you -- I called Mrs. Carrie McCray in Talladega and secured the following information (in addition to confirming that you will be there):

The first item on your agenda is an informal lunch with a group of students. She asks that you arrive around 11:30, as the luncheon is to be at 12:00.

She asks that you come to her office on the second floor of Swayne Hall. You can park on the parking lot at the administration building and ask directions; it is a small school.

From 1:30 to 3:00 you will meet with a political science class. From 3:00 to 4:30 you are to meet a senior seminar in sociology. She calculates that it might be 5:00 o'clock before you could get away.

Mrs. McCray seemed very pleased that you are coming. After I finished outlining your credentials she even said "Thank you, Dr. Stanfield" -- which I take as an effort to maintain the fiction that she would have been just as satisfied to have me!

Many thanks, and good luck.

Ed

SENIOR SEMINAR IN SOCIOLOGY

Seminar Theme:

"Social Change in America Today -- Implications for Social Welfare and Education"

Schedule of Invited Lecturers

March 16, 1967 - "The Process of Social Change in the South"

3:00, Sumner 104

DR. EMORY VIA, on leave from the University of Wisconsin to direct the Labor Project for the Southern Regional Council. Dr. Via is from the South and has been at the University of Wisconsin as professor of Labor Education. He comes to us through the Southern Regional Council.

March 21, 1967 - "The Law and Social Change"

2:00, Sumner 104

MR. OSCAR W. ADAMS, JR., Birmingham attorney and attorney for the NAACP Legal Defense and Education Fund. Mr. Adams is a graduate of Talladega College.

March 23, 1967 - "Social Change and the Negro Family"

2:00, Sumner 104

DR. HERMAN HODGE LONG, President of Talladega College, Director Human Relations Institute.

April 11, 1967 - "Social Protest and Social Change"

2:00, Sumner 104

REV. T. Y. ROGERS, JR., pastor of First African Baptist Church of Tuscaloosa, active in Civil Rights, President of Confederation of Alabama Political Organizations, President of Tuscaloosa Citizens for Action Committee.

April 17, 1967
April 18, 1967 - Two-day seminar and workshops in specific areas of Social Welfare and Education:

(time and place to be announced)

I. "Child Welfare Today"

MRS. ANNIE LAURIE TUCKER, Associate Director Sheltering Arms Childrens Service, New York City. Mrs. Tucker was consultant for New York City Department of Welfare in setting up of its adoption program. Mrs. Tucker is a graduate and trustee of Talladega College.

Ia. Workshop - "The Child Welfare Worker"

II. "Some Trends and Some Problems in Public Welfare"
MISS MAE NEELEY, Director of Division of Adoption New York City Department of Welfare. Miss Neeley has been with the Department of Welfare in New York City for many years, and comes to us with broad experience in public welfare services.

IIa. Workshop - "The Worker in Public Assistance"

III. "Special Problems of Youth in the Schools Today"
MISS THELMA GOODE, Guidance Counselor, Trenton, New Jersey. Miss Goode is a graduate of Talladega College.

IIIa. Workshop - "The Guidance Counselor"

April 25, 1967
April 26, 1967 - Two-day seminar: "Social Welfare Today and Tomorrow" with emphasis on social change and trends in social welfare.
(time and place to be announced)
DR. MARYELLEN GARDNER, Department of Sociology, The University of the City of New York. Dr. Gardner has a broad knowledge of the field of social welfare, having developed the curriculum for courses in Social Welfare at Hunter College, New York, Fairleigh Dickinson College, New Jersey and Queensboro College in New York City.

(Date to be Announced) - "Social Change and Social Problems, with emphasis on Mental Illness"
April 20, 1967
DR. ROBERT BERGEN, Department of Sociology and Psychiatry, Dartmouth College.

May 5-7, 1967 - "Problems of the Cities -- Implications for Social Welfare and Education"
PROF. ELTON W. HAM, Associate professor of Political Science and Director of Bureau of Municipal Research, Kalamazoo College, Kalamazoo, Michigan.

I'M GOING OVER TO SET UP SEMINAR ROOM - WOULD YOU BE ABLE TO BRING DR VIA OVER AT 3:00.

INSTITUTE OF LABOR AND INDUSTRIAL RELATIONS

UNIVERSITY OF MICHIGAN-WAYNE STATE UNIVERSITY
ANN ARBOR DETROIT

March 22, 1967

Mr. Emory Via
c/o Southern Regional Council
5 Forstythe Street, N.W.
Atlanta, Georgia 30303

In Reply Please Refer to:
4901 Evergreen Rd.
Dearborn, Mich. 48128

Dear Mr. Via:

Save the dates of May 25 and 26 for a most important conference.

The Institute of Labor and Industrial Relations, in cooperation with the Liaison Office of the Equal Employment Opportunity Commission, has planned a conference for the directors and chairmen of state and municipal civil rights agencies.

You are probably familiar with the study of Patterns of Discrimination in Employment conducted by Wayne State University for the E.E.O.C. last year; perhaps you have had an opportunity to examine the findings and conclusions. The data from this study, similar observations by others, as well as changes in the population, economy, and civil rights movement combine to create a growing consensus about the need for agencies to review their direction in order to achieve greater gains.

The conference will be addressed by several outstanding theoreticians and practitioners in the areas of manpower and civil rights. It is being planned as an informal, off-the-record examination and exchange among those who bear the major responsibility for expanding and improving employment opportunity in their respective jurisdictions.

You will receive a formal invitation and details about the speakers and agenda soon. The site is Fairlane, the former Henry Ford estate, on the Dearborn Campus of The University of Michigan. Its location, away from the city, is greatly conducive to deliberation and discussion with a minimum of distractions but with modern comfortable facilities.

We hope you will plan to attend.

Sincerely,

Frances R. Cousens

(Dr.) Frances R. Cousens, Director
Patterns of Discrimination Project

FRC:ef

Misc Proj.

MEMORANDUM

TO: Participants at Fair Lane Conference

FROM: Frances Cousens

DATE: May 18, 1967

Your reservation form has been received and I am happy that you will be with us at the conference of civil rights agencies. Approximately sixty persons are coming and will represent a wide variety of state and municipal agencies from all parts of the country. The consultants are experts with knowledge and experience and will lead discussion on the most important aspects of civil rights.

Unlike many conferences, there will be a minimum of being "talked at;" relatively little formalized structure and ample opportunity for exchange and participation by the conferees.

The detailed agenda will be finalized by a small planning group meeting on Wednesday; this will be distributed, along with a number of position papers, when you register on Thursday morning. We can tell you, however, that the plenary sessions will cover areas such as: "Twenty Years of Fair Employment Practices Legislation" by Harold Fleming; "Tension and Crisis in Cities as a Consequence of Employment Discrimination" on the basis of a study of Watts by Paul Bullock; "The State of State Agencies" by Eric Polisar; "American Liberalism and Black Power" by Professor Arnold Kaufman of the University of Michigan Department of Philosophy; and commentaries by Ed Howden and K.C. Jones.

The findings of the Wayne State--E.E.O.C. study will be discussed and probed for their implications for affirmative action programs; also a proposal for another study under consideration for which we will solicit your comments and recommendations.

There will be free periods interspersed with both plenary and small group sessions; some time is also being set aside for a tour of the Fair Lane grounds and the Dearborn Campus which are beautiful at this time of year.

Now for some details about getting from the airport to either Holiday Inn or Fair Lane, depending on when you are arriving. We have arranged with the dispatcher of the limousine service to put you on the proper form of ground transportation. When you have collected your luggage, report to the limousine desk, located at the exit to the parking lot on the lower level of the main terminal. If you disembark in another wing, ask to be taken to the main terminal and proceed to the limousine service desk. We will have supplied them

with your names and respective times of arrival; in some cases, you may have to wait a little while for the other members of a party but this should not exceed twenty minutes or so.

A few of you who cannot be included with such a group will be directed to a cab. The cab driver need only be told that you are going to the Holiday Inn on Michigan, near Telegraph Road or the Fair Lane Conference Center on the Dearborn Campus of the University of Michigan. A map of the Campus was sent you in an earlier mailing which you might wish to bring with you; however, I am reasonably certain that limousine and cab drivers will know the way.

Several people have inquired about mode of dress; Spring has finally arrived in the Detroit area and the temperature is in the 60's during the day, and 40's in the evening. We will have Fair Lane all to ourselves or share it with only one other group; therefore, you may feel free to dress informally and for maximum physical comfort. Ladies might consider bringing a pair of low-heeled shoes for the tour of the grounds.

One disadvantage of the conference center is that no liquor can be served because it is a state-owned facility; however, there is a cocktail lounge at Holiday Inn for imbibing after sessions.

We are hoping to adjourn the conference no later than 5 P.M. on Friday and because you will be only ten miles of freeway from the airport, you can plan on 20 minutes (no more than 30 even in a traffic jam) to reach your return flight.

I hope you have a pleasant trip here and may be sure that we will do all that is within our power to make your attendance as comfortable and productive as possible. I am looking forward to greeting old friends and meeting new ones.

Dear Mr. Via:

As of this date, we have had no reply to our invitation to attend the Fair Lane conference on May 25 and 26. Since all of our desks are deluged with invitations and publications of one sort or another, I can well understand how one may have decided to attend and yet neglected to return the reservation form.

There is already considerable conjecture about the coming summer and how "hot" it may become in various communities; moreover, some public agencies have become targets for legal action and other expressions of dissatisfaction on the part of the Negro community because of a perceived lack of effectiveness. We are not so naive as to promise you methods of resolving such conflict situations; nevertheless, much can be gained from a frank discussion of the problems common to all agencies and communities and much can be learned from a sharing of both successful and unsuccessful experience.

We urge your attendance at this conference; much thought has gone into the content and arrangements and a group of specialists will be here to serve as consultants. I know that agency directors and their commission chairmen are busy individuals but am confident that you will find this a worthwhile experience.

Please let us hear from you no later than May 12 and we hope that you will decide to come.

Sincerely,

Frances R. Cousens

Dear Mr. Via:

Enclosed is the brochure for the Fair Lane conference on May 25 and 26 about which we wrote you earlier and which we hope you are planning to attend. I have received word from some who will attend and a few who find it impossible to do so. In any case, I believe all of you will want to have this additional information about the purpose of the conference.

This was not mentioned in the first communication, but you will be happy to know that we are planning to cover all your expenses except for travel. We need to know your travel plans as soon as possible, so please complete the reservation form and return it to us at your very earliest convenience.

When you arrive at Metropolitan Airport, go to the ground transportation desk of Airport Service Lines for a limousine to either Holiday Inn (Michigan Avenue at Telegraph Road) or to Fair Lane, depending on your time of arrival.

which

More detailed information and the conference agenda will be sent you well in advance of May 25.

We are looking forward to your attendance and participation.

Sincerely,

Frances R. Cousens

Dear Dr. Via:

I am enclosing ten announcements on a Seminar on Protective Labor Legislation. This Seminar will be held on the campus of Troy State College, Troy, Alabama, on Wednesday, April 26, 1967. I hope your schedule will permit you to attend.

Since the topics to be discussed at the Seminar should be of interest to many individuals with whom you have contact, perhaps by word of mouth or through the use of weekly newsletters (if your organization has one) you can help us to reach these people and enable us to make this Seminar a big success.

I am looking forward to seeing you at the Seminar.

If you wish additional announcements, please contact Dr. Tom Eason, Troy State College, Troy, Alabama.

Sincerely yours,

Harold L. Smith

Dear Mr. Via:

I am glad you have accepted our invitation to attend the Equal Employment Seminar to be held at Paschal's Motor Hotel, Atlanta, on April 10, 1967. Your participation will contribute greatly to the success of the meeting.

Registration for the meeting will begin at 8:00 a.m. in the hotel lobby. A luncheon for all participants is planned, which will cost each person $2.00. This amount will be collected during registration.

A table will be provided in the hotel lobby for representatives from community organizations and groups to display pamphlets, leaflets or other type informational material about the activities of their organizations. It is intended that these materials be made available for distribution to the insurance company and Blue Cross organization representatives. Therefore, if you represent an organization or group that has such materials available, I would appreciate your bringing a small supply for dissemination.

I am looking forward to seeing you at the meeting.

Sincerely yours,

James W. Murray

A

EV — Need few attended at Conference

Called Miss Hankerson & said that EV would represent Soc Sec Apr. 10 wj 3/30/67

March 17, 1967

Mr. Paul Anthony
Southern Regional Council, Inc.
5 Forsyth Street, N. W.
Atlanta, Georgia 30303

Dear Mr. Anthony:

The Social Security Administration has contracted with Blue Cross-Blue Shield organizations and major commercial insurance companies in the administration of Medicare. These organizations and companies pay Medicare hospital and medical bills as agents of the Federal Government and, as contractors, have equal employment opportunity responsibilities under Presidential Executive Order 11246.

The Social Security Administration is sponsoring an Equal Employment Opportunity Seminar in Atlanta on April 10, 1967. The meeting will bring together home office, regional and local management personnel from 15 major commercial insurance companies and the Blue Cross-Blue Shield, along with representatives of regional and community organizations from Atlanta and the Southeast who are particularly concerned with the employment of minority persons. These companies will include among others, Aetna, Equitable, John Hancock, Metropolitan, Mutual of Omaha, Prudential and Travelers. Since the equal employment opportunity requirements cover all segments of the contracting organizations, the seminar will seek to encourage managers of local offices of these companies to increase minority employment in their commercial office forces.

The meeting is designed to enable insurance company representatives -- the employers -- to get together with various community groups -- the sources for prospective employees -- to discuss frankly job opportunities in the insurance field. Our plans call for general sessions in the morning of the meeting and in the afternoon we will

have five work groups on the subjects of: (1) recruiting clericals, (2) recruiting professionals and technicals, (3) the in-office human relationships atmosphere, (4) affirmative selection and promotion procedures, and (5) company self-appraisal of equal employment opportunity progress. Emphasis will be placed upon the cooperative post-conference activities of the participants.

The meeting will be held at Paschal's Motor Hotel, 830 Hunter Street, S. W., Atlanta, Georgia 30314, and will run from 8:00 a.m. to 4:30 p.m. on April 10, 1967.

Because of your leadership and concern for fair employment practices, you are invited to attend the seminar to participate actively and share your views and experience on equal employment with the participants. Your attendance, we feel, will add greatly to the success of the seminar. I would appreciate your notifying me by March 29 whether you will attend. If you like, you may call Miss Theresa Hankerson of my staff (telephone 526-5961) about your attendance. Or, if you wish additional information, please let me know.

Sincerely yours,

James W. Murray

Dear Emory:

I am certainly glad that you and Al could come down and participate in the Savannah meeting last week. I am sorry that we did not take advantage of your presence for more of a contribution but do appreciate your coming.

I do hope that you, Margaret and your son can soon come down for a weekend. Rather than waiting to discuss this at the SRC meeting, you might want to come before that while the weather is still good. At any rate, we will count on a visit soon.

Best regards,

Courtney Siceloff

CS/fm

November 24, 1965

Professor Karl U. Smith
Department of Psychology
University of Wisconsin
Madison, Wisconsin

Dear Karl:

I am not certain if you know that I am on leave from the School for Workers to be with the Southern Regional Council for a year, but I write to seek your assistance in a matter close to your professional and personal interests.

We would like to have an article of about 2,000 to 3,500 words on problems of testing, with special attention given to occupational tests. The audience to which the article is directed is mixed: moderately sophisticated to very sophisticated, including a variety of professionals, business and labor leadership. They have in common a concern for the attainment of equality and decency in racial relations. It is overwhelmingly a southern audience but includes well placed and influential persons in social action, governmental, foundation, and academic circles.

The need as I see it is for a candid assessment of the uses and abuses of testing -- a clear statement as to what can be expected from tests and what it is improper and impractical to expect from them. I think, too, that a summary of the ways in which bias enters into the test is still quite useful. One special problem that seems to arise out of testing lore and, unfortunately out of Title VII (FEP) of the Civil Rights Act (1964), is the belief that testing is a device for assuring fairness.

I have been surprised all over again by the extent of this belief with no questions asked about the nature or the purposes of the test or whether it is reasonably related to the proclaimed end. The Civil Rights Law recognizes that not just any test is acceptable but that those professionally produced and administered are OK. One would gather that as long as there was no intent to discriminate that a professionally developed test would be accepted. I think this leaves a good bit to be desired.

Incidentally, it would not be necessary to limit your remarks to just the problems of possible discrimination because of race (or the cultural differences for which race is a shorthand symbol), and it would be of real value to have fundamental difficulties tackled. Having said this, though, clear lessons should be drawn, where they are clear, regarding the discriminatory effect of tests.

Although I have described our audience as sophisticated, I am sure that this means a fairly widespread acceptance of tests so long as they are professionally developed. We have found, generally, that we have the greatest impact with material that is moderate in tone but hard hitting in fact presentation and analysis.

The article would be designed for the Council's New South which is currently a monthly, but after the first of the year will be a much more substantial quarterly. Payment for the article would be modest, in the two-figure range. My appeal to you is really based on your own interest and the importance of reaching this particular audience. We would like to see your article by February 15, 1966.

Please let me hear from you about this matter. I will be happy to supply you with such further information or leads that would prove useful to you. I am enclosing a few items that may be of interest.

Sincerely,

Emory F. Via

HEINZ RUHNAU

2 HAMBURG-BLANKENESE
WILDENBRUCHSTRASSE 17E
TELEFON 86 50 39

17th December, 1965

Dear Conroy!

At the end of this year some very important alterations for my future life have been occured. The 15th December 1965 I have been elected as Senator of the Hamburg State. As Secretary for interior affairs in the Hamburg Government I will be responsible for the Community Administration, the Police and Civil Defense problems.

By this, my activity at the Metalworkers' Union, lasting more than 15 years, will be finished. The decision for this step was very difficult for me, because working 15 years in a trade union has built many personal relations. But on the other side it is an honour and an appreciation, I suppose, of the trade unions in our country. Furthermore I am convinced that now the time has come where the young generation has to take over the political responsibility in this nation.

By means of my work in the Metalworkers' Union I have won a lot of good friends. Today I may hope and wish that all these contacts will be preserved also in the future. But the step I have done is not rather big. Now I shall have the task and the responsibility to form from another place the social character of our country and to assist that freedom and democracy in the Federal Republic of Germany will have a stable basis. In the next months there is waiting a lot of work, as the Parliament in Hamburg will anew be elected on 27th March, 1966. In the Parliament we have the absolute majority and I am sure that we shall keep it. After that I hope it will be possible to make holidays for some time.

My family is well. They are all in good health. We would be very glad to hear from you in the very near future.

With my best wishes for a Merry Christmas and a happy New Year I remain

Yours very truly,

Heinz.

Atlanta 3, Georgia

Dear Emory,

After what they have done to mail delivery, I am surprised at nothing the P.O. does -- but even they should know the distinction between a regional man and a national man !

Henry Dixon (Freudian slip, oops) should particularly know better; ah, with friends like these who needs acquaintances ?

Hope this finds Margaret and David well -- you, too.

Warmly, Fred

cc Anthony

NAIRO - 2027 Massachusetts Avenue, N. W.
Washington 6, D. C. - 387-7050

March 9, 1966

Dear Roy:

When I can't adequately perform the work I should do to better this old world I turn to personal pique at the injustices leveled my way by our many imperfect social systems. You will recognize an old complaint in the enclosed letter to United Van Lines and a variety of its agents. You should have seen the letter Margaret vetoed.

I hate to be done in by another fellow's fault which he could easily remedy. This is worth something to me in life. Let's say up to one hundred dollars in this case plus whatever a court might reasonably allow in costs and fees if the case is tight enough. I think the rascals are treating me rascally and should not be allowed off free.

If you say pocket your pique, pride, and accompanying sentiments and be off to sensibility, I will do so, and my continued respects to you. If you say other, and wish to proceed in the light of the above, I say, lay on McDuff (or is that sufficiently Scandahoovian)!

Margaret is currently in two shows in two states. Awards in each. Sold a major oil this week. Marketable are the works of the true professional, we continue to say.

My best to all there. At least you know the juices still run What can you expect in a warm climate?

Sincerely,

Emory F. Via

Mrs. Joyce Ebi
School for Workers
825 Extension Building
University of Wisconsin
Madison, Wisconsin

Dear Joyce:

Can't you cook up troubles in your own union sufficient to keep you busy so that you will not interfere with the internal workings of mine to the extent of electing its treasurer. He won handsomely. Not a word of protest but then I kept quiet.

The enclosed pound cake recipe is for the ever growing file and eventual book. It is widely acclaimed in certain conclaves in Virginia and Georgia as the best yet. For immediate practical purposes the recipe comes from old Mama Via herself. For even more immediate and more practical purposes, the recipe comes from Margaret V. J. Via. No baker she, but the two she has whomped up have been most satisfying.

It was good to see Owen and Frank in Detroit. Tell all others I'm sorry they were not able to show.

Best wishes to Betty, Al, and to all other friends of good standing.

Sincerely,

Emory F. Via

June 6, 1966

Dean T. J. Shannon
University Extension Division
The University of Wisconsin
Madison, Wisconsin 53706

Dear Ted:

Thank you for your letter regarding the Regents' action approving my leave for a further year running to August 31, 1967.

The travel schedule here is as heavy as with the Division, except that it tends to be spread over eleven states. I have just returned from an ILGWU education conference at Daytona Beach which had followed immediately upon my participation at the White House Conference "To Fulfill These Rights". Incidentially, I served as a consultant to the White House Conference which meant that I was on the task force dealing with the section on economic security and welfare. This led ultimately to my serving on a panel with four of the sessions dealing with our task force's report at the conference itself. Bill Foster (Law) also served as a consultant. I believe the two of us were the only University of Wisconsin-connected persons among the forty or so people nationally who were used on the various task forces for the conference. Should this get a mention in MEMO?

The year has been fruitful and many respects but still full of frustrations when I look at all that there is to do. I remain appreciative of your willingness and cooperation in securing leave for me and for your interest in the program here.

Sincerely,

Emory F. Via
Director, Labor Program

June 9, 1966

Manager
Sheraton-Park Hotel
Washington, D. C.

Dear Sir:

I was a registered guest in your hotel from May 31st through June 2nd. With a conference of 2500 persons making use of your facilities I know that it was a time of unusual business and harrassment.

I write simply to say that I have never before been in so large a hotel where service and courtesy were so uniformly good. It was a real pleasure to have dealt with housemen, maids, bellboys, and the people at the front desk and to have always been treated ably and kindly.

I know that a full thousand things must have gone wrong during the same period of my stay with you; however, I could not resist this fan letter since the quality of service I received made an otherwise busy stay quite pleasant.

Sincerely,

Emory F. Via

Professor James Stern
School for Workers
825 Extension Bldg.
The University of Wisconsin
Madison, Wisconsin

Dear Jim:

The grapevine, or whatever it is we use for a communication network, tells me that your status will soon be changing at the University. I have no doubt that we will miss you at the School. I know that I will miss the smiling countenance, long sharp needle, buzz sessions, and occasional brainstorming. I trust that when the Vias return to town that we will be getting to see you and family through other interests if not on a daily work basis. Best wishes to you as you go full-time in economics.

What finally gets me to actually correspond with a human being outside this region is the need to settle Owen Tapper's credit situation which involves the two of us. I am satisfied in my mind that Owen has done sufficient reading, re-reading, thinking, and applying of what he has read to easily warrant the four hours of credit which we had agreed he would be due if all was done satisfactorily.

His readings included articles in books from the following authors: William H. Form, Alice H. Cook, Lawrence Herson, Arthur B. Shostak, Charles R. Walker, James B. McKee, Orme W. Phelps, Donald E. Ray, C. M. M. Hart, W. Lloyd Warner, and Floyd Hunter. If you need more of a report it could be provided. Owen used his reading in connection with our project and I think quite usefully.

Let me know if anything else is needed. Best wishes to you and family.

Sincerely,

Emory F. Via
Director, Labor Program

Dear Professor Via:

This is a very belated "Thank You" for sending me a copy of the 1965 report of the Southern Teaching Program.

This plan has real import for our own Carnagie Grant with A&T, NCC, and TSU. I know that Marshall Colston, who now is Administrative Secretary of our CCNU, would appreciate receiving a copy of it. This noon, I had lunch with Jack Barbash, and he too stated that he would like a copy.

For your own interest, I am enclosing a copy of our report to the Carnagie Corporation. This report was sent to them this spring and describes in some detail various aspects of our program.

Please keep my name on any mailing list you have for future reports on the Southern Teaching Program. I had expected to see you this fall and to get acquainted with you personally, but I just learned that you again are on leave of absence for the coming year. Good luck!

Sincerely,

C. H. Ruedisili

1 September 1966

Mr. Rubin C. Buse

Dear Mr. Buse:

I will come into Madison on September 7. I should arrive some time in the mid-afternoon and will be there until mid-afternoon on September 9 attending a conference at the University.

I will be in touch with you shortly afterII arrive to arrange a convenient time for me to come out to the house. I need to take a look at our own stuff in the basement and would greatly welcome the chance to meet you. I am sure that you've had your hands full in getting settled into the house after your extensive travels. There are one of two items that got lost in the shuffle that perhaps I should raise now. We had had a water softener service provided by Clack. We would like this continued and its cost is included in the rental charge. Similarly, the water bill is included in the rental charge. We have also used the Midland Cooperative for our heating oil supplier. We would prefer that they continue to be the supplier both because of good past relations and because we would like to continue our service contract with them. Incidentially, the cost of the service contract is also included in the rental payment.

If there are any problems that have arisen since you moved in I would be happy to discuss them with you while I am in Madison. I look forward to meeting you and family.

Sincerely,

Emory F. Via

MEMORANDUM

Telephone: 525-8549

To: Emory Via

October 6, 1966

From: E. T. Kehrer
Suite 1422
40 Marietta Street, N. W., Atlanta, Georgia 30303

Subject: Georgia Independent Democratic Caucus

Regardless of the outcome of the November Governor's race, i.e., whether Maddox wins or not, the fact remains that he and his radical right "wool hat" group will control the Georgia Democratic Party machinery for the next four years. Under this "leadership" there will be no place for the moderate Georgian. The resulting vacuum could very well have disastrous results for the Democratic Party and the future of our State.

I would like to suggest the formation of an Independent Democratic Party Caucus to meet this urgent need for a viable structure under which the moderate Georgian, Negro and white, could coalesce.

The chief purposes of this Caucus would be:

1. To provide a district, county, and state delegate organization to reach the rank and file voter, and a communication link up and down the organization and throughout the State.

2. To serve as a program formulating, issue stating, and problem focusing structure for Georgia. This role would be two-fold - pressures on the incumbent administration in an effort to prevent erosion of already existing programs - and development of a framework of program on which to build the next campaign.

To carry out such an important and imperative program it would require that a number of Georgians of stature issue a call for the Caucus and also the commitment of some money for a modest budget.

I would be interested in your reaction to the above proposal.

Sheraton-Battle House Hotel
P. O. Box 1269
Mobile, Alabama

Dear Sirs:

When I was last with you (attending the Alabama Labor Council Convention) I was not able to straighten out the enclosed statement.

My recollection about the bill for September 16 and 17 is that I checked out of the hotel on the 18th very early in the morning, and stopped by the cashier's window before catching the airport limousine. The notes in ink on the face of the statement are mine, and come from my personal copy of my expense account. They indicate the charges and that they were paid on a Diners' Club credit card. Unfortunately, I no longer have the receipts.

Would you have your accounting office check this matter again? If you can come up with a conclusive answer, or if my organization is not billed by the Diners' Club, I will be most happy to pay the amount due.

My most recent stay with you was quite pleasant.

Sincerely,

November 7, 1966

The Editor
The Wall Street Journal
30 Broad Street
New York, New York

Dear Sir:

I read The Wall Street Journal regularly and with respect. I am among a rather sizable portion of your readers who respect your paper as a journalistic enterprise, but who find themselves frequently in disagreement with your editorial positions. I am sorry that this letter is not occasioned by a favorable response to an editorial position rather than a negative one. But you have reacted, I think, too quickly and far too negatively to a proposal which (a) attempts to be responsible in the U.S. scheme of things, (b) which offers help to our land at a point of great hurt, and (c) which suggests positive benefits, possible of attainment, to the nation, its economy and, thereby, to business.

I speak of your response to the "Freedom Budget" proposals in your editorial of November 1, 1966.

I guess I am realist enough to know that no letter such as this could persuade you to consider an about face. But as a people, business and The Wall Street Journal included, we face problems of such seriousness that I would hope for some reconsideration on your part. Or perhaps you could call for an open examination of what the "Freedom Budget" offers.

Surely you, and all of us, must go beyond the right-middle-left cry that poverty programs have failed. We must find ideas and programs which meet needs--needs which have frequently found eloquent and factual expressions in your own most worthy news columns.

There probably are those of us who can point to even more poverty program failures than the editors of the Journal. But can we let the matter rest with such criticism of recent special efforts--even when we fail to recognize successes? Can we urge a return to prior practices which benefited many of us, but which did little to narrow the gap between those of average means (leave the rest of us out) and those in poverty? Can we ignore the impact of world events, the mass media, and a to-be-praised rising expectation of our own people which have led to accelerated demands for solutions to individual and group problems occasioned by society's ills?

It would be wrong to suggest that our society is all bad. I for one defend even the near-indefensible in the hope that we preserve the good while nudging the bad from the picture. Would that I and you were dedicated to the eradication of the bad.

We could quibble at great length about what the "Freedom Budget" proposes. Let me suggest some things which it, or similar plans with broad backing, holds that your editorial over looks:

(1) Full employment for the able and willing;

(2) Training, education, motivation toward making people able;

(3) A candid recognition of the harm done to others (children, for instance) by not caring adequately for those not now ready for full participation in the economy;

(4) Recognizing that those described in (3) are deeply affected by society's own failures;

(5) Leaving unsaid as to the details of what we can do for those cases--large in numbers but small in percentages--whose failures may be due to individual inadequacies, but suggesting a more positive approach than the nation has yet tried;

(6) To encourage economic growth, full production, improved transportation, water and air purification, resource development;

These profit us all--me, the editors, business, the masses. The cost is not likely to exceed the return to our economic health to say nothing of the gain in human values.

You rightly proclaimed the contribution of the two hundred billion dollars spent annually on education and social services. Did the proposers of the "Freedom Budget" fault existing expenditures? I think not. They took a hard look and added what further was needed, and I think they have stated why.

Could we all find a way to quibble, if needed, about particulars, but accept with energy the basic outline for a common effort for our common good?

Sincerely,

Emory F. Via

hj

I wrote this originally as a personal exchange with the editors, but would not mind its publication. I am sorry about the length, but you have able people there and if it must be cut, cut it.

Appreciatively,

E.F.V.

DEPARTMENT OF PHILOSOPHY

November 8, 1966

Dear Emory,

Your letter of July 29, along with the examination copy of the New South, failed to reach me in Vermont, where we spent most of the summer. Since I got back in September, I've made many good resolutions to answer it (the kind, I'm afraid, with which the road to Hell is paved), and only many distractions and the mental lapses, which mark my decline, have kept me from doing so.

Let me say that I'm glad you are in Atlanta, where what you believe and are doing counts (& will continue to count for so much. (I say this in spite of the fact that this is election day, 1966.) I hope you will have a continued sense of contentment & achievement, which it often takes faith to sustain.

The New South is handsome and telling. The issue I have seems more intent to create a mood (with interviews & interjected commentary) than to push analysis through to designs for action. But it contains substantial articles which belie this impression. I enclose a subscription blank.

Give our regards to Margaret, & accept our best wishes to you both.

Sincerely
Roy Foerster

THE AMERICAN POLITICAL SCIENCE ASSOCIATION
Political Science Building
1726 Massachusetts Avenue, N. W.
Washington, D. C. 20036

To: Members of the Association

From: Evron M. Kirkpatrick, Executive Director

As the spring term begins, I would like to call your attention to the following items of Association business.

1. Life Insurance

Over 750 members including graduate students belong to the Association's low cost group term life insurance program. Two enrollment dates each year--in November and May--are maintained by the Association; all applications for the May enrollment date must be filed with the Association's office by May 15. A descriptive booklet containing detailed information on the Program's benefits is available upon request from the Association.

2. Travel-Study Opportunities

Once again the Association is arranging summer flight programs to Europe. Also, we are sponsoring a 1966 tour seminar to Africa as a part of our continuing program of area study tour-seminars. These programs are described in detail in an enclosed announcement and a printed brochure.

3. Research on State Legislatures

Recently, there has been an increase in research activity on state legislatures and the availability of financial resources for such work. The Association is interested in gaining knowledge on research in the area and the manner in which such research is financially supported. To this end, a questionnaire is enclosed and those doing research on state legislatures are requested to fill it out and return it to the Association.

4. Professional Personnel Placement Service

The Association's Professional Placement Service is widely recognized for its effectiveness in serving the recruitment-employment needs of our profession. Registration with the service is open to all Association members for $5.00 per calendar year, to cover the cost of printing, mailing, and processing of referrals. Ten newsletters are sent to those registered with the service each year, and the listings include teaching, research, and administrative positions. For further information and registration forms, write to the Personnel Service Director at Association headquarters.

5. 1966 Annual Meeting

The 1966 Annual Meeting will be held at the Statler-Hilton Hotel in New York City, September 6 to 10.

July 27, 1965

Mr. Emory Via
School of Social Workers
University of Wisconsin
Madison, Wisconsin

Dear Emory:

Les Dunbar tells me you are going to be back at the SRC in Atlanta next year. If your time is not already too fully committed I would like to solicit your help with the study preferably as an interview coordinator or as a consultant. Interview coordinators would undertake some interviews and coordinate the activities of interviewers in several cities, including Atlanta. The interview coordinators and consultants will be paid on a daily basis plus per diem and travel expenses. I am enclosing a copy of our proposal which has been approved by OMAT. The study is being undertaken at the request of the Secretary of Labor and will, as you can imagine, be followed very closely by unions, government officials, and Civil Rights' groups.

If you can possibly denote some time to the project, I would very much like to have your participation.

Cordially,

Ray

Washington, D. C.

Negro Participation in Apprenticeship Programs

Abstract

Objectives

The proposed study would seek to identify the approaches and methods undertaken to increase Negro participation in selected apprenticeship programs; and establish why other attempts have been unsuccessful. The main objective of the study would be to recommend policies which would make it possible for Negroes to increase their participation in and successful completion of apprenticeship programs, as well as their equitable placement as journeymen when they complete their training.

Procedures

An examination will be made of dynamic situations involving the participation of Negroes in apprenticeship programs in the recent past, in at least six major cities with large Negro populations. Specific situations to be studied would be selected to reflect different regions, crafts, industries, degree of union involvement and degree of minority representation in the crafts. One of the cities chosen should reflect substantial progress in Negro participation. The apprenticeship situations studied would include those in the building and printing trades and the machinists crafts.

In specific situations studied, attention would be focused on remedial measures initiated, such as better vocational counseling, wider publicity, more intensive recruitment efforts, revised tests, fairer administration of tests, pre-apprenticeship training programs, etc. For these specific situations information

would be obtained from the Bureau of Apprenticeship and Training, state apprenticeship officials, joint apprenticeship committees, minority organizations involved, management and union officials, rank and file white and Negro journeymen, Negro apprenticeship applicants, Negro drop-outs, Negro apprentices, commission members, counselors, apprenticeship instructors, and other individuals and organizations which have played a role in the effort to increase Negro participation in apprenticeship programs. Remedial measures would be evaluated as to their effectiveness and potential for apprenticeship programs in other crafts and areas.

Negro Participation in Apprenticeship Programs.

Problem

The problem of Negro apprenticeship training relates directly to many of the stated objectives of the Manpower Act. The proposed study would develop and supply information and recommend methods needed to deal with one of the problems of malutilization of Negro manpower: the failure to utilize Negroes in apprenticeship. Greater Negro participation in apprenticeship training would tend to minimize the impact of technological change on Negro workers, would tend to raise the skill levels of this important sector of the work force, increase the Nation's productivity, and help provide the manpower resources needed in the crafts. The problem of the utilization of Negro workers is undoubtedly one of the most important manpower problems confronting the Nation.

Objectives

The proposed study would attempt to answer the following questions:

1. What specific measures have been taken in the situations studied to promote greater Negro participation in apprenticeship programs?
2. Why have certain specific programs proven successful while others have not?
3. What are the conditions which have promoted Negro participation in certain crafts as opposed to others?
4. What techniques should be used to improve Negro participation in apprenticeship in particular crafts and in cities where there has been little participation?
5. What is the significance of apprenticeship training for the overall Negro employment problem?

Relationship to Other Research

Considerable research has been undertaken to show that Negroes have not participated in apprenticeship training. Some of this research has been undertaken by the principal investigator of this study. However, none of this research attempts to analyze in depth the reasons other than discrimination which account for the relative paucity of Negro apprenticeship trainees. And few of these studies make systematic recommendations of policies (other than the elimination of discrimination) which would make it possible for Negroes to increase their participation in apprenticeship training. Indeed, many of the studies proceed from the assumption that discrimination is the only or predominant reason for the low degree of Negro participation in apprenticeship training; the study proposed here would attempt to account for other factors as well as discrimination and evaluate corrective measures taken to increase participation; such as measures taken to improve their preparation, to increase their selection rate, to reduce their dropout rate, and to improve their placement rate as journeymen.

Procedure

Nine cities - - such as New York, Washington, Philadelphia, Atlanta, Cleveland, Cincinnati, Detroit, Houston, and San Francisco - - have been tentatively selected for the study. In all of these cities there have been significant developments in the Negro apprenticeship situation in recent years.

In an effort to find out what was done to increase Negro participation in apprenticeship in these cities and to evaluate their effectiveness, information would be collected through unstructured field interviews from

the Bureau of Apprenticeship and Training, state apprenticeship officials, joint apprenticeship committees, apprenticeship information centers, employment offices, rank and file white and Negro journeymen, Negro apprenticeship applicants, Negro dropouts, Negro apprentices, state and Federal apprenticeship officials, civil rights commission members, vocational counselors, apprenticeship instructors, and other individuals and organizations. In each case, information would be gathered as to the extent of Negro participation in apprenticeship programs, the reasons for Negro participation or the absence thereof, and recommendations for policies which would make it possible for Negroes to increase their participation. More specifically, answers would be sought to the following questions: Do Negroes have knowledge of and aspirations to participate in apprenticeship programs? If Negroes are qualified, why do they not apply for apprenticeship training? If qualified Negroes apply, do they or do they not get into apprenticeship training programs? What have been the results of tests administered to Negroes who had the formal qualifications for apprenticeship training? What accounts for the results in each case? Are apprenticeship entrance tests fairly administered? What have been the training experiences of Negroes who were admitted to apprenticeship training? How does the Negro attrition rate compare with that of whites? What accounts for the differential in attrition rates, if any? What has been the work experience of Negroes who have completed apprenticeship training? To what extent have remedial measures adopted in these cities been successful? If they were unsuccessful, what are the reasons for failure? Where appropriate, interviewees would be asked

Guidance counselors H.S. & Voc. classes

to make recommendations to improve specific defects in the flow of Negroes through apprenticeship programs and into jobs.

The project will be undertaken in the following phases:

1. The development of background information, plans for interviewing, and preparation of instructions to interviewers.
2. Conduct the interviews.
3. Begin a non-statistical analysis of gathered data and re-examination of particular situations.
4. Complete a preliminary draft of the report which will be circulated and discussed with knowledgeable and interested people.
5. Wrtie the final report.

Phase 1 of the project will consist of the development of background information, plans for interviewing and preparation of instructions for interviewers. In addition to available printed sources, information will be developed from preliminary discussions with knowledgeable and interested individuals in the survey cities and in Washington. Lists of prospective interviewers and interviewees will be compiled during Phase 1, and the interview check-list will be pre-tested in Houston, Texas. Advice will be sought from special consultants in the social sciences during this phase of the study, which will be completed by October 1, 1965.

Phase 2 of the study will consist of field interviews with approximately 300 interviewees in the survey cities. Although reliable statistics are not available on the number Negro apprentices, the interviews conducted during this study undoubtedly will consist of the large proportion of the total number of Negro apprentices in the United States.

In addition to the interviews with various organizational representatives, particular attention will be paid to the development of a limited number of case studies of Negroes who were successful entrants into apprenticeship programs, and a limited number of case studies of individuals who were not. These interviews will be undertaken by the principal and assistant investigators, by graduate students in the social sciences, and other available personnel. In the interest of economy wherever possible interviewers will be selected who reside in the survey cities. They will be supervised by the principal and assistant investigator and by interview coordinators on the staff of the project. Interviewers will be instructed to prepare written reports which not only set forth the interviewees' responses to specific questions, but also the general circumstances surrounding the interview. The interviewers will be briefed before they undertake the interviews. It is expected that this phase of the project will be completed by January 15, 1965.

Planning Training Interviews

The third phase will consist of a systematic analysis of the data collected and preparation of a preliminary draft of the report. The principal and assistant investigators will prepare the preliminary report with the assistance of special consultants. Some of the situations probably will be reexamined during this phase, which will be completed by April 1, 1966.

The fourth phase of the project, circulation of the preliminary report to knowledgeable and interested people, will begin April 1. Perhaps it would be possible during this phase to hold a seminar in Washington based on a discussion of the preliminary report. After comments have been

received on the preliminary report, the fifth and final phase, writing the final report, can be undertaken. The final report will be completed by July 1, 1966.

Personnel

The principal investigator is Ray Marshall, Professor of Economics, The University of Texas, who has considerable research experience in the area of minority group employment problems. Marshall has published a number of articles dealing with Negro employment problems and has a book (The Negro in Organized Labor, New York, John Wiley & Sons, 1965) which deals in part with the participation of Negroes in apprenticeship programs. He also worked on the Minority Group Employment Project at Princeton University (which led to Toward Fair Employment. New York, Columbia University Press, 1964). Marshall has related research experience as a Fulbright Research Scholar (1955-1956) to study Finnish labor problems and as a Wortheim Fellow in Industrial Relations at Harvard University (1960) to make a study of Labor in the South, which will be a forthcoming book. During 1964-1965, Marshall was awarded a grant by the Ford Foundation to study "The Impact of Federal policies on Negro Employment in the South," which resulted in a number of articles, several of which have been published and others of which are forthcoming. Marshall holds a Ph.D. in Economics from The University of California at Berkeley.

The other principal investigator is Vernon M. Briggs, Jr., Assistant Professor of Economics, The University of Texas. Briggs' main field of interest is Labor Economics and he holds a Ph.D. degree in Economics from

Michigan State University. He has taught a course in Manpower Economics and he will have a paper in a forthcoming issue of the Industrial and Labor Relations Review.

Facilities and Cooperating Groups

The facilities of the University of Texas are available to the investigators. These facilities include one of the Nation's largest libraries, an excellent computor center, and specialists in a variety of fields. In addition, the investigators' past experience suggests the cooperation of civil-rights, labor, management, and other interested groups. The director of the AFL-CIO Civil Rights Department and the chairman of the Construction Industry Joint Conference have promised their assistance with the project. The investigators also anticipate the cooperation of various federal and state agencies.

Duration

The project would start on July 1, 1965 and be completed by June 30, 1966.

Administrative Information

Salaries paid from government grant funds at the University of Texas conform to the rates approved by the Board of Regents for salaries paid from regular University funds.

AIR MAIL

August 10, 1965

Mr. Emory F. Via
Associate Professor
of Labor Education
The University of Wisconsin
School of Social Workers
432 North Lake Street
Madison, Wisconsin 53706

Dear Emory:

Thank you for your letter of August 3, expressing your interest in the Apprenticeship Project.

I am enclosing a copy of our proposal which has been changed, but will give you some idea what the project is about. As to your specific role, we would like for you to conduct the kinds of interviews indicated by the proposal primarily in Atlanta, but in other places if you have time. In addition, we would like for you to recruit interviewers in places where there are too many interviews for you to conduct alone. Since the project is still in the planning stages, we have not compiled a list of specific questions to be asked of the interviewees, but I am currently preparing such list. As to compensation, we are prepared to pay you $50. a day, plus travel expenses, and $16. per diem while traveling. I think our use of your services will depend primarily upon the amount of time you have available.

If you have any questions after reading the proposal, please call me collect at GR 1-3211, or HO 5-8310.

Very cordially yours,

Ray

Ray Marshall
Professor of Economics

RM:jas

September 30, 1965

Mr. Emory Via
Southern Regional Council, Inc.
5 Forsyth Street, N.W.
Atlanta, Georgia

Dear Emory:

In connection with our conversation, I am enclosing a letter of introduction which you may use when making contacts on the apprenticeship project. I am glad that you are finally settled in Atlanta and can devote some time to the apprenticeship project. I also welcome any suggestions you might have about the project.

Sincerely yours,

Ray

Ray Marshall
Project Director

RM:jas
encl.

P.S. Please sign the enclosed vouchers and return them to me when you have some expenses or when you want to get paid.
Ray

Apprenticeship Study

THE UNIVERSITY OF TEXAS
AUSTIN 78712

October 1, 1965

TO WHOM IT MAY CONCERN:

This is to certify that the bearer, Mr. Emory Via, is serving as in Interview Coordinator for a project on Negro Participation in Apprenticeship Programs. The study is being undertaken by the Department of Economics, the University of Texas, under contract from the Office of Manpower, Automation, and Training, U. S. Department of Labor.

If there is any question concerning Mr. Via's participation in this project, you may call the undersigned or Dr. Vernon M. Briggs at GR 1-3211 (Area Code - 512) Austin, Texas.

Sincerely yours,

Ray Marshall

Ray Marshall
Project Director

RM:jas

If you do not agree with us filling out the forms let me know & I will send you a detailed letter on how to correctly how to fill it out.
Jean Schlueter (Sec. to Dr. Marshall

October 1, 1965

Dear Mr. Via:

We are enclosing some forms for your use in reimbursing you for expenses and also salaries made to you.

These forms are:

1. Travel Voucher
2. Purchase voucher

I have marked both forms with an "X" where your signature is needed. All copies of each form must be signed and returned to us. Or, if you wish for us to fill out the forms for you, please sign all the forms and return them all to us. If would be easier for you (and us) if you would just sign these forms and return them to us so that we can have them on file as your expenses incur and as time for salaries roll along. Then all you would have to do as your expenses incur is to mail us your receipts and a note telling us how much you spent on taxi fares. We could complete the forms in this office, send them to the auditor for processing and really expedite payment to you.

If you agree to this, please sign all the forms in the placed marked with an "X" and mail them all back to us. When you travel, you need to send us:

1. The dates you traveled

2. All airplane tickets

3. All receipts for fares (taxi's, limousine's rent-a-car,etc.) for over $2.50

4. The dates you travelled by plane noting what time you left your home base, the time you arrived to your destination, the time you left that city, and returned back to your home base. (i.e., left Washington 9/10/65 - 1:00 P.M. arrived New York 6:30 P.M. 9/12/65 left New York 2:10 P.M. arrived back in Washington 8:48 P.M.)

5. A brief sentence stating why you travelled to that city. (i.e., Trip to New York to conduct interviews with various interviewees as area (or interview) coordinator in connection with apprenticeship project)

Taxi fares must be listed as follows:

9/10	Taxi from residence to airport (Washington)	$1.50
	Limousine from airport (new York) to hotel	2.50
9/11	Taxi from hotel to contact	.75
	Taxi from contact to hotel	.75
9/12	Taxi from hotel to airport (New York)	2.50
	Taxi from airport (Washington) to residence	1.50

[Post 1971]

PROPOSAL

PROSPECTUS

AN INNOVATIVE APPROACH TO

COMPREHENSIVE AREA

SUPPORT SERVICES

PROJECT

TO

MANPOWER DEVELOPMENT

IN

SOUTH MISSISSIPPI

Utilizing Resources of Existing
Federally Funded Office of
Economic Opportunity Grantees

Area Comprehensive Supportive Services

NOTE: The purpose of this proposed project is taken from the "Minority Report" as submitted to the Honorable Robert J. Brown, Special Assistant to the President, in Washington, D.C. on January 18, 1971, by Mr. State Stallworth of the NAACP, Legal Defense, taken from page four, item numbers 7 & 8.

PURPOSE:

1. Join with anti-proverty programs to develop meaningful motivational projects to insure that minorities are sufficiently prepared to take on the responsibility of employees, homeowners and productive citizens.
2. Develop programs to insure minorities of all the support necessary for success despite the unique problems that beset their race.

a. <u>What problems will be dealt with in the project?</u>

The project will address itself to the underemployed, unemployed, and unemployables because of a lack of education, a usable skill and unique problems that can be solved or eased by adequate Supportive Services. All of the OEO grantees in the area to be served by this project have indicated a willingness to assist and enter into cooperative efforts with other agencies i.e. MESC, Vocational Education, etc., to supply the aforementioned supportive services.

b. <u>What are the objectives of the project and what benefits should result from its operations?</u>

It is the objectives of this project to involve all disadvantaged persons or families participating at any level in the industrial Development of Jackson County in the following supportive services as needed:

1. Identifying the target group
2. Recruiting
3. Assessment
4. Counseling
5. Referral Services
6. Basic Education
7. Consumer Education
8. Pre-Employment Skill Profiling
9. Transportation
10. Subsistence
11. Follow-up
12. Trainee Paraphernalia
13. Day Care - JCCAA will Develop Separate Proposal
14. Job Coaching
15. Family Services
16. Coordinate Labor Mobility
17. Source of Advice for management/Employee Sensitivity Training

The following benefits should result from the project:

1. The project is designed to provide to the maximum extent an avenue for the unemployed, underemployed, present unemployable populous of the assigned targit area.
2. They will be instrumental in releaving area residents from deprivation of poverty and provide a long range solution to the area manpower needs.

c. Why do you believe these results can be achieved?

in Addition to the expressed need of area residents, several areas of commitment from these grantees greatly enhance the potential for success of this unique approach. These include commitments from Star, Inc. staff with the cooporation of other area agencies to provide services in identifying the target group, recruiting, assessment, counseling, referral, ABE, consumer education, pre-employment, skill profiling, coordinate transportation, provide subsistence, follow-up, provide trainee parapheranalia, coordinate day care services, job coaching, identifying the target group, recruiting, coordinate labor counseling, outreach, and social services and commitments by the following OEO Grantees:

1. Forrest-Stone Area Opportunity, Inc. in Forrest County
2. Harrison County Civic Action Committee in Harrison
3. Jackson County Civic Action Committee in Jackson County
4. Pearl River Valley Opportunity, Inc. in Lamar, Marion, and Walthall Counites
5. Community Education Extension in Jones, and Stone Counties
6. Friends of the Children of Mississippi in Wayne and Greene Counties
7. Mississippi Action for Progress, Inc., in Hancock, Pearl River, and Perry Counties
8. Sophia Sutton in Jefferson Davis, Jones, and Covington Counties

It is the opinion that upon availing themselves of the services offered in the program, these participants will be much better equipped to understand and work with the complexities of involvement in full gainful employment.

Further, OEO Grantee agencies that will be involved in providing the aforementioned services are people oriented instead of paper oriented.

II. PARTICIPANTS

a. How many people are potentially eligible to take part in the program account?

All of the 31,476 plus poor families in the 16-county area served by this project will be eligible to take part in the program. This amounts to approximately 31% of the total population of the 16-county area. (See attached chart #201.)

b. What percentage of those eligible will participate?

Due to the impact of activities of this program upon the entire family, we will assume that where a family member participates, the family will be considered to have participated. On this basis, a minimum of 3,900 or approximately 12.6% of the poor families in the area will be directly served by the activities outlined in the program.

c. How will the poor and target area residents learn about and be recruited for the program?

Information about and recruitment for the program will be done through the combined outreach staffs of all grantees within the 16-county area.

d. What are the selection criteria?

Selection will be on a first come, first serve basis and upon expressed interest in and articulation of a commitment to complete the activities of the program. OEO income guidelines will apply.

III. PROGRAM

a. What activities will be carried out in the work program?

The following activities will be carried out in the work program?

1. Supportive services by central coordinating staff. These activities will include:

   a. Coordination of all participant agencies progammatic efforts

   b. Develop and operate a management information system (MIS)

   c. Develop plans and necessary budgets for project activities

d. Evaluate the overall effectiveness of this and other programs of participant agencies which are a part of this program

2. FACILITIES - Prime centers will be provided for program activity on a needs basis at the following locations:

a. Tylertown - Systematic Training and Redevelopment, Inc., (STAR), and Pearl River Valley Opportunities, Inc.

b. Hattiesburg - STAR, Inc., Forrest-Stone Opportunities, and Mississippi Action for Progress

c. Lucedale - STAR, Inc., and Friends of Children of Mississippi

d. DeLisle - STAR, Inc., and Mississippi Action for Progress

e. Gulfport - STAR, Inc., Harrison County CAA, Community Education Extension

f. Biloxi - STAR, Inc., Harrison County CAA, Community Education Extension

g. Pascagoula - STAR, Inc., Jackson County CAA

h. Secondary centers will be established to serve the counties of Jefferson Davis, Covington, Jones, and Wayne as needed. Existing facilities of participating agencies will be used in all cases (STAR, CEE, FOCOM, and Sophia Sutton).

3. ACTIVITIES - Through these existing centers, the following supporting services will be provided:

a. Needs assessment - Direct contact will be made by outreach staff of the participant agencies utilizing their expertise in locating and indentifying the target residents. Individual interviews will be conducted to determine:

(1) Normal CAA MIS

(2) Inventory of manpower interest and skills

b. The central staff will develop MIS information for the entire area from the input described above. Development of this information

may require purchasing computer time and card punch services. This information will be the basis for qualifying the services to be provided at each of the centers.

c. The participant agencies will be assisted in developing a coordinated program for providing needed services in line with their goals, program activity, and available resources.

d. Each prime center will be equipped to provide the following services to the target residents:

1. Initial Contact and Survey - conducted by present outreach staff of participant agencies.
2. Recruitment and Intake - follow-up individual recruitment of target residents into the centers conducted by present outreach staff.
3. Assessment - needs definition and qualification of service needs to be conducted by STAR staff and/or STAR trained staff of participant agencies.
4. Input of information developed in step #3 to central staff and MIS. This information is processed and each participant is apprised of the scope, specific nature and projected participation levels, by center.
5. Direct Support Services Begin - Based on the needs, schedules, and coordination developed above actual activities begin and through the centers. These activities include:

   a. Personal Services

      .1 Family Counseling

.2 Day Care

.3 Consumer Education

.4 Basic Education

.5 GED

.6 Referral to services of participating and other agencies.

b. Career Development Services

.1 Career counseling and employability planning

.2 Pre-employment and skill profiling

.3 Co-ordination on behalf of the individual with MESC for manpower training, projected job, etc.

.4 Assignment to training slot

.5 Job coach assigned to the individual

.6 Trainee paraphernalia supplied

.7 Transportation and subsistence on a need basis

.8 Job development and placement

c. Follow-Up

.1 Individual and Family Counseling

.2 Assist in the development of Management-Employee sensitivity training

.3 Evaluation of co-ordinative and participant agencies services

Staffing and Budget Requirements:

STAFF

A. Central Staff:

Director - Coordinator	$14,000
Manpower/Management Information Developer	12,000
Planner/Resource Developer	12,000
Executive Secretary	6,000
Clerk Typist	4,800
Travel, Office Operations	30,000
Computer systems leasetime	10,000
	$88,800

B. Individual participant agencies may require additional funding for travel and training materials. Present funding sources of these participant agencies must be made aware of this need and assured of sufficient resources to meet it.

NOTE: All of the above described activities and services are available within the current capability of the agencies listed subject to the funding needs expressed. We highly recommend that funding for the central staff be through an OEO agency such as STAR, Inc., or one of the CAA's in the area.

ADDITIONAL COMMENTS

After considering the above proposal, the Manpower Committee approved same and hereby submits it to the Executive Committee with the following conditions:

1. Before application to fund the Coordinating Staff, efforts be made to use present funded projects to function as the coordinating staff, i.e., TENCO Program Development and Planning Project.
   Negotiations should begin immediately with OEO to reprogram to include the functions of the coordinating staff, etc.
2. If the above can not be achieved, the Committee goes on record that this project be funded immediately through some source.

COMPREHENSIVE AREA SUPPORT SERVICES PROJECT

RECOMMENDATIONS AND TIME PHASING

OF THE

WORK PROGRAM

The following are recommendations of immediate and long-range implementation of the Grantee's Proposal.

A. What major steps will be taken to carry out the work program?

		Start	End
1.	Assemble a temporary staff from Project "50" of Pascagoula and TENCO.	Immediately	Upon hiring of permanent staff
2.	Identify and define geographical areas that each center will be operationally responsible for.	Immediately	Continuous
3.	Identify and charge each Grantee with a specific geographical area of responsibility and to which center the Grantee is to work in conjunction with.	Immediately	Upon completio
4.	Formal staff orientation: (If funds are received at this point, permanent staff will be recruited and hired.) Orientation will include coordinating staff, Executive Directors of participating agencies and STAR Manpower Director, Manpower teams, and STAR Center Directors. (In the event that the coordinating staff is not on Board, this will be repeated.)	May, 1971	Upon completion
5.	Gear up all Centers for operation.	May, 1971	Upon completion
6.	Set up coordination points with MESC to include agency responsibilities, develop common system of referrals, and lines of communication.	May, 1971	Upon completion
7.	Develop a pool of additional supportive services and a system of referral to each; i.e., Salvation Army, Catholic Charities, Welfare Agencies, etc.	May, 1971	Upon completion
8.	Inform residents of the program to include documentation of potential participants.	May, 1971	Upon completion

		Start	End
9.	Participant Intake		
10.	Use of computer lease time to qualify and quantify information as gathered throughout the program.	June, 1971	Upon completion
11.	Workshop for the exchange of information and the re-assessment of training and/or job slots to include Coordinating Staff, MESC, and representatives of the Miss. Manufacturing Association, EDA, Chambers of Commerce, etc.	June 15, 1971	Upon completion
12.	Render quality supportive services to enable participants to successfully qualify for and enter into programs and/or jobs.	July 1, 1971	Upon completion

PROCEEDINGS OF

Conference On Arbitration

HELD AT
MILWAUKEE, WISCONSIN
DECEMBER 4, 1953

SPONSORED BY

SCHOOL FOR WORKERS
EXTENSION DIVISION
UNIVERSITY OF WISCONSIN
MADISON, WISCONSIN

The University of Wisconsin
UNIVERSITY EXTENSION DIVISION

School for Workers
5-3311 Ext. 4349

3012 Stadium
Madison 6, Wisconsin

INTRODUCTION

For better or worse, the use of arbitration as a means of resolving grievances arising under the contract appears to be growing. The purpose of this conference was to aid union staff representatives in preparing and presenting arbitration cases and in writing contract clauses on arbitration.

The large number of favorable responses from participants have led us to prepare this summary of the proceedings of the conference. The language of the participants has been used but repetitious words and ideas have been cut wherever possible. Subject headings have generally been substituted for questions from the chairman and the audience.

The School for Workers wishes to express its appreciation to the many audience participants and particularly to the program participants, who so obligingly subjected themselves to a long hard day.

Robert Ozanne, Director
SCHOOL FOR WORKERS

ARBITRATION CONFERENCE PROGRAM

9:15	Registration	Hotel Pfister
9:45 - 11:00	CHOOSING AN ARBITRATOR Chairman, Robert Ozanne; Panel: Pearce Davis, Frank Ranney, Max Raskin, Harold Thompson Discussion of sources of arbitrators Ad Hoc vs Permanent Arbitrator Board vs Single Arbitrator	
11:00 - 12:20	PREPARATION OF CASES Chairman, Norris Tibbetts; Panel: Pearce Davis, N. P. Feinsinger, David Previant Type of facts needed Getting the facts Union record keeping for grievance and arbitration purposes	
12:30 - 2:00	LUNCHEON Nathan P. Feinsinger, speaker	
2:10 - 3:20	PRESENTING THE CASE Chairman, Raymond Munts; Panel: Pearce Davis, N. P. Feinsinger, David Previant, Max Raskin Briefs, oral presentation Use of witnesses Cross-examination of witnesses	
3:30 - 4:30	A. SPECIAL PROBLEMS IN WAGE INCENTIVE AND JOB EVALUATION ARBITRATION Chairman, Bertram Gottlieb; Panel: Pearce Davis, Anthony Doria, Bertram McNamara B. CONTRACT CLAUSES ON ARBITRATION Chairman, William Kuhl; Panel: N. P. Feinsinger, David Previant What should be arbitrated Common examples of inadequate clauses	

CHOOSING AN ARBITRATOR

Participants: Chairman: Robert Ozanne, Director, School for Workers
Harold Thompson, Int'l Rep., United Auto Workers, CIO
Frank Ranney, Sec. Treasurer, Local 200, Teamsters, AFL
Max Raskin, Attorney, Milwaukee
Pearce Davis, Chairman, Business & Economics Department of Illinois Institute of Technology

Single Arbitrator Vs. Board

Thompson: I think I prefer a single arbitrator to a board. Because the chairman of the board has to compromise with either one side or the other side he very often does not give a true decision.

Ranney: I've always had a lot of arguments with our legal staff on this point. The legal staff seems to think you'll be able to put your case across inside a session much better. But actually the arbitrator sits there and says, now you fellows get together and agree upon something or I'm going to make the decision. You might as well compromise without going into arbitration. I think you'll get lot better results presenting the facts of the case to one man than making a compromise.

Davis: I'm only speaking here today from the point of view of the arbitrator. About half my cases are boards and about half are sole arbitrators and I don't much care which they are. I do disagree based upon my own experience with some of my colleagues. I don't believe that collective bargaining has entered into my board sessions. I frankly don't expect to get anything better than a majority decision. Under certain circumstances the board has advantages in certain types of cases. Also it has an advantage in explaining your decision and promoting industrial relations, a side-issue from the arbitration.

Raskin: Generally speaking a single arbitrator is the best means of reaching a decision. However, when you do not rely upon a transcript, the counsel of the various parties through their representatives on the board would be of some

value. But, it is much more advantageous to have a good record so that you know all the facts have been presented and you don't have to rely on any outside sources.

Comment: One point that might not have been covered so far is that it depends to a large extent on the issues involved. I agree with the majority of the panel on simple cases such as discharges that a single arbitrator is better than a board. But in arbitrating a very complex incentive system, I believe that it is worthwhile, from the union's point of view, to have one of their representatives on the board so that it is satisfied the arbitrator understands the union's position.

Comment: Isn't this problem a question of how the arbitration process is conducted? If you do adversary proceedings where the parties are going to battle it out, rather than take part in collective bargaining, doesn't that color your view as to whether a single arbitrator or panel should decide the case?

Thompson: In a wage case where there are a lot of technical things involved I'd prefer a tri-partite panel. But I think from what the War Labor Board experience shows, I'd have to disagree with Davis that such arbitration does not involve compromise.

Davis: This general matter of whether you should merely arbitrate or whether bargaining mediation should go on is a matter upon which arbitrators hold different opinions. My position has always been that we are not mediators. However, if he is asked for that, then I think the arbitrator is certainly within his professional responsibilities in taking that course.

Comment: The better your case is, the more reason you should present it to one arbitrator. On a tri-partite panel you find that the arbitrator doesn't want to gain the animosity of industry or of labor. You can sit there hours on end arguing with him and finally trying to get the parties together. You

see an opportunity to gain a point, so you'll give up a point. It's just exactly like collective bargaining. Maybe the arbitrator doesn't come out with a unanimous decision but in the process you have given up several points, that you would have won if you had left it to a single arbitrator.

Methods of Selecting Arbitrators

Ranney: If you have the money to spend, the United States Conciliation Service is the place to go, and even then it is not entirely satisfactory. The panels that are submitted to you by the Conciliation Service have people on them from all over the country whose transportation expenses you must pay. You may wind up with an arbitrator that knows absolutely nothing about your problems or the particular type of arbitration and therefore you don't get the decision you think you should get. Many unions in the past have had clauses in their contract to let the circuit court appoint the arbitrator. That is probably one of the least expensive ways of getting an arbitrator. But you don't get a panel. It depends upon who the calendar judge is so that you may wind up with somebody who is in total sympathy with the employer. The State Labor Board is another place to go, although I find that the panels that they have sent out are mostly loaded with business attorneys or heads of industrial firms. I know a number of unions have had the Industrial Commission as the agency picking the arbitrator. I haven't had too much experience with that myself but I understand that some of the unions have had satisfactory service from the Industrial Commission.

Thompson: It's my opinion that the parties should select the arbitrator if at all possible. If you pick the guy, you are less apt to find fault with him than if somebody else picks him and he starts out in a better position. My second choice would be the Federal Mediation and Conciliation Service. I've used the American Arbitration Association but I always end up with the same guy so why should I pay the AAA for a list if the Federal Mediation and

Conciliation Service will furnish his name without charge? I am against a judge picking the arbitrator. He usually gives us some lawyer that starts out not knowing anything about the shop. I have checked the Labor Board's list and I agree with Ranney.

Ozanne: I had hoped to give you the list of arbitrators who are actually used in this area by the Federal Mediation and Conciliation Service, the American Arbitration Association and the State Labor Board. I wasn't able to get all of them and so I don't want to give out any one of them lest I be accused of advertising one particular agency. However, I have a very firm belief that this information should be published and that every union and every company should have the list of panels from which these people are selected before you go to one of them. I'd also want to know who the agency has actually appointed in the last hundred cases, so I know what my chances are. I see no reason at all why that information should not be divulged. The agencies that refused to give it simply gave the sentence "we just haven't got the clerical staff to get out this list". But I really think it's something you should demand and you should be able to get.

Ranney: The panel here is unanimous in their agreement that the best method is to mutually agree with the employer and if this is impossible, that the Federal Mediation & Conciliation Service is the next best solution.

Raskin: The experience I have had is that in representing labor in arbitration cases, it isn't too difficult to pick an arbitrator if you know the attorney on the other side. In spite of what the average labor man thinks, the lawyer isn't a bad guy. You talk the same language to him and you start taking apart various individuals and pretty soon you arrive at the person you want, except that he wants to check it with his client and vice-versa. I would like to suggest the creation of a board or a commission of arbitrators.

I would like to see the arbitrators independent and courageous and without the necessity of constantly compromising or worrying whether they are going to have a next assignment. We have finally gotten through a retirement law for judges. There are a number of them that I know of that would be well fitted to be used to act as arbitrators in various types of cases.

Davis: I want to pick up the last remark about independence. It's a delicate subject, but I think it should be spoken to. I know a good many arbitrators in this country and my impression is that most of them, certainly those that I know, do make decisions based upon what they think is right. I firmly believe that no arbitrator should be dependent upon arbitration cases for his livelihood. That isn't to say that if you were dependent, you wouldn't be considered impartial, but it is just more difficult for obvious reasons.

Ozanne: I wonder if there are any other ways in picking an arbitrator that are worth mentioning before we continue.

Raskin: There is. Mr. Davis' suggestion that the parties themselves as part of the contract itself might agree on a person or a group of people and incorporate their names into the contract.

Who Makes a Good Arbitrator?

Ranney: I think my first choice would be from the ministry. However, they are being used less and less because of employer fear that since the minister looks at the human aspect of arbitration, he usually leans a little more towards the union's point of view. My second choice would be professors of either economics or law, who are probably doing most of the arbitrating today. Unions have a good deal of faith in them and the employers, so far, don't seem to have as much reluctance to accepting them as they do gentlemen of the cloth. The third group would be lawyers and other professional groups within

the community, but here the union often has the same reluctance as the employer does with the first group that I mentioned. Actually that leaves you with only the professors and the colleges and I think you are on safe ground to get an honest decision based upon the facts from that group.

Thompson: I think I'd have to add the qualification that the individual is more important than the calling sometimes. I would first call in the professional arbitrator, whom I think has a lot more background than a minister. I think many times a minister only brings good will and not enough knowledge. I am also against lawyers because they get too legalistic. I think professors would be my second choice although sometimes they get too opinionated.

Raskin: I would say that the man must know his job and you can't just appoint someone to be an arbitrator, particularly if it's an involved problem or question, and expect him to become a professional on the job. To defend a decision to your members you have to be able to uphold the dignity of that arbitrator, by stating who he is and what he has done. The professional arbitrator studies, has written decisions and has read all the decisions, particularly professors in the law school or in the school of economics. I think that if you confine your choice to those two groups you are apt to get a better decision.

Selecting Arbitrator to Fit the Case

Davis: The use of the term, professional arbitrator I think probably means arbitrators of experience who know what contracts mean, and know about public relations. That is not inconsistent with my criterion of not being the source of total income. I'd like to pose a question--do unions really try or care to find trained people when they select an arbitrator to work on a technical case?

Comment: When we write in to the state board, we usually write a joint letter with the company and we state we would like to have someone familiar with engineering or problems of that nature. We still get a panel of five and out of that five, very rarely do all five have the qualifications we ask for.

Comment: We go into arbitration because we want to win so if we feel that the contract supports us, common sense will tell us to pick a man with technical experience. On the other hand if the contract case is weak, we want to pick a man who hasn't got so much technical experience.

Comment: I think that in our particular organization we find that there are three general categories of types of issues that come up under arbitration. One, we have cases which are strictly legal interpretations of a contract clause. Here we're not too concerned with a man's philosophy about trade unionism. We'd just as soon have a lawyer, an honest fair one who can make a true appraisal of the law. Two, is the category of trade union practices. Here we want a man who has an understanding of collective bargaining. The third one involves emotional appeal in the social aspect of the employer-employee relationship. So we try to peg which one of the three classes the particular case falls in and get the qualified individual to handle it.

Lawyers as Arbitrators

Ranney: I think that among those actively practicing law, you'll find very few who could classify as impartial arbitrators since they receive their income from one side or the other.

Ozanne: Is there any person in any segment of society that someplace along the line doesn't have a prejudice?

Ranney: I think you have to define the degree of prejudice, and I think that when you speak of lawyers who owe their income to one particular group or another, that they're bound to be prejudiced. Whereas, someone who has his income assured from the state or where it comes equally from all of the people, they have fewer prejudices.

Comment: To mention the clergy again, I presume the clergymen up in Whitefish Bay and Fox Point would have one bias and clergymen from the south side of Milwaukee would have another bias.

Ozanne: I'd even go farther and say I think you ought to look over the viewpoints of the professor just as you would a minister and certainly a lawyer.

Comment: In all fairness to the lawyer I'd like to mention that one thing he's inclined to do is to hold the decision until the end of the case because he wants to get all the facts out, which is not true of all arbitrators.

Raskin: Generally speaking, I would think that lawyers as a group are objective. They have been taught to be able to analyze problems and they are in some sense independent. If you've got an independent lawyer who has an income, and doesn't have to rely upon labor and doesn't have to rely upon management, for his daily bread, you'll find a good arbitrator whether he has been a professional or ever expects to become one.

Cases Based on Emotional Appeal

Comment: Let's have cases decided strictly on their merit and we'll get someplace. Only go into arbitration with a strong case. Don't try to win a weak case on an emotional basis or you're only going to hurt yourself in the future.

PREPARATION OF CASES

Participants: Chairman, Norris Tibbetts, School for Workers
Pearce Davis, Chairman, Business and Economics Department, Illinois Institute of Technology
Nathan Feinsinger, Law Professor, University of Wisconsin
David Previant, Milwaukee Attorney

(The check list on the preparation of arbitration cases which served as a basis for this session is included in the appendix of this summary.)

Feinsinger: The first warning that I would like to give you is that you cannot generalize as to the most effective kind of preparation or presentation. In a question concerning job standards, for instance, you may have to go to the extent of calling on an industrial engineer and there your emphasis would be on expert testimony. Your man in the shop may be absolutely useless to you. First, look at the kind of grievance you're talking about. In a simple discharge case, the presentation depends on who your arbitrator is. I like to have somebody on the union's side and on the company's side start out and tell me in very simple language what it's all about. As a rule, rather than a lawyer, I prefer to have someone who knows the shop problem and knows what the grievance is about and preferably someone who has followed through the grievance procedure.

Secondly, I often find it very helpful in saving time and money for the union representative, after he gets through telling me about the case, to make what I call an offer of proof. He says, "I have several witnesses here who, if called upon, will testify as follows," and then he will tell what they are going to testify. Frequently the company will say, "We agree that if they're called, that's what they will say. Our argument is not as to what happened but is rather on what the contract means, that is, whether we had cause for disciplining and whether the penalty was excessive."

So you have saved a day, perhaps two days, and sometimes a whole week. Sometimes you get a little disagreement where the other side will say, "We're not concerned with any of that except this one thing." Then you'll put on your man or men just to talk about that one thing. While you may have to bring a lot of people in anticipation of anything that may happen, don't feel that because you've got them there, even if they've got speeches all rehearsed, you've got to use them. Your object is not to provide a hearing hall for your people, as a rule, but to win your case.

Formulation of the Issue to be Arbitrated

Davis: I go along with everything Feinsinger said. Also, I think the formulation of the issue to be decided should be looked at very carefully. I have had situations where I was quite sure that the union did not realize the implications of the situation presented to the arbitrator and all the presentation was on issues that were not for the arbitrator. Many arbitrations have no written record because of the cost involved. In that situation, I find it very useful if there is a little brief presented by the union. It seems to me to have some advantage from the point of view of putting down your own ideas as well as in helping the arbitrator diagnose the issue.

Previant: I'd like to concur in what Mr. Davis said about clarifying the question involved. However, there are dangers in this from the union's stand point. Usually the attorney for the company prepares a proposed stipulation which tries to make it very narrow and very technical. I have always advised our people to be very careful of that type of stipulation. For one thing, I do not think it's a good idea to put into a stipulation any reference to any particular provision in the contract. You might even agree with the company that the issue can be decided under a particular provision of the contract. But by the time you get through presenting your case, you may find either that

you are mistaken or that the arbitrator may find there are other provisions which said as much if not more on the particular problem and on which he would prefer to base his decision.

Generally, the only possible basis for the overthrow of an arbitrator's decision is that he acted outside his jurisdiction. If you have limited his jurisdiction in your submission to making a precise answer based upon a precise provision of the contract and his answer is based on other provisions of the contract, you may find you have an invalid award. The submission, therefore, is probably the only part in an arbitration proceeding where it is well to advise with your counsel. I think you want to be sure that the question submitted is broad enough so that when the decision comes down, not only is this particular grievance settled but that you have eliminated the possibility of other grievances along the same line in the future.

The other comment that I want to make with respect to the check sheet is to suggest that you use it even before you decide to arbitrate, and not wait until you have made your request for arbitration and selected your arbitrator. Too many times you find that after getting to arbitration that you are arbitrating the wrong case. Maybe it's not the particular case that you should have chosen to present the general problem in which you are interested. Or one or two members of the committee may get a little hot on the disposition of a particular grievance and submit it to arbitration without relating the problem to other cases and to the overall relationship between the union and the company.

Question: A particular contract says that if unable to reach an agreement on the last step of a grievance procedure, either party may submit the matter to arbitration. In such event, the party shall submit the question to be arbitrated and name their arbitrator. The other party, within five days,

shall name their arbitrator and failure to do so shall forfeit their case. Does the other party have the opportunity to state the question the way it wants it stated?

Previant: My advice would be to state the question the way you think it should be stated and your position on it, and not worry about the other fellow's position.

New Evidence in Supplementary Brief

Question: I would like to ask a question as to what weight the arbitrator gives to additional evidence which may not have been brought up in the hearing.

Feinsinger: Theoretically you are not supposed to present any new evidence in your supplementary brief. If you do, the other side usually insists on writing a counter-supplemental brief. Almost invariably the first side wants to answer the answer, so you wind up with a half a dozen supplemental briefs. Therefore, as a rule, I try to get the parties to agree that each side can submit a supplemental brief on the same day. I usually find supplemental brief very helpful because by that time the issues have sharpened. However, I think you ought to refrain from putting new evidence in your supplemental brief that the other side hasn't had a chance to answer. However, there are cases where neither side has the figures available at the hearing which the arbitrator want to have, and it is agree that one side or the other will submit that evidence. In that case, it must be agreed which of the two parties is going to prepare that additional evidence. It should be further understood that before this is sent to the arbitrator, the other side will have the opportunity to check on it and to add anything that it wants to, and then the arbitrator gets the whole submission at one time.

Preliminary Brief

Previant: I can appreciate that Mr. Davis and Mr. Feinsinger, being arbitrators, would like a preliminary brief so that they can help orient themselves. However, I prefer the suggestion made earlier that somebody at the beginning of the hearing say for the benefit of the arbitrator exactly what is involved, rather than have to submit a formal preliminary brief. I am getting at the same point I made before. Things may happen during the course of an arbitration that may change your entire attitude. You may find then that you have bound yourself in your brief to certain positions that you wish you hadn't taken. If the arbitrator feels that a post-hearing brief will be helpful to him, then I think a brief summary setting forth the highlights, without a large document, would be the proper thing. But if you are before a board of arbitration that thinks in terms of legal procedures, you can very seriously prejudice your case, in my opinion, if you submit a preliminary brief.

Davis: I recognize the point of my colleagues. It depends somewhat on the nature of the case. If there is no transcript of the hearing, I would accomplish my purpose by a post-hearing brief.

Rules of Evidence

Question: Does the panel believe that it is advisable to abide by the rules of evidence?

Feinsinger: I think the answer of most arbitrators is that the technical rules of evidence have no place in an arbitration case. But since most of the rules of evidence are based on common sense, they are useful to some extent. For example, you may have two witnesses available, one of whom saw what happened and the other didn't. If you decide to use the fellow who only heard about it because you think he'll make a more impressive witness, the first thing the arbitrator will ask is, "Did this fellow see it"? In a

court of law that would be rejected on the ground of the hearsay rule. I wouldn't place my objection on this ground. Rather, I would ask, "Why didn't you produce the guy that saw it? The arbitrator has a perfect right not to pay much attention to the evidence of the fellow whom you did produce when you could have produced an eye witness.

"Face Saving" Arbitration

Previant: I don't see anything wrong, from a union point of view at least, with a face saving arbitration. It may be that you think an entire group within your organization is trying to stretch the contract beyond all reason and you may feel that the way to stop that tendency is to go into what you call face saving arbitration. I think that it would not be an imposition on the arbitrator if he understood that an answer is required in order to solve a situation which may cause trouble in the plant. Also, I don't think that you should necessarily call them 'face saving' as that has an unpleasant implicatio It's simply that you've got to get a decision one way or the other.

Another practical consideration a union may face is when it has a series of winning cases before a permanent arbitrator. It may get a little bit leary that the company is going to replace him with a new permanent arbitrator, so it may decide to take a couple of "dogs" up and let the company win so the company won't question the fairness of the arbitrator.

Feinsinger: I agree with Previant on his first proposition. Don't forget that one of the chief functions of the arbitration procedure is to let the partners blow off steam. I can understand why a grievance which the officers recognize may be out of reason, but which the members want to have taken to arbitration, should be taker there. However, I disagree strongly with the idea of sending up cases simply to giv the arbitrator a chance to fatten his batting average. I have known occasions where the union has submitted five cases, three good, and two which they thought were "dogs",

where the arbitrator held for the union only in the "dog" cases.

Suggested Award

Question: I wonder how Professor Feinsinger feels about preparing a case in such a way that it gives the arbitrator a suggested award?

Feinsinger: It is perfectly proper and he welcomes it.

In lots of cases, the arbitration award is unsatisfactory in that it doesn't exactly answer the problem or it covers too much ground. In some cases it helps a lot for the union to say, "We want the arbitrator to award as follows:" and write it in just the way you want it if you should win the case.

Oral vs. Written Argument

Question: I have a case in which the arbitrator asked me to send in an initial statement to him and to the company. Then he told the company to send me back a reply, to which I would send an answering statement. I'm afraid that I'll exhaust all my good arguments in written language and I want to know from the viewpoint of the arbitrator, do they attach as much importance to the written briefs as they would to an oral presentation?

Feinsinger: The initial statement I was speaking of is given to the arbitrator just at the time of the hearing. If I were in your position, I would not like to do what you were asked to do. On the question of the weight of written or oral argument, I would only be able to answer with my own experience. After getting all the evidence, my procedure is to go through everything I have at one sitting - transcript or my hearing notes, and briefs, etc. I don't think that I would attach more weight to oral or to written presentation.

Oral or Written Stipulation

Question: Do you believe it is better to have a written stipulation, or let the arbitrator determine whether or not he understands the question after an

oral presentation?

Previant: Consistent with my previous statements, I would like to stay away from any written commitment of any kind prior to arbitration. However, I think in fairness to the arbitrator, he should know what the question is in some way. I think you should try to summarize the precise question that is involved.

Question: Will you make your statement consistent with your previous position?

Previant: I said as far as I was concerned, in no event should you try to tie your written stipulation down to a specific provision of the contract. It's all right to say "Was this man discharged with cause", "Was this man transferred outside of seniority", "Was this man improperly laid off", "Was this man called back before others were called back who were better entitled to be called back", but don't mention any particular contract section.

Davis: I just might say that from a practical point of view, the arbitrator must know before he hears the case what the issue is that he is to decide. Nothing can be worse than to decide the wrong thing. I, like most arbitrators, will take a double statement, providing it is perfectly clear in my mind what the issue is. Several hours can sometimes be taken up if you try to get a single wording. I think that can be avoided if it is perfectly clear what the issue is.

Influence of Past Practices

Question: Should emphasis be placed on past practice, as well as the written contract in preparing a brief?

Feinsinger: Your contract is supposed to represent what the parties intended. Your contract consists not only of the written language, but of any other evidence which brings out the intention of the parties, including past practice, that went on during negotiations, and how grievances have been settled. If either side suddenly changes the pattern, that will be held against it in many

You may run into the technical problem which we call the parol evidence rule. Arbitrators will frequently say, as courts frequently say, "If the language of the contract is clear, that's as far as you can go." However, rules of contract interpretation often come in pairs. There is another rule of "latent ambiguity" that says, "even though the language appears to be clear on its face, you may introduce evidence to show that all is not as clear as it appears." That's the advantage of having a lawyer. If the arbitrator starts spouting legal propositions, since most legal propositions do come in pairs, your lawyer may be smart enough to think of the opposite one. I have very seldom seen a case where, in my judgment, the language was so clear as to permit only one decision. Even where the language appears to be clear, if you dig into the facts, you'll find in many cases that the parties didn't have that situation in mind when they used the particular language.

Opinion Accompanying Award

Question: How does the panel feel about having an opinion accompany the arbitrator's award?

Davis: I never was on a case without an opinion. I've always assumed the parties didn't want just a decision, but they wanted to know "why".

Weight of Previous Awards

Question: What is a source for getting arbitration awards and opinions in related cases? What degree of weight do arbitrators usually give to previous awards?

Feinsinger: The easiest source to get these awards is at Max Raskin's, David Previant's, or Bobby Gram's office. More seriously, there are various services available: Prentice-Hall, Commerce Clearing House, Bureau of National Affairs. We happen to use the Bureau of National Affairs at the Law School. Certainly somewhere in the City of Milwaukee, in some union office, there must be a

complete set of those reports for the use of those local unions which are not going to employ a lawyer to present their case.

Your question as to how much weight arbitrators give previous decisions is an important one. Practice varies greatly. The new arbitrator, or the fellows who are afraid of criticism, are more inclined to rely on precedents to support their position. The older and more experienced arbitrators, either because they are men of great character or have a separate income, don't care whether they are criticized. Personally, I very seldom pay any attention to other arbitrator's awards, except in those cases where I'm acting as permanent or contract arbitrator. There I feel I ought to give weight to previous awards because one of the purposes of having a permanent arbitrator is to have continuity in the administration of an agreement. For example, for years the umpires of the General Motors agreements have ruled that all an arbitrator can do is to declare job vacant if a promotion was given to the wrong man under the seniority rules. Now, I followed that rule in a recent decision even though I didn't agree with it and even though under most contracts back pay is awarded to the man who should have gotten the job.

There is another time when I use prior awards. Suppose I've got a new question which involves a more-or-less philosophical problem. There I will look up to see who people whom I respect in the profession have d[illegible] at question. Sometimes I may find a good opinion from a fellow I don't know but who has given deep thought to the matter and arrived at a pretty sound conclusion. I look at these decisions and check them against my own reaction. Beyond these two cases, I think I'm safe in saying that I don't pay any attention to anybody else's awards. I'm hired to decide a case on the basis of what I think is right under the particular contract.

Davis: I'd like to put in a word of caution on the use of services. You will not necessarily get a random sample in the services that have been mentioned.

First of all, they only select certain cases they think should be printed. Secondly, only those cases can be included where the parties give permission.

Closing Remarks

Feinsinger: I want to recall my opening remark. Voluntary arbitration is not a court proceeding in which rules as to how the case is to be handled have been laid down in advance. The proceedings are entirely in the control of the union and the company concerned in the particular contract. So please don't feel that because some other unions deal with some things in a particular way, that you must do it in that same way. It is up to you and the company to decide what kind of procedure you want and what kind of arbitrator you want. You must decide for yourself what you think is the best way to prepare the particular grievance before the arbitrator you have selected.

SOME VIEWS ON LABOR ARBITRATION

We're meeting here today for the purpose of discussing some specific problems in the field of labor arbitration. I should like to discuss that subject in a broader setting.

Twenty years or so ago, persons in your positions would have scratched their heads in amazement at the discussions we have been having. In those days, your concern would have been mainly how to get recognition and some kind of an agreement, - you wouldn't have worried much about how to administer the agreement once you got it. Until late in the 1930's, generally speaking, you would have had to go after recognition the hard way, that is, by the strike and by the picket line.

Union recognition and collective bargaining are now part of our national policy. The law requires both sides to attempt in good faith to reach an agreement on terms and conditions of employment, and on questions arising under the agreement once it is made. There is no hard and fast line between bargaining in the making of the agreement and bargaining after the agreement has been made.

The law requires the employer to furnish information which is necessary for the union to bargain intelligently and to police the contract after it has been made. Some of you may be aware of the recent Otis Elevator Case in which a federal court of appeals ruled on a contract which gave to the employer the right to set job standards, but gave the union the right to file grievances over the job standards. The union filed such a grievance and asked (1) for the date on which the employer's engineers had based their job standards, and (2) for the right to make an independent time study of its own. The court unanimously ruled the union was entitled to access to the information on which the employer based his own job standards, but by 2 to 1 vote ruled that it was not entitled, however,

to make its own job studies. That case may go up to the United States Supreme Court. The dissenting judge agreed with the National Labor Relations Board that there was no difference between these two requests and had held that the union was entitled to have both requests granted.

Our government does not as a rule attempt to dictate what goes into the contract or how questions arising under the contract will be settled. There are, of course, some exceptions. For example, the Labor Management Relations Act and our state act provide certain restrictions on the type of union securit clauses that you can agree to with the employer. The government does appoint mediators to help the parties reach agreement but if they still disagree, the parties are free to strike or to lock-out provided that the end is lawful and the means used are lawful. Unfortunately, the ends and means test leads to difficulty because what is lawful or unlawful often depends on what the particu lar judge or group of judges or the members of a government board feel to be economically or socially justifiable.

The "hands-off" policy of the government is based on the theory that in our democracy, characterized by the spirit of free competition and liberty of contract, it is better that the public suffer the temporary inconvenience of a shut-down than to force labor to work or management to run its business on terms not of their own making. It is only in periods of war or defense production, in cases threatening a national emergency or, in some states, an interruption of public utility service, that this principle is departed from and then only to the least possible degree.

It's important to note that employers and unions are not obliged to resort to the strike or the lock-out to settle their contract differences. They may, on the contrary, agree to submit such disputes voluntarily to a third party of their

own choosing for a final and binding decision under such restrictions as they themselves choose to impose. Instances of that kind are increasing, but they are still rare because of the reluctance of labor and management, as they view it, to turn over to an outsider the functions of making the agreement under which they are to live.

Now, in the case of a dispute arising after the agreement has been made, the situation is reversed. As of 1950, over 80% of all the agreements in the United States contained some kind of provision for arbitration at the terminal point of the grievance procedure. There are several explanations for the greater willingness of employers and unions to use this type of arbitration. First, is the feeling that the parties take no great risk in permitting an outsider merely to interpret their contract as long as he does not attempt to add to or change that contract. Second, people are used to having courts decide disputes as to what a contract means. Third, and perhaps most important, is the realization that there must be some way to dispose finally of the varied problems which arise in the day-to-day administration of the agreement, lest an accumulation of unsettled grievances that arise between periods of contract negotiation blow off the lid.

There are often questions that arise during the life of the contract that are not covered at all by the contract. Sometimes the parties have anticipated that situation and have agreed that they shall carry it over until the next contract negotiation. In such a case the union has, in effect, waived its right to bargain over the question.

Usually, however, the parties have not anticipated the problem. In such a case, the union, for example, has a right to ask the employer to negotiate on the question. But suppose that the parties fail to reach an agreement. Then

what? The answer depends to a large extent on the scope of the grievance and arbitration provisions. Suppose that the arbitration clause covers only a question of interpretation or application instead of all disputes: then if a question does not pertain to a matter covered by the agreement, it is not arbitratable. What happens then, if no agreement is reached on the matter? The union, generally speaking, is free to strike, and the employer is free to lock-out, unless they have agreed to an overall, no-strike, no-lock-out clause.

All this points to the necessity of using extreme care in negotiating the contract -- first, to define what you mean by a grievance, second, to state clearly what grievances, whether all disputes or just certain kinds of disputes may be taken to the arbitration step; and third, to specify whether the contrac no-strike clause is to be only as broad as the arbitration clause or is to be all inclusive. If you have an all inclusive no-strike clause and you cannot agree on a matter not subject to arbitration, the employer's decision controls until the next contract negotiation.

Even grievances concerning matters covered by the contract, such as the setting of job standards (a common case), are sometimes excluded from the arbitration clause and from the no-strike clause. In the General Motors contract, the umpire can handle any dispute arising under the contract, except disputes over the study of job standards, but as a corollary, disputes over job standards are excluded from the coverage of the no-strike clause, so the union is free to strike. However, there has not been as yet a single strike over the setting of job standards in General Motors. I am not sure whether this is because of the union's reluctance to strike during the contract even though it has the right, or the fact that the employer leans over backward to be fair in setting job standards. I'm inclined to believe it's the

latter, and if I'm right, then it might be advisable for some unions to experiment with affording the employer more leeway in certain areas than they are generally inclined to do.

Try eliminating some things from the arbitration step that the employers ask, but subject to the understanding that if it does not work, then the matter will be made subject to the arbitration procedure in the next contract. Most unions would probably oppose my suggestion, but I should point out that if you do not want to get too rigid in labor-management relations. Symmetry or completeness must not be confused with perfection.

This does not attempt to be an exhaustive treatment of the subject of arbitration. I am trying to point out that we have come a long way from the law of the jungle in our handling of labor-management relations in a relatively short time. In my opinion, the relationship between labor and management will always have the dual elements of cooperation on the one hand and competition on the other: competition over the distribution of the profits of the enterprise, but likewise cooperation in increasing output, by which all parties concerned benefit, and cooperation in making the agreement work. We shall never, I hope, be in the position of the Iron Curtain countries whose "worker" delegates to the ILO will have to sometimes sit on the labor side of the conference table and sometimes on the management side because they regard themselves as both managers and workers. But the fact that in this country our workers sit on one side of the bargaining table and our managers on the other side of the table, should not obscure our realization that there is, in the last analysis, a common enterprise. Therefore, the pursuit of advantages to one side should not be pressed to the point of real injury to the other.

We are much more civilized in our industrial relations than we were a generation ago, but sometimes I regret to say this civilized attitude does not extend to the arbitration hearing room. The business agent sometimes argues his case as though he were presenting a case to an NLRB trial examiner, charging the company with a vile conspiracy to undermine the union when all that is involved is an honest difference of opinion as to whether John Jones did or did not carelessly spoil some pieces. Likewise, the industrial relations manager sometimes argues that the union is trying to ruin the employer's business, when the dispute is only an honest difference of opinion as to whether the work assigned to John Smith is covered by his present negotiated job description or a description carrying a higher wage rate. Often the people presenting the case become so engrossed in pointing out that the other side is a so-and-so, that they have no energy left to emphasize the facts and arguments relevant to the case. The arbitrator is left impressed with the forensic ability of the parties but without the necessary information to make an intelligent decision in the case.

This brings me finally to the role of the lawyer in arbitration proceedings. Unfortunately, the growing complexity of our present labor relations laws makes it almost essential for employers and unions to resort to legal counsel, both in the drafting and collecting of labor agreements and, to some extent, in the presentation of arbitration cases. For example, the drafting of an arbitration and no-strike clause may be extremely delicate and technical. The improper drafting of such a clause may lead to serious disturbances during the contract, including costly law suits.

Recognizing the increasing role of lawyers in labor relations, the University of Wisconsin Law School is attempting to train its students to be not only

good advocates, but to understand labor relations, to realize that there are many ways of winning an arbitration case, some of which may be more costly to their client than losing it. Win or lose, the employer and the workers must continue to live together after the contract is completed or the arbitration is decided. In my own classes, if I find a man whose natural sympathies are on the union side, I appoint him as counsel for the employer; and if I find a man whose natural sympathies are on the employer's side, I assign him as counsel for the union. It is surprising to see how fast a man can get rid of his own prejudices and adopt the opposite prejudices of his client even in an academic debate. I'm sure that our students will be better labor lawyers, whichever side they serve when they get out into practice, for the experience of having served as counsel, even in classes, for the other side.

PRESENTING THE CASE

Participants: Chairman, Raymond Munts, School for Workers
Nathan Feinsinger, Professor of Law, University of Wisconsin
Pearce Davis, Chairman, Department of Business & Economics, Illinois Institute of Technology
Max Raskin, Milwaukee Attorney
David Previant, Milwaukee Attorney

Procedural Rules for Hearings

Raskin: I'm not one who is interested in too much flexibility but rather believe that certain procedures are necessary. Now some arbitrators even go to the exter of swearing in witnesses. However, I believe that without interruption witnesses should testify from each side with opportunity for cross-examination by the other side and then the arbitrator may ask questions. I think that if you parallel to a large degree the pattern followed in a court of law, you will find that you get the job done much more expeditiously than where there is a talking free-for-all. A witness should be presented and asked questions, one at a time, so that his story is sufficiently extracted. You are less likely to present all the fact when you have a free-for-all.

Previant: I belong to that school of thought that believes in the "grab your best hold" idea. Feel your way along and adjust your tactics and your procedures to the things that come up in the arbitration rather than trying to follow closely the procedures in a court of law. I don't think that it should become a talk-fest, or that there should be a complete lack of control on the part of the arbitrator. I think that one of the things that most of our labor union clients are opposed to is the legal procedures of the courts. They have very reluctantly accepted the arbitration procedure because they had been told "this is different than going into court".

Now certainly a union should know before it gets into the arbitration where it is going---generally, who its witnesses are going to be and what its position is going to be. But I think that you destroy the ability to present a good

case if you try to pattern yourself as closely as you can on a court of law. I myself believe that in most cases the parties are better off if there is no lawyer in the arbitration hearing.

Of course, I think a great deal depends on who the arbitrator is. There are some arbitrators who are not going to permit you to be informal or to be flexible, while other arbitrators encourage it. So you will have to adapt your tactics and your procedures to a particular personality before whom you are trying your arbitration case. I think that it is impossible to plan a really orderly procedure in an arbitration because you may re-shape your entire case and pound away at a particular point after hearing arguments or sensing the feeling of the arbitrator. That, I think, is the advantage of informality and flexibility in a hearing.

Contrasting Types of Arbitration

Feinsinger: Both Raskin and Previant are right. There are two or more proper ways to present an arbitration case. There should be as many ways to prepare and present an arbitration case as the parties and the arbitrator want.

If it will help the arbitrator to understand the case by developing it in the way that Raskin suggests, you should try it that way if you can persuade the arbitrator to listen to you. I have found it most effective for my own handling of the case to have the presentations more informal as Previant has suggested. I'd like to illustrate two types of arbitration proceedings both of which are good because they work for the particular parties.

Under one contract the parties come in together after having met the night before and weeded out all the "dogs" or traded them off. They come to present four or five cases that are real disputes. Each side has come prepared with a short brief. Each puts his witnesses on the stand and examines

them. Then, there's cross-examination and finally the umpire is permitted to examine the witness himself. If we need to go to the plant to look at a job, each side sends a man along with me. Sometimes they file post-hearing briefs, usually not. There are no informal discussions whatsoever between the parties and the umpire.

Now, under another contract, I'll get there the evening before and sit down with the business agent and the top man from the company. They say, "We've agreed on twenty of these thirty-seven cases but we'd like for you to hear what the steward has to say and what the foreman has to say because they'll feel much better if they get things off their chest." I mark these cases. At eight o'clock in the morning we start going through the plant to start to look at the jobs that we're going to talk about in the arbitration proceedings. We pick up people as we go along and discuss the thing very informally. In the hearing each dispute is allowed the same amount of time whether it's a genuine dispute or not.

When we get through about 4 p.m. we dismiss everybody but the business agent and a couple of more fellows on his side and three fellows on the company's side. We take off our coats and we sit down to discuss these cases. I say, "Well, now fellows, it seems to me that there should be no dispute about this group of cases; the company is clearly right about these and the union is clearly right about these". They can argue if they think I'm wrong, but generally speaking, they will agree that my hunch is right. So you are left with about three cases that are very tough. Then we argue back and forth and I take part in the argument. When it is about six o'clock I say, "Now, if you fellows don't agree on the remaining cases, I'm going to decide them, one way or the other". They may ask for a recess. Half the time they call me in and say "o.k. You're all through. We've settled it". The other half of the time they may have one or two cases and they say "On these we're ready to ask your decision".

I decide and I tell them why orally. Now until last year then we used to call in a stenographer and I would dictate opinion and the awards in all these cases and they would say "Wait a minute. That's not clear. That's going to cause trouble if you do it that way". After a while, it occurred to me that it was just a waste of time for me to do it, since they were telling me what to put in the opinion anyhow. Now they write them up and send them to me. Sometimes I catch one where I would not have put it that way so I refuse to sign and send it back for revision.

Booby Traps in Presenting Cases

Raskin: Generally speaking, if the international representative knows the case at his fingertips and knows the proof that he's going to submit to the arbitrato there are very few booby traps he could fall into. However, if he decides at the last minute and relies exclusively on the grievance write-ups that he has accumulated in his briefcase, then, of course, he's liable to find that he never reached the real issue and the arbitrator will probably decide against him. An exception is the informal procedure Feinsinger describes where everybody just si around and talks about the case.

But for the most part, where arbitration cases are quite recent and you haven't yet orientated yourself to this method of presenting a case, you're safe by all means in presenting it in the more ordered manner I have suggested. Safe, because you will avoid talking out of turn and making an admission in this so-called "off the cuff" discussion which the other side may grab on to and repeat and perhaps blow out of proportion and get accepted by the arbitrator as the basis for his decision. If you've got your case outlined, you know what each fellow is going to talk about. You know what the weaknesses of the company are and plan questions to reveal them, and if you're in a position to make a good summary, I think you'll be in good shape. I think the free discussion ought to take place after all the witnesses have told their stories,

but not in the process of their telling them.

Is A Stenographic Record Useful?

Feinsinger: If you have a verbatim transcript, it can serve as a supplement to your own notes. You may mark in your notes that certain testimony is unimportant and can be skimmed while other testimony should be examined intensely.

Raskin: I find it somewhat disconcerting when an arbitrator continuously takes notes. It's hard to tell if you are getting your testimony over. That's one of the reasons I recommend, if it's at all possible, to have a stenographic record. Then the arbitrator can concentrate on the situation and he can see and listen to the people.

Feinsinger: I'd like to add one caution to Raskin's remarks. Don't look at the arbitrator and don't expect the arbitrator to look up in order to encourage you or discourage you or it may be misleading to you.

Previant: I want to register a dissent on the transcript idea. When you submit to arbitration, you've got to accept the arbitrator's mistakes of facts, and the arbitrator's mistakes of law. However, many employers in my experience, are not willing to accept those mistakes. The employer will use the transcript to attempt to destroy entirely the award and to cast a reflection upon the integrity of the arbitrator and upon the integrity of the union representative. Unless it's an exceedingly complicated case, arbitrating wage matters, I don't think the arbitrator really ever has any need to go to the transcript if he has paid attention during the hearing and taken either sketchy or copious notes. If he's a good arbitrator he has at least the basic essentials necessary for his decision. He knows what he's looking for and has questioned the witnesses closely on those particular points. Also, I think that having to work with the interruptions of a recorder is a greater handicap than having the arbitrator sit there taking copious notes.

Comment: It seems to me that if it's three or four weeks until the arbitrator gets around to writing his opinion he will have to have a transcript to refresh his memory.

Feinsinger: That's one of the nice things about a transcript for me. But when don't have any transcript, I try to write that case up fast, while my notes are meaningful.

I think arbitrators take too long to decide their cases. I suggest that in all your appointments of an arbitrator you say "one of the terms of your appointment is that a decision be given within thirty days after the last brief." If he realizes he's got thirty days' deadline, he'll probably get it out of the way within two weeks, but if you don't give him any deadline, he'll do anything else first, because it is really tough to write up some of those decisions.

Legality of Arbitrator's Award

Question: Is there any way in which a court of law can upset an arbitrator's award by comparing the transcript with the opinion and decision?

Feinsinger? The grounds on which an award can be upset by the courts are very narrow: fraud, collusion, or exceeding the arbitrator's authority. A mistake of fact or law is no basis for setting aside the arbitrator's award.

Cross-Examination of Witnesses

Feinsinger: Both sides I think very frequently hurt their case by spending too much time on minute cross examination. Unions particularly lose cases which they should have won by hurrying through their affirmative case in order to tear the company witnesses apart.

Question: I wonder if Mr. Feinsinger wants to take all the enjoyment out of arbitration in cross examination of the company's witnesses. How can we get the arbitrator to understand or to recognize that the witness is lying if we

don't cross examine a great deal?

Feinsinger: The answer is to bring it out through your own witnesses. I have seen union representatives try hour after hour to get witnesses to admit lying but that is very rarely successfully accomplished. The best way to prove that the other fellow is lying is to produce your own people, have them tell their story, and let the arbitrator decide who is lying and who is telling the truth.

Question: Where there's a direct conflict in testimony, isn't it true that the arbitrator will put more weight on the testimony of the individual's foreman?

Feinsinger: The answer generally speaking is "no". It depends on the particular foreman's testimony. The foreman's testimony carries no more weight than the janitor who may be involved in the case.

Length of Pre-Hearing Brief

Question: Is it better to submit a short general brief and then carry on with the main points in your oral presentation, or is it better to present a good complete brief with your most important points listed there?

Feinsinger: In any case you should bring out everything at the hearing, all your evidence and all your arguments. Your citations of authority you can let go until later. If, as Previant advises, you are going to limit your brief, then I suggest that you start out with a one-page summary of the case. The important thing is to give the arbitrator at the beginning of the case by a brief or a summary statement, a general idea of what the case is all about, what you claim the facts to be, what your position is, what the other fellow's position is, where the difference lies, and what you're asking him to decide.

Question: Do you think from your experience that arbitrators are aware of the natural hesitancy of many witnesses to go counter to the wishes of management?

Feinsinger: That's a difficult question. The arbitrator, in theory at least, does not attempt to help one side make it's case because it may be weaker than

the other side, or have a weaker case. Now, I say that with reservations, because even a judge, when he feels that a party has a case but because of poor expression, etc., isn't bringing the case out in its best aspects, will take a hand, and by his own questioning produce the necessary facts. In that connecti I might point out arbitrators are very frequently criticized for doing things that courts do ever day. However, you can't expect the arbitrators to give you a break, a 10% discount or anything like that because your witnesses are timid.

Should Witnesses Be Sworn In?

Previant: A lot of arbitrators feel that psychologically there is an advantage in swearing in a witness. My own experience is that the guy who is inclined to lie is not influenced a bit by being sworn in.

Raskin: I think that the arbitrator ought to be able to understand who is closer to the truth, without placing witnesses under the restraint that the oath usually has psychologically.

Davis: As far as I'm concerned I'd never ask for it, but I always ask the parti what their pleasure is.

Feinsinger: My practice is not to swear the witnesses in unless that is the understanding of the parties or unless that's the rule of the office that appointed you, like the American Arbitration Association. You've got to remembe that the witnesses are fellows from the shop and like most stories that fellows tell in the shop, their testimony is composed partly of things they know partly of things they believe, partly of things they don't believe but would like the arbitrator to believe. Now as the arbitrator hears these fellows, he tries to form a conclusion --"Just how far can I trust this or that witness?"

Now the minute you put a witness under oath he starts to stutter and he gets all fouled up and you don't get the story. Particularly when the lawyer on cross examination says, "In answering this question, I want you to realize that you're under oath."

Question: Would you advise that the union would be better off not using a witness who has difficulty remembering time, dates, or people with whom he worked?

Feinsinger: If the witness has anything to contribute, I don't think a good arbitrator will be misled by the fact that the fellow has a poor memory for dates, etc. A lawyer frequently will try to discredit a witness for that reason, but a good arbitrator knows it is human nature to make mistakes.

Change of Grounds in Arbitration

Question: Suppose that a case has been fought on seniority grounds through all the steps of the grievance procedure and suddenly, the company, for the first time at the hearing uses the discharge clause to support its case. Has the arbitrator the right to examine the case from this entirely different point of view?

Feinsinger: That's a very good question. As often as not , however, the shoe is on the other foot and it is the union that advances another theory or relies on a different clause of the contract before the arbitrator. This is a situation where Previant's theory about not freezing your case in a submission is in point. Many arbitrators say that you cannot change your theory or basis of your case after it has once reached the arbitrator. I am probably in the minority. The position I take as arbitrator is to do justice to this individual under this contract regardless of the grounds on which the grievance was originally presented.

Question: If a case is made where agreed-on practice has replaced the contract, does the contract or the past practice govern?

Previant: I would like to decide before the hearing whether I'm going to argue that a clause is unambiguous and that the decision should be made strictly on the clause, or whether I'm going to argue that there is latent ambiguity and leave it wide open. The danger in leaving it wide open is that the union representative may not tell you of all the past practices so that you may hurt yourself by giving the employer an opening. However, I've found that even when I argue that the contract clause is clear and that there is no reason to search into the past practices, the arbitrator will usually decide to take the additio evidence anyway.

PROBLEMS IN WAGE INCENTIVE AND JOB EVALUATION ARBITRATION

Participants: Chairman: Bertram Gottlieb, School for Workers
Pearce Davis, Chairman, Department of Business and Economics, Illinois Institute of Technology
Anthony Doria, Secretary-Treasurer, United Auto Workers, AFL
Bertram McNamara, Staff Representative, United Steelworkers, CIO

Gottlieb: In an article in the June edition of the Labor Law Journal by Herbert Unterberger, three solutions are suggested to the problem of arbitrating technical cases. One is to use a technician as arbitrator. The second is the use of a technician as an advisor to the arbitrator. In the third solution, the technician not only presents his findings to the arbitrator but presents the material to the parties, and if they so desire, they can have a hearing in front of the arbitrator and go over this information. What do you think of these approaches?

Technical Adviser to the Arbitrator

Davis: I touched on this subject this morning when I asked whether the unions try to seek out particular people for particular cases. I got the answer that they do and I would certainly think this is desirable. Now the third suggestion Gottlieb mentioned of having a technical adviser is a very good one, except for a practical difficulty which I think kills it. A consulting expert is going to increase the cost of these cases very substantially. I think it would be very difficult for the typical union to take a 75% or a 100% increase in the cost of cases. I don't know what the solution is except to train enough arbitrators who understand the problems.

Doria: Any dispute that involves an incentive problem has to come down to the point of measurement. To submit a problem to any arbitrator who did not have complete grounding in the technicalities involved in the matter of

measurement would be a hopeless task. Then it would be a case of who could present the best argument to completely confuse the arbitrator. The arbitrator would be in a position of 'who convinced me', not who was right. Even if the consultant could impart to the arbitrator his complete technical knowledge, and the arbitrator could make his decision with full control of the technicalities that are involved, we are actually taking, then, the results that have been arrived at by the consultant. Therefore, I would favor selecting the most technically competent individual that is available to us. Of course, he should possess those characteristics of impartiality that we look for in any arbitrator

Since most consultants are working for management, where do we look for one that will not hurt the union cause in an arbitration proceeding? Our only assurance is to state the case clearly so that the consultant has to take a very specific position with respect to very specific facts. The award rendered in writing remains as a permanent record of the policy of the consulting firm.

Industrial Engineer as Arbitrator

McNamara: I agree completely with Tony Doria about using a technical consultant to the arbitrator. But should we agree at all to the use of technicians as arbitrators? Where do you find an industrial engineer that you can rely upon to be reasonably impartial? By and large, they are individuals who have taken their training solely for the purpose of getting a position in industry. I've found generally that companies who propose industrial engineers as arbitrators in wage rate cases are companies who, in the beginning, were extremely reluctant to have the matter of incentives arbitrated at all. They have found that if they have to submit to some form of arbitration, they prefer the industrial engineer because they feel they have one of their own kind to arbitrate the case.

Even where we have agreed to having an industrial engineer, we have finally concluded that there are possibly five or six men covering most of the United States that we could generally agree on. When you examine them, you find that at least two or three of them are not industrial engineers but arbitrators or university professors who have had some industrial engineering training. I have found from experience that I prefer to rely on the professional arbitrator who has had broad experience in incentive cases as well as the other kinds of arbitration. You have to recognize that even in incentive cases you want to have a man who can interpret the agreement.

Davis: There are some contracts that call for a competent industrial engineer to arbitrate certain types of cases. The plain fact is that there is no agreed upon definition of "industrial engineer" in the profession itself. I would suggest that you achieve what I think you want by putting in something like "a person trained in incentives" or "competent in this field", rather than tying yourself to a term that may cause you trouble.

Time Study by Arbitrator

Question: Don't we need to have an arbitrator who can time-study a job, not just one who is acquainted with wage incentives?

Davis: In the sense of going in to do a complete job, the answer is "no". If you go into that sort of thing, it will take a fantastic amount of time. I think that by the proper presentation on the part of the union people and the company people, plus an experienced man going in and looking at the job and going over the points, you can achieve your objective. I think unions are doing a very good job of presenting arbitration cases, but if there is one field in which they are weak, it is in technical presentation. I think that every union should have trained people who can present technical cases.

Performance Rating

Doria: To me, the whole issue of an incentive grievance, when it gets down to its bare facts, is a matter of the time study man's judgment on the performance rating of the operator. I don't worry about a man deliberately chiseling on the actual clock timing of the operation. That can be too easily checked and an error determined. But it is very easy for the time study man of the company to say, "This fellow was working at 105 per cent" when actually he was working at 130 per cent. Therefore, you've got to get right back to the job. No amount of facts that could be presented in the arbitration hearing could ever make up for the lack of the information as to what the performance was when that job was time studied.

Question: How would Mr. Davis decide a case where there was a difference of opinion on the performance ratings? Would he split it right down the middle? Would it then be smart for the union to set their sights high and have the company set their sights high so in the end they wind up in a compromise?

Davis: I certainly don't split it up the middle. All I can say is all the facts have to be presented and I've got to see the situation to make a decision, maybe wholly for the company or wholly for the union. Certainly there is no slide-rule technique that you can apply. It's judgment from the company, judgment from the union, and judgment from the arbitrator-informed judgment.

Types of Incentive Cases

Question: I'd like to know, Mr. Davis, whether it's your experience that in many cases the method of taking the study, the conditions of the job, or the contract terms cause trouble, or do you arbitrate in most cases the performance ratings Mr. Doria discussed?

Davis: That gives me an opportunity to bring out that there are all sorts of arbitration issues revolving about the general incentive problem. There is the

question of standards. Here you have to go over the entire approach of the company. On the other hand, you get a question such as I had not long ago as to whether or not the company was privileged to change the incentive rate, in view of the wording in the contract. Here the parties very carefully said, "We don't want the arbitrator to tell us whether the change in rates was right, only whether the company had the right to change." All the things you listed are possibilities with all sorts of variations.

McNamara: I think the type of case depends on the kind of industry with which you're working. We have any number of grievances which arise not over the actual process of setting the rate, but over whether or not the company has a right to change a rate, or whether the job was changed to the extent that a new rate is necessary. I would much prefer to submit such problems to a competent professional arbitrator than I would the alleged specialist, the industrial engineer. Although these are incentive problems, they are also basically a matter of contract interpretation.

Question: Which is the hardest one to solve?

Davis: The standards question and the detailed method are the hardest cases there are -- or they ought to be.

Are Performance Ratings Measurable?

Question: Are we arbitrating measurable quantities, particularly in the case of performance ratings?

Doria: Let's say that we're measuring measurable quantities with a flexible rule, because of the inability to provide methods that are as exact as they should be. When we get into performance ratings, judgment unquestionably has to play a part. But I do believe that we can start relating performance rating with certain basic factors that have been determined about the productive capacity of individuals. What is the range of this capacity in human beings

taken as a group? And within that range we're trying to place the pacing of that particular operator when that time study was taken. I might say at this point for the benefit of just union people that the thing that is wrong with this whole scheme of incentives is that employees who are working in the plant don't spend their whole time on it, but are usually the ones that have to bring about the challenge. We shouldn't be overly impressed by someone who has a stopwatch, a slide rule, and some fancy terms. After all, we're trying to find out one thing: how much faster does a fellow work, and is he getting paid for the how much faster that he works? The way we get that answer should not be impressive. We should find out to what extent we have answered that question. And we ought to challenge what we believe is wrong.

Comment: I think one of our biggest problems is to get our workers to work at a normal speed. Then if the rate doesn't come out, his earnings are going to prove that the time study man was wrong in that rating. But sometimes in the shop you get a smart guy that'll go in there and think he's going to fool the time study man. Maybe he'll go like a cyclone to see how high the guy's going to rate him. Then the time study man gives the guy a rating of 120 per cent. This normally wouldn't be too bad if he had been working right along, but he was really tearing. When he found he had to work the job all day long, he couldn't make out and there's a grievance.

Comment: Your situation is one even an arbitrator would have an awful job settling for you. You'd have to come in and say, "This guy is an above average worker and was working at above the normal speed when the time study was taken." What are you going to base this argument on? Your only course is to argue that here is a man who has been earning $2.50 or $3.00 an hour on piece work. On this particular job he can only make $2.00 an hour so the rate must be off base.

Synthetic Standards

Question: Would the arbitrator accept some such synthetic system as MTM as evidence to back up management's position?

Doria: I had such a case. Off hand it looks terribly convincing to a person who doesn't know the opposite arguments. I believe that MTM is being palmed off on unions today as being something super scientific. I think that any union makes a mistake to accept any form of synthetic standards or basis for synthetic standards that cannot be checked directly against the operation in that plant. We do not know the pacing of the operators when the synthetic standards were adopted -- there might have been as much of a mistake made there as there will be in an original time study in your plant.

The proper precaution must be taken at the time your contract is written not to commit yourself to the extent that you bind the arbitrator's hand by having accepted standards submitted to you by the company that cannot be challenged by the operator or the arbitrator. Then when synthetic standards that do not properly apply are submitted as the company's argument, the arbitrator can use enough judgment to say, "Well, now, look. That may be right as far as it goes, but it does not apply to this particular problem."

Influence of Past Earnings

Question: Does an arbitrator look at prior earning records or efficiency percentages in making his decision as to whether the company's rating at the time the study was taken was the proper rating?

Davis: An arbitrator certainly would look at that as one factor. We're aware, incidentally, of the possible situation that was just described. I don't think you can give a flat answer as to what you select as the deciding factor in it. You have to take all the circumstances and put them together.

Question: Supposing that you have a job and it's been timed and has been worke on for some time. Then the company decides to make some mechanical change or some change in procedure and adjust the rate. After they adjust the rate, the potential earnings that they were making before are not there. Would you have a case for arbitration? Would the arbitrator agree that, even if you have to make more pieces, at least the potential earnings that you had previously shoul exist?

Davis: It is awfully difficult to answer specific questions. I think the general principle you state is correct. I look at past earnings, but I like to see, if possible, a normal run on the job as it has been set up. Now one of th problems is to make sure you have normal earnings possible after the change. Sometimes psychological reactions are reflected in earning history after a change.

Technical Aid to the Union

Question: Should the union use someone who has some special skills in this field to present the arbitration case?

McNamara: I think it would be desirable if the union can afford it and if you have an industrial engineer available. Some unions have trained industrial engineers on their staff, but usually do not have sufficient trained personnel to cover the entire area. I've found that in most cases you have to rely on your own resources. The answer is for us all to have more training in the field. If we attempt to hire independent industrial engineers, then we run into much the same problem that we mentioned earlier about the industrial engineer as an arbitrator. You're hiring someone whose sympathies are mainly with management.

Agencies with Technical Arbitrators

Question: What agencies do we have to which the appeal for qualified arbitrators in this field?

McNamara: I've had experience with both the American Arbitration Association and the United States Mediation and Conciliation Service. If you request a person with special training in that field, they will attempt to send you a list of arbitrators who admittedly have experience. But you have to scrutinize them very closely because we have found that in a list of five people, perhaps three of them would be industrial engineers, in some cases working for management consulting firms. So you pay your money and you take your chances based on the very brief descriptions furnished.

CONTRACT CLAUSES ON ARBITRATION

Participants: Chairman, William Kuhl, School for Workers
Nathan Feinsinger, Professor of Law, University of Wisconsin
David Previant, Milwaukee Attorney

Comprehensive Clauses

Previant: I have prepared a check list of things to watch for in your arbitration clauses.

First, is to make your arbitration clauses as comprehensive as you can. I would like to see all the arbitration and grievance clauses say that any dispute which might arise between the parties shall go through the grievance and arbitration procedure. I would exclude questions of general wage increase: unless you are one of those unions that believes that even in the negotiation of a new contract you want to subject all questions in dispute to arbitration. A clause limited to the interpretation of the agreement cannot, in my judgment, cover all the many things that might arise during the life of a collective bargaining agreement. One of the examples that comes to my mind is the question of sanitary conditions in a plant which is not covered specifically by a contract clause.

Secondly, if you cannot get a broad clause on grievances and arbitration, then I think you've got to reserve the right to strike on those matters not covered by the grievance and arbitration procedure. Many times you will have employers who argue for very narrow grievance and arbitration clauses. The best answer is to say, "That's your choice, but as a matter of fairness, you will have to agree with us then that we shall have the right to reserve our economic strength in those cases where you do not care to arbitrate." Now, generally, you won't have to put that into the contract because when you

make that argument to an employer, he will ordinarily revise his ideas and will give you a broad contract clause on the grievance procedure and the arbitration procedure.

Bar Legal Proceedings

Third, you should include a clause that neither the company nor the union will institute any legal proceedings that by-pass the arbitration procedure. Legal proceedings should include petitions before the State Labor Board or the National Labor Relations Board, or any kind of governmental agency. We should have the assurance during the life of the contract that all of our disputes are going to be settled by the arbitration procedure, and that you aren't going to be running into court or before government administrative agencies without exhausting all procedures or without accepting the arbitration as final.

The Right to Strike

If you don't have a final and binding arbitration, you must make sure that your no-strike clause does not exempt you from striking at the terminal point of the grievance procedure. I don't think it's safe to rely upon the absence of a no-strike clause to give you the freedom to strike as the courts have interpreted it differently. Where you don't have a terminal arbitration procedure, the right to strike should be specified in the contract.

One or Multi-Case Hearings

Another question is whether to submit more than one question at a time to an arbitrator. There is much to be said on both sides. On the one hand, where a lot of grievances have accumulated, a small union cannot afford the expense of arbitrating each case separately. On the other hand, if you submit too many grievances to an arbitrator at one time, he may be inclined to bargain with himself as to what he's going to do and balance his decisions

to keep both parties happy. However, I prefer the idea of trying to get all the unsettled grievances out of the way at one arbitration hearing, particularly because arbitrators have become expensive.

Selection of the Arbitrator

It is very important to make sure that you have selected a method for the appointment of the impartial chairman. We still come across arbitration clauses that say the company will appoint an arbitrator, the union will appoint an arbitrator, and the two shall then meet for the selection of a third man, but then forget to say what will happen in the event these two arbitrators do not agree upon the third man.

Default Procedure

I would handle default by a clause stating, "If either party willfully fails to participate in the arbitration proceedings at any stage, the grievance or dispute shall be deemed automatically in favor of the party who is not in default, at the time of such willful failure to participate, and such automatic determination may be enforced by legal or economic action or both." Similarly, if either party fails to comply with the final decision of a board of arbitration, the other party may enforce such decision by legal or economic acts, or both.

Fortunately, today you don't have too many employers who will put themselves in a position of not acting in good faith under the contract. But you still do have some who will arbitrarily disregard their obligations and try to embarrass the union. In that circumstance, the union should protect itself in the arbitration clause and be in a position to fight, if it believes it can successfully, by a strike or at least by a full legal proceedings. In Wisconsin the courts have held that you cannot specifically enforce a clause

to arbitrate. I think the clause I suggest would give you the right to go into court because you are not trying to enforce an agreement to arbitrate but to enforce the decision which has resulted by default. Of course, in Wisconsin you can still go to the State Labor Board for enforcement of your arbitration clause, even though the courts will not specifically enforce it. It has not yet been determined whether you can get court enforcement through the indirect method I suggest.

Technical Assistance to Arbitrator

Another good clause to consider is whether or not you want to give to the arbitrator the right at the expense of the parties to hire technical assistance where you have not been able to get an arbitrator who is technically qualified.

Clarification of Award

It would be my recommendation that in your arbitration clause, you provide that jurisdiction shall be reserved and that the board of arbitration must determine or clarify any questions which arise under the award as granted. If the board is dissolved and no longer has any authority in the matter, you may find yourselves in the same dispute all over again, but with no recourse.

Time Limitations

I think Feinsinger's suggestion that a time limit should be given the arbitrator is a good one. However, I don't believe such time restrictions should be put in the contract itself. Sometimes the arbitrator just cannot get his decision done in the time set forth in a contract, and the employer will take advantage of it as being jurisdictional. There are other time limitations that you can put into the contract so that you can avoid delay. A clause should require that each party appoint its member on the arbitration

board within a certain period of time, require that these two parties shall agree on the third man within a certain period of time, and require that if agreement is not reached, that there should be an immediate submission to either federal or state agencies or to a circuit judge for the appointment of the third man.

Stenographic Costs

If there is going to be stenographic reporting of the hearing, I would suggest putting in the contract that the party requesting the record be imposed with its cost, and also be required to provide a free transcript to the arbitrator and to the opposing side. At least then we won't be paying the cost of something we oppose. If the arbitrator himself requests it, you have no choice but to share the cost. But I don't think that if any one party vigorously opposes it, the arbitrator is going to ask for it.

Conclusion

I must say that not enough time has been spent in drafting arbitration clauses in the past. I think it's just as important to get these clauses in good shape as to get your extra nickel or ten or fifteen cents, because you can lose your wage increase by an improper application of the contract or by an arbitration clause that does not give you the relief that you want.

Time Limit in Grievance Procedure

Feinsinger: I have just two or three suggestions to add to Previant's excellent coverage. There's another time limit that has caused a good deal of difficulty, and that has to do with the time limits of the various stages of the grievance procedure. There are some arbitrators that have been very tough and have said that they have no jurisdiction under the contract to pass upon the grievance if the time limits haven't been met. I don't know exactly how to get around these problems, except to use language indicating that

those time limits are not jurisdictional and that the arbitrator shall have the authority to consider any dispute.

Time limits do have a useful purpose in the contract as unions have a tendency to drag their case, but there is the danger that a worthy case may be lost on a pure technicality.

Definition of "Dispute"

Secondly, I suggest a little variation on the broad disputes clause to read "Any dispute except a demand for a change in the terms and conditions of the existing contract". By stating what is excepted from the word "dispute" you make it doubly clear that you mean any other kind of a dispute. Otherwise the arbitrator may rule that the words "any dispute" exclude not only demands for a change in the terms of the existing contract, but any kind of demand which would normally be made in collective bargaining negotiations, on the theory that the parties did not mean to have that kind of question raised during the contract.

Jurisdiction of the Arbitrator

More and more arbitrators' awards are being attacked in the courts on the ground that the arbitrator exceeded his jurisdiction. This is particularly true where the arbitration clause reads "The arbitrator shall have authority only to interpret or apply the contract and shall have no authority to add to, modify, or any way change the terms of the contract". Of course when the arbitrator decides in your favor, he is merely interpreting the contract, but when he decides in the other fellow's favor, he's changing the contract. The losing party may very well attack the decision on the ground that the arbitrator added to the contract in violation of terms of the agreement or may refuse to take the case to arbitration in the first place on the grounds that it is not arbitratable, and resort to an injunction, particularly in

the federal and New York courts. Unfortunately, the courts have a tendency to go ahead and make their own determination of what is arbitratable and what the jurisdiction of the arbitrator is.

There are two ways to avoid this increasingly important problem. One is to say that if any question is raised as to the authority of the arbitrator to pass upon a particular grievance, that question shall also be determined by the arbitrator. The other, of which I'm not so sure, is to say the arbitrator shall also be the final authority on whether the contract has been modified. In that way, you have said to the arbitrator, "Don't change the contract, don't add to it, but, we leave it to your judgment to decide whether you are changing it or adding to it." The worst part about these cases is the delay. You've gone through the grievance procedure, you've gone before an arbitrator, you've won the award and now you've got to fight the whole battle over again in the courts. It is costly and time-consuming and it makes for ugly labor relations.

Conclusion

Now, I want you to take everything that's been said here with a grain of salt. If I've made any point today at all, it is consider the problem in relation to your own case. There may be some cases where you're better off taking the technical or the tough position.

Before you sign your contract, be sure that you look through the contract to find all clauses that deal with grievances and arbitrators and be sure they are consistent. Sometimes a problem is raised by a discrepancy between the grievance provision, the arbitration provision, the management clause and the no-strike clause.

Question: Could a union, under the state labor law, make an unfair labor practice claim that the company failed to abide by the terms of the agreement?

Previant: I think so, but even there, you have no assurance that the state labor board is not going to decide that the particular award was outside the jurisdiction of the arbitrator.

Feinsinger: The first question is whether the employer has to arbitrate and the second is whether he has to comply with the award. The question as to whether he has to arbitrate is an open question at the moment. You can't compel arbitration by direct proceeding in court but the State Board has said you can by an unfair labor practice complaint. Concerning the enforcibility of an award, you have always been able to take your award to court and get an order compelling the employer to comply with it. Today under the State Labor Act, you can also file an unfair labor practice charge.

Question: If you have a clause that the arbitration board has a right to determine its own jurisdiction, would it also prevent the process of having to go to the State Labor Board and taking a chance?

Feinsinger: You'd probably first have to get a court's decision or the Board's decision as to whether that clause was binding, but I think it would be.

Three Man Board

Previant: I wasn't here this morning to put in my oar for the three-man board. I like the idea of the union representative being there to keep the arbitrator in line when he starts to get off the path. Actually, the decision is made by the third man and the others can either add to or sign it as agreeing or disagreeing.

Feinsinger: Wouldn't it be better and accomplish both results to provide for a three man board but provide that the decision of the neutral man shall

be the decision of the Board? Otherwise, you invite dissents which are usually only attacks on the arbitrator.

The advantage of having the parties there, although with no power to vote as Previant pointed out, is that they can discuss and argue with the arbitrator to be sure that he's got good reasons for his decision. There's an additional reason; they're often useful as pipe-lines to get additional information which isn't brought out at the hearing. Don't forget that in half of these arbitration hearings, the people act as though their problem is to keep the arbitrator from finding out what the truth is. When you get all through with the hearing, you still don't know what the real truth is so you get together with your two board members and say "will you check on this"?

Question: Couldn't the arbitrator check directly with the parties?

Feinsinger: In most cases the theory is that it is a judicial proceeding and you're not allowed to talk to one side alone. Your job is done when you've heard all the evidence. He doesn't want to do it in an ad-hoc case. If he's a permanent arbitrator, sometimes it does work out that way. In other cases, like General Motors or Allis Chalmers, never. You don't dare talk to them informally, together or separately, about a case.

The board of three is also useful where the problem is a very hot potato for both management and labor. An employer representative and a union representative working with the arbitrator can retreat from an extreme position gracefully without anybody accusing you of trying to fix the arbitrator behind somebody else's back. You'd be surprised how often a union finds itself in this position. It's got to suggest a compromise because it doesn't want the decision to go all the way. It might win the

particular case and lose a big advantage in the shop or stir up some internal disputes that could very well wreck the union.

Now those people who think that arbitration is purely a judicial process would object and want to have one arbitrator act as a judge. Those who believe that arbitration is merely an extension of the collective bargaining process and a method for settling disputes between labor and management believe that it should be a three-way deal: the impartial man, the employer and the union trying to work out the problems together.

Previant: I think it should be in the arbitration clause that the third man's decision shall be the decision of the board whether they agree or not and that the other two members are merely advisory.

Penalties

Previant: Sometimes you run into a situation where the union and the impartia man may agree that a discharge was not for good cause, but may disagree about the remedy. The union man insists that he shall be reinstated with full back pay but the impartial man thinks there should have been a one-week or two-week disciplinary lay-off. A lot of consideration should be given, either in the arbitration clause or in your discharge clause to the question of remedies. The arbitrator should not be limited to one of two decisions, either reinstatement with full back pay or discharge. I have had cases taken to court by the employer on the ground that the arbitrator had no jurisdiction to compromise.

Feinsinger: It is important to decide whether you want to give your arbitrator authority to modify, to reinstate with full back pay, to sustain the discharge or any intervening penalty.

Previant: Speaking strictly from a union point of view, you're better off giving the arbitrator the flexibility to determine the penalty, because he may find himself in a position where he would not, under any circumstances, believe that a man should be reinstated with full back pay but may believe that discharge was too severe. If you tie his hand, he will decide to lay the man off altogether rather than say the employer has no right to do anything to him.

Particular Biases of Arbitrators

Question: Would it be advisable to permit an arbitrator to hear cases similar to ones on which he has ruled against you?

Previant: It's very important to work to see if an arbitrator has a definite slant with respect to certain types of grievances. Generally, after an arbitrator becomes well known, you can say, "This guy's sympathetic on discharge cases but don't ever take him in an incentive plant or in a job evaluation case because he's a strong management rights fellow". Most employers, when they get a list from Federal Mediation or anybody else, will try to get a complete run-down on each man on that list either by looking at his biography as it may be reported in the various arbitration journals or by the American Arbitration Association. Many unions don't unfortunately. Sometimes they get stuck while if they had made some inquiries, they would have found their choice was swell for some things but for the case they'd chosen him, he was poison.

Suggested New Contract Language

Question: In one case which the arbitrator awarded us a decision, he stated an alternative contract phrasing under which the company would not have been liable. What do you think of putting words into their mouth like this?

Feinsinger: The arbitrator may be trying to justify his position by saying the company's argument would have been entirely proper if they had been astute enough to word the contract this way. Then it becomes a matter for bargaining and the next negotiations. Haven't you many times taken matters to arbitration to get a decision so that you know whether or not you've got to change your contract? You may take a case that you know may be a loser because you want a determination from the arbitrator so that if you lose, you can correct it at the next negotiation.

SCHOOL FOR WORKERS
UNIVERSITY OF WISCONSIN

APPENDIX I

ARBITRATION

PREPARATION OF THE CASE

Examine what took place at the earlier stages of the grievance procedure.
- what have been the company's main arguments
- what have been the union's main arguments
- what can the union exploit from the company's early presentation
- what might the company take advantage of from the union's presentation
- what approach will the company probably take
  - --as indicated by previous experience in arbitration
  - --as indicated by the early stages of the procedure
- what witnesses will the union need
- what witnesses will the company probably use
- who will probably be in charge of the company's presentation
- what exhibits will the union need
  - --grievance
  - --letters
  - --contract
  - --transcripts of earlier meetings
  - --technical and statistical information
  - --other possible exhibits (pictures, materials, records, etc.)

Check for precedents and past-practice
- settled grievances of a similar nature
- arbitration awards, local and general
- past practice, the generally accepted way of doing things which has been accepted by both parties, at least tacitly, without regard to what the contract or company rules may provide

Prepare presentation
- opening remarks; what the union will seek to establish
- direct testimony; remarks by union representative
- witnesses; reinforcing the union's contention by developing points through witnesses
- preparing questions for witnesses
- drilling union witnesses on prepared testimony
- attempt to prepare witnesses for cross examination by company
- attempt to prepare for cross examination of company's witnesses

Line up exhibits
- prepare copies for the union, company and arbitrator
- decide when and where they will be introduced
- number accordingly

PRESENTATION OF THE CASE

(Where the company has taken the initiative, as in a discharge, it is adviseable for the company to present its case first. Where the union has taken the initiative, as in an effort to raise rates, the union will probably present its case first.)

While the company is presenting its case
- take notes of company's opening remarks, direct testimony and statements of witnesses
- prepare to cross examine company witnesses
- consider the possibility of calling certain company representatives as union witnesses; may catch them off balance

The union's case
- follow a logical sequence
  - --the circumstances
  - --the contention: facts, witnesses, exhibits
  - --the conclusion: summation of case
- amend and modify or amplify prepared presentation as required in light of company's presentation
- use care in deal-ing with company representatives and witnesses
- have consideration for the arbitrator as a person
  - --maintain composure in spite of provocation
  - --have presentation well organized
  - --see that exhibits are clear and fit into presentation
  - --indicate respect, BUT NO SOFT SOAP.
- summation
  - --brief and well organized
  - --hit the main points

It is possible that one party, or both, may request the right to file briefs. If one so requests, the other party must decide whether it is important to do likewise, or whether the case can stand as presented in the hearing. Occasionally, the parties will request the privilege of replying to each other's brief. This often results in considerable delay in gaining a decision.

In the matter of #
Discharge of Myron Heinrich #
#
Hearing, April 26, 1956 #
#
###

Award and Opinion

Heinrich was an assembler in department 20. He had about 7 years seniority and had been a steward in his department during 1952-53. On March 15, 1956, Heinrich and an employee named Raphoon were engaged in assembly work involving pieces weighing about 70 to 80 pounds. The men were using an available overhead hoist to move and position thepieces.

Mr. Reichl, the foreman, came by about 10 AM and ordered the men to lift the pieces by hand. The men complied. After Reichl left, Raphoon hurt his finger and went to the dispensary, leaving Heinrich alone on the job. Heinrich resumed the use of the hoist. Reichl returned, found Heinrich using the hoist, and fired him.

The Company's Position

The Company introduced as Exhibit A a copy of the grievance filed by the union in connection with the discharge. The Company introduced as Exhibit B a copy of the applicable sections of the contract, which read as follows:

> Article VI, Section 1: The maintenance of discipline is the responsibility of management, but discipline shall be for cause. Any dispute as to the existance of cause shall be subject to the grievance procedure, including arbitration. The arbitrator shall have thepower to modify the penalty if he thinks the Company has been unreasonably severe.
>
> Plant Rules: Violation of any of the Plant Rules shall be cause for disciplinary action including discharge subject to the provisions of Art. VI, Sec. 1.
>
> 6. Insubordination is strictly prohibited. Employees are required to carry out the orders of their supervisors.
> 7. Any interference with production, including slowdowns, is prohibited.

The Company contended that Heinrich was in violation of both rules 6 and 7 and that the discharge should therefore be upheld.

Through its witness, Mr. Reichl, foreman, and through its exhibits the Company attempted to establish that the Company had had a series of difficulties with Heinrich in the past, prior to the discharge. The Company, in its exhibit C, presented and discussed a series of formal warnings and complaints directed at Heinrich, beginning in 1950. Two of these, aside from the discharge, resulted in disciplinary action of one week off without pay. Both of the instances, the Company said, were of a nature similar to the occurrance which led to the discharge. In its exhibit D, the Company presented a number of verbal warnings issued by the foreman to Heinrich, and in its exhibit E, the company presented an evaluation report on Heinrich issued by Reichl; the report, which has since been discontinued, was of a derogatory nature.

The Company stated that the foreman's remarks and the exhibits c, D and E indicated that Heinrich had given the Company trouble over a long period of time and that the discharge was in a sense the last link in a series of events. The Company laid particular stress on the fact that its exhibit C established that Heinrich had been given disciplinary penalties in 1952 and 1954 for insubordination and encouraging others in their department to limit their production.

The Company contended that Heinrich's refusal to carry out the orders of the foreman on March 15 constituted insubordination of the worst sort and that this type of thing could not be tolerated if the plant was to remain efficient. This incident, together with Heinrich's record, caused the Company to recommend to the arbitrator that the discharge be upheld.

The Union's Contention

The Union contended that the Company did not have cause to discipline Heinrich for the occurrance on March 15, that Heinrich had not been in violation of Rules 6 and 7, and that the discharge should therefore be set aside.

Through its chief witness, Mr. Heinrich, the Union attempted to establish that Heinrich and Raphoon had in fact carried out the orders of the foreman as long as the circumstances under which they were given prevailed. Through Mr. Raphoon, the Union established that some hazard was connected with the job when it was carried on without the use of the hoist. In his testimony, Heinrich maintained that his return to the use of the hoist was actually an effort to keep up production in the absence of his partner and that since the circumstances had changed drastically since the initial order had been given, he, Heinrich, was simply exercising his initiative under the changed circumstances.

The Union contended that much of the Company's records on Heinrich were old. It established that some of the warnings had been verbal and vague, with use of the word "approximately" as to dates, and that no copies were given to the worker. In its exhibit A, the Union established that grievances had been filed in connection with the two disciplinary actions cited in the Company's exhibit C and that as a result of these grievances, Heinrich was paid for the whole time lost in the first instance and for four out of five days in the second instance.

In summary, the Union maintained that Heinrich had not been insubordinate, that the Company's records as submitted was incomplete and misleading and that therefore the discharge should be set aside and Neinrich reinstated with full seniority and pay for all time lost.

Findings and Award

The arbitrator has carefully examined his notes and the record of the hearing. He recalls his visit into the department where he observed the operation of a job similar to the one in dispute, under conditions similar to those leading to the discharge. The arbitrator is persuaded that in discharging Heinrich the Company acted without cause; that the facts in the case do not indicate that Heinrich was insubordinate or attempting to limit production. The arbitrator therefore rules that Mr. Heinrich should be reinstated to his job with full seniority and pay for all time lost, less any moneys which he may have received from unemployment compensation or outside employment during the period of his discharge.

Respectfully submitted,

Norris Tibbetts

Of your K.

I. Scope of Arbitration

A. What The Contract Says

1. Definition of dispute in arbitration clause

   e.g., "All disputes"
   "Interpretation and application of Agreement"
   Specific exclusion of subjects

2. Is the definition of arbitrability contained in the definition of a grievance?

   e.g., "Grievances which cannot be settled"

3. Are the powers of the arbitrator specifically limited?

   e.g., "The arbitrator shall not have the power to add to or modify the terms of the agreement."

4. Other clauses affecting arbitrability --

   a. Management rights clause — Substantive Clause

      1. How much does it exclude from the contract?

      2. Does it exclude from management rights anything mentioned in the contract?

         (e.g., "except as otherwise dealt with in the agreement)

   b. Union recognition clause

      (e.g., "recognized for wages, hours, and conditions of employment")

Grievance Procedure
Arbitration
Recognition
Management Prerogatives
Substantive (Issue)

5. Time-table

   Has the issue been processed within the time limits?

6. Procedural steps --

   Have they been followed?

B. Measuring the issue against the scope

1. Is the subject mentioned in the contract?

   e.g., vacations, seniority, etc.

I. Scope of Arbitration (continued)

2. If not:

a. Is there a past practice clause, and is this event a deviation from past practice?
b. Does it involve law? (does the contract require adherence to laws)
c. Does it involve "discrimination"? (is there a contract clause on this subject)
d. Does it involve fair treatment, union relations, or personal relations? (if so, how do you justify its inclusion)

C. Case Studies

Contract Clauses:

RECOGNITION:

"The corporation recognizes the XYZ Union as the exclusive representative of the production and maintenance employees for the purpose of collective bargaining with respect to rates of pay, wages, hours of employment or other conditions of employment."

GRIEVANCE PROCEDURE:

"Any employee having a grievance must first take the grievance up with the foreman within five days of its occurence. If it is not adjusted within five days thereafter, it shall be reduced to writing and taken up by the floor steward and the foreman. If it is then not settled, it may be submitted to the Plant Supervisor within five working days, who shall then discuss it with the Union Business Agent."

ARBITRATION:

"Any matter concerning the interpretation or application of any terms of this agreement which are not settled by the grievance procedure may be submitted to arbitration within 10 working days after the final step in the grievance procedure to an arbitrator designated by the American Arbitration Association under its rules. The arbitrator shall not have the right to add to or modify the agreement in any manner."

MANAGEMENT PREROGATIVES:

"The management of the Company and the direction of its working forces, including the right to hire, transfer, promote, demote, discipline, establish reasonable rules of conduct, or discharge for cause, to increase or decrease the working force as necessary, or to make work assignments is vested solely in the Company, provided that this will not be used for purposes of discrimination against any member of the Union, and subject to the terms and conditions of this Agreement."

I. Scope of Arbitration (continued)

Issues:

Number One: It is claimed by 3 workers that their corner of the shop is unbearably hot. All attempts to ventilate by opening windows have little or no effect. It would be very expensive to move them because of waste of space and heavy machinery installations. The small electric fans which have been set up around the area have hardly any effect. The workers are demanding a huge exhaust fan.

Is this matter arbitrable? Why?

Number Two: The Employer says that a group of workers is conspiring to cut down output. He has issued warnings and has now applied for arbitration.

Is this matter arbitrable? Why?

Number Three: The work in the plant is slow. The Employer puts everybody on a four-day week. There is a plant-wide seniority clause. The Union says that the senior people should be kept on a full week, and the junion people laid off accordingly. The plant is situated far from the place where most people live, and commuter tickets are bought for 30-day periods regardless of the number of rides.

Is this matter arbitrable? Why?

Number Four: The plant has a maintenance department which has been doing most of the inside painting and minor repairs. The employer closes down during a two-week vacation period and calls in outside union painters to repaint the inside walls. The Union claims that two maintenance men have been deprived of two weeks' work.

Is this matter arbitrable? Why?

Number Five: A man was fired on March 15th because of alleged inefficiency. He reacted with disgust and told the boss he could "stick" the job. After going out to look for work, he found he could not get another job. On April 15th, he showed up in the Union Hall and said he wanted to have the discharge arbitrated. The Business Agent went to the employer who said it was too late to discuss it and would not take it up.

Is this matter arbitrable? Why?

II. Arbitration of Contract Interpretation

A. Check List

1. The contract language

   a. Silence?
   b. Double meaning?
   c. Contradictory?

2. Arbitrability

   a. If the subject is not covered, does the contract permit arbitration, or is it a management prerogative?

3. If the language is unclear --
   The effect of practices

   a. What has been past company practice?
      What has been industry practice?
      What is general practice?
      Does one way work a hardship, against another way?
      Does one way deprive worker of other contract rights?
      Does one way create grievances and tensions?

   b. What was the intent of the Parties

      Witnesses of negotiation discussions
      List of union demands submitted at negotiations
      Comparison with past contracts
      Settlement memoranda

   c. Did either party permit an interpretation over a period of time without protest or appeal, and with full knowledge?

Summing Up --

Does the contract say anything on the subject?

What does it mean?

What was it interpreted in the past?

How do others interpret it?

Case Study:

Study the following case. How would you argue it from a management point of view? From a union point of view?

III. Arbitration of Contract Application

A. Check List --

1. Contract authority

   a. Does it permit the employer to act?
   b. Does it permit the union to act?

2. Specific contract clause

   a. Does it clearly cover the situation, or does it have to be "projected"?
   b. Is it general (e.g., "qualified", "just cause", "reasonable", "beyond his control", "fair opportunity").

      (Establish a definition and support it.)

   c. Is it exact (e.g., "10% above standard", or "after having received second warning for absences").

      (Show how the definition has not been satisfied, or that it includes the latitude you want.)

3. What happened

   a. Records, and how they should be interpreted
   b. Witnesses

      (The arbitrator may have a reservation about the testimony of Union activists or officers, as well as supervisory people who testify for the employer).

   c. What the other side will say, and how to rebut
   d. Visual material

      (e.g., floor plan, sample of work, photograph of scene.)

4. Testimony of experts

   e.g., Accountant, on the meaning of cost figures; physician, on physical ability; trade school representative, on journeyman qualifications; engineer, on time-and-motion study.

Case Study:

Study the following case. How would you argue it from a management point of view? From a union point of view?

IV. The Pre-Hearing Brief

The pre-hearing brief may have 3 purposes:

A. A written means of narrating your case as a self-reminder of all the elements necessary in it.

B. A speech prompter from which to read all or portions of your case in making either your preliminary statement or your summation, or both.

C. As a document to be submitted in advance to the arbitrator.

Limitations of pre-hearing brief:

A. Other side may object to its submission as a document (arbitrator may rule out, or permit both to submit).

B. It may become too rigid a statement of your case, not allowing you to adapt for unexpected angles which come up during the hearing.

Elements of a good pre-hearing brief

* A. Form

1. statement of the issue
2. background of the issue
3. definition and description of terms, machines, jobs, place
4. citing of pertinent contract clauses
5. recitation of events from Union point of view
6. argument (so labeled)

* B. Style - short sentences, simple words, non-legal terminology

* C. Facts

1. what happened
2. who saw it
3. when and where
4. relation to past
5. contract clauses
6. rights based on contract, practices, general standards of fairness

Case Study:

Write a Union pre-hearing brief and an Employer pre-hearing brief for the attached case.

NOTE ON POST-HEARING BRIEF

The items marked * apply, but there should be included references to evidence at the hearing as both support for your position and refutation of your opponent's position

Case Study:

Write post-hearing briefs following the case which will be heard. They will then be exchanged so that answering briefs can be written.

V. Writing the Submission Agreement

A. The issue may be submitted to the arbitrator by

1. the grievance slip (sometimes referred to as "Grievance No. -)
2. the Union's original letter requesting arbitration
3. the oral statements of the parties defining the issue
4. a written submission form stating the issue and signed by both

a. this may be a statement of the Union's demand e.g., "The Union's request for a reclassification of John Jones from Tool Crib attendant to Head Shipping Clerk".

b. or a question, "Shall John Jones be reclassified from Tool Crib Attendant to Head Shipping Clerk?"

c. or a statement of the position of both sides: "The Union states that John Jones is entitled to classification as Head Shipping Clerk under the contract between the parties. The Employer states that John Jones is properly classified as a Tool Crib Attendant under the terms of the contract between the parties.

B. Elements of a submission agreement

1. identification of aggrieved party or group
2. relation to authority

note -- under a narrow arbitration clause, or a narrow conditions clause, the employer will frequently wish to tie the question to the contract; the Union will want to state it as a general controversy without referring to the contract. A frequent statement in the submission is "Under the terms of the contract between the parties....". It is unnecessary to say this, but the arbitrator is generally under a n obligation to be guided primarily by the contract.

3. the condition which is sought to be remedied
4. the remedy sought

note -- this is frequently covered by the statement, "What shall the remedy be?". In cases of cumulative consequences, such as back pay for a fired worker, there may be much controversy over whether the liability shall be limited by such factors as a delay by the Union. Sometimes a legalistic-minded Employer will fight for a "winner take all" outcome. For example, the discharge should be sustained completely, or the man should be reinstated with full back wages.

Case Study:

The discharge clause says summary dismissals may take place for drunkenness or dishonesty, subject to arbitration; in all other cases, the Employer must apply for arbitration before discharging, and can only dismiss if the arbitrator so rules. An Employer

V. Writing the Submission Agreement (continued)

fired a worker for carelessness on the job and spoilage of product. He now claims this is a form of dishonesty. Write the submission for arbitration.

VI. Presenting Your Case

A. Usual procedure

1. oath of arbitrator (considered waived if not requested)
2. definition of the issues (writing of submission agreement)
3. stipulation of agreed upon facts
4. agreement on order of presentation, or stipulation by arbitrator of order of presentation

(note -- stenographer will ordinarily be provided only if requested and arrangements made to pay her.)

5. opening statement
this is usually a brief introductory statement by each side including definition of the issue, statement on facts upon which parties agree, contract clauses which are pertinent, and brief listing of main arguments.

note on order of presentation -- the initiating party usually leads off in both the introductory statement and the presentation of its case. This is usually the Union, because it has raised the grievance. However, in discharge and discipline cases, the arbitrator frequently asks the Employer to start off, because it is he who has made the change in the status quo by his action against the Employee.

6. presentation of case by initiating party

* a. direct examination of witnesses, subject to cross examination
b. presentation of information, exhibits, data
(these are usually acceptable if they have some general pertinence to the case a nd will help the arbitrator to understand it.)

7. presentation of case by opposing party
8. questions by arbitrator, if he desires
9. summation
the spokesmen for both sides may be permitted to sum up. Usually the order is reversed from that which was used in the opening statements.
10. visit to the plant
the arbitrator may desire to inspect the site of the issue.
11. subsequent opportunity for information
the arbitrator may ask the parties to come back prepared to provide additional data or argument.

* Witnesses may be sworn individually, notified generally that they are under oath, or testify without oath. It may give emphasis when needed to request that witnesses (or a particular witness) be sworn.

V. Writing the Submission Agreement (continued)

12. post-hearing briefs --
at the request of one or both of the parties, or on the instruction of the arbitrator, briefs may be provided, either by simultaneous presentation within a stated number of days, or by exchange and rebuttal.

VII. Some Guides to Arbitration Procedure and Techniques

A. The single spokesman
(communication by notes, or through caucus on request for recess.)

B. The introductory statement

1. it is an intention of proof, not testimony ("We intend to show"). It is proper to caution the arbitrator against the use by your opponent of a tone of fact or proof in his statement.
2. it should be short.
3. it should help to explain facts to which the arbitrator needs introduction, to help put the dispute in an understandable setting.

C. Questioning of witnesses

1. establish the witness' identity and, if necessary, his competence
2. bring him to the facts as quickly as possible.
3. do not testify for him.
4. anticipate by your direct questions some doubts that may be raised in cross examination.
5. you may re-examine him after cross examination to clear up or answer questions raised in cross examination.
6. ask him only about that which is needed.
7. ask him only what he saw, heard or knows.

note: Much more leeway is allowed in arbitration hearing than in court proceeding in allowing "hearsay" testimony or in "irrelevant" material, but the general guides are:

a. does it make a contribution of an impartial nature to the arbitrator's knowledge?
b. does it bear on the subject pretty closely?
c. will the arbitrator be able to assign a weight to it in keeping with its worth as something seen, heard or known?

The arbitrator will let something in frequently, to which he will give little or no value in making his judgment, hearing it "for what it may be worth". This allows some opportunities for getting in non-probative statements which may nevertheless have some passing effect. BUT REMEMBER, YOUR OPPONENT CAN PLAY THAT GAME TOO. YOU MAY WISH TO SETTLE FOR RESTRAINING BOTH YOURSELF AND YOUR ADVERSARY.

VII. Some Guides to Arbitration Procedure and Techniques (continued)

D. Cross examination

1. the general rule: Ask only about that which has been testified to in direct examination.
2. some vigor, repetition and persistence by the questioners are tolerated in cross examination.

E. Decorum

1. firm conviction but polite manner
2. improper: coaching, signaling, outbursts, rejoinders.

Emory 1959

ARBITRATION SUBMISSION AGREEMENT

IT IS HEREBY AGREED by and between the Standfast Machine Company, Madison, Wisconsin (hereinafter called the "Company") and Local 66, AFL-CIO, of the same place (hereinafter called the "Union"), as follows:

1) That there now exist certain differences concerning the interpretatio and application of the collective bargaining agreement dated August 1, 1958, between the Company and the Union.

2) Said difference involves the rate per piece applied to Operation 37-C in Department 456.

3) The difference arises from the Company's action in changing the rate on said job after making a new time study because of changes installed by the Company in the job.

4) The Union contends that the rate for this work is not adequate and that the Company in effecting the change in rate has not complied with the contract.

5) The arbitration shall be held in accordance with the provisions of Article VIII of the aforementioned agreement between the parties.

IN WITNESS WHEREOF, each of the parties signatory hereto pursuant to proper authority has caused this agreement to be signed by its proper officer or representative this 19th day of May, 1959.

FOR THE COMPANY

_____

FOR THE UNION

_____

GRIEVANCE

May 1, 1959

This worker, seniority 8-15-47, is a drill press operator on Operation 37-C. On Monday, April 6, certain changes were made in the job. A new study was made on Tuesday, April 14 and a new rate put into effect on Wednesday, April 15. Prior to the change, this worker maintained an average on this job of 145%. Since the installation of the changes and the new rate, his earnings have dropped greatly.

The Union contends that this is a violation of Article VI of the contract and requests an immediate upward adjustment of the rate to yield earnings comparable to those existing before the change, paid retroactively to date of change.

Company answers:

Step 2: Have investigated grievance and checked with Standards Department. Rate is OK if Kottler would apply himself. Request denied.

May 5 - the Superintendant

Step 3: Management sees no reason to change the rate. Kottler's earnings are either above or near the expected level. Furthermore, Kottler's record indicates an unwillingness to apply himself on a properly rated job. Request denied.

May 15 - Management Committee

ARTICLE II - Management Rights

Subject to the provisions of this Agreement and the rights of the Union and the employees as herein set forth, it is recognized and agreed that the management of the Plant and the direction of the working force is vested in the Employer; among the rights and responsibilities which shall continue to be vested in the Employer but not intended as a wholly inclusive list of them shall be: the right to increase or decrease operations to remove or install machinery, and to increase or decrease production equipment; to introduce new or improved procedures, productive methods and facilities; to regulate the quantity and quality of production; to relieve employees from duty because of lack of work; to employ, layoff, re-employ, and transfer employees; to demote or discharge employees for cause as the efficient operation of the Plant shall in the opinion of Management require, provided that none of such rights shall be exercised in violation of any provision of this Agreement.

ARTICLE VI, Wage Incentive Plan

1. Standard time rates shall be set by the Company so that an average competent incentive employee putting forth average effort based on normal production can earn no less than 25% above the minimum guaranteed hourly rates as set forth in Schedule A attached hereto. Each employee is only guaranteed the basic hourly rate of the occupation on which he is employed.

2. Operations or jobs may be retimed, provided that major changes in tools, fixtures, jigs or machining methods, etc., are made by the Company and such changes increase or reduce the amount of time required to perform said operations or jobs. In such event, only such portion of the job affected by the addition or deletion shall be retimed.

3. Whenever jobs or operations are retimed because of changes referred to in paragraph 2 above, the rate established by such retiming will be set so that hourly earnings will not be less than hourly earnings before such retiming, providing the same amount of effort has been applied. In no case shall jobs or operations be retimed for the purpose of reducing employees' earnings or because of a change in symbol number.

SCHEDULE A

	Before 3-30-59	After 3-30-59
Drill Press Operator, base rate	$1.70	$1.80

ARTICLE VII, Grievance Procedure

Complaints and grievances shall be handled in the following manner:

Step 1: The aggrieved employee, with or without the department steward as the employee desires, shall meet and discuss the complaint with the employee's immediate supervisor who shall have two working days in which to answer unless the time is extended by mutual agreement.

Step 2: If the complaint is not settled at step 1, it shall be reduced to writing, dated, signed by the aggrieved employee and presented to the employee's Department Superintendent who shall meet with the department steward in an effort to settle the dispute; the employee may be present if desired. The Department Superintendent shall have two working days in which to answer, in writing, unless the time is extended by mutual agreement.

Step 3: If the grievance is not settled at step 2, it shall be presented to the Plant Manager for discussion at the next regular meeting of the Grievance Committee with Management. Such meetings shall occur every two weeks. Management shall have two weeks from the date of discussion of a grievance presented at this stage to render its decision which shall be in writing. The Union shall have two weeks from the date of receipt of Management's written decision in which to decide whether or not to appeal the case to Arbitration.

Step 4: Arbitration: In the event that either party is dissatisfied with the decision regarding a grievance at Step 3, it may request Arbitration subject to the conditions and procedures set forth in Article VIII.

ARTICLE VIII, Arbitration

If a grievance processed under Article VII of this Agreement is not settled at Step 3, and if it arises out of the application or interpretation of the terms of this Agreement, it shall be subject to Arbitration in the following manner:

A. Either party may make written demand for Arbitration after two weeks from the date of receipt of Management's written decision at Step 3 of the Grievance Procedure and within ten days of receipt of such written decision. Failure to make such demand within that period shall be deemed abandonment of the grievance and no further action can be taken in connection therewith unless otherwise mutually agreed by the parties.

B. In the event of demand for Arbitration submitted by either party in accordance with the foregoing, the issues of fact shall be immediately referred to _____ whom the parties accept as continuing Arbitrator for the duration of this Agreement. After first giving the parties reasonable notice of his hearing, the Arbitrator shall then meet with the parties and consider such evidence and arguments as the parties shall submit. He shall render his decision in writing, not inconsistant with any provision of this Agreement, and such decision shall be final and binding upon both parties hereto and all employees covered by this Agreement. He shall have the power to render such decision as he considers warranted by the true facts as ascertained and determined by him, and in discharge cases where he decides that the discharge has not been made for cause he shall direct reinstatement with or without back pay as the circumstances in his opinion warrant.

C. It is specifically agreed, however, that the Arbitrator must base his decision on the facts as ascertained and determined by him and the terms of this Agreement. He shall have no power to render a decision the effect of which is to change or modify any provision of the Agreement or write into it any provision not agreed on by the parties.

D. The compensation of the continuing Arbitrator shall be paid one-half by the Company and one-half by the Union.

Time Study No. 123 | Dept. No. 456 | Lubricant Mist Coolant | Strokes Per Min.

Special Tools Used Hand-locking 4" Vise - High Speed Steel Drill Bit | Feed .005"/Rev.

Part Name Cover Plate, $\frac{1}{8}$" x 1" x $3\frac{1}{4}$" | Part No. UWM 1959 | Operation No. 37C

Remarks Drill two (2) $\frac{3}{8}$" holes through. Tolerance ± .010

SKETCH

DETAILED DESCRIPTIONS OF ELEMENTS

1. Move hand from pile of machined parts and pick up one unworked piece from pile located on left front corner of drill press table and position in vise against stop, L.H.; Lock vise, R.H.; Engage drive, L.H.; Lower spindle to work - 8", R.H.; Engage automatic feed, R.H. (Automatic feed Engaged)
2. Drill one (1) $\frac{3}{8}$" hole through plate (Automatic feed Kicks Out)
3. Raise spindle, R.H.; Disengage drive, L.H.; Unlock vise, R.H.; Turn piece over and position in vise against stop, L.H.; Lock vise, R.H.; Engage drive, L.H.; Lower spindle to work - 8", R.H.; Engage automatic feed, R.H. (Automatic feed Engaged)
4. Drill second $\frac{3}{8}$" hole through plate (Automatic feed Kicks Out)
5. Raise spindle, R.H.; Disengage drive, L.H.; Unlock vise, R.H.; Remove piece and aside to pile located on left center of drill press table, L.H.; (Piece hits table)
6. Secure stock once every twenty-five (25) pieces from tool crib which is approximately forty (40) feet from work location.

DISCIPLINARY RECORD JOHN KOTTLER

10-15-49	Spoke to Kottler about low production; said he would improve	JR, foreman
10-25-49	Warned Kottler that production must improve or he would be subject to formal warning.	JR, foreman
6-12-52	Formal warning on insubordination: Kottler complained about delay in adjusting rate, threatened to lead wildcat.	TL, foreman
4-6-56	Kottler given 3 day disciplinary layoff for poor quality	TL, foreman
3-15-57	Gave Kottler formal warning on poor attendance.	TL, foreman

GRIEVANCE

April 7, 1956

This worker was given a 3 day disciplinary layoff as of April 6, 1956. The Union contends that this action was unjustified and requests reinstatement at once with pay for all time lost.

Company answers:

Step 1 (oral): request denied

Step 2: Company agreed to put Kottler back to work at noon on April 7, with loss of 4 hours pay. Union accepted.
